Present law permits taxpayers to take a deduction for losses on business debts using either the specific charge-off method or the reserve method. The specific charge-off method allows a deduction at the time and in the amount that any individual debt is wholly or partially worthless. The reserve method allows the current deduction of the amount that is necessary to bring the balance in the bad debt reserve account as of the beginning of the year, adjusted for actual bad debt losses and recoveries, to the balance allowable under an approved method as of the end of the year. The deduction taken under the reserve method is required to be reasonable in amount, determined in light of the facts existing at the close of the taxable year.

Worthless debts are charged off, resulting in a deduction under the specific charge-off method, or an adjustment to the reserve account under the reserve method, in the year in which they become worthless. In the case of a partially worthless debt, the amount allowed to be charged off for Federal income tax purposes cannot exceed the amount charged-off on the taxpayer's books. No such requirement is applicable to wholly worthless debts.

Present law requires an actual debt be owed to the taxpayer in order to support the creation of a reserve for bad debts. An exception to this rule is provided for dealers who guarantee, endorse, or provide indemnity agreements on debt owed to others if the potential obligation of the dealer arises from its sale of real or tangible personal property.

House Bill

The House bill repeals the availability of the reserve method in computing the deduction for bad debts for all taxpayers, other than commercial banks whose assets do not exceed $500 million, and thrift institutions. Wholly worthless debts are not deductible for Federal income tax purposes until charged off on the taxpayer's books, as is the case under present law for partially worthless debts. The House bill does not address the continued use of the reserve method by dealers who guarantee, endorse, or provide indemnity agreements with regard to debt obligations arising out of the sale by the dealer of real or tangible personal property in the ordinary course of business.

The provision is effective for taxable years beginning after December 31, 1985. The balance in any reserve for bad debts as of the effective date is to be taken into income ratably over a five-year period.

Senate Amendment

The Senate amendment repeals the availability of the reserve method in computing the deduction for bad debts for all taxpayers, other than financial institutions, banks or cooperatives, production credit associations, and certain finance companies. Wholly worthless debts are not deductible for Federal income tax purposes until charged off on the taxpayer's books, as is the case under present law for partially worthless debts.

The Senate amendment also repeals the reserve method for dealers who guarantee, endorse, or provide indemnity agreements with respect to debt obligations arising out of the sale by the dealer of real or tangible personal property in the ordinary course of business (sec. 166(f)).

The Senate amendment is effective for taxable years beginning after December 31, 1986. The balance in any reserve for bad debts as of the effective date is to be included in income ratably over a five-year period. In the case of a bad debt reserve for guarantees, the amount of the reserve is first reduced by the remaining balance in any suspense account established under section 166(f)(4), and the net amount taken into income ratably over a five-year period beginning with the first taxable year beginning after December 31, 1986.

Conference Agreement

The conference agreement generally follows the House bill with regard to the availability of the reserve method for computing losses on business debts. Thus, taxpayers (other than certain financial institutions) will be required to use the specific charge-off method in accounting for losses on bad debts. In determining whether a debt is worthless, the fact that a utility is required to continue to provide services to a customer whose account has otherwise been determined to be uncollectible will not be considered as evidence that the debt is not worthless for Federal income tax purposes.

[1] The conferees intend that any costs that qualify as independent research and development costs under the Federal Acquisition Regulations System, 48 C.F.R. sec. 31.205-18 (1985), will qualify under this provision.

The conference agreement does not include the provision limiting the deduction of wholly worthless business debts to the amount written off on the taxpayer's books. Thus, a wholly worthless debt will be deductible in full in the year that it becomes worthless, as is the case under present law.

The conference agreement follows the Senate amendment in repealing the reserve method for dealers who guarantee, endorse, or provide indemnity agreements with respect to debt obligations arising out of the sale by the dealer of real or tangible personal property in the ordinary course of business.

The provision of the conference agreement is effective for taxable years beginning after December 31, 1986. Any change from the reserve method of accounting for bad debts is treated as a change in method of accounting initiated by the taxpayer with the consent of the Secretary of the Treasury. The balance in any reserve for bad debts as of the effective date is generally to be included in income ratably over a four-year period. The amount to be included in income is the full balance of the reserve account, without offset for any anticipated amounts that will not be currently accrued as income under the rules allowing accrual basis service providers to exclude from income amounts that are statistically determined not to be collectible until such amounts are actually collected (see VIII. A., supra). In the case of a bad debt reserve for guarantees, the amount of the reserve subject to inclusion is first reduced by the remaining balance in any suspense account established under section 166(f)(4).

The conferees intend that (1) net operating loss and tax credit carryforwards will be allowed to offset any positive section 481 adjustment; and (2) for purposes of determining estimated tax payments, the section 481 adjustment will be recognized in taxable income ratably throughout the year in question.

The conferees also direct the Secretary of the Treasury to study and to issue a report regarding appropriate criteria to be used to determine if a debt is worthless for Federal income tax purposes. The conferees anticipate that the report will consider under what circumstances a rule providing for a conclusive or rebuttable presumption of the worthlessness of an indebtedness is appropriate.

The final report is to be submitted, by January 1, 1988, to the House Committee on Ways and Means and the Senate Committee on Finance.

G. Taxable Years of Partnerships, S Corporations, and Personal Service Corporations

Present Law

Partnerships.—Present law requires a partnership adopting or changing a taxable year to use the same taxable year as all of its principal partners (or the calendar year, if all of the partnership's principal partners do not have the same taxable year), unless the partnership establishes to the satisfaction of the Secretary of the Treasury a business purpose for selecting a different taxable year (sec. 706). A partnership that adopted its taxable year prior to April 2, 1954, is not required to change its taxable year regardless of whether the taxable year adopted is the same as the taxable year of all of the principal partners (Treas. Reg. sec. 1.706-1(b)(6)).

In 1972, the Internal Revenue Service announced in Revenue Procedure 72-51 (1972-2 C.B. 832) that requests by a partnership to adopt or change to an accounting period differing from that of the principal partners generally will be approved where the adoption of such change would result in the deferral of income to the partners of three months or less.

S corporations.—Present law requires a corporation that makes an election to be taxed as an S corporation, or an S corporation that changes its taxable year to adopt a "permitted year" (sec. 1378). A permitted year is a calendar year or any other accounting period for which the S corporation establishes a business purpose to the satisfaction of the Secretary of the Treasury. A corporation that was an S corporation for a taxable year that includes December 31, 1982 (or that was an S corporation for a taxable year beginning in 1983 by reason of an election made on or before October 19, 1982) may retain a taxable year that is not a permitted year. However, if more than 50 percent of the stock of such an S corporation is newly owned stock, the S corporation must change its taxable year to a permitted year. Revenue Procedure 83-25 (1983-1 C.B. 689) provides procedures that the Internal Revenue Service will follow in approving a request by a S corporation desiring to change to, or to adopt, a taxable year other than a calendar year. Revenue Procedure 83-25 provides that requests will be approved where the adoption of the taxable year results in the deferral of income to shareholders of three months or less.

Personal service corporations.—A personal service corporation generally may adopt any taxable year on its first Federal income tax return that conforms with its annual accounting period. A personal service corporation desiring to change its taxable year must generally first obtain the consent of the Secretary of the Treasury.

House Bill

No provision.

Senate Amendment

In general, the Senate amendment requires that all partnerships, S corporations, and personal service corporations conform their taxable years to the taxable years of their owners. An exception to the rule is made in the case where the partnership, S corporation, or personal service corporation establishes to the satisfaction of the Secretary of the Treasury a business purpose for having a different taxable year. The deferral of income to owners for a limited period of time, such as the three months or less rule of present law, is not to be treated as a business purpose.

All partnerships generally are required to adopt the same taxable year as the partners owning a majority interest in partnership profits and capital. If partners owning a majority of partnership profits and capital do not have the same taxable year, the partnership is required to adopt the same taxable year as all of its principal partners. If neither partners owning a majority of partnership profits and capital, or all of the partnership's principal partners have the same taxable year, the partnership is required to adopt the calendar year. S corporations and personal service corporations generally are required to adopt the calendar year.

The amendment is effective for taxable years beginning after December 31, 1986. A partner in a partnership or a shareholder in an S corporation that is required to include the items from more than one taxable year of the partnership or S corporation in any one taxable year as a result of the amendment is allowed to take into account the items from the short taxable year of the partnership or S corporation ratably in each of the partner's or shareholder's four taxable years beginning after December 31, 1986, unless the partner or shareholder elects to include all such amounts in the taxable year to which they would otherwise apply.

Conference Agreement

The conference agreement generally follows the Senate amendment.

The conference agreement extends the provisions of section 267 to provide that a personal service corporation and its employee-owners are treated as related taxpayers regardless of the amount of the corporation's stock owned, directly or indirectly, by the employee-owner. Thus, a personal service corporation may not deduct payments made to employee-owners prior to the time that such employee-owner would include the payment in gross income.

The rule allowing partners or shareholders of a partnership or S corporation to include items of income from the short year of the partnership or S corporation in each of the partner or shareholder's four taxable years beginning after December 31, 1986 is applicable regardless of what type of entity the partner or S corporation shareholder is. Thus, a personal service corporation that is a partner in a partnership required to adopt a new taxable year as a result of this provision is eligible to include the partner's distributive share of partnership income over four taxable years. The rule is applicable to income from an S corporation only if such corporation was an S corporation for a taxable year beginning in 1986.

The conferees intend that any partnership that received permission to use a fiscal year-end (other than a year-end that resulted in a three-month or less deferral of income) under the provisions of Rev. Proc. 74-33, 1974-2 C.B. 489, shall be allowed to continue the use of such taxable year without obtaining the approval of the Secretary. Similarly, any S corporation that received permission to use a fiscal year-end (other than a year-end that resulted in a three-month or less deferral of income), which permission was granted on or after the effective date of Rev. Proc. 74-33, shall be allowed to continue the use of such taxable year without obtaining the approval of the Secretary.

Moreover, any partnership, S corporation, or personal service corporation may adopt, retain, or change to a taxable year, under procedures established by the Secretary, if the use of such year meets the requirements of the "25% test" as described in Rev. Proc. 83-25, 1983-1 C.B. 689 (i.e., 25% or more of the taxpayer's gross receipts for the 12-month period in question are recognized in the last two months of such period and this requirement has been met for the specified three consecutive 12-month periods).

In addition, the Secretary may prescribe other tests to be used to establish the existence of a business purpose, if, in the discretion of the Secretary, such tests are desirable and expedient towards the efficient administration of the tax laws.

The conferees intend that (1) the use of a particular year for regulatory or financial accounting purposes; (2) the hiring patterns of a particular business, e.g., the fact that a firm typically hires staff during certain times of the year; (3) the use of a particular year for administrative purposes, such as the admission or retirement of partners or shareholders, promotion of staff, and com-

pensation or retirement arrangements with staff, partners, or shareholders; and (iv) the fact that a particular business involves the use of price lists, model year, or other items that change on an annual basis ordinarily will not be sufficient to establish that the business purpose requirement for a particular taxable year has been met.]

The conferees anticipate that the Secretary of the Treasury will promulgate regulations regarding the use of the 52-53 week taxable year to prevent the evasion of the principles of this provision. It is anticipated that the regulations will provide that, for the purpose of determining when taxable income is included by a partner or S corporation shareholder, a 52-53 week taxable year of a partner, shareholder, partnership, or S corporation will be treated as ending on the last day of the calendar month ending nearest to the last day of such 52-53 week taxable year. For example, a calendar year partner will include its share of taxable income from a partnership with a 52-53 week taxable year ending on January 3, 1988 in its 1987 calendar year Federal income tax return. The Secretary of the Treasury may also prescribe similar rules to prevent the evasion of the principles of the provision through the use of a 52-53 week taxable year by personal service corporations and the shareholder-employees of such corporations. It is also anticipated that the Secretary of the Treasury will suspend the operation of Treas. Reg. sec. 1.441-2(c) allowing taxpayers in certain cases to adopt, or change to, a 52-53 week taxable year without the approval of the Secretary of the Treasury.

Some partnerships and S corporations that adopted a taxable year providing a deferral of income to owners of three months or less were required to include the amount of deferral obtained in income over a 10-year period. Any portion of such amount not taken into income as of the effective date of the provision may be used to reduce the income attributable to any short taxable year required by the provision.

H. Special Treatment of Certain Items

1. Qualified discount coupons

Present Law

Under present law, issuers of qualified discount coupons using the accrual method of accounting may elect to deduct the cost of redeeming qualified discount coupons outstanding at the close of the taxable year and received for redemption by the taxpayer within a statutory redemption period following the close of the taxable year (sec. 466). The statutory redemption period is the 6-month period immediately following the close of the taxable year, unless the taxpayer elects a shorter period.

A qualified discount coupon is a coupon which (1) is issued by the taxpayer, (2) is redeemable by the taxpayer, and (3) allows a discount on the purchase price of merchandise or other tangible personal property. The coupon must not be redeemable directly by the issuer (i.e., a direct consumer rebate) and may not by itself, or in conjunction with any other coupons, bring about a price reduction of more than $5 with respect to any item.

The election must be made with respect to each trade or business of the taxpayer and constitutes a method of accounting. Revocation of an election may be made only with permission of the Secretary of the Treasury. In certain situations, a taxpayer is required to establish a suspense account in the year of election in order to limit the bunching of deductions in that year.

House Bill

No provision.

Senate Amendment

The Senate amendment repeals the provision of present law allowing a deduction for the cost of redeeming qualified discount coupons received during a redemption period after the close of the taxable year. As a result, only those costs of redeeming discount coupons received for redemption during the taxable year will be allowed as a deduction during that taxable year.

The Senate amendment treats any taxpayer currently electing to deduct the cost of redeeming qualified discount coupons as having elected to change its method of accounting. The change will be considered to have been initiated by the taxpayer with the consent of the Secretary of the Treasury. Any adjustment which is required to be made by section 481 will be reduced by any balance in the suspense account of the taxpayer, and the net amount is to be taken into account over a period not to exceed five taxable years, commencing with the first taxable year beginning after December 31, 1986. It is expected that the concepts of Revenue Procedure 84-74, 1984-2 C.B. 736, generally will apply to determine the actual timing of recognition or expense as a result of the adjustments arising from this provision.

The provision of the Senate amendment is effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement generally follows the Senate amendment. The net adjustment required to be made as a result of the provision, after reduction for any balance in the suspense account, is required to be taken into account over a period not to exceed four taxable years, commencing with the first taxable year ending after December 31, 1986.

The conferees also intend that (i) net operating loss and tax credit carryforwards will be allowed to offset any positive section 481 adjustment; and (ii) for purposes of determining estimated tax payments, the section 481 adjustment will be recognized in taxable income ratably throughout the year in question.

2. Utilities using accrual accounting

Present Law

Present law requires taxpayers using the accrual method of accounting to recognize income at the time all the events have occurred which establish the taxpayer's right to receive the income and the amount of income can be established with reasonable accuracy.

The Internal Revenue Service has allowed utilities using the accrual method of accounting to recognize income in the taxable year in which a customer's utility meter is read, providing a similar technique is used for financial accounting purpose (Rev. Rul. 72-114, 1972-1 C.B. 124). Recent judicial decisions have allowed income to be recognized in the taxable year in which a customer's utility meter is read regardless of the technique used for financial accounting purposes. *See, e.g., Orange and Rockland Utilities* v. *Commissioner*, 86 T.C. No. 14 (1986). Some courts also have held that taxpayers are allowed to defer recognition of income until such time as the taxpayer bills (or is entitled to bill) the customer for services.

House Bill

No provision.

Senate Amendment

The Senate amendment requires accrual basis taxpayers to recognize income attributable to the furnishing or sale of utility services to customers not later than the taxable year in which such services are provided to the customer. The year in which utility services are provided may not be determined by reference to the time the customer's meter is read or to the time that the customer is billed (or may be billed) for such services.

The effect of the provision is to require an estimate of the income attributable to utility services provided during the taxable year but after the final meter reading or billing date which falls within the taxable year. It is anticipated that, where it is not practical for the utility to determine the actual amount of services provided through the end of the current year, this estimate may be made by assigning a pro rata portion of the revenues determined as of the first meter reading date or billing date of the following taxable year.

Utility services subject to the Senate amendment are the provision of electrical energy, water or sewage disposal, the furnishing of gas or steam through a local distribution system, telephone and other communications services, and the transportation of gas or steam by pipeline. It is anticipated that similar rules also would be applicable to other utility services which might come into existence at some future date. Whether or not a utility service is regulated by a government or governmental agency does not affect its treatment under this provision. The Senate amendment creates no inference as to the proper Federal income tax treatment of utility services under current law.

The conferees are aware that the proper accounting for utility services is presently a matter of controversy between taxpayers and the Internal Revenue Service. In order to minimize disputes over prior taxable years, the conference agreement provides that, for any taxable year beginning before August 16, 1986, a method of accounting which took into account income from the providing of utility services on the basis of the period in which the customers' meters were read shall be deemed to be proper for Federal income tax purposes. No inference is intended as to methods of accounting for utility services not described in the preceding sentence (e.g., a method of accounting which takes income into account on the basis of the date the customer is billed for utility services).

The provision is effective for taxable years beginning after December 31, 1986. The amount of any adjustment required to be made as a result of this provision is to be included in income ratably over the first four taxable years for which the proposal is effective.

Conference Agreement

The conference agreement follows the provision of the Senate amendment.

The conferees also intend that (i) net operating loss and tax credit carryforwards will be allowed to offset any positive section 481 adjustment; and (ii) for purposes of determining estimated tax payments, the section 481 adjustment will be recognized in taxable income ratably throughout the year in question.

In addition, the conferees intend that taxpayers required to accrue income at the time the utility services are furnished to customers may accrue at such time any de-

ductions for the related costs of providing the utility services if economic performance has occurred with respect to such costs within the taxable year in question. Therefore, the conferees intend that any change in accounting method required under this provision include any related change in accounting method for the related items of expense or deduction. The section 481 adjustment is then to be computed on the net amount of the two changes and taken into income ratably over a 4-year period.

3. Contributions in aid of construction

Present law

The gross income of a corporation does not include contributions to its capital. A corporate regulated public utility that provides electric energy, gas (through a local distribution system or transportation by pipeline), water, or sewage disposal services may treat contributions received in aid of construction as a contribution to capital not includible in gross income. Such contributions may not be included in the utility's rate base for rate making purposes. Property received (or purchased with the proceeds of) a contribution to capital has no depreciable basis for Federal income tax purposes and is not eligible for the investment tax credit.

House Bill

The House bill repeals the provision of present law allowing contributions in aid of construction received by a corporate regulated public utility to be excluded from gross income. Property, including money, that is received to encourage the provision of services to, or for the benefit of, the person transferring the property must be included as an item of gross income.

The provision is effective for contributions received after December 31, 1985.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the provision of the House bill, effective for contributions received after December 31, 1986.

4. Discharge of indebtedness income of solvent taxpayers

Present Law

Present law generally requires taxpayers to include in gross income the amount of any discharge of indebtedness to the extent the taxpayer is solvent following the discharge. In the case of a discharge of qualified business indebtedness, a taxpayer may elect to reduce the basis of depreciable assets (or, by election, inventory) instead of including the amount of the discharge in gross income. Qualified business indebtedness is indebtedness incurred or assumed by a corporation or by an individual in connection with property used in the individual's trade or business.

House Bill

No provision.

Senate Amendment

The Senate amendment repeals the provision of present law that provides for the election to exclude income from the discharge of qualified business indebtedness from gross income. Thus, any discharge of indebtedness, other than a discharge in title 11 cases or a discharge that occurs when the taxpayer is insolvent, results in the current recognition of income in the amount of the discharge.

The Senate amendment does not change the present-law treatment of a discharge of indebtedness that occurs in a title 11 case or when the taxpayer is insolvent (including a farmer treated as insolvent under section 108(g) as added by the amendment, see IV. A. 7.), nor does it change the provision of present law (sec. 108(e)(5)) that treats any reduction of purchase-money debt of a solvent debtor as a purchase price adjustment, rather than a discharge of indebtedness.

The provision of the Senate amendment is applicable to discharges of indebtedness occurring after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

TITLE IX. FINANCIAL INSTITUTIONS

A. Reserves for Bad Debts

1. Commercial Banks

Present Law

In general

Under present law, commercial banks[1] are allowed to use either the specific charge-off method or the reserve method in computing their deduction for bad debts for Federal income tax purposes. Under the reserve method, a commercial bank is entitled to a deduction equal to that amount necessary to increase the year-end bad debt reserve balance to an amount computed under either the "bank experience method" or the "percentage of eligible loans method."

Experience method

The maximum allowed ending reserve balance for a bank using the bank experience method is the amount of loans outstanding at the close of the taxable year times a fraction, the numerator of which is the sum of actual bad debts for the current and five preceeding taxable years, and the denominator of which is the sum of the amount of loans outstanding at the close of the each of those years.

Percentage of eligible loans method

The maximum allowed ending reserve balance for a bank using the percentage of eligible loans method is equal to a specified percentage of the oustanding eligible loans at the close of the taxable year, plus an amount determined under the bank experience method for loans other than eligible loans. The specified percentage for taxable years beginning after 1982 is 0.6 percent.[2] Eligible loans for this purpose generally are loans incurred in the course of a bank's normal customer loan activities on which there is more than an insubstantial risk of loss.[3]

Under both the experience method and the percentage of eligible loans method, the ending reserve balance need not be less than the balance at the end of the "base year," providing that the amount of outstanding loans at the close of the current year is at least as great as the balance at the close of the base year.

A commercial bank may switch between the experience method and the percentage of eligible loans method of determining the addition to its reserve for losses on loans from one year to another. If the bad debt reserve deduction for the taxable year determined under the above rules exceeds the amount which would have been allowed as a deduction on the basis of actual experience, the deduction is reduced by 20 percent of such excess (sec. 291). Also, 59% percent of the deductible excess (after the 20-percent reduction) is treated as a tax preference for purposes of computing the corporate minimum tax (sec. 57).

The availability of the percentage of eligible loans method is scheduled to expire after 1987. For taxable years beginning after 1987, banks will be limited to the experience method in computing additions to bad debt reserves.

House Bill

Repeal of reserve method for large banks

The House bill retains present law regarding the use of reserves in computing the deduction for losses on bad debts, except in the case of "large banks." A bank is considered a "large bank" if, for the current taxable year or any taxable year beginning after December 31, 1985, the sum of the average adjusted bases of all assets of such bank (or any controlled group of which the bank is a member) exceeds $500 million. The adjusted basis of an asset generally will be considered to be the tax basis of the asset, adjusted by those amounts allowed as adjustments to basis by section 1016. In determining the sum of the average adjusted bases of all assets of a controlled group, interests held by one member of such group in another member of such group are to be disregarded. The average adjusted basis of the assets of a bank or controlled group is the average of the adjusted bases of the assets for each period of time falling within the taxable year the bank is required to report for regulatory purposes.

A controlled group for this purpose is a controlled group of corporations described in section 1563(a)(1). For the purpose of determining the sum of the adjusted bases of the assets of a controlled group, all corporations includible in the group under the ownership tests of section 1563(a) are included, without regard to their status as an "excluded member" of a controlled group as a result of the application of section 1563(b)(2), and whether or not the corporation meets the definition of a commercial bank.

Recapture of bad debt reserves

Ratable inclusion method.—A commercial bank that is determined to be a large bank generally is required to include in income the balance in any reserve for bad debts, ratably over a period of five taxable years, beginning with the disqualification year. Alternatively, the bank may elect to include in income a greater amount in the first year for which recapture is required and include

---

[1] A commercial bank is defined as a domestic or foreign corporation, a substantial portion of whose business consists or receiving deposits and making loans and discounts, or of exercising fiduciary powers similar to those permitted national banks, and who are subject by law to supervision and examination by State or Federal Authority having supervision over banking institutions (sec. 581). For the purpose of determining the deductions for bad debts, the term "commercial bank" does not include domestic building and loan associations, mutual savings banks, or cooperative nonprofit mutual banks ("thrift institutions").

[2] For taxable years beginning after 1975 and before 1982, the specified percentage was 1.2 percent. For taxable years beginning in 1982, the specified percentage was 1.0 percent.

[3] Specifically excluded from the definition of an eligible loan are a loan to a bank; a loan to a domestic branch of a foreign corporation which would be a bank were it not a foreign corporation; a loan secured by a deposit in the lending bank or in another bank if the taxpayer bank has control over the withdrawal of such deposit; a loan to or guaranteed by the United States, a possession or instrumentality thereof, or to a State or political subdivision thereof; a loan evidenced by a security; a loan of Federal funds; and commercial paper. Sec. 585(b)(4).

any remaining amount ratably over the next four years.

Cut-off method.—In lieu of recapture, the bank may elect to use a cut-off approach with regard to its outstanding loans at the time it becomes a large bank. Under the cut-off method, all charge-offs and recoveries of such loans generally will be adjustments to the reserve accounts and not separate items of income and expense. However, if the charge-off of any loan would reduce the balance in any reserve account below zero, the charge-off shall be an adjustment to the reserve account only in the amount necessary to reduce the balance in such account to zero. Any charge-offs in excess of such reserve balance, and any recoveries with regard to such loans, will be items of income and expense in the year of charge-off or recovery, as if the taxpayer had always used the specific charge-off method. Under the cut-off method, no additional deductions in the disqualification year or thereafter are allowable for additions to the reserve for bad debts.

Unless the balance of a reserve account has been reduced to zero by the adjustment required for a charged-off item, the allowable ending balance for the reserve account is computed for year end by taking into account only those debts which were outstanding on the last day of the taxable year before the disqualification year. No additional deductions may be taken for an addition to restore the reserve account to its allowable ending balance. However, income must be recognized in the amount by which the balance in any reserve account after adjustments for charge-offs and recoveries exceeds the allowable ending balance for the account.

Effective date

The provision of the House bill is effective for taxable years beginning after December 31, 1985.

Senate Amendment

No provision.

Conference Agreement

In general

The conference agreement follows the House bill with certain modifications.

Recapture of existing reserves

A large bank not electing to use the cut-off method is required to recapture its bad debt reserve by including 10 percent of the reserve balance in income in the first taxable year for which the provision is effective, 20 percent in the second, 30 percent in the third, and 40 percent in the fourth. A bank may elect to include more than 10 percent of its reserve balance in income in the first taxable year. If such an election is made, ⅞ of the remainder of the reserve balance (after reduction for the amount included in income in the first taxable year) must be included in income in the second taxable year, ⅓ of the remainder in the third taxable year and ⅚ of the remainder in the fourth taxable year.

Suspension of recapture for financially troubled banks

The conference agreement also provides that a bank, other than a bank electing to use the cut-off method, may suspend the inclusion in income of its bad debt reserve for any year in which it is a "financially troubled bank." Nonetheless, a financially troubled bank may elect to include in income currently all or a portion of the amount of its reserves that otherwise would be recaptured that year.

A bank is considered to be a financially troubled bank if the average of its nonperforming loans for the taxable year exceeds 75 percent of the average of its equity capital for the year. Nonperforming loans include (1) loans that are "past due 90 days or more and still accruing," (2) "nonaccrual" loans, and (3) "renegotiated 'troubled' debt" under the existing standards of the Federal Financial Institution Examination Council. Equity capital is assets less liabilities, as those amounts are reported for regulatory purposes. Equity capital does not include the balance in any reserve for bad debts. The average of nonperforming loans and equity capital for the year is to be determined as the average of those amounts at each time during the taxable year that the bank is required to report for regulatory purposes. In the case of a bank that is a member of a controlled group described in section 1563(a)(1), the determination of whether the bank is a financially troubled bank is made with respect to all members of that controlled group.

The inclusion in income of a portion of the bad debt reserve suspends for each year in which the bank is considered to be a financially troubled bank. For example, assume that a large bank is financially troubled in the disqualification year, is not financially troubled in the two following years, and then returns to financially troubled status in the fourth year. No portion of its bad debt reserve need be included in income during the disqualification year, since the bank meets the definition of a financially troubled bank. In the second year, the bank must begin the inclusion of its bad debt reserve in income. As the inclusion in income begins in this year, the bank may include in income either 10% of its reserve balance or a greater amount if it so elects. The bank may not elect at this time to use the cut-off method, since it has already tolled the inclusion of the bad debt reserve in income as a financially troubled bank. In the third year, the bank must include 2/9 of the bad debt reserve not included in income in the prior year. The bank returns to troubled status in the fourth year and no portion of the bad debt reserve must be included in income in that year. The bank will be required to include the amount it would have included in that year in the next year in which it is not a financially troubled bank.

The provision allowing a financially troubled bank to suspend the inclusion of its bad debt reserve in income does not affect the requirement that a large bank account for its bad debts using the specific charge-off method.

Effective date

The provision is effective for taxable years beginning after December 31, 1986.

2. Thrift Institutions

Present Law

General rule

Under present law, mutual savings banks, domestic building and loan associations and cooperative banks without capital stock which are organized and operated for mutual purposes and without profit (collectively called "thrift institutions"), are allowed to use either the specific charge-off method or the reserve method in computing their deduction for bad debts for Federal income tax purposes. For thrift institutions using the reserve method, the reasonable addition to the reserve for bad debts is equal to the addition to the reserves for losses computed under the "bank experience" method, the "percentage of eligible loans" method, or, if a sufficient percentage of the thrift's assets constitute "qualified assets," the "percentage of taxable income" method.

Permissible methods

The bank experience and percentage of eligible loans methods for thrift institutions generally are the same as for commercial banks (discussed above).

Under the percentage of taxable income method, an annual deduction is allowed for a statutory percentage of taxable income.[4] The statutory percentage for tax years beginning after 1978 is 40 percent.

The full 40-percent of taxable income deduction is available only where 82 percent (72 percent in the case of mutual savings banks without capital stock) of the thrift institution's assets are qualified. Where the 82-percent test is not met, the statutory rate is reduced by three-fourths of one percentage point for each one percentage point of such shortfall. For mutual savings banks without capital stock, the statutory rate is reduced by 1½ percentage points for each percentage point that qualified assets fail to reach the 72-percent requirement. At a minimum, 60 percent of a thrift institution's assets must be qualifying (50 percent for mutual savings banks without stock) in order to be eligible for deductions under the percentage of income method.

A thrift institution may switch between methods of determining the addition to its loan loss reserves from one year to another.

Corporate preferences and minimum tax

Under present law, if the deduction for bad debts for the taxable year determined under the above rules exceeds the amount which would have been allowed as a deduction on the basis of actual experience, the deduction is reduced by 20 percent of such excess (sec. 291). Also, 59% percent of the deductible excess (after the 20-percent reduction) is treated as a tax preference for purposes of computing the corporate minimum tax (sec. 57).

House Bill

The House bill provides that thrift institutions (mutual savings banks, domestic building and loan associations and cooperative banks) will continue to be able to compute bad debt deductions using the bank experience method and the percentage of taxable income method. The percentage of eligible loans method will no longer be available. In the case of the percentage of taxable income method, the portion of taxable income which may be deducted as an addition to a reserve for bad debts is reduced from 40 percent to 5 percent. The rules reducing the amount of the percentage of taxable income deduction available to a thrift institution which holds 60 percent of its assets in qualifying assets, but fails to hold a sufficient percentage of qualifying assets to use the maximum percentage of taxable income deduction, are eliminated. Any institution meeting the definition of a thrift institution and holding at least 60 percent of its assets as qualifying assets, will be eligible

[4] For purposes of determining the deduction under the percentage of income method, taxable income is computed without regard to any deduction allowable for any addition to the reserve for bad debts and exclusive of 18/46 of any net long-term capital gain, gains on assets the interest on which was tax-exempt, any dividends eligible for the corporate dividends received deduction and any additions to gross income from the thrift institution's own distributions from previously accumulated reserves.

for the full 5 percent of taxable income deduction. The 60-percent test applies to mutual savings banks as well as other types of thrift institutions.

Thrift institutions which claim the 5 percent of taxable income deduction allowed by the bill are not to be considered to have obtained a tax preference for purposes of the 20-percent reduction of section 291. The excess of the percentage of taxable income deduction over the deduction that would have been allowable on the basis of actual experience will be treated as a preference item for the purpose of computing the corporate minimum tax (sec. 57).

The House bill also repeals the provision of current law (sec. 586) that allows small business investment companies operating under the Small Business Investment Act of 1958 and business development companies to use the reserve method of computing losses on bad debts.

The provision is effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment reduces the percentage of taxable income that a thrift institution using the percentage of taxable income method may exclude from taxable income as an addition to a reserve for bad debts from 40 percent to 25 percent.

The rules reducing the amount of the percentage of taxable income deduction available to a thrift institution that holds 60 percent of its assets in qualifying assets, but fails to hold a sufficient percentage of qualifying assets to use the maximum percentage of taxable income deduction are changed. A thrift institution other than a mutual savings bank will reduce the maximum 25 percent of taxable income deduction by one-half of one percentage point for each full percentage point by which its qualified assets fall below 82 percent of total assets. A mutual savings bank will reduce the maximum 25 percent of taxable income deduction by a full percentage point for each percentage point by which its qualified assets fall below 72 percent of total assets.

In addition to the percentage of taxable income method, thrift institutions may continue to use the bank experience method. Thrift institutions may also use the percentage of eligible loans method for taxable years beginning before 1988.

The provision is effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement generally follows the House bill. The portion of taxable income that may be excluded from income as an addition to a reserve for bad debts is decreased from 40 to 8 percent. The provisions are effective for taxable years beginning after December 31, 1986.

B. Interest on Debt Used to Purchase or Carry Tax-Exempt Obligations By Financial Institutions

Present Law

No deduction is allowed for interest payments on debt incurred or continued to purchase or carry tax-exempt obligations. Under a long-standing judicial and administrative interpretation, financial institutions generally are permitted to invest deposited funds in tax-exempt obligations, while continuing to deduct interest paid to depositors.

The corporate tax preference rules reduce by 20 percent the amount which may be deducted by financial institutions for interest on funds allocable to tax-exempt obligations acquired after 1982. The portion of funds allocable to tax-exempt obligations is deemed to be equivalent to the ratio of (1) the average annual adjusted basis of tax-exempt obligations acquired after 1982 and held by the financial institution, to (2) the average annual adjusted basis of the financial institution's total assets.

House Bill

General rule

The House bill denies financial institutions (including foreign banks doing business in the United States) 100 percent of interest deductions that are allocable to tax-exempt obligations acquired on or after January 1, 1986. The amount of interest allocable to tax-exempt obligations is determined in the same manner as for purposes of the tax preference reduction under present law.

The present-law (i.e., 20-percent) reduction continues to apply with respect to tax-exempt obligations acquired in 1983 through 1985.

Effective date

The provision applies generally to tax-exempt obligations acquired after December 31, 1985, in taxable years ending after that date.

Transitional rules

Under the House bill, tax-exempt obligations that (1) are acquired pursuant to a direct or indirect written commitment that was entered into before September 25, 1985 or (2) are qualified tax-exempt obligations acquired during calendar years 1986, 1987 or 1988, are treated as having been acquired before January 1, 1986. A qualified tax-exempt obligation is defined as an essential function (i.e., governmental) or section 501(c)(3) organization tax-exempt bond designated by an issuer as either (i) a tax anticipation note with a term not exceeding one year, or (ii) part of an issue not exceeding $3 million (including issues for a common purpose) to provide qualified public project financing. Not more than $10 million of aggregate obligations may be designated by any issuer during any calendar year.

The exception for qualified tax-exempt obligations is limited to obligations acquired by a financial institution authorized to do business in the State of the issuer.

Senate Amendment

No provision.

Conference Agreement

General rule

The conference agreement follows the House bill, with the following modifications:

First, the provision applies with respect to tax-exempt obligations acquired after August 7, 1986 (rather than December 31, 1985). The present-law 20-percent disallowance continues to apply with respect to tax-exempt obligations acquired on or before that date. As under the House bill, the 100 percent disallowance rule is to be applied before the new rule requiring capitalization of certain expenses where the taxpayer produces property (new sec. 263A).[5] For purposes of the disallowance rule, the acquisition date of an obligation is the date on which the holding period begins with respect to the obligation in the hands of the acquiring financial institution. Thus, the acquisition of bonds as part of a tax-free reorganization is not treated as a new acquisition for purposes of this provision.

Second, a permanent exception to the provision is provided for qualified tax-exempt obligations acquired by a financial institution.[6] This exception applies whether the obligation is acquired at the original issuance or by a secondary purchaser. Under the conference agreement, qualified tax-exempt obligations include any obligation which (1) is not a private activity bond as defined by the conference agreement (see, Title XIII, below),[7] and (2) is issued by an issuer which reasonably anticipates to issue, together with subordinate entities, not more than $10 million of tax-exempt obligations (other than private activity bonds, as defined above) during the calendar year. Qualified tax-exempt obligations must be designated as such by the issuer; not more than $10 million of obligations may be so designated by any issuer (including subordinate entities) for any calendar year.[8] Refundings of outstanding bonds may qualify for this exception, and count toward the $10 million limitation, under the same terms as new issues.

For purposes of the exception for qualified tax-exempt obligations, subordinate governmental entities include entities deriving their issuing authority from another entity or subject to substantial control by another entity. For example, a sewer or solid waste authority created by a city or county in order to issue bonds for that city or county is considered a subordinate entity. An entity is not to be considered subordinate solely because of geographic inclusion in a larger entity (e.g., a city located within a larger county), if the smaller entity derives its powers independently of the larger entity and is not subject to significant control by the larger entity.

Qualified tax-exempt obligations are treated as acquired by the financial institution before August 8, 1986. Interest allocable to such obligations remains subject to the 20-percent disallowance contained in present law.

Effective date

This provision is effective for taxable years ending after December 31, 1986. Thus, bonds acquired after August 7, 1986, in taxable years ending in 1986 are subject to the 20-percent disallowance rule of present law for the taxable year ending in 1986, but are subject to the 100-percent disallowance rule of the conference agreement for subsequent taxable years.

A transitional exception is provided for tax-exempt obligations acquired after August 7, 1986 pursuant to a direct or indirect written commitment to purchase or repurchase such obligation, which commitment was entered into before September 25, 1985. Obligations qualifying for this excep-

---

[5] Also as under the House bill, the special rule of present law regarding face-amount certificate companies (contained in sec. 265(2)) is repealed. These companies will therefore be subject to the 100 percent disallowance rule in the same manner as other financial institutions.

[6] The rule contained in the House bill, which limited this exception to financial institutions authorized to do business in the State of the issuer, is not included.

[7] For purposes of this provision only, qualified section 501(c)(3) organization bonds (as defined in the conference agreement) are not treated as private activity bonds. In the case of bonds issued before August 15, 1986, for purposes of this provision only, bonds are not to be treated as private activity bonds if they are not IDBs, mortgage subsidy bonds, student loan bonds, or other private ("consumer") loan bonds for which tax exemption is permitted under present law.

[8] The rule contained in the House bill, which limited this exception to political subdivisions in existence on October 23, 1985, is not included.

tion are treated as if acquired before August 8, 1986; interest allocable to such obligations thus remains subject to the 20-percent disallowance contained in present law. The conference agreement also provides certain transitional rules for specified identified projects.

C. Special Rules for Net Operating Losses of Financial Institutions

Present Law

Under present law, commercial banks or thrift institutions (mutual savings banks, domestic building and loan associations, and cooperative banks) may carry net operating losses (NOLs) back to the prior ten taxable years and forward to the succeeding five taxable years. Other taxpayers may carry net operating losses back to the prior three taxable years and forward to the succeeding fifteen taxable years.

House Bill

The House bill repeals the special rules permitting financial institutions to carry net operating losses back to the prior ten taxable years and forward to the succeeding five taxable years.

Senate Amendment

The Senate amendment provides that net operating losses incurred by a thrift institution in taxable years beginning after December 31, 1981 and before January 1, 1986, may be carried back to the prior ten taxable years and carried forward to the succeeding eight taxable years.

Conference Agreement

In general

The conference agreement follows the provisions of both the House bill and the Senate amendment. The rule allowing net operating losses incurred by a financial institution to be carried back to the prior ten taxable years and carried forward to the succeeding five taxable years generally is repealed for taxable years beginning after December 31, 1986, except for certain net operating losses of commercial banks. Net operating losses incurred by a financial institution in taxable years beginning after December 31, 1986, generally are carried back to the prior three taxable years and carried forward to the succeeding fifteen taxable years, as is the case for other taxpayers.

Special rule for thrift institutions

Net operating losses incurred by a thrift institution in taxable years beginning after December 31, 1981, and before January 1, 1986, are carried back to the prior ten taxable years and carried forward to the succeeding eight taxable years.

Special rule for commercial banks

The portion of the net operating losses of commercial banks (not including thrift institutions) for any taxable year beginning after December 31, 1986, and before January 1, 1994, that is attributable to deductions for losses on bad debts is carried back to the prior ten taxable years. The portion of the net operating loss of a commercial bank attributable to deductions for losses on bad debts is the excess of the net operating loss for the taxable year over the net operating loss for such taxable year computed without regard to any deductions for losses on bad debts.

D. Reorganizations of Financially Troubled Thrift Institutions

Present Law

Present law provides special rules which exempt the acquisition of financially troubled thrift institutions from rules otherwise applicable to such transactions. These provisions, added by the Economic Recovery Tax Act of 1981, relax certain requirements for qualification as a tax-free bankruptcy reorganization under the Code. Thus, the requirements that (1) the acquired corporation undergo formal receivership or similar proceedings and (2) the shareholders and creditors of the acquired corporation receive stock in the acquiring corporation, need not be met (sec. 368(a)(3)(D)).[9] In addition, these provisions relax the rules regarding the survival of net operating loss carryovers following a merger (sec. 382(b)(7)), and exempt certain payments from the Federal Savings and Loan Insurance Corporation (FSLIC) to the troubled thrift from income (and from the requirement in sec. 362(c) that basis in property be reduced by the amount of nonshareholder contributions to capital) (sec. 597).

House Bill

Under the House bill, the special rules enacted in the 1981 Act relating to the acquisitions of troubled thrift institutions are repealed, effective for acquisitions occurring after December 31, 1985. The repeal of the special treatment for FSLIC payments is effective for payments after December 31, 1985, unless such payments are made pursuant to a written binding contract entered into before September 27, 1985.

The House bill also clarifies that FSLIC payments within the scope of section 597 do not constitute tax-exempt income to which expenses may be allocated (and hence disallowed) under section 265(1) of the Code.

Senate Amendment

No provision.[10]

Conference Agreement

The conference agreement follows the House bill with a delayed effective date. The special reorganization rules for troubled thrift institutions are repealed effective for acquisitions and mergers after December 31, 1988. The repeal of the special treatment for FSLIC payments is effective for payments after December 31, 1988, unless such payments are made pursuant to an acquisition or merger occurring on or before that date.

E. Losses on Deposits in Insolvent Financial Institutions

Present Law

Under present law, a loss experienced by a taxpayer with respect to a deposit or account in a financial institution is treated in the same manner as any other bad debt loss. A deduction of the loss is generally allowable only in the year in which it is determined, based on all the facts and circumstances, that there is no prospect of recovery. Unless the deposit in the financial institution was created or acquired in connection with a trade or business of the taxpayer, any loss on the deposit will be considered a short-term capital loss (sec. 166(d)). An individual taxpayer generally may deduct short-term capital losses only to the extent of $3,000 plus the taxpayer's capital gains for the year (sec. 1211).

House Bill

Under the House bill, qualified individuals may elect to deduct losses on deposits in qualified financial institutions as casualty losses in the year in which the amount of such loss can be reasonably estimated, subject to the generally applicable limitations on deductibility of casualty losses (sec. 165). A qualified individual is any individual other than an owner of one percent or more of the value of the stock of the institution in which the loss was sustained, an officer of such institution, and certain relatives and related persons to such owners and officers. A qualified financial institution is any commercial bank (as defined in sec. 581), thrift institution (as defined in sec. 591), insured credit union, or similar institution chartered and supervised under Federal or State law.

The provision is effective for taxable years beginning after December 31, 1982.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment. The conferees understand that the election is to be made on the tax return for the taxable year and, once made, cannot be changed without the consent of the Internal Revenue Service.

The conference agreement also provides that accrued, but unpaid, interest on a deposit in a financial institution for a taxable year beginning on or before 1987 is not includible in the depositor's taxable income for that taxable year where such interest is not subject to withdrawal at the end of that taxable year. Such interest income is includible in gross income in the taxable year in which such interest is withdrawable.

TITLE X. INSURANCE PRODUCTS AND COMPANIES

A. Policyholder Issues

1. Interest on installment payments of life insurance proceeds

Present Law

Amounts paid by an insurance company to the beneficiary of a life insurance contract by reason of the death of an insured individual generally are not includible in gross income (sec. 101(a)). Under certain life insurance contracts, the insurer may agree to hold the amounts that it would otherwise pay on the death of the insured, and pay the life insurance proceeds at a later date.

If the insurer pays the insurance proceeds to a beneficiary in a series of payments after the death of the insured, a prorated amount of each payment is treated as a nontaxable payment of the death benefit, and the remainder of the payment generally is includible in gross income. However, the first $1,000 in excess of the amount treated as a payment of the death benefit received by a surviving spouse in any taxable year is excludable from gross income.

In addition, under present law, the amount held by an insurer with respect to any beneficiary is the amount that equals the present value of the amounts to be paid pursuant to the agreement, determined as of the date of death of the insured and discounted on the basis of the interest rate and mortality tables used by the insurer. The mortality tables used by an insurer for purposes of valuing the agreement described above may distinguish among individuals on the basis of sex.

---

[9] Although no formal receivership or similar proceeding is required, certain certifications regarding the financial condition of the thrift institution must be received from the Federal Deposit Insurance Corporation or the Federal Home Loan Bank Board.

[10] For discussion of special rules relating to carryover of net operating losses (NOLs) of certain financial institutions following an acquisition or merger, see Title VI, Part H.

House Bill

Under the House bill, all amounts paid to any beneficiary of a life insurance policy at a date later than the death of the insured are included in gross income to the extent that the amount paid exceeds the amount payable as a death benefit. The exclusion from the gross income of a surviving spouse of the first $1,000 in excess of the amount payable as a death benefit is repealed.

The provision applies to amounts received with respect to deaths occurring after December 31, 1985, in taxable years ending after that date.

Senate Amendment

The Senate amendment is the same as the House bill, except the Senate amendment also requires, for purposes of valuing the portion of any payment deferred beyond the death of the insured that is treated as a nontaxable death benefit, that an insurer use mortality tables prescribed by the Secretary of the Treasury in regulations. Such tables are not to distinguish among individuals on the basis of sex.

This provision applies to amounts received with respect to deaths occurring after December 31, 1986, in taxable years ending after that date.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, except that the provision is effective for amounts paid with respect to deaths occurring after the date of enactment in taxable years ending after that date.

2. Treatment of structured settlement agreements

Present Law

Present law excludes from income the amount of any damages received on account of personal injuries or sickness, whether by suit or agreement and whether as a lump sum or as periodic payments. The person liable to pay the damages may assign to a third party (a structured settlement company) the obligation (pursuant to a structured settlement agreement) to make the periodic payments.

The net effect of the use of a structured settlement agreement is to permit a taxpayer liable for damages to an injured party to deduct the amount of the damages as if they were paid in a lump sum and to permit a structured settlement company to exclude from income the earnings on amounts used to fund its liability to make periodic payments to the injured party.

House Bill

The House bill amends present law to limit the favorable treatment of structured settlement agreements to those assignments requiring the payment of damages on account of a claim for personal injuries that involve physical injury or physical sickness of the claimant. Damages on account of a claim for wrongful death arising from physical injury or sickness are also included.

The provision applies to assignments entered into after December 31, 1985.

Senate Amendment

The Senate amendment repeals the special treatment of structured settlement agreements and replaces those rules with a new deduction election for a taxpayer assuming a liability to make damage payments to an injured party, effective for assignments entered into in taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement generally follows the House bill. Thus, the exclusion for structured settlements applies only to those qualifying structured settlement arrangements for payments of damages on account of a claim for personal injuries that involve physical injury or physical sickness of the claimant, including damages on account of a claim for wrongful death arising from physical injury or sickness, provided the arrangements meet all other applicable requirements.

Claims which do not involve physical injury or physical sickness include, for example, defamation of a third party or invasion of privacy. Claims which do not involve physical injury or physical sickness are not eligible to be treated as structured settlement arrangements.

The conferees understand that multiple claims are alleged in many personal injury actions. The conferees do not intend that allocation of damages is necessary among such multiple claims. Rather, if the action has its origin in a physical injury, then all damages that flow therefrom are included.

The provision is effective for assignments entered into after December 31, 1986, in taxable years ending after that date.

3. Life insurance policyholder loans

Present Law

Under present law, no deduction is allowed for any amount paid or accrued on indebtedness incurred or continued to purchase or carry certain life insurance, endowment or annuity contracts pursuant to a plan of purchase which contemplates the systematic direct or indirect borrowing of increases in the cash value of the contract, unless the requirements of certain exceptions to this disallowance rule are satisfied (sec. 264).

In addition, no deduction is allowed for any amount paid or accrued on indebtedness incurred or continued to purchase or carry a single premium life insurance, endowment or annuity contract (sec. 264(a)(2)). Single premium contracts include contracts under which substantially all of the premiums are paid within 4 years from the date on which the contract is purchased, or contracts under which an amount is deposited with the insurer for payment of a substantial number of future premiums on the contract.

House Bill

The rule of present law regarding the disallowance of a deduction for any amount paid or accrued on indebtedness incurred or continued to purchase or carry a single premium life insurance, endowment or annuity contract is restated.

Senate Amendment

A deduction for interest on policyholder loans is not allowed to the extent that aggregate loans to any officer, employee, or person financially interested in any trade or business carried on by the taxpayer exceed $50,000. The provision is effective for interest on loans under policies purchased after June 20, 1986.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

Interest deduction

With respect to the provision disallowing a deduction for interest on certain policyholder loans in the case of a taxpayer carrying on more than one trade or business, the $50,000 amount per officer or employee or person is financially interested in any trade or business of the taxpayer is determined on an aggregate basis for each such person in all trades or businesses. For example, if an employee of a business of the taxpayer is also an officer in two other businesses of the taxpayer, the $50,000 of permitted borrowings by the taxpayer with respect to life insurance covering the person is determined by aggregating all policies covering his life with respect to which the taxpayer has borrowed. In the case of an affiliated group of corporations, it is intended that the affiliated group is considered to be one taxpayer for this purpose, and all loans with respect to policies covering the life of an officer or employee or person financially interested in, a business of any member of the group are aggregated. Similar principles are intended to apply in the event of common ownership of unincorporated trades or businesses.

Under the conference agreement, the fact that the proceeds of a loan under a life insurance contract are used in a trade or business does not affect the deductibility of interest paid on the loan. Therefore, for example, if a sole proprietor borrows under a life insurance policy on the sole proprietor's life, the interest paid on the loan (to the extent the loan exceeds $50,000) is not deductible even though the proceeds of the loan are used in the sole proprietor's trade or business.

The provision is effective for interest on loans under policies purchased after June 20, 1986, in taxable years ending after that date.

Single premium contracts

The conference agreement restates the present-law rule that no deduction is allowed for any amount paid or accrued on indebtedness incurred or continued to purchase or carry a single premium life insurance, endowment, or annuity contract (sec. 264(a)(2)). Single premium contracts include contracts where substantially all of the premiums are paid within four years from the date on which the contract is purchased, or contracts where an amount is deposited with the insurer for payment of a substantial number of future premiums on the contract. Generally, section 264(a)(2) also applies to contracts other than those where the nonpayment of premiums would cause the policy to lapse, but no inference is intended that universal life insurance policies are always treated as single premium contracts.

4. Treatment of policies to cover prearranged funeral expenses

Present Law

A life insurance contract generally is defined as a contract which meets either (1) a cash value accumulation test, or (2) a test consisting of a guideline premium requirement and a cash value corridor requirement. Future increases in death benefits may cause a contract not to qualify under these tests.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that future increases in death benefits may be taken into account in determining whether the definition of life insurance contracts is satisfied with respect to certain policies to cover prearranged funeral expenses. Such contracts can qualify as a life insurance contract if the initial death benefit is $5,000 or less (treating all contracts issued to the same contract owner as one contract), and if the contract provides for fixed annual increases in the death benefit not exceeding 10 percent of the initial death benefit or 8

percent of the death benefit at the end of the preceding year.

The provision is effective on the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment, with a modification that a contract to cover prearranged funeral expenses can qualify as a life insurance contract provided the death benefit under the contract (treating all contracts issued to the same owner as one contract) does not exceed $25,000.

The provision is effective on the date of enactment.

5. Deduction for nonbusiness casualty losses

Present Law

For property not connected with a trade or business or a transaction entered into for profit, casualty losses are deductible only if they arise from "fire, storm, shipwreck, or other casualty or theft." These personal casualty losses are deductible only to the extent that each casualty loss exceeds $100, and to the extent that all casualty losses for the year exceed 10 percent of the taxpayer's adjusted gross income (sec. 165(h)). Certain courts have ruled that a taxpayer whose loss was covered by an insurance policy could nevertheless deduct the loss if the taxpayer decided not to file a claim under the terms of the insurance policy. See *Hills* v *Commissioner*, 691 F.2d 997 (11th Cir. 1982); *Miller* v *Commissioner*, 733 F.2d 399 (6th Cir. 1984).

House Bill

Under the bill, a taxpayer is not permitted to deduct a casualty loss for damages to property not used in a trade or business or in a transaction entered into for profit, unless the taxpayer files a timely insurance claim with respect to damage to that property. This requirement applies to the extent of any insurance policy would provide reimbursement for a loss.

The provision applies to losses sustained in taxable years beginning after December 31, 1985.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill, except that the provision applies to losses sustained in taxable years beginning after December 31, 1986. The provision is clarified to apply only to the extent any insurance policy would provide reimbursement.

B. Life Insurance Companies

1. Special life insurance company deduction

Present Law

A life insurance company is taxed at corporate rates on its life insurance company taxable income (LICTI) and certain other income. A life insurance company is allowed a special deduction in computing LICTI equal to 20 percent of the income from insurance businesses that otherwise would be subject to taxation (sec. 806(a)).

House Bill

The special life insurance company deduction is repealed, effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that a special rule is provided in the case of a life insurance company owning the stock of another corporation through a partnership, which stock was acquired on January 14, 1981. For purposes of determining the small life insurance company deduction under section 806(a), tentative life insurance company taxable income is computed without taking into account income, gain, loss or deduction attributable to the ownership of such stock, and the amount of such income, gain, loss or deduction is taken into account at the rate of 46/36.8, which provides the same tax benefit to the life insurance company as is provided under present law.

This provision is effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, effective for taxable years beginning after December 31, 1986.

2. Tax-exempt organizations engaged in insurance activities

Present Law

Present law (sec. 501(c)) specifies various standards that an organization must meet in order to qualify for exemption from Federal income taxation. These standards vary depending on the basis on which the entity is seeking exemption. Certain insurance activities performed by an organization may make it ineligible for tax exemption.

At least one major organization (described in sec. 501(c)(3)), which provides life insurance and annuities to employees of tax-exempt educational institutions, has been recognized as a tax-exempt charitable organization by the IRS. At least one major health insurance provider has been treated as a tax-exempt social welfare organization.

A fraternal beneficiary society, order, or association (sec. 501(c)(8)) is entitled to tax exemption if it operates under the lodge system or for the exclusive benefit of the members of a fraternity itself operating under the lodge system, and provides for the payment of life, sick, accident, or other benefits to the members of such society, order, or association or their dependents.

House Bill

Under the bill, an organization described in sections 501(c)(3) and (4) of the Code is exempt from tax only if no substantial part of its activities consists of providing commercial-type insurance.

In the case of such a tax-exempt organization, the activity of providing commercial-type insurance is treated as an unrelated trade or business (sec. 513), but in lieu of the usual tax on unrelated trade or business taxable income, the unrelated trade or business activity is taxed under the rules relating to insurance companies (subchapter L).

For this purpose, commercial-type insurance generally is any insurance of a type provided by commercial insurance companies. The House bill provides that the issuance of annuity contracts is treated as providing insurance.

Several exceptions are provided to the definition of commercial-type insurance. Commercial-type insurance does not include insurance provided at substantially below cost to a class of charitable recipients. Commercial-type insurance also does not include health insurance provided by a health maintenance organization that is of a kind customarily provided by such organizations and is incidental to the organization's principal activity of providing health care. Similarly, organizations that provide supplemental health maintenance organization-type services (such as dental services) are not affected if they operate in the same manner as a health maintenance organization.

In addition, commercial-type insurance does not include property and casualty insurance (such as fire insurance) provided directly or through a wholly owned corporation by a church or convention or association of churches for the church, convention or association. This exception does not apply if the insurance is provided not only to the church, convention or association, but also to other persons.

In the case of activities of Blue Cross and Blue Shield and their affiliates with respect to high risk individuals and small groups, the House bill authorizes the Treasury Department to issue regulations providing for special treatment to such organizations in connection with the unique activities (such as open enrollment) of Blue Cross and Blue Shield and their affiliates for high risk individuals and small groups. The special treatment is not available to the extent the activities are required by applicable law.

The House bill requires that the Treasury Department audit and study fraternal beneficiary organizations (described in sec. 501(c)(8)) that received gross insurance premiums in excess of $25 million in taxable year 1984.

The provision is effective for taxable years beginning after December 31, 1985. A special rule for Mutual of America provides that this provision shall not apply with respect to that portion of its business attributable to pension business. Another special rule for Teachers Insurance Annuity Association-College Retirement Equities Fund provides that this provision does not apply to taxable years beginning before January 1, 1988, with respect to that portion of its business attributable to pension business.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill with respect to the treatment of commercial-type insurance activities of organizations described in sections 501(c)(3) and (4), with modifications.

In general

Under the conference agreement, commercial-type insurance does not include property or casualty insurance provided directly or through an organization described in sec. 414(e)(3)(B)(ii) by a church or convention or association of churches for the church, convention or association. It also does not apply to the provision of retirement or welfare benefits by such organizations directly or indirectly through an organization described in sec. 414(e)(3)(A) or 414(e)(3)(B)(ii) for the employees of such organizations, or for employees' beneficiaries. This exception is not intended to apply if insurance is provided to persons other than the church or convention or association of churches and their employees.

The conference agreement does not alter the tax-exempt status of health maintenance organizations (HMOs). HMOs provide physician services in a variety of practice settings primarily through physicians who are either employees or partners of the HMO or through contracts with individual physicians or one or more groups of physicians (organized on a group practice or individual practice basis).

Certain health insurance providers

In lieu of the provision in the House bill authorizing Treasury regulations with respect to high risk individuals and small groups in the case of activities of Blue Cross and Blue Shield and their affiliates, the conference agreement provides the following treatment of existing Blue Cross or Blue

Shield organizations and other organizations that meet certain requirements and substantially all of whose activities are providing health insurance. Health insurance includes insurance that provides coverage of medical expenses.

The treatment applies to Blue Cross and Blue Shield organizations providing health insurance that (1) were in existence on the date of conference action (August 16, 1986), (2) are determined at any time to be tax-exempt under a determination that has not been revoked,[1] and (3) were tax-exempt for the last taxable year beginning before January 1, 1987, provided that no material change occurs in the structure or operations of the organization after August 16, 1986, and before the close of 1986 or any subsequent taxable year. The conferees intend that the following principles will be applied by the Secretary in determining whether or not a material change in operations or structure has occurred.

First, the merger or split up of 1 or more existing Blue Cross/Blue Shield organizations will not constitute a material change in operation or structure.

Second, if an existing Blue Cross/Blue Shield organization acquires a new line of business or is acquired by another business (other than a health business), the acquisition does not constitute a material change in operations or structure of the organization if (1) the assets of the other business are a de minimis percentage (i.e., less than 10 percent) of the assets of the existing Blue Cross/Blue Shield organization at the time of the acquisition, or (2) the taxpayer can demonstrate to the Secretary of the Treasury that, based on all the facts and circumstances, the acquisition does not constitute a material change in operations or structure of the existing Blue Cross/Blue Shield organization.

Third, a material change in operations occurs if an existing Blue Cross/Blue Shield organization drops its high risk coverage or substantially changes the terms and conditions under which high risk coverage is offered by the organization from the terms and conditions in effect as of August 16, 1986. A change in high risk coverage is considered substantial if the effect of the change is to defeat the purpose of high risk coverage. High risk coverage for this purpose generally means the coverage of individuals and small groups to the extent the organization (1) provides such coverage under specified terms and conditions as of August 16, 1986, or (2) meets the statutory minimum definition of high risk coverage for new organizations. A material change in operations does not occur if an existing organization alters its operations to provide high risk coverage that meets the minimum standards under the conference agreement for new Blue Cross/Blue Shield organizations.

For example, if an existing Blue Cross/Blue Shield organization provides open enrollment to all individuals and small groups of less than 5 individuals, the organization could redefine a small group for purposes of this coverage to mean the lesser of 15 individuals or the minimum number of individuals required for a small group under State law. Such a redefinition of a small group (from 5 to 15 individuals) would not be considered a material change in operations because the organization would meet the minimum standard for a new organization with respect to small group coverage.

On the other hand, if an existing Blue Cross/Blue Shield organization provides, as of August 16, 1986, high risk coverage to individuals and small groups without a premium price differential to take account of the high risk nature of the business, a change in premium structure for such individual and small group coverage that has the effect of creating a significant price differential to take account of the high risk nature of the business would be considered a material change in operations.

The conferees intend that, to the extent such determinations of tax exemption for any taxable year beginning before 1987 were not under audit or in litigation before the date of conference action (August 16, 1986), the Internal Revenue Service will not seek to revoke such determinations.

The conference agreement provides that such existing Blue Cross and Blue Shield organizations and other organizations eligible for this treatment are subject to tax as stock property and casualty insurance companies under Part II of Subchapter L of the Code, as amended under the conference agreement. Thus, such organizations are generally subject to the provisions applicable to property and casualty insurance companies in this conference agreement, except as otherwise provided.

A special deduction is provided to such organizations with respect to their health business equal to 25 percent of the claims and expenses incurred during the taxable year less the adjusted surplus at the beginning of the year. This deduction is calculated by computing surplus, taxable income, claims incurred, expenses incurred, tax-exempt income, net operating loss carryovers, etc., attributable to health business. Thus, the deduction is not allowable with respect to such items attributable to, for example, life insurance business. The expenses attributable to health business are those incurred during the taxable year in connection with the administration, adjustment or settlement of claims under health business. The deduction may not exceed taxable income attributable to health business for the year (calculated without regard to this deduction).

For organizations eligible for this deduction in the first taxable year beginning after December 31, 1986, the amount of the adjusted surplus to be applied in the first year for which the deduction is allowable is the surplus reported on the organization's annual statement (i.e., the annual statement approved by the National Association of Insurance Commissioners) at the close of the preceding year, adjusted by not taking into account distributions (such as distributions to shareholders, or contributions or loans to affiliates that reduce surplus, but not including ordinary and necessary expenses or deductible policyholder dividends) after the date of conference action (August 16, 1986). For organizations that first become eligible for the provision in a later taxable year, the amount of the adjusted surplus for the first year of the deduction is the surplus reported on the annual statement at the close of the preceding year.

The initial surplus amount is adjusted under the provision at the close of each taxable year by adding the taxable income or loss [2] of the organization for the year (determined without regard to net operating loss carryovers and without regard to the deduction under this provision), plus net tax-exempt income for the year. Net tax-exempt income means dividends for which the dividends received deduction was allowed, and interest that is tax-exempt, less the expenses of earning the tax-exempt interest that were disallowed under sec. 265, and less the adjustment that was made for proration of tax-exempt income under sec. 805(a) or sec. 832(b)(5) (as amended by the conference agreement). If an organization eligible for the deduction under this provision does not take the deduction in any year, adjusted surplus must be calculated for the intervening years between the last year the organization took the deduction and the next year in which it takes the deduction, so as to take account properly of the calculation of the deduction in the later year.

For example, assume a calendar year Blue Cross organization engaged only in health business, the State law surplus (as adjusted) of which was $100 million on January 1, 1987. In 1987, the organization has health claims and expenses incurred of $880 million and adjusted taxable income of $160 million (including net tax-exempt income of $10 million). In 1987, the organization would be entitled to a special deduction of $120 million, that is, the excess of $220 million (25 percent of the 1987 claims and expenses paid) over $100 million (the 1987 opening surplus).

As a further example, assume that in 1988, the organization has health claims and expenses incurred of $1.2 billion. Its special deduction for 1988 would be $40 million, that is, the excess of $300 million (25 percent of the 1988 health claims and expenses incurred) over the opening 1988 adjusted surplus balance of $260 million. The opening 1988 surplus is calculated by taking the sum of (a) 1987 opening surplus of $100 million, plus (b) 1987 adjusted taxable income of $160 million (including 1987 net tax-exempt income of $10 million).

The deduction applies only for regular tax purposes. Therefore, the deduction is treated as a preference item for purposes of the corporate minimum tax.

In addition to this special deduction, such organizations are given a fresh start with respect to changes in accounting methods resulting from the change from tax-exempt to taxable status. No adjustment is made under section 481 on account of an accounting method change.

Such organizations are not subject to the treatment of unearned premium reserves generally applicable to property and casualty insurance companies under the conference agreement. The conferees believe that during the period such organizations were tax-exempt, any mismatching of currently deductible premium acquisition expenses and deferred premiums (resulting from the unearned premium reserve deduction) had no significant tax impact, and therefore it is not appropriate to require these organizations to include in income a portion of the outstanding balance of the unearned premium reserve. To ease the transition from tax-

[1] The conferees intend that, to the extent such determinations of tax exemption for any taxable year beginning before 1987 were not under audit or in litigation before the date of conference action (August 16, 1986), the Internal Revenue Service will not seek to revoke such determinations.

[2] As under present law, insurance loss reserves must be reasonable (see X.C. 1., below). Generally, it is intended that the loss reserves of organizations eligible for the deduction under this provision also be reasonable, and that they be comparable to the historical loss reserves of the organization in relation to its claims and expenses.

exempt to taxable status, the conferees believe that it is appropriate to give such organizations relief from the requirement that 20 percent of the increase in unearned premium reserves be included in income.

Finally, the basis of assets of such organizations is equal, for purposes of determining gain or loss, to the amount of the assets' fair market value on the first day of the organization's taxable year beginning after December 31, 1986. Thus, for formerly tax-exempt organizations utilizing a calendar period of accounting and whose first taxable year commences January 1, 1987, the basis of each asset of such organization is equal to the amount of its fair market value on January 1, 1987. The basis step-up is provided solely for purposes of determining gain or loss upon sale or exchange of the assets, not for purposes of determining amounts of depreciation or for other purposes. The basis adjustment is provided because the conferees believe that such formerly tax-exempt organizations should not be taxed on unrealized appreciation or depreciation that accrued during the period the organization was not generally subject to income taxation.

The foregoing special provisions apply to existing tax-exempt Blue Cross and Blue Shield organizations and and to those other organizations that satisfy the additional criteria described below.

Other organizations substantially all of whose activities are providing health insurance, in order to receive the treatment under the provisions described above, must meet certain requirements.

First, at least 10 percent of the health insurance (determined as a percentage of the total number of individuals covered annually) provided by the organization must be provided to individuals and small groups (disregarding Medicare supplemental coverage). A small group is defined as the lesser of 15 individuals or the number of individuals required for a small group under the State law where the covered groups are located.

Second, the organization is required to provide continuous full-year open enrollment for individuals and small groups. Open enrollment is intended to included conversions from group to individual coverage (for example, upon separation from service with an employer who provides group coverage), without a lapse in coverage, provided the individual seeking to convert from group to individual coverage notifies the organization providing group coverage of his conversion request by the date of his separation from service. Conversion includes any change in the type of coverage (e.g., from one type of group to another).

Third, any individual seeking health insurance is required to be offered coverage which includes coverage of pre-existing conditions, and the coverage becomes effective within a reasonable waiting period after the time such coverage is sought. A reasonable waiting period is intended to be not more than three months. Further, health insurance coverage must be provided without regard to the age, income, or employment status of persons under age 65.

Fourth, at least 35 percent of the organization's health insurance premiums are determined on a community-rated basis. This percentage is determined as a percentage of the total number of persons covered on an annual basis. Community rating means that premiums are determined on the basis of the average annual cost of health insurance over the population in the community.

Fifth, the organization must be organized and operated in a manner such that no part of the net earnings inures to the benefit of any private shareholder or individual.

The conference agreement requires that the Treasury Department audit and study fraternal beneficiary organizations (described in sec. 501(c)(8)) that received gross insurance premiums in excess of $25 million in taxable year 1984. The Treasury study is due by January 1, 1988.

Effective dates

The provision is effective for taxable years beginning after December 31, 1986. Special rules for Mutual of America and for Teachers Insurance Annuity Association-College Retirement Equities Fund provide that this provision does not apply with respect to that portion of their business attributable to pension business. For this purpose, the conference agreement provides that pension business means the administration of qualified pension plans (sec. 401(a) or 403(a)), tax-sheltered annuities (sec. 403(b)), unfunded deferred compensation plans of State and local governments (sec. 457), and individual retirement arrangements (IRA's.)

Additional special rules provide that this provision does not apply to the YMCA retirement fund, to administrative services performed by tax-exempt municipal leagues, to the Missouri Hospital Association, or to dental benefit coverage by Delta Dental Plans Association through contracts with independent service providers so long as the provision of such coverage is the principal activity of such Association. No inference is intended, under this provision, as to whether the performance of administrative services by tax-exempt municipal leagues, without more, constitutes commercial-type insurance activities. Generally, however, the performance of administrative services with respect to insurance contracts by tax-exempt organizations may be subject to unrelated business tax.

3. Operations loss deduction of insolvent companies

Present Law

Prior to 1984, life insurance companies were permitted to exclude from taxable income 50 percent of the excess of gain from operations over taxable investment income. In addition, life insurance companies were allowed certain special deductions for nonparticipating contracts and for accident and health insurance and group life insurance contracts. The amounts deducted under these provisions were added to a deferred tax account known as the policyholders surplus account (PSA). The allowance of these special deductions, and the establishment of a PSA, were intended to provide a cushion of assets to protect the interests of the policyholders. The 1984 Act repealed the deduction for additions to a PSA, but continued the deferral on existing amounts in a PSA.

The deferral of tax on existing amounts held in the PSA of a life insurance company is ended if the amounts are distributed to shareholders. In certain circumstances, amounts may be required to be distributed from the PSA (i.e., the deferral of tax on such amounts is ended) if the PSA becomes too large in relation to the scope of the company's current operations. The deferral of tax on amounts in the PSA also may end if the company ceases to be taxed as a life insurance company. The amounts included in income as a result of ending deferral on amounts in the PSA cannot be offset by the company's loss from operations or loss carryovers.

House Bill

Under the bill, a life insurance company is permitted to apply its current loss from operations and its unused operations loss carryovers against the increase in its taxable income attributable to the amount distributed from its PSA if certain conditions are satisfied. First, the company must have been insolvent on November 15, 1985. Second, the company must be liquidated pursuant to the order of a court of competent jurisdiction in a title 11 or similar case. Third, as a result of the liquidation, the company's tax liability must be increased due to distributions from the PSA. Under the provision, no carryover of any loss from operations of the company arising during or prior to the year of liquidation may be used in any taxable year succeeding the liquidation year (regardless of whether the amount of the loss exceeds the amount of the distribution from the PSA).

The provision applies to liquidations on or after November 15, 1985.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, effective for liquidations on or after November 15, 1985.

4. Treatment of electing mutual life insurance company

Present Law

A mutual life insurance company may elect to treat all its individual noncancellable (or guaranteed renewable) accident and health insurance contracts as cancellable, for purposes of determining whether the company is taxable as a life insurance company or a property and casualty insurance company. As a condition of making this election, all stock life insurance company affiliates of an electing mutual life insurance company which is the common parent of the group are treated as mutual life insurance companies subject to tax under all provisions of the Code applicable to mutual life insurance companies, including the provisions regarding the differential earnings amount of mutual companies.

House Bill

No provision.

Senate Amendment

Under the Senate amendment, the requirement that a stock life insurance affiliate of an electing mutual life insurance company parent be treated as a mutual life insurance company is repealed, only for taxable years beginning after December 31, 1985, and before January 1, 1992.

Conference Agreement

The conference agreement follows the House bill.

C. Property and Casualty Insurance Company Taxation

1. Inclusion in income of 20 percent of unearned premium reserve

Present Law

Under present law, the income of a property and casualty insurance company (whether stock or mutual) includes its underwriting income or loss and its investment income or loss, as well as gains and other income items. Underwriting income means premiums earned on insurance contracts

during the year, less losses incurred and expenses incurred (sec. 832(b)(3)). To determine premiums earned, the increase in unearned premiums during the year is deducted from gross premiums (sec. 832(b)(4)(B)). This treatment of unearned premiums generally reflects accounting conventions imposed under applicable State law.

Property and casualty insurers may also deduct expenses incurred during the taxable year (sec. 832(b)(3)). Expenses incurred generally means expenses shown on the annual statement approved by the National Association of Insurance Commissioners. Expenses incurred are calculated by adding to expenses paid during the year the excess of unpaid expenses at the end of the current year over unpaid expenses at the end of the preceding year (sec. 832(b)(6)). Expenses incurred ordinarily include premium acquisition expenses. Expenses, to be deductible, must constitute ordinary and necessary trade or business expenses within the meaning of section 162 (sec. 832(c)(1)), although this rule does not determine the time when the deduction is allowed.

House Bill

Under the House bill, a property and casualty insurance company is required to reduce its deduction for unearned premiums by 20 percent. All items which are included in unearned premiums under section 832(b) of present law are subject to this reduction in the deduction.

The House bill also provides for the inclusion in income of 20 percent of the unearned premium reserve outstanding at the end of the most recent taxable year beginning before January 1, 1986. This income is includible ratably over a 5-year period commencing with the first taxable year beginning after December 31, 1985. In each taxable year during this period, 4 percent of the unearned premium reserve outstanding at the end of the most recent taxable year beginning before January 1, 1986, is included in income.

The provision is generally effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that life insurance reserves which are included in unearned premium reserves under section 832(b)(4) are not subject to this reduction in the deduction for unearned premiums.

In addition, the amendment provides for the inclusion in income of 20 percent of the unearned premium reserve outstanding at the end of the most recent taxable year beginning before January 1, 1987, ratably over a 7-1/2 year period commencing with the first taxable year beginning after December 31, 1986.

In the case of insurance against default in the payment of principal or interest on securities with a maturity of 5 years or more, the amendment provides that the deduction for increases in unearned premiums is reduced by 10 percent, rather than 20 percent. Thus, only 90 percent of the increase in unearned premiums is deductible and 90 percent of any decrease is includible in income.

Similarly, in the case of such insurance on securities, 10 percent, rather than 20 percent of the amount of the unearned premium reserve outstanding at the end of the most recent taxable year beginning before January 1, 1986, is included in income ratably over 7-1/2 years. Insurance on securities with a maturity of less than 5 years is subject to the general rule reducing the deduction (or inclusion) for a change in unearned premiums by 20 percent.

Under the Senate amendment, if a property and casualty insurance company ceases to be taxable as a property and casualty company, the ratable inclusion rule for outstanding unearned premium balances (for balances as of the end of the last taxable year beginning before January 1, 1987) is applied to include the remaining amount subject to the rule in income for the taxable year preceding the taxable year in which the company ceases to be subject to tax as a property and casualty insurance company.

An exception is provided to the extent a successor company (which is also a property and casualty insurance company) is subject to the requirements of section 381(c)(22) (relating to acquiring companies under Subchapter L). Further, this rule applies only if a company ceases to be a property and casualty company for a taxable year beginning before January 1, 1993.

The provision is generally effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, generally effective for taxable years beginning after December 31, 1986, with the modification that the period over which 20 percent (or 10 percent in the case of insurance on securities with a maturity over 5 years) of the outstanding balance of unearned premium reserves at the end of the last taxable year beginning before January 1, 1987, is included in income is 6 years, rather than 7-1/2 years, commencing with the first taxable year beginning after December 31, 1986.

The conference agreement also provides special treatment of title insurance unearned premium reserves (see item 3, below).

2. Treatment of certain dividends and tax-exempt interest

Present Law

Property and casualty insurance companies are subject to tax on investment income, which generally includes interest, dividends, and rents (sec. 832(b)(2)). A property and casualty company that includes interest exempt from tax (sec. 103) in its investment income may deduct this interest under section 832(c)(7) of present law. In addition, property and casualty companies are allowed the dividends-received deduction (sec. 832(c)(12)).

No reduction in the loss reserve deduction is required, under present law, to take account of the fact that deductible additions to reserves may come out of income not subject to tax. Unlike life insurance companies, property and casualty insurance companies are not required to allocate or prorate investment income (including tax-exempt investment income) so as to take account of the possibility of a double deduction where deductible additions to reserves are funded with tax-exempt income (or with the deductible portion of dividends received).

House Bill

Under the House bill, the deduction for losses incurred is reduced by a specified portion of the insurer's tax-exempt interest and of the deductible portion of dividends received (with special rules for dividends from affiliates). For this purpose, tax-exempt interest includes interest income excludable under section 103 (or deductible under sec. 832(c)(7)), the portion of interest income excludable under section 133, and other similar items. The specified portion for taxable years beginning after December 31, 1985, is 10 percent, increasing to 15 percent for taxable years beginning after December 31, 1987.

In the case of dividends from affiliates, 100 percent of which are deductible under present law, the portion which is subject to proration in the hands of the recipient property and casualty company is that portion which is attributable to tax-exempt interest or the deductible portion of nonaffiliate dividends (that is, those dividends which would not be eligible for the 100 percent dividends-received deduction).

The proration rule does not apply to tax-exempt interest and the deductible portion of dividends received or accrued on stock or obligations acquired before November 15, 1985. The portion of dividends received from an affiliate attributable to stock or obligations (the interest on which is tax-exempt) acquired by the affiliate after November 14, 1985, is subject to the proration rule. Further, if an affiliate is acquired after November 14, 1985, each share of stock or obligation (the interest on which is tax-exempt) held by the affiliate (or by its subsidiaries which are affiliates), whenever acquired by the affiliate, is treated as acquired after November 14, 1985.

The provision relating to proration of tax-exempt interest and the deductible portion of dividends received at the rate of 10 percent is effective for taxable years beginning after December 31, 1985. Effective for taxable years beginning after December 31, 1987, the rate is increased to 15 percent.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill, with modifications. The specified portion by which the deduction for losses incurred is reduced under the provision is 15 percent for all taxable years beginning after December 31, 1986. In addition, the proration rule does not apply to tax-exempt interest and the deductible portion of dividends (whether or not from an affiliate) received or accrued on stock or obligations acquired before August 8, 1986.

The portion of dividends received from an affiliate attributable to stock or obligations (the interest on which is tax-exempt) acquired by the affiliate after August 7, 1986, is subject to the proration rule. Similarly, the transfer of tax-exempt bonds among affiliates after August 7, 1986, is treated as an acquisition of the bonds after August 7, 1986. Further, if an affiliate is acquired after August 7, 1986, each share of stock or obligation (the interest on which is tax-exempt) held by the affiliate (or by its subsidiaries that are affiliates), whenever acquired by the affiliate, is treated as acquired after August 7, 1986.

The conference agreement clarifies the determination of the portion of a dividend that is attributable to prorated amounts. Under the conference agreement, dividends are treated as paid first out of current or accumulated earnings and profits attributable to prorated amounts; that is, it is treated as paid first out of tax-exempt income of the paying company (such as interest or the deductible portion of dividends received).

The provision is effective for taxable years beginning after December 31, 1986.

3. Loss reserves

Present Law

In general

Present law provides generally that property and casualty companies are required to include their underwriting and investment income or loss in taxable income (sec. 832(b)). Among the items that are deductible in calculating underwriting income are additions to reserves for losses and expenses incurred. Losses incurred may include unpaid losses, the amounts of contested liabilities, and amounts which are estimated (and which therefore may be subject to future change when the amounts can be determined with reasonable accuracy).

The amount of the deduction for losses incurred must be reasonable. *See* Reg. sec. 1.832-4(b) and *Hanover Insurance Co. v. Commissioner*, 598 F.2d 1121 (1st Cir. 1979), *cert. denied*, 444 U.S. 915. Thus, under present law, the Internal Revenue Service may review, and, if appropriate, adjust the amount of the deduction for unpaid losses and unpaid loss adjustment expenses.

Title insurance

Under present law, the treatment of title insurance (i.e., insurance to protect the buyer of real property against the risk that a defect in the title or an encumbrance against the property exists at the time the property is purchased) is unclear. Under Rev. Rul. 83-174, 1983-2 C.B. 108, as modified by Rev. Rul. 84-107, 1984-2 C.B. 122, for title insurers operating in jurisdictions requiring the maintenance of an unearned premium reserve, the IRS has permitted premiums received by title insurers (to the extent of the reserve required under State law) to be treated as unearned premiums for Federal income tax purposes for years beginning before November 28, 1984; however, the taxpayer may not deduct incurred but unreported losses in addition to unearned premiums for tax years beginning on or after November 28, 1983.

House Bill

The Treasury Department (in consultation with the Joint Committee on Taxation) is required to conduct a study of the treatment of loss reserves of property and casualty insurance companies. The results of the study, together with recommendations, are to be submitted to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate no later than January 1, 1987.

Senate Amendment

In general

The Senate amendment provides for the discounting of the deduction for losses and expenses incurred to take account partially of the time value of money. The Senate amendment limits the deduction for unpaid losses (reported losses that have not been paid, estimates of losses incurred but not reported, resisted claims, and unpaid loss adjustment expenses) to the amount of discounted unpaid losses.

This modified treatment of loss reserve deductions is applicable both to loss reserves of property and casualty companies, and to loss reserves of life insurance companies that are not required to be discounted under life insurance company taxation provisions. In the case of any reserves (including reserves of property and casualty companies) which life insurance company provisions require to be discounted, the applicable life insurance reserve discounting rules apply in lieu of the new discounting rules adopted by the Senate amendment.

The Senate amendment requires all property and casualty loss reserves (unpaid losses and unpaid loss adjustment expenses) for each line of business (as shown on the annual statement) to be discounted for tax purposes. The amount of the discounted unpaid losses as of the end of any taxable year attributable to any accident year is the present value of the losses (as of the close of the taxable year) determined by using (1) the gross amount to be subject to discounting (i.e., the undiscounted loss reserves), (2) the pattern of payment of claims, including the duration in years over which the claims will be paid, and (3) the rate of interest to be assumed in calculating the discounted reserve. This discounting methodology is applied by line of business and by accident year, as reported on the annual statement filed for the year.

Interest rate

The interest rate used for purposes of applying the discounting methodology to a line of business is 5 percent for all accident years of the company beginning before or in 1987. For accident years beginning after 1987, the annual interest rate applicable to the discounting of unpaid losses is equal to 75 percent of the average of the applicable Federal mid-term rates (as defined in sec. 1274(d) converted to a rate based on annual compounding) effective as of the beginning of each of the calendar months in the base period. The base period means the most recent 60 calendar months ending before the beginning of the calendar year for which the determination is made (excluding months beginning before 1987).

Loss payment patterns

The Senate amendment requires the Secretary of the Treasury to determine a loss payment pattern with respect to each line of business reported on Schedules O and P for a determination year. This loss payment pattern will be determined by reference to the historical loss payment pattern applicable to the line of business and applies to accident years ending with (or within) the determination year and each of the four succeeding years.

The Senate amendment provides a special rule for certain long-tail lines of business. In addition, the amendment provides special rules for unallocated lines of reinsurance and international business, and for certain accident and health insurance. A taxpayer may elect to apply the reserve discounting rules by reference to the taxpayer's own historical loss payment patterns.

Title insurance

Under the Senate amendment, the treatment of unearned premiums of title insurance companies is clarified. Section 832(b)(4) does not apply to amounts denominated as unearned premiums by a title insurance company (including amounts characterized under State law as unearned premium reserves). Rather, such reserves are to be treated as reserves for unpaid losses subject to the new discounting rules. To the extent that the amount of such reserves is in excess of the unpaid loss reserves necessary for the protection of policyholders, it is not treated as a reserve amount.

Effective dates

Under the Senate amendment, the provisions relating to the treatment of loss reserve deductions for property and casualty companies apply to taxable years beginning after December 31, 1986.

Under the Senate amendment, a transitional rule is provided with respect to the unpaid losses on outstanding business before the effective date of the provision. Under this transitional rule, for purposes of calculating a company's change in unpaid losses with respect to outstanding business, the unpaid losses are determined as if the discounting provisions had applied to the unpaid losses (and unpaid expenses) in the last taxable year beginning before January 1, 1987. In addition, the interest rate and loss payment pattern assumptions with respect to such outstanding business are to be computed by using the rate and loss payment pattern applicable to accident years ending in 1987.

Further, the bill provides a fresh start adjustment with respect to undiscounted loss reserves applicable to the last taxable year beginning before January 1, 1987. Under this fresh start rule, the difference between the amount of undiscounted unpaid loss reserves and unpaid expenses (the recomputed reserves) at the end of the last taxable year beginning before January 1, 1987, and the amount of the discounted balances determined under the transitional rule, are not taken into account for purposes of determining the taxable income of an insurance company after the effective date.

Such fresh start adjustment is to be taken into account in full in the first taxable year to which the discounting provisions apply (i.e., the first taxable year beginning after December 31, 1986), for purposes of calculating any adjustment to earnings and profits. Any reserve strengthening after March 1, 1986, is to be treated as reserve strengthening for the first taxable year beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, with modifications.

Interest rate

Under the conference agreement, the interest rate to be used for purposes of applying the discounting methodology to a line of business is equal to 100 percent of the average of the applicable Federal mid-term rates (as defined in sec. 1274(d) converted to a rate based on annual compounding) effective as of the beginning of each of the calendar months in the base period. The base period means the most recent 60 calendar months ending before the beginning of the calendar year for which the determination is made. However, no calendar month before August 1986 is included in the base period. For accident years of a company beginning before or in 1987, the rate to be applied is 100 percent of the average of the applicable Federal mid-term rates effective as of the beginning of the 5 last calendar months of 1986.

Loss payment patterns

The conference agreement follows the Senate amendment provision requiring the Secretary of the Treasury to determine a loss payment pattern with respect to each line of business reported on Schedules O and P for calendar year 1987 and each 5th calendar year after 1987.

In the case of unallocated reinsurance and international lines of business, the conference agreement provides that the discounting provisions are implemented on the basis of composite discount factors derived by combining the payment patterns for all Schedule P lines. The conference agreement clarifies that international and reinsurance business that is allocated to a particular line of business and taken account of as part of that line of business is discounted in accord-

ance with the rules applicable to that line of business, not the general rules applicable to unallocated international and reinsurance business. Thus, for example, reinsurance of accident and health business that is allocated to that line of business as reported on the annual statement of the taxpayer is subject to the discounting rules applicable to that line of business. The Treasury Department may, by regulation, address the treatment of distortions in the loss payment patterns arising where, for example, reinsurance of "short tail" business is allocated to that line of business and reinsurance of "long tail" business is unallocated, or vice versa.

In the case of life insurance companies and property and casualty companies with respect to the types of accident and health insurance coverage (other than disability insurance) that are not currently subject to the life insurance company reserve requirements (such as cancellable accident and health coverage), such coverage is subject to the discounting provisions for property and casualty insurance companies with the clarification that life insurance companies may not deduct loss adjustment expenses that do not meet the all-events test applicable under sec. 461 of the Code. Thus, it is not intended that noncancellable accident and health insurance business currently subject to life insurance reserve rules (sec. 807(d)) be subject to discounting under the property and casualty discounting methodology. Similarly, life insurance companies are not intended to be permitted to deduct loss adjustment expenses by virtue of the application of the property and casualty discounting methodology with respect to cancellable accident and health insurance business, if any, of such companies.

Election to use historical experience

The conference agreement follows the Senate amendment with respect to the provision that a taxpayer may elect to apply discounting with respect to the taxpayer's own historical loss payment pattern. Authority is granted to provide in Treasury regulations that an election under this provision does not apply to a line of business in which the taxpayer does not have sufficient historical experience. Generally, it is intended that the election be available only for those lines of business for which the taxpayer's own historical experience is statistically significant. Thus, if the taxpayer's business in any line of business does not represent a meaningful portion of the total industry-wide business in that line of business, then it is intended that the election not apply with respect to that line of business. Generally, a meaningful portion would be a portion representing business in at least the 10th percentile of industry-wide reserves for a line of business for the determination year with respect to which the election is made. That is, no election would be permitted for any line of business where 90 percent of taxpayers that have reserves in that line of business, have reserves that are bigger than those of the taxpayer for the line of business for the determination year.

Extension of payment pattern for long-tail lines

The conference agreement follows the Senate amendment with respect to the discounting period for certain long-tail lines of business, with a modification. The conference agreement provides that, if the amount of losses treated as paid in the penultimate year of the payment pattern is zero or negative, then the the average of the amounts treated as paid in the 3 penultimate years of the payment pattern is the amount taken into account, for purposes of extending the loss payment pattern by up to an additional 5 years. In the event that the average of the 3 years gives rise to a negative number for any line of business, additional preceding years of the payment pattern should be averaged in successively, until the average is a positive number. This rule applies to the extension of all payment patterns, including those where the taxpayer has elected to determine its loss payment patterns on the basis of its own historical experience.

The following example illustrates the appropriate methodology for determining a payment pattern for a line of business for any given accident year. In the case of an electing taxpayer, the data used would be the annual statement data for the line of business reported on the taxpayer's most recently filed annual statement. Example 1 illustrates the development of a payment pattern for a Schedule P line, and example 2 illustrates the development of a payment pattern for a Schedule O line of business.

Example 1: payment pattern for Schedule P line

The development of reserve discount factors for a Schedule P line of business is illustrated in Table 1. This example is based on the 1985 consolidated industry totals for automobile liability. The 1985 annual statement is used because it contains the most recent loss development data.

Table 1.—Reserve Discount Factor Development, Automobile Liability

[Discount rate is assumed to be 7 percent per annum]

Years before current year	Year loss incurred	Loss and loss expense payments to date (thousands)	Total losses and loss expense incurred [1] (thousands)	Percentage				
				Cumulative fraction of loss paid [2] (percent)	Fraction of loss paid during year [3] (percent)	Fraction of loss unpaid, year-end (percent)	Discounted fraction unpaid, year-end (percent)	Reserve discount factor [4] (percent)
AY+0	1985	$10,734,519	$31,281,287	34.3161	34.3161	65.6839	58.7454	89.4365
AY+1	1984	10,397,279	28,217,053	65.1992	30.8831	34.8008	30.9119	88.8251
AY+2	1983	20,047,248	24,986,353	80.2335	15.0343	19.7665	17.5241	88.6555
AY+3	1982	19,808,529	22,243,403	89.0535	8.8200	10.9465	9.6273	87.9486
AY+4	1981	18,974,882	20,225,272	93.8149	4.7614	6.1851	5.3760	86.9181
AY+5	1980	17,105,852	17,717,213	96.5493	2.7344	3.4507	2.9238	84.7308
AY+6	1979	16,266,022	16,633,374	97.7915	1.2422	2.2085	1.8435	83.4743
AY+7	1978	14,534,843	14,766,868	98.4287	.6372	1.5713	1.3135	83.5901
AY+8	1977	12,853,464	13,027,563	98.6636	.2349	1.3364	1.1624	86.9808
AY+9	1976	11,389,407	11,506,437	98.9829	.3193	1.0171	.9135	89.8135
AY+10	Pre76	91,306,371	91,545,592	NA	.3193	.6978	.6472	92.7417
AY+11	NA	NA	NA	NA	.3193	.3785	.3622	95.6845
AY+12	NA	NA	NA	NA	.3193	.0592	.0572	96.6736
AY+13	NA	NA	NA	NA	.0592	0	0	96.6736

[1] "Total losses and loss expense incurred" equals "loss and loss expense payments" plus "losses unpaid" plus "loss expense unpaid" as defined in Schedule P.
[2] "Cumulative fraction of loss paid" equals ratio of "loss and loss expense payments" to "total losses and loss expense incurred".
[3] "Fraction of loss paid during year" equals the change in the "cumulative fraction of loss paid" from the previous year for AY+0 through AY+9 (see text for computation after AY+9).
[4] The reserve discount factor is 96.6736 in AY+12 and all subsequent years.

Schedule P of the 1985 annual statement itemizes "loss and loss expense payments" and "total losses and loss expense incurred" for the 10-year period 1976-1985 and the total for all years before 1976 (see Table 1). The number of years that have passed since the accident year through the current year (1985) is shown in the first column of Table 1; for example, the year 1976 is referred to as AY+9. From these data, the cumulative fraction of loss and loss expense paid through 1985, for losses incurred in 1976-1985, is computed as the ratio of "loss and loss expense payments" to "total losses and loss expense incurred". For AY+0 through AY+9, the fraction of loss and expense paid during each accident year is estimated as the change in the cumulative fraction of loss and expense paid from the previous accident year. Since unpaid loss and loss expense at the end of AY+9 (1.0171 percent) exceeds the amount of loss and expense payments in AY+9 (0.3193 percent), the special rule for long-tail lines is applicable. Under this rule, unpaid loss and expenses at the end of AY+9 are deemed to be paid at at a rate of 0.3193 percent in AY+10 through AY+12, and the balance, 0.0592 percent, is deemed to be paid in AY+13.

The reserve discount factors are equal to the ratio of discounted unpaid losses to undiscounted unpaid losses in each accident year. For purposes of discounting, losses are deemed to be paid in the middle of the year. For example, if the discount rate is 7 percent, then the discounted unpaid loss in AY+11 is computed as the present value of losses deemed to be paid in AY+12 and AY+13:

$$0.3622 = \frac{0.3193}{1.07^{1/2}} + \frac{0.0592}{1.07^{3/2}}.$$

Consequently, as shown in Table 1, the reserve discount factor for AY+11 is 95.6845

percent, the ratio of discounted unpaid losses (0.3622 percent) to undiscounted unpaid losses (0.3785 percent) in AY+11. The reserve discount factor for the year that the last claim is deemed to be paid (AY+13), and for all subsequent years, is the reserve discount factor for the preceding year (96.6736 percent in AY+12).

Example 2: payment pattern for a schedule O line

The development of reserve discount factors for a schedule O line of business is illustrated in Table 2. This example is based on the 1985 consolidated industry totals for fire insurance. The 1985 annual statement is used because it contains the most recent loss development data.

Table 2.—Reserve Discount Factor Development, Fire Insurance

[Discount rate is assumed to be 7 percent per annum]

Years before current year	Year loss incurred	Net losses paid in year [1] (thousands)	Unpaid losses beginning year [2] (thousands)	Fraction unpaid loss paid in year [3] (percent)	Fraction of total loss paid in year [4] (percent)	Fraction of total loss unpaid, year-end (percent)	Discounted fraction unpaid, year-end (percent)	Reserve discount factor [5] (percent)
AY+0	1985	$1,182,445	$2,142,829	55.1815	55.1815	44.8185	42.1950	94.1464
AY+1	1984	687,222	944,426	72.7661	32.6127	12.2058	11.4138	93.5114
AY+2	Pre84	196,764	462,600	NA	6.1029	6.1029	5.8999	96.6736
AY+3		NA	NA	NA	6.1029	0	0	96.6736

[1] "Net losses paid in year" equals "losses paid during the year less reinsurance received during the year" less "salvage and subrogration received in the current year" as defined in Schedule O.
[2] "Unpaid losses, beginning year" equals "net losses paid in year" plus "losses unpaid" as defined in Schedule O.
[3] "Fraction unpaid loss paid in year" equals ratio of "net losses paid in year" to "unpaid losses, beginning year".
[4] "Fraction of total loss paid in year" equals "fraction unpaid loss paid in year" times previous year's "fraction of total loss unpaid, year-end" for AY+0 and AY+1 (see text for computation after AY+1).
[5] The reserve discount factor is 96.6736 in AY+2 and all subsequent years.

Schedule O of the 1985 annual statement itemizes "losses paid" and "losses unpaid" for the 2-year period 1984-1985 and the total for all years before 1984 (see Table 2).[1] The number of years that have passed since the accident year through the current year (1985) is shown in the first column of Table 2; for example, the year 1984 is referred to as AY+1. From these data, the fraction of unpaid losses paid in 1985, for losses incurred in 1984 and 1985, is computed as the ratio of "net losses paid in year" to "unpaid losses, beginning year". For AY+0 and AY+1, the fraction of total loss paid in the current year is estimated as the fraction of unpaid losses paid in the current year times the previous year's fraction of total loss unpaid at year-end. The fraction of loss paid during AY+2 and AY+3 is deemed to be one-half of the fraction of total loss unpaid at the end of AY+1 (6.1029 percent equals one-half of 12.2058 percent).

The reserve discount factors are equal to the ratio of discounted unpaid losses to undiscounted unpaid losses in each accident year. For purposes of discounting, losses are deemed to be paid in the middle of the year. For example, if the discount rate is 7 percent, then the discounted unpaid loss in AY+1 is computed as the present value of losses deemed to be paid in AY+2 and AY+3:

$$11.4138 = \frac{6.1029}{1.07^{1/2}} + \frac{6.1029}{1.07^{3/2}}.$$

Consequently, as shown in Table 2, the reserve discount factor for AY+1 is 93.5114 percent, the ratio of discounted unpaid losses (11.4138 percent) to undiscounted unpaid losses (12.2058 percent) in AY+1. The reserve discount factor for the year that the last claim is deemed to be paid (AY+3), and for all subsequent years, is the reserve discount factor for the preceding year (96.6736 percent in AY+2).

[1] Part 1 of Schedule O contains data on losses; part 2 contains data on loss adjustment expense. In this example, loss adjustment expense is disregarded because the consolidated industry totals for part 2 data are not published. A taxpayer electing its own experience is required to compute reserve discount factors using combined loss and loss expense development data.

Title insurance reserves

In the case of title insurers, the conference agreement provides that the amount of the taxpayer's unearned premium reserve determined under present law is subject to discounting at the rate generally applicable to property and casualty insurers loss reserves.[2] The amount of the unearned premium reserve subject to discounting is the amount shown on the yearly statement filed for State insurance regulatory purposes for the year ending with or within the taxable year. The loss payment pattern to be applied for purposes of discounting these reserve amounts is the period and pattern over which such reserves for that year are to be included in income in accordance with applicable State law. The rate and amount of inclusion in income for statutory accounting purposes is considered to determine the timing of and amount of releases from such reserve which are included in income for income tax purposes. The applicable interest rate is the rate applicable, for the year the premiums are received, under the loss reserve discounting rules applicable to property and casualty insurance companies.

Title insurance case reserves (i.e., known claims reserves) are subject to discounting under the provisions generally applicable to property and casualty insurance loss reserves.

A fresh start for discounting title insurance reserves is provided, calculated in a manner similar to the fresh start for other property and casualty company loss reserves.

This treatment is provided for title insurance reserves because of the deferral and the consequent failure to acknowledge the time value of money which results under present law with respect to title insurance unearned premium reserves.

Fresh start adjustment

The conference agreement follows the Senate amendment with respect to providing a fresh start adjustment — i.e., a forgiveness of income — for the reduction in reserves resulting from discounting the opening reserves in the first post-effective date taxable year of the provision. The conference agreement modifies the Senate amendment with respect to the treatment of reserve strengthening under the fresh start income forgiveness provision. Under the conference agreement, reserve strengthening in taxable years beginning after December 31, 1985, is not treated as a reserve amount for purposes of determining the amount of the fresh start. Instead, such reserve strengthening additions to loss reserves in taxable years beginning in 1986 are treated as changes to reserves in taxable years beginning in 1987, and are subject to discounting. Reserve strengthening is considered to include all additions to reserves attributable to an increase in an estimate of a reserve established for a prior accident year (taking into account claims paid with respect to that accident year), and all additions to reserves resulting from a change in the assumptions (other than changes in assumed interest rates applicable to reserves for the 1986 accident year) used in estimating losses for the 1986 accident year, as well as all unspecified or unallocated additions to loss reserves. This provision is intended to prevent taxpayers from artificially increasing the amount of income that is forgiven under the fresh start provision.

The amount of the fresh start forgiveness of income is included in earnings and profits for the taxpayer's first taxable year beginning after December 31, 1986.

Effective date

The loss reserve discounting provisions are effective for taxable years beginning after December 31, 1986.

4. Treatment of net gain from operations

Present Law

No special provision of present law requires that the taxable income of a property and casualty insurance company bear a relationship to its net gain from operations as reported on its annual statement for financial accounting purposes.

House Bill

The House bill requires that the taxable income of a property and casualty company must bear a relationship to the company's net gain from operations (as reported on the company's annual statement for accounting purposes). This rule provides that regular taxable income of a property and casualty insurance company is not less than 20/36 of its adjusted net gain from operations, and its regular taxable loss is not more than 20/36 of its adjusted net loss from operations, as set forth in its annual statement. Tax-

[2] No inference is intended with respect to the applicability of Rev. Ruls. 83-174 and 84-107, above.

exempt income and the deductible portion of certain dividends received attributable to investments made before November 15, 1985, are excluded from adjusted net gain or loss from operations.

Pre-effective date loss carryovers may not be applied against post-effective date income, and consolidated taxable income of property and casualty members of an affiliated group is generally determined separately before being taken into account in determining consolidated taxable income of the entire consolidated group.

The provision is effective for taxable years beginning after December 31, 1987.

Senate Amendment

No provision.

Conference Agreement

The conference agreement does not include the House bill provision.

5. Limiting policyholder dividend deduction for mutual companies

Present Law

Under present law, property and casualty insurance companies are generally permitted to deduct dividends and similar distributions paid or declared to policyholders in their capacity as such. Stock companies may not, however, fully deduct dividends paid to shareholders. Policyholder dividends and shareholder dividends are treated differently for tax purposes at the distributee level as well as at the company level. Policyholder dividends are generally considered price rebates and are not taxable distributions (unless the insurance premiums were deducted by the policyholder). Dividends paid to shareholders in their capacity as shareholders, on the other hand, constitute ordinary income to the recipient shareholders to the extent of the distributing corporation's earnings and profits. Unlike mutual property and casualty companies, however, mutual life insurance companies must reduce the amount of deductible policyholder dividends by an amount intended to reflect the portion of the distribution allocable to the companies' earnings on equity (as distinguished from the proportion which is a policyholder rebate).

House Bill

The Treasury Department is required to conduct a study of the tax treatment of policyholder dividends by mutual property and casualty insurance companies. The results of the study, together with recommendations, are to be submitted to the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, and the Joint Committee on Taxation no later than January 1, 1987.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill, with modifications. The scope of the study is expanded to cover corporate minimum tax issues as well as regular tax issues relating to the tax treatment of policyholder dividends of mutual property and casualty insurance companies. In addition, the study is to cover the operation and effectiveness of the conference agreement provisions relating to the regular and minimum tax of property and casualty insurance companies, and is to examine whether the revenue targets projected for the provisions are met. The study is due January 1, 1989.

6. Protection against loss account for mutual companies

Present Law

Mutual property and casualty insurance companies are permitted a deduction for contributions (which are bookkeeping entries) to a protection against loss ("PAL") account (sec. 824). The amount of the deduction is equal to the sum of 1 percent of the underwriting losses for the year plus 25 percent of statutory underwriting income, plus certain windstorm and other losses. In general, certain contributions to the PAL account are taken into income after a 5-year period. The PAL account thus effects a 5-year deferral (and, in some cases, a permanent deferral) of a portion of mutual company underwriting income.

House Bill

Under the House bill, the deduction for contributions to a PAL account (sec. 824) is repealed. PAL account balances are includible in income over the first 5 taxable years beginning after December 31, 1985. The amount includible is the greater of the amount includible for the year had the subtraction provisions of section 824 remained in effect (but no further additions had been made), or an amount equal to a required percentage of the balance remaining in the account at the close of the preceding taxable year. For taxable years beginning in 1986, the required percentage is 20; for 1987, 40; for 1988, 60; for 1989, 80; and for 1990, 100.

The repeal of the deduction for contributions to a PAL account is effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that the required percentage for 1987 is 20; for 1988, 25; for 1989, 33-1/3; for 1990, 50; and for 1991, 100.

The repeal of the deduction for contributions to a PAL account is effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, effective for taxable year beginning after December 31, 1986, except that, with respect to recovery of amounts contributed to PAL accounts in taxable years beginning before December 31, 1986, the conference agreement provides that such amounts are recovered and included in income in accordance with present law (as if sec. 824 remained in effect). Therefore the ratable inclusion rule in the House bill and the Senate amendment is not adopted. The provision is effective with respect to taxable years beginning after December 31, 1986.

7. Special exemptions, rates, and deductions of small companies

Present Law

Under present law, mutual property and casualty companies are classified into three categories depending upon the amounts of the gross receipts. Mutual companies with certain gross receipts not in excess of $150,000 are tax-exempt (sec. 501(c)(15)). Companies whose gross receipts exceed $150,000 but do not exceed $500,000 are "small mutuals" and generally are taxed solely on investment income. This provision does not apply to any mutual company that has a balance in its PAL account, or that, pursuant to a special election, chooses to be taxed on both its underwriting and investment income. Additionally, small mutuals which are subject to tax because their gross receipts exceed $150,000 may claim the benefit of a special rule which phases in the regular tax on investment income as gross receipts increase from $150,000 to $250,000. Companies whose gross receipts exceed $500,000 are ordinary mutuals taxed on both investment and underwriting income. Mutual reciprocal underwriters or interinsurers are generally taxed as mutual insurance companies, subject to special rules (sec. 826).

Like stock companies, ordinary mutuals generally are subject to the regular corporate income tax rates. Mutuals whose taxable income does not exceed $12,000 pay tax at a lower rate. No tax is imposed on the first $6,000 of taxable income, and a tax of 30 percent is imposed on the next $6,000 of taxable income. For small mutual companies which are taxable on investment income, no tax is imposed on the first $3,000 of taxable investment income, and a tax of 30 percent is imposed on taxable investment income between $3,000 and $6,000.

Mutual companies that receive a gross amount from premiums and certain investment income of less than $1,100,000 are allowed a special deduction against their underwriting income (if it is subject to tax). The maximum amount of the deduction is $6,000, and the deduction phases out as the gross amount increases from $500,000 to $1,100,000.

House Bill

The House bill provides that mutual and stock property and casualty companies are eligible for exemption from tax if their net written premiums or direct written premiums (whichever is greater) do not exceed $500,000.

In addition, the House bill repeals the special rates, deductions and exemptions for small mutual companies and substitutes a single provision (sec. 847 of the Code). The new provision allows mutual and stock companies with net written premiums or direct written premiums (whichever is greater) in excess of $500,000 but less than $2 million to elect to be taxed only on taxable investment income. To determine the amount of direct or net written premiums of a member of a controlled group of corporations, the direct or net written premiums of all members of the controlled group are aggregated.

The provisions are effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that the $500,000 threshold is reduced to $350,000 and the $2 million threshold is reduced to $1,200,000. The provisions are effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, effective for taxable year beginning after December 31, 1986, with the modification that, in determining whether a taxpayer is a member of a controlled group of corporations for purposes of eligibility for the provision, a 50 percent ownership test applies.

Parts II and III of Subchapter L of the Code are consolidated into Part II, under the conference agreement. Part II of Subchapter L relates generally to taxation of property and casualty insurance companies.

8. Physicians' and surgeons' mutual protection associations

Present Law

In general, the gross income of a mutual insurance company (other than a life insurance company) includes gross premiums and other consideration, gross investment income, and gain from the sale or other disposition of property. Present law provides a special deduction for dividends and similar distributions paid to policyholders in their capacity as such.

In the case of corporations, gross income does not include any contribution to capital (sec. 118). However, the provisions covering the taxation of nonlife mutual insurance companies have no specific provisions regarding paid-in capital or the distribution of such capital.

Under present law, premiums for liability insurance in carrying on any trade or business generally are deductible in the year they are paid or incurred if they represent ordinary and necessary business expenses and are not capital expenditures. For example, annual premiums paid by a physician for medical malpractice insurance generally are deductible. No deduction is allowed as an expense paid or incurred during the taxable year for a contribution to capital.

House Bill

No provision.

Senate Amendment

Contributions to a pooled malpractice insurance association are currently deductible to the extent they do not exceed the cost of a commercial insurance premium for annual coverage and are included in the association's income. Refunds of such contributions are deductible to the fund only to the extent included in income of the recipient. The provision applies to associations operating under State law prior to January 1, 1984.

The provision is effective for contributions and refunds after the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment, effective for contributions and refunds after the date of enactment.

TITLE XI—PENSIONS AND DEFERRED COMPENSATION; EMPLOYEE BENEFITS; EMPLOYEE STOCK OWNERSHIP PLANS (ESOPs)

A. Limitations on Treatment of Tax-Favored Savings

1. Individual Retirement Arrangements (IRAs)

Present Law

IRA deduction limit

Under present law (Code sec. 219), an individual who has not attained age 70½ generally is entitled to deduct from gross income (within limits) the amount contributed to an individual retirement arrangement (an IRA). The limit on the deduction for a taxable year generally is the lesser of $2,000 or 100 percent of compensation (earned income, in the case of income from self-employment).

Prior to the Economic Recovery Tax Act of 1981 (ERTA), deductible IRA contributions were not permitted for any taxable year if an individual, for any part of the taxable year, was an active participant in a qualified pension, profit-sharing, or stock bonus plan (sec. 401(a)), a tax-sheltered annuity program (sec. 403(b)), a qualified annuity plan (sec. 403(a)), or a governmental plan (whether or not tax qualified). Nondeductible IRA contributions were not permitted.

ERTA provided that deductible IRA contributions (within limits) could be made by all individuals, without regard to whether an individual is covered under an employer's retirement plan.

Spousal IRA deduction

Under a spousal IRA, an individual is allowed an additional deduction for contributions to an IRA for the benefit of the individual's spouse if (1) the spouse has no compensation for the year; (2) the spouse has not attained age 70½; and (3) the couple files a joint income tax return for the year. If deductible contributions are made (1) to an individual's IRA and (2) to an IRA for the noncompensated spouse of the individual (a spousal IRA), then the annual deduction limit on the couple's joint return is increased to the lesser of $2,250 or 100 percent of compensation includible in gross income. The annual contribution may be divided as the spouses choose, so long as the contribution for neither spouse exceeds $2,000. If a spouse has a small amount of compensation, including amounts less than $250, the spousal IRA deduction is not available.

Interest on loans to make IRA contributions

Under present law, no deduction is allowed for interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from tax (sec. 265(2)). This provision does not apply to amounts borrowed to make IRA contributions because the interest on an IRA is not wholly exempt from tax, but instead the tax is deferred until income is withdrawn from the IRA.

Qualified voluntary employee contributions

Present law allows an employee who is a participant in a qualified plan, tax-sheltered annuity program, or government plan, a deduction for qualified voluntary employee contributions made by or on behalf of the employee to the plan. The deduction allowed for contributions to an IRA is reduced by the amount of deductible voluntary employee contributions to a plan. Thus, the deduction allowed for the total of (1) an employee's contributions to an IRA and (2) the employee's qualified voluntary employee contributions to a plan (or plans) for a year, generally is limited to the lesser of $2,000 or 100 percent of compensation for the year.

Acquisition of gold and silver coins

Present law provides that the acquisition by an IRA of any collectible is treated as a distribution from the IRA equal to the cost of the collectible and is includible in the IRA owner's income for the year in which the cost is deemed distributed. A collectible includes any stamp or coin, including stamps or coins issued by the United States.

House Bill

Coordination of IRA deductions with elective deferrals

Under the House bill, an individual's IRA deduction limit for a taxable year is reduced, dollar for dollar, by the amount of an individual's elective 401(k) or 403(b) deferrals for such year. In the case of an individual claiming a spousal IRA deduction for a taxable year, the amount of the reduction is limited to the first $2,000 of the individual's elective deferrals plus the amount (if any) of the spouse's elective deferrals for the year.

Elective 401(k) or 403(b) deferrals include, with respect to any taxable year, the sum of (1) an individual's elective deferrals under a qualified cash or deferred arrangement (to the extent the deferrals are not currently included in income under section 402(a)(8)), and (2) any contribution to a tax-sheltered annuity made pursuant to a salary reduction agreement (to the extent the contribution is not currently included in income under section 403(b)), whether or not the salary reduction agreement is evidenced by a written agreement or otherwise (see sec. 3121(a)(5)(D)).

Spousal IRA deduction

Under the House bill, the spousal IRA provision is amended to eliminate the requirement that the spouse have no compensation for the year in order to be eligible for the spousal IRA contribution. Therefore, under the bill, the spousal IRA is available either if (1) the spouse has no compensation for the taxable year, or (2) the spouse elects to be treated for the taxable year as having no compensation.

For purposes of this provision, if a spousal IRA deduction is claimed on a couple's tax return for the taxable year, the spouse for whom the deduction is claimed is deemed to have elected to be treated as having no compensation.

Effective dates

The provisions generally are effective for taxable years beginning after December 31, 1985. A special effective date is provided for purposes of the provision coordinating elective deferrals with the IRA deduction limit in the case of certain elective deferrals under a plan maintained pursuant to one or more collective bargaining agreements ratified before November 22, 1985.

Senate Amendment

IRA deduction not available to active participants

Under the Senate amendment, no deductible IRA contribution may be made for any taxable year if an individual is an active participant in an employer-maintained retirement plan for any part of the plan year ending with or within the individual's taxable year. For purposes of this rule, an employer-maintained retirement plan means (1) a qualified pension, profit-sharing, or stock bonus plan, (2) a qualified annuity plan (sec. 403(a)), (3) a simplified employee pension (sec. 408(k)), (4) a plan established for its employees by the United States, by a State or political subdivision, or by any agency or instrumentality of the United States or a State or political subdivision, (5) a plan described in section 501(c)(18), or (6) a tax-sheltered annuity (sec. 403(b)).

The Senate amendment follows the pre-ERTA rule for determining whether an individual is an active participant in an employer-maintained retirement plan.

In the case of a defined benefit pension plan, an individual is treated as an active participant if the individual is not excluded under the eligibility requirements under the plan for any part of the plan year ending with or within the individual's taxable year. Thus, for example, if an individual satisfies the conditions for eligibility under a defined benefit pension plan, but is required to make an employee contribution to accrue any benefit attributable to employer contributions under the plan, the individual is treated as an active participant even if no employee contribution is made and, thus, no benefit is accrued for the plan year.

Under a money purchase pension plan, an individual is an active participant if any employer contribution or forfeiture is required to be allocated to the individual's account

with respect to the plan year ending with or within the individual's taxable year, even if the individual is not employed at any time during the plan year (e.g., contributions are continued on behalf of a permanently disabled employee (sec. 415(c)(3)(C)) or the individual's taxable year (e.g., the individual separates from service before the beginning of the taxable year).

An individual is treated as an active participant under a profit-sharing or stock bonus plan if any employer contribution is added or any forfeiture is allocated to the individual's account during the individual's taxable year. A contribution is added to an individual's account on the later of the date the contribution is made or is allocated.

Finally, an individual is treated as an active participant for any taxable year in which the individual makes a voluntary or mandatory employer contribution. An individual is not treated as an active participant if earnings (rather than contributions or forfeitures) are allocated to the individual's account.

The determination of whether an individual is an active participant or whether amounts are contributed on the individual's behalf is made without regard to whether the individual's rights to benefits under a plan are nonforfeitable.

Nondeductible contributions to IRAs permitted

Under the Senate amendment, individuals who are active participants (and who, therefore, are not eligible to make deductible IRA contributions for a taxable year) may make designated nondeductible IRA contributions. The limit on designated nondeductible contributions for a taxable year is the lesser of 100 percent of compensation (earned income in the case of a self-employed individual) or $2,000 ($2,250 in the case of an additional contribution to a spousal IRA).

Spousal IRA deduction

The Senate amendment is the same as the House bill with respect to the spousal IRA deduction.

Interest on loans to make IRA contributions

The Senate amendment provides that no deduction is allowed for interest on indebtedness incurred or continued to make an IRA contribution. Under the Senate amendment, the interest deduction is denied whether or not a deduction is allowed for the IRA contribution.

Qualified voluntary employee contributions

Under the Senate amendment, the rules permitting deductible employee contributions analogous to deductible IRA contributions are repealed.

Acquisition of gold and silver coins

The Senate amendment exempts any gold or silver coin issued by the United States from the rules relating to IRA investments in collectibles.

Effective dates

The provisions generally are effective for taxable years beginning after December 31, 1986.

Conference Agreement

IRA deduction not available to active participants

The conference agreement generally follows the Senate amendment with modifications to retain the present-law IRA provisions for taxpayers with adjusted gross income (AGI) below certain levels, and to reduce the IRA deduction for active participants with AGI above those levels.

Under the conference agreement, an individual is permitted to make deductible IRA contributions up to the lesser of $2,000 or 100 percent of compensation (earned income, in the case of a self-employed individual) if (1) the individual (or a married couple if a joint return is filed) has AGI that does not exceed an applicable dollar amount, or (2) the individual is not an active participant (or, in the case of a married individual filing a joint return, neither the individual nor the individual's spouse is an active participant) in an employer-maintained retirement plan for any part of the plan year ending with or within the individual's taxable year.

The applicable dollar amount is (1) $25,000, in the case of an individual, (2) $40,000, in the case of a married couple filing a joint return, and (3) $0, in the case of a married couple filing separately. The IRA deduction limit is reduced by an amount that bears the same ratio to the applicable dollar limit as the taxpayer's AGI in excess of the applicable dollar amount (or, in the case of a married couple filing a joint return, the couple's AGI in excess of the applicable dollar amount) bears to $10,000. Thus, under the conference agreement, in the case of an active participant, the IRA deduction limit is $0 for (1) individuals with AGI above $35,000, (2) married couples filing a joint return with AGI above $50,000, and (3) married couples filing separately if a spouse has AGI above $10,000.

Under the conference agreement, the spousal IRA deduction limit is also proportionately reduced for AGI above the applicable dollar amount. Thus, the spousal IRA deduction limit (i.e., $2,250) is reduced by an amount that bears the same ratio to $2,250 as the excess of AGI over the applicable dollar amount bears to $10,000.

The deduction limit is rounded to the next lowest $10 in the case of a limit that is not a multiple of $10. In addition, the conference agreement provides a $200 floor on the IRA deduction limit for individuals whose AGI is not above the phaseout range. For example, an individual with AGI of $34,500 has an IRA deduction limit of $200 even though the phaseout would otherwise provide an IRA deduction limit of $100.

AGI, for purposes of determining the IRA deduction limit, is calculated without regard to any deductible IRA contributions made for the taxable year, but with regard to any taxable social security benefits (sec. 86) and with regard to any passive loss limitations (new sec. 469). In other words, AGI is calculated in the following order: (1) for purposes of the limitations on passive loss deductions, (2) for purposes of the amount of social security benefits that are taxable, and (3) for purposes of the IRA deduction limit.

The conference agreement clarifies that an unfunded deferred compensation plan of a State or local government or a tax-exempt organization (sec. 457) is not considered a plan established for its employees by a State or political subdivision, or by an agency or instrumentality of a State or political subdivision. As under the Senate amendment, the determination of active participant status under the conference agreement is made without regard to whether an individual's rights under an employer-maintained retirement plan are nonforfeitable (i.e., vested).

The conference agreement clarifies that, for purposes of the active participant rule, elective contributions (such as elective deferrals under a qualified cash or deferred arrangement) are treated as employer contributions.

The conference agreement clarifies that an individual is considered an active participant in a defined benefit plan if the individual is eligible to participate in the plan, even if the individual elects not to participate.

Under the conference agreement, the present-law rule relating to the time that contributions are required to be made is retained. Therefore, an individual may make IRA contributions for a taxable year up to the due date of the individual's tax return for the taxable year without extensions. Of course, as under present law, the individual is required to designate the taxable year to which an IRA contribution relates when making the contribution.

The provision is effective for taxable years beginning after December 31, 1986. A taxpayer may make an IRA contribution for the 1986 taxable year up to the due date of the taxpayer's 1986 tax return (without extensions) under the present-law IRA rules.

Nondeductible contributions permitted to IRAs

As under the Senate amendment, the conference agreement permits individuals to make designated nondeductible IRA contributions to the extent that deductible contributions are not allowed. Thus, an individual may make nondeductible contributions to the extent of the excess of (1) the lesser of $2,000 or 100 percent of compensation over (2) the IRA deduction limit with respect to the individual. The nondeductible IRA limit is $2,250, in the case of a spousal IRA.

In addition, the conference agreement permits a taxpayer to elect to treat deductible IRA contributions as nondeductible. An individual might make such an election, for example, if the individual had no taxable income for the year after taking into account other deductions.

Under the conference agreement, a designated nondeductible contribution means any contribution to an IRA for a taxable year that is designated as a nondeductible contribution in the manner prescribed by the Secretary. The designation is to be made on the individual's tax return for the taxable year to which the designation relates. Designated nondeductible contributions may be made up to the due date of the individual's tax return for the taxable year (without extensions).

An individual who files an amended return for a taxable year may change the designation of IRA contributions from deductible to nondeductible or vice versa. Such an amended return is to be treated as a return filed for the taxable year to which the return relates. Of course, under the usual rules, any increased tax liability that the individual may owe as a result of such a change in designation is to accompany the amended return.

An individual who makes a designated nondeductible contribution to an IRA for a taxable year or who receives a distribution from an IRA during a taxable year is required to provide such information as the Secretary may prescribe on the individual's tax return for the taxable year and, to the extent required, for succeeding taxable years. The information that may be required includes, but is not limited to (1) the amount of designated nondeductible contributions for the taxable year, (2) the aggregate amount of designated nondeductible contributions for all preceding taxable years which have not previously been withdrawn, (3) the aggregate balance of all IRAs of the individual as of the close of the calendar

year with or within which the taxable year ends, and (4) the amount of distributions from IRAs during the taxable year.

If the required information is not provided on the individual's tax return for a taxable year, then all IRA contributions are presumed to have been deductible and, therefore, are taxable upon withdrawal from the IRA. The taxpayer can rebut this presumption with satisfactory evidence that the contributions were nondeductible.

Amounts withdrawn from an IRA during a taxable year are includible in income for the taxable year under rules similar to the rules applicable to qualified plans under section 72. Under special rules applicable to IRAs for purposes of section 72, (1) all IRAs of an individual are treated as one contract, (2) all distributions during a taxable year are treated as one distribution, (3) the value of the contract (calculated after adding back distributions during the year), income on the contract, and investment in the contract is computed as of the close of the calendar year with or within which the taxable year ends, and (4) the aggregate amount of withdrawals excludable from income for all taxable years shall not exceed the taxpayer's investment in the contract for all taxable years. The conference agreement provides that, if an individual withdraws an amount from an IRA during a taxable year and the individual has previously made both deductible and nondeductible IRA contributions, then the amount includible in income for the taxable year is the portion of the amount withdrawn which bears the same ratio to the amount withdrawn for the taxable year as the individual's aggregate nondeductible IRA contributions bear to the aggregate balance of all IRAs of the individual (including rollover IRAs and SEPs).

In the case of a withdrawal from an IRA, for purposes of the rules relating to withholding on pensions, annuities, and certain other deferred income, the payor is to assume that the amount withdrawn is includible in income.

For example, assume that (1) an individual makes a $2,000 IRA contribution for the individual's 1987 tax year, $1,500 of which is deductible, (2) no withdrawals are made from the IRA during the taxable year, (3) the account balance at the end of the taxable year is $2,200, and (4) no prior IRA contributions have been made. The individual is required to report all such information on the individual's 1987 tax return. For 1988, assume (1) the individual makes a $2,000 IRA contribution to another IRA account, none of which is deductible, (2) no withdrawals are made from the IRA during the taxable year, and (3) the aggregate account balance at of the end of the taxable year for both IRAs is $4,600. In the individual's 1989 taxable year, no IRA contributions are made and $1,000 is withdrawn from the IRA to which the individual contributed during the 1987 taxable year. At the end of the 1989 taxable year, the aggregate account balance of both IRAs is $4,000. The $1,000 withdrawn from an IRA during the 1989 tax year is treated as partially a return of nondeductible contributions, calculated as the percentage of $1,000 that the total nondeductible contributions ($500 plus $2,000) is of the total account balance ($4,000) at the end of the taxable year plus distributions during the year ($1,000). Thus, 2,500/5,000 or ½ of the $1,000 withdrawal is treated as a return of nondeductible contributions (and, therefore, is not taxable).

Under the conference agreement, an individual who overstates the amount of designated nondeductible contributions made for any taxable year is subject to a $100 penalty for each such overstatement unless the individual can demonstrate that the overstatement was due to reasonable cause.

The trustee of an IRA is required to report certain information to the Secretary and to the individuals for whom an IRA is maintained for each calendar year. This information is to include (1) contributions made to the IRA during the calendar year, (2) distributions from the IRA occurring during the calendar year, and (3) the aggregate account balance as of the end of the calendar year. This information is required to be reported by the January 31 following the end of the calendar year. In the case of a failure to report the required information, as under present law, the penalty for the failure is $25 for each day during which the failure occurs, but the total amount imposed on any person for a failure to report is not to exceed $15,000.

The provisions are effective for contributions and distributions in taxable years beginning after December 31, 1986.

Spousal IRA deduction

The conference agreement follows the House bill and the Senate amendment, effective for taxable years beginning before, on, or after December 31, 1985.

Interest on loans to make IRA contributions

The conference agreement does not adopt the provision in the Senate amendment.

Qualified voluntary employee contributions

The conference agreement follows the Senate amendment, which repeals the deduction allowed for qualified voluntary employee contributions to qualified plan, effective for taxable years beginning after December 31, 1986.

Acquisition of gold and silver coins

The conference agreement follows the Senate amendment, effective for acquisitions of coins after December 31, 1986.

2. Qualified Cash or Deferred Arrangements

Present Law

Under present law, if a tax-qualified profit-sharing or stock bonus plan (or an eligible pre-ERISA money purchase pension plan) meets certain requirements described below (a "qualified cash or deferred arrangement"), then an employee is not required to include in income any employer contributions to the plan merely because the employee could have elected to receive the amount contributed in cash.

Nondiscrimination requirements

Under present law, special nondiscrimination tests apply a limit on elective deferrals that may be made by the group of highly compensated employees. This limit depends (in part) on the level of elective deferrals by nonhighly compensated employees. An employee is considered highly compensated, for this purpose, if the employee is one of the most highly compensated ⅓ of all employees eligible to defer under the arrangement. These nondiscrimination tests provide that the special treatment of elective deferrals is not available unless the cash or deferred arrangement does not disproportionately benefit highly compensated employees.

A cash or deferred arrangement meets these special nondiscrimination requirements for a plan year if (1) the actual deferral percentage for the highly compensated employees is not greater than 150 percent of the actual deferral percentage for the other eligible employees, or (2) the actual deferral percentage for the highly compensated employees does not exceed the lesser of (a) the actual deferral percentage for the other eligible employees plus 3 percentage points or (b) 250 percent of the actual deferral percentage for the other eligible employees. In calculating these deferral percentages, contributions by the employer may be taken into account as elective deferrals by employees if they (1) are nonforfeitable when made, (2) satisfy the withdrawal restrictions applicable to elective deferrals, and (3) separately satisfy the general nondiscrimination rules (sec. 401(a)(4)).

Withdrawal restrictions

Under present law, a participant in a qualified cash or deferred arrangement is not permitted to withdraw elective deferrals (and earnings thereon) prior to death, disability, separation from service, retirement, or (except in the case of a pre-ERISA money purchase pension plan) the attainment of age 59½ or the occurrence of a hardship.

Limit on elective deferrals

Elective deferrals under a qualified cash or deferred arrangement are subject to the overall limits on contributions to a defined contribution plan. Thus, under present law, the sum of an employee's elective deferrals and any other annual additions on behalf of the employee under all defined contribution plans maintained by the employer generally cannot exceed the lesser of $30,000 or 25 percent of the participant's nondeferred compensation.

House Bill

Limit on elective deferrals

Under the bill, the maximum amount that an employee can elect to defer for any taxable year under all cash or deferred arrangements in which the employee participates is limited to $7,000 a year. The $7,000 limit is coordinated with elective deferrals under tax-sheltered annuities and the annual deduction limit for IRA contributions.

If, in any taxable year, the total amount of elective deferrals contributed on behalf of an employee to any qualified cash or deferred arrangements and tax-sheltered annuities in which the employee participates exceeds $7,000, then the amounts in excess of $7,000 (the excess deferrals) are included in the employee's gross income for the year. In addition, with respect to any excess deferrals, by March 1 after the close of the employee's taxable year, the employee may allocate the excess deferrals among the qualified cash or deferred arrangements in which the employee participates and notify the administrator of each plan of the portion of the excess deferrals allocated to it. Further, not later than April 15 after the close of the employee's taxable year, each plan is to distribute to the employee the amount of the excess deferrals (plus income attributable to the excess) allocated to the plan.

Excess deferrals that are not distributed by the applicable April 15 date are not treated as employee contributions upon subsequent distribution even though such deferrals had been included in the employee's income. In addition, undistributed excess deferrals are treated as elective deferrals subject to the special nondiscrimination test.

Nondiscrimination requirements

In general

The bill modifies the special nondiscrimination tests applicable to qualified cash or

deferred arrangements by redefining the group of highly compensated employees and by modifying the special percentage tests.

Definition of highly compensated employees

The House bill provides a uniform definition of highly compensated employees for purposes of the nondiscrimination rules for qualified plans and employee benefit plans. (see the description in B.7., below).

Modification of nondiscrimination tests

The House bill alters the special nondiscrimination tests applicable to qualified cash or deferred arrangements so that the actual deferral percentage under a cash or deferred arrangement by highly compensated employees for a plan year may not exceed either (1) 125 percent of the actual deferral percentage of all nonhighly compensated employees eligible to defer under the arrangement, or (2) the lesser of 200 percent of the actual deferral percentage of all eligible nonhighly compensated employees or the actual deferral percentage for all eligible nonhighly compensated employees plus 2 percentage points.

Under the House bill, if a highly compensated employee participates in more than one qualified cash or deferred arrangement of an employer, the employee's actual deferral percentage for purposes of testing each arrangement under the special nondiscrimination tests is to be determined by aggregating the employee's elective deferrals under all of the arrangements of the employer.

Excess contributions

If the special nondiscrimination rules are not satisfied for any year, the House bill provides that the qualified cash or deferred arrangement will not be disqualified if the excess contributions (plus income allocable to the excess contributions) are distributed before the close of the following plan year. Distribution of the excess contributions may be made notwithstanding any other provision of law and the amount distributed is not subject to the additional income tax on early withdrawals.

Under the House bill, excess contributions mean, with respect to any plan year, the excess of the aggregate amount of elective deferrals paid to the cash or deferred arrangement and allocated to the accounts of highly compensated employees over the maximum amount of elective deferrals that could be allocated to the accounts of highly compensated employees without violating the nondiscrimination requirements applicable to the arrangement. To determine the amount of excess contributions and the employees to whom the excess contributions are to be distributed, the bill provides that the elective deferrals of highly compensated employees are reduced in the order of their actual deferral percentages beginning with those highly compensated employees with the highest actual deferral percentages. The excess contributions are to be distributed to those highly compensated employees for whom a reduction is made under the preceding sentence in order to satisfy the special nondiscrimination tests.

Excise tax on excess contributions

Under the House bill, a penalty tax is imposed on the employer making excess contributions to a qualified cash or deferred arrangement (sec. 4979). The tax is equal to 10 percent of the excess contributions under the arrangement for the plan year ending in the taxable year. However, the tax does not apply to any excess contributions that, together with income allocable to the excess contributions, are distributed no later than 2½ months after the close of the plan year to which the excess contributions relate.

Excess contributions (plus income) distributed within the applicable 2½ month period are to be treated as received and earned by the employee in the employee's taxable year in which the excess contributions, but for the employee's deferral election, would have been received as cash.

Other restrictions

The House bill includes several additional restrictions on qualified cash or deferred arrangements. First, no withdrawals generally are permitted under a qualified cash or deferred arrangement prior to death, disability, separation from service, bona fide plan termination or (except in the case of a pre-ERISA money purchase pension plan) the attainment of age 59½. However, a cash or deferred arrangement (other than a pre-ERISA money purchase pension plan) may permit hardship withdrawals from elective deferrals (but not income on the elective deferrals).

In addition, the House bill provides that a qualified cash or deferred arrangement cannot require, as a condition of participation in the arrangement, that an employee complete a period of service with the employer (or employers) maintaining the plan in excess of one year of service.

Under the House bill, an employer generally may not condition, either directly or indirectly, contributions and benefits (other than matching contributions in the plan of which that arrangement is a part) upon an employee's elective deferrals.

The House bill clarifies that qualified cash or deferred arrangements are not available to employees of tax-exempt organizations or governmental entities. This restriction does not apply to a plan maintained by a rural electric cooperative (defined in sec. 457(d)(9)(B)), a national association of such cooperatives, or a plan maintained by the Tennessee Valley Authority.

The House bill provides that, in the case of employer contributions (including elective deferrals under a qualified cash or deferred arrangement) that satisfy the immediate vesting and withdrawal restrictions applicable to elective deferrals under a qualified cash or deferred arrangement, the determination of whether the plan to which the contributions are made is a profit-sharing plan is to be made without regard to whether the employer has current or accumulated profits. This is the case even if the plan does not contain a qualified cash or deferred arrangement.

Effective dates

The provisions relating to qualified cash or deferred arrangements generally are effective for plan years beginning after December 31, 1985. A special effective date is provided in the case of certain elective deferrals under a qualified cash or deferred arrangement maintained pursuant to one or more collective bargaining agreements ratified before November 22, 1985, between employee representatives and one or more employers.

The House bill also provides a transition rule for the provision that provides that public employers and tax-exempt employers may not maintain qualified cash or deferred arrangements. Under this rule, the provision does not apply to any cash or deferred arrangement maintained by a State or local government or a tax-exempt employer that (1) was adopted by the employer before November 6, 1985, and (2) with respect to which the Internal Revenue Service received, before November 6, 1985, an application for a determination letter that such arrangement is a qualified cash or deferred arrangement.

The House bill contains a special effective date for any qualified cash or deferred arrangement maintained by a State or local government and grandfathered under the preceding transition rule. Under this special effective date rule, the new special nondiscrimination tests (including the new "highly compensated employee" definition) and the new withdrawal restrictions will not apply to elective deferrals under such grandfathered arrangement for years beginning before November 22, 1987.

The House bill provides a special transition rule with respect to the prohibition on the use of elective deferrals under a cash or deferred arrangement as a condition to the receipt of any other benefits (other than employer matching contributions under the same plan). Under this rule, a cash or deferred arrangement will not be treated as violating this prohibition for plan years beginning before January 1, 1991, to the extent that the qualified cash or deferred arrangement is part of a "qualified offset arrangement" with a defined benefit pension plan.

Senate Amendment

Limit on elective deferrals

The Senate amendment is the same as the House bill except that (1) the $7,000 cap on annual elective deferrals is adjusted for inflation by reference to percentage increases in the social security wage base at the same time and in the same manner as the indexing of dollar limits on benefits under section 415(d) and (2) the $7,000 cap is not coordinated with an individual's deductible IRA contributions.

The $7,000 limit is coordinated with elective deferrals under simplified employee pensions (SEPs). In addition, the benefits under an unfunded deferred compensation plan of a State or local government (sec. 457) and a plan described in section 501(c)(18) are coordinated with the limits on elective deferrals under a qualified cash or deferred arrangement or a SEP. Moreover, for purposes of determining an individual's cap on elective deferrals for a year, the $7,000 cap (as indexed) is reduced by the amount of the individual's contributions to a tax-sheltered annuity contract to the extent that the contributions are made pursuant to a salary reduction agreement.

Special limitation for investment in employer securities

Under the Senate amendment, the $7,000 cap (as indexed) on elective deferrals is increased by up to $2,500 in the case of certain investments in employer securities. The amount of the increase in the annual cap for an individual equals the lesser of (1) $2,500 or (2) the amount of elective deferrals for the year invested in employer securities and held by an ESOP (described in sec. 4975(e)(7) or meeting the requirements of sec. 409(l)).

The Senate amendment provides that the qualified cash or deferred arrangement is required to allow all eligible participants to have up to $2,500 of elective deferrals invested in employer securities before the additional limitation is available. In addition, the employer securities allocated to the account of a participant whose elective deferrals for a year exceed $7,000 are required to

remain so allocated during the 3-year period beginning with the year following the year in which the employer securities were allocated to a participant's account. If the employer securities cease to be allocated to the participant's account, then the securities are treated as if they were distributed to the participant on the date the securities cease to be allocated to the participant's account.

Nondiscrimination requirements

The Senate amendment is the same as the House bill except that the Senate amendment (1) does not modify the permitted disparities under the special nondiscrimination test applicable to qualified cash or deferred arrangements; (2) clarifies the rules for aggregating elective contributions with certain nonelective contributions for purposes of the special nondiscrimination test; and (3) modifies the uniform definition of highly compensated employees.

Other restrictions

The Senate amendment is the same as the House bill except that the amendment modifies certain present-law restrictions and imposes several additional restrictions on qualified cash or deferred arrangements.[1] First, the amendment provides that distributions may be made to a participant in a qualified cash or deferred arrangement on account of the sale of a subsidiary, sale of a substantial portion of the assets of a trade or business, or termination of the plan of which the arrangement is a part. Under the Senate amendment, the exception for distributions upon the sale of a subsidiary is available with respect to a participant who has not separated from service with the subsidiary.

The Senate amendment is the same as the House bill with respect to the availability of qualified cash or deferred arrangements for public employers, but the Senate amendment provides that qualified cash or deferred arrangements are available to employees of tax-exempt organizations.

Effective dates

The provisions (1) relating to the annual limit on elective deferrals under qualified cash or deferred arrangements, (2) permitting distributions upon the sale of a subsidiary, (3) aggregating the elective deferrals of highly compensated employees for purposes of the special nondiscrimination tests, and (4) relating to the treatment of excess contributions generally are effective for years beginning after December 31, 1986. Other changes in the nondiscrimination requirements and other restrictions applicable to qualified cash or deferred arrangements generally are effective for plan years beginning after December 31, 1988.

The provision permitting distributions upon plan terminations, sale of a subsidiary, or sale of assets is effective for terminations occurring in years beginning after December 31, 1984.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement.

The Senate amendment provides a transition rule for the provision prohibiting State and local government employers from maintaining qualified cash or deferred arrangements. Under this rule, the provision does not apply to any cash or deferred arrangement maintained by a State or local government that was adopted by the employer before May 6, 1986.

The Senate amendment provides a special transition rule with respect to the prohibition on the use of elective deferrals under a cash or deferred arrangement as a condition to the receipt of any other benefits (other than employer matching contributions under the same plan). Under this rule, a cash or deferred arrangement will not be treated as violating this prohibition to the extent that the qualified cash or deferred arrangement is part of a "qualified offset arrangement" with a defined benefit pension plan which offset arrangement was maintained by the employer on April 16, 1986.

Conference Agreement

Limit on elective deferrals

The conference agreement is the same as the Senate amendment except that the method of indexing the $7,000 limit on annual elective deferrals is the same method that applies for purposes of adjusting the dollar limits on benefits under section 415. Therefore, the limits are adjusted for percentage increases in the Consumer Price Index (CPI), beginning in 1988.

In addition, as under the Senate amendment, the conference agreement provides that elective deferrals in excess of the annual limit are treated as elective deferrals for purposes of applying the special nondiscrimination requirements for qualified cash or deferred arrangements, except to the extent provided under rules prescribed by the Secretary. The Secretary is to prescribe rules preventing use of this rule to increase artificially the actual deferral percentage of the nonhighly compensated employees.

To the extent that an excess deferral is distributed by the first April 15 following the close of the taxable year in which the excess deferral was made, the excess deferral is not treated as an annual addition for purposes of the overall limits on contributions and benefits (sec. 415).

Similarly, excess deferrals distributed by the required date are not subject to the additional income tax on early withdrawals from qualified plans. In addition, the conferees intend that a plan distributing excess deferrals is not to be required to obtain the consent of the participant or the consent of the participant's spouse with respect to the distribution of excess deferrals. Further, a distribution of excess deferrals is not to be treated as violating an outstanding qualified domestic relations order (within the meaning of sec. 414(p)).

The provision is effective for years beginning after December 31, 1986.

Further, the provisions do not apply to elective deferrals of an employee made during 1987 and attributable to services performed during 1986 under a qualified cash or deferred arrangement if, under the terms of the arrangement in effect on August 16, 1986, (1) the employee's election to make the elective deferrals is made before January 1, 1987, and (2) the employer identifies the amount of the elective deferral before January 1, 1987.

Special limitation for investment in employer securities

The conference agreement does not adopt the provision in the Senate amendment allowing an additional $2,500 in annual elective deferrals in the case of amount invested in employer securities.

Nondiscrimination requirements

The conference agreement follows the House bill with certain modifications.

Definition of highly compensated employees

The conference agreement modifies the definition of highly compensated employees to which the nondiscrimination requirements apply and provides that this uniform definition applies generally for purposes of nondiscrimination requirements for qualified plans and employee benefit programs (*see* the description in Part B.7., below). In addition, the conference agreement adopts the provision in the Senate amendment providing a special definition of highly compensated employees for purposes of the special nondiscrimination requirements for qualified cash or deferred arrangement and in the case of a certain company.

Special nondiscrimination requirements

The conference agreement follows the House bill with respect to the special nondiscrimination tests applicable to qualified cash or deferred arrangements.

In addition, the conference agreement provides that, for purposes of applying the special nondiscrimination requirements, under rules prescribed by the Secretary, employer matching contributions that meet the vesting and withdrawal restrictions for elective deferrals under a qualified cash or deferred arrangement and qualified nonelective contributions may be taken into account. Qualified nonelective contributions are defined to mean employer contributions (other than matching contributions) with respect to which (1) the employee may not elect to have the contributions paid to the employee in cash in lieu of being contributed to the plan and (2) the vesting and distribution restrictions applicable to qualified cash or deferred arrangements are satisfied.

Excess contributions

The conference agreement follows the House bill and the Senate amendment with respect to the treatment of excess contributions (i.e., contributions to highly compensated employees that violate the special nondiscrimination requirements applicable to qualified cash or deferred arrangements). The conference agreement modifies the rules for determining the amount of income attributable to excess contributions. Under the conference agreement, the amount of income attributable to excess contributions is that portion of the income on the participant's account balance for the year that bears the same ratio as the excess contributions bears to the total account balance.

For purposes of determining the year in which the excess contributions are includible in income, the excess contributions are treated as the first contributions made for a year.

In addition, the conferees intend that the Secretary will prescribe rules relating to the coordination of an employee's excess deferrals (i.e., amounts in excess of the annual limit on elective deferrals) and the excess contributions and that, generally, the excess deferrals are to be calculated and distributed first and then the excess contributions are to be allocated among the highly compensated employees and distributed.

Under the conference agreement, the provision in the Senate amendment under which excess contributions that are distributed to a highly compensated employee are not subject to the additional income tax on early withdrawals from qualified plans is adopted. In addition, the conferees intend that a plan is not required to obtain the consent of the participant or the participant

[1] *See*, also, the discussion in Part C., below.

and spouse to distribute an excess contribution.

The conference agreement provides that a plan can distribute excess deferrals and excess contributions without regard to the terms of the plan or any other law until the first plan year for which plan amendments are required.

Effective dates

The provisions generally are effective for years beginning after December 31, 1986.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, in the case of a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective, with respect to employees covered by the agreement, for plan years beginning before the earlier of (1) January 1, 1989, or (2) the date on which the last of the collective bargaining agreement terminates (determined without regard to any extensions in the collective bargaining agreement).

The rule relating to aggregation of a highly compensated employee's benefit under more than one qualified cash or deferred arrangement and the rules relating to the treatment of excess contributions are effective for plan years beginning after December 31, 1986.

Other restrictions

The conference agreement adopts the following provisions with respect to qualified cash or deferred arrangements:

Hardship withdrawals.—The conference agreement follows the House bill and the Senate amendment which limits hardship withdrawals from a qualified cash or deferred arrangement to the amount of an employee's elective deferrals. Therefore, hardship withdrawals are not permitted from amounts attributable to income on elective deferrals.

Under the conference agreement, employer matching contributions and nonelective contributions (to the extent taken into account for purposes of the special nondiscrimination test), and income on such matching or nonelective contributions may not be distributed on account of hardship.

The provision is effective for years beginning after December 31, 1988.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, with respect to employees covered under a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective, with respect to employees subject to the agreement, for plan years beginning before the earlier of (1) the later of January 1, 1989, or the date on which the last of the collective bargaining agreement terminates (determined without regard to any extensions in the collective bargaining agreement), or (2) January 1, 1991.

Withdrawals on account of plan termination, etc.—The conference agreement generally follows the Senate amendment with respect to the provision permitting distributions from a qualified cash or deferred arrangement upon (1) plan termination without the establishment of a successor plan; (2) the date of the sale by a corporation of substantially all of the assets used by the corporation in a trade or business if the employee continues employment with the corporation acquiring the assets; or (3) the date of the sale by a corporation of the corporation's interest in a subsidiary if the employee continues employment with the subsidiary. Under the conference agreement, a distribution upon any of the 3 events described above is permitted only if it constitutes a total distribution of the employee's balance to the credit in the cash or deferred arrangement.

The provision is effective for distributions occurring after December 31, 1984.

Conditioning other benefits on elective deferrals.—The conference agreement follows the House bill and the Senate amendment with respect to the rule that a qualified cash or deferred arrangement cannot condition, either directly or indirectly, contributions and benefits (other than matching contributions in the plan of which the arrangement is a part) upon an employee's elective deferrals.

In addition, the conference agreement adopts the provision in the House bill and the Senate amendment that any elective deferrals under a qualified cash or deferred arrangement may not be taken into account for purposes of determining whether another plan meets the coverage requirements (sec. 410(b)) or the general nondiscrimination rules (sec. 401(a)(4)) or other qualification rules. This provision does not apply for purposes of applying the average benefit percentage requirement under the coverage requirements (but does apply for purposes of the present-law classification requirement that is part of the average benefit test).

The conferees clarify that the provision relating to conditioning other benefits on elective deferrals applies in the situation in which a plan provides that voluntary after-tax employee contributions may not be made until an employee makes a minimum amount of elective deferrals under a qualified cash or deferred arrangement. The conferees also clarify that this provision precludes the use of elective deferrals to satisfy the minimum contribution required on behalf of nonkey employees in a top-heavy plan.

Further, the conference agreement follows the Senate amendment with respect to qualified offset arrangements with a clarification of the definition of an employer for purposes of the provision.

The provisions are effective for years beginning after December 31, 1988.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, with respect to employees covered under a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective, with respect to employees subject to the agreement, for plan years beginning before the earlier of (1) the later of January 1, 1989, or the date on which the last of the collective bargaining agreement terminates (determined without regard to any extensions in the collective bargaining agreement), or (2) January 1, 1991.

Eligibility to participate.—The conference agreement follows the House bill and the Senate amendment with respect to the provision that a qualified cash or deferred arrangement cannot require, as a condition of participation in the arrangement, that an employee complete a period of service greater than 1 year with the employer maintaining the plan, effective for years beginning after December 31, 1988.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, in the case of a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective, with respect to employees covered by the agreement, for years beginning before the earlier of (1) the later of January 1, 1989, or the date on which the last of the collective bargaining agreement terminates (determined without regard to any extensions in the collective bargaining agreement), or (2) January 1, 1991.

Tax-exempt and State and local employers.—Under the conference agreement, the provision in the House bill prohibiting tax-exempt organizations and State and local governments (or a political subdivision of a State or local government) from establishing qualified cash or deferred arrangements is adopted.

The conference agreement provides that this provision does not apply to plans adopted before (1) May 6, 1986, in the case of an arrangement maintained by a State or local government (or political subdivision of a State or local government), or (2) July 2, 1986, in the case of an arrangement maintained by a tax-exempt organization. The grandfather treatment is limited to the employers who adopted the plan before the dates specified above. However, the grandfather treatment is not limited to employees (or classes of employees) covered by the plan as of the date the grandfather treatment is provided.

The provision is effective for years beginning after December 31, 1986. However, in the case of a plan maintained by a State or local government that was adopted before May 6, 1986 (and is, therefore, eligible for the grandfather rule), the following provisions in the conference agreement applicable to qualified cash or deferred arrangements do not apply until years beginning after December 31, 1988: (1) the modification of the special nondiscrimination tests, (2) the new definition of highly compensated employees, (3) the new definition of compensation, and (4) the rule aggregating highly compensated employees.

Definition of compensation

The conference agreement adopts a uniform definition of compensation for purposes of applying the special nondiscrimination requirements, effective for years beginning after December 31, 1988. (*See* description in Part B.1., below.)

3. Nondiscrimination Requirements for Employer Matching Contributions and Employee Contributions

Present Law

Under present law, a qualified plan may permit employees to make either after-tax or pre-tax contributions to a qualified plan. Employee contributions to a qualified plan may be voluntary or mandatory. Mandatory employee contributions include those made as a condition of obtaining employer-derived benefits (e.g., employee contributions made as a condition of obtaining employer matching contributions).

Present law provides that a qualified plan may not discriminate in contributions and benefits in favor of employees who are officers, shareholders, or highly compensated. Generally, this nondiscrimination requirement is satisfied with respect to employee contributions if all participants are entitled to make contributions on the same terms and conditions. In the past, voluntary em-

ployee contributions have been permitted if all participants are eligible to make such contributions and if no employee is permitted to contribute more than 10 percent of compensation, determined based on cumulative contributions and cumulative compensation during the period of participation.

House Bill

Under the House bill, special nondiscrimination rules are applied to employer matching contributions and employee contributions under all qualified defined contribution plans. These nondiscrimination tests apply in addition to the usual nondiscrimination rules applicable to qualified plans.

Qualified matching and employee contributions

Under the first test, a defined contribution plan (and the employee contribution portion of a defined benefit pension plan) will not be treated as meeting the special nondiscrimination test with respect to employer matching contributions that are qualified employer matching contributions and with respect to employee contributions (other than deductible employee contributions) for a plan year unless neither the matching contribution percentage nor the employee contribution percentage for highly compensated employees exceeds the greater of (1) 125 percent of the matching contribution percentage or the employee contribution percentage for all other eligible employees, or (2) the lesser of 200 percent of the matching contribution percentage or the employee contribution percentage for all other eligible employees or such percentage plus 2 percentage points.

In order to be qualified employer matching contributions, employer matching contributions are required to be (1) nonforfeitable when made, (2) ineligible for withdrawal prior to attainment of age 59½, death, disability, separation from service, or bona fide plan termination, and (3) no greater than 100 percent of the employee's contributions.

Nonqualified matching contributions

The House bill provides that nonqualified matching contributions (i.e., matching contributions that are not qualified matching contributions) are subject to a special nondiscrimination test under which the matching contribution percentage for highly compensated employees is limited to the greater of (1) 110 percent of the matching contribution percentage for the other eligible employees or (2) the lesser of 150 percent of the matching contribution percentage for other eligible employees or such percentage plus one percentage point.

Treatment of excess contributions

As under the provision of the House bill relating to qualified cash or deferred arrangements, if the special nondiscrimination rules are not satisfied for any year, the plan will not be disqualified if the excess contributions (plus income allocable to such excess contributions) are distributed before the close of the following plan year. Distribution of excess contributions may be made notwithstanding any other provision of the law, and the amount distributed is not subject to the additional income tax on early withdrawals.

Effective dates

The provisions relating to employer matching contributions and employee contributions generally are effective for plan years beginning after December 31, 1985.

A special effective date is provided in the case of certain contributions under a qualified plan maintained pursuant to one or more collective bargaining agreements.

In addition, these provisions apply to any plan maintained by a State or local government in existence on November 6, 1985, for plan years beginning after November 21, 1987.

Senate Amendment

In general

Under the Senate amendment, special nondiscrimination rules are applied to employer matching contributions and employee contributions under all qualified defined contribution plans and employee contributions under a defined benefit plan (to the extent allocated to a separate account on behalf of the employee). These nondiscrimination tests apply in lieu of the usual nondiscrimination rules applicable to the amount of contributions under qualified plans.

Under the first test, a defined contribution plan (and the employee contribution portion of a defined benefit pension plan) will not be treated as meeting the special nondiscrimination test with respect to employer matching contributions and with respect to employee contributions for a plan year unless the contribution percentage for highly compensated employees does not exceed the greater of (1) 150 percent of the contribution percentage for all other eligible employees, or (2) the lesser of 250 percent of the contribution percentage for all other eligible employees or such percentage plus 3 percentage points.

Employer contributions (including nonelective and elective contributions) may be treated like matching contributions if the contributions (1) are nonforfeitable when made, (2) are ineligible for withdrawal prior to attainment of age 59½, death, disability, separation from service, sale of a subsidiary, or plan termination, and (3) satisfy the general nondiscrimination rules applicable to such contributions.

The Senate amendment applies rules similar to the aggregation rules for qualified cash or deferred arrangements for purposes of the special nondiscrimination test for employer matching and employee contributions. Thus, under the Senate amendment, if a highly compensated employee participates in more than one plan, all employer matching contributions, employee contributions, elective contributions, and, if the employer so elects, qualified nonelective contributions with respect to that highly compensated employee are aggregated and a single deferral percentage is computed for purposes of applying the special nondiscrimination test under each plan in which the highly compensated employee participates. Of course, the employer could elect to aggregate plans with respect to all participating employees, rather than merely highly compensated employees, in testing whether the special nondiscrimination test is satisfied.

Effective dates

The provisions relating to employer matching contributions and employee contributions generally are effective for plan years beginning after December 31, 1988. A special effective date applies to plans maintained pursuant to a collective bargaining agreement.

Conference Agreement

The conference agreement generally follows the House bill with modifications.

Special nondiscrimination test

In general

Under the conference agreement, a special nondiscrimination test is applied to employer matching contributions and employee contributions under qualified defined contribution plans and employee contributions under a defined benefit pension plan (to the extent allocated to a separate account on behalf of an employee) including employee contributions under a qualified cost-of-living arrangement. This special nondiscrimination test is similar to the special nondiscrimination test applicable to qualified cash or deferred arrangements. The conference agreement does not follow the House bill provision under which a special nondiscrimination test applies to employee contributions and to employer matching contributions that are "qualified matching contributions" and a different nondiscrimination test applies to other employer matching contributions.

The conference agreement provides that the special nondiscrimination test is satisfied for a plan year if the contribution percentage for highly compensated employees does not exceed the greater of (1) 125 percent of the contribution percentage for all other eligible employees, or (2) the lesser of 200 percent of the contribution percentage for all other eligible employees, or such percentage plus 2 percentage points. The contribution percentage for a group of employees for a plan year is the average of the ratios (calculated separately for each employee in the group) of the sum of matching and employee contributions on behalf of each such employee to the employee's compensation for the year.

Under the conference agreement, under rules prescribed by the Secretary, an employer may elect to take into account elective contributions and qualified nonelective contributions under the plan or under any other plan of the employer. Qualified nonelective contributions are defined to mean any employer contribution (other than a matching contribution) with respect to which (1) the employee may not elect to have the contribution paid to the employee in cash in lieu of being contributed to the plan, and (2) the vesting and withdrawal restrictions applicable to qualified cash or deferred arrangements are satisfied (and hardship withdrawals are not permitted). The term "employer matching contributions" means any employer contribution made to the plan on account of an employee contribution or an employee's elective deferrals to a qualified cash or deferred arrangement. The Secretary may prescribe such other conditions on aggregating types of contributions for nondiscrimination purposes as are appropriate to carry out the intent of the provisions.

Elective and nonelective contributions may only be taken into account for purposes of the special nondiscrimination rules if the contributions taken into account satisfy the applicable nondiscrimination rules and other contributions would not fail to satisfy applicable nondiscrimination rules if the elective or nonelective contributions taken into account were disregarded.

For example, if an employer maintains a qualified cash or deferred arrangement, a plan to which after-tax employee contributions and matching contributions are made, and a profit-sharing plan with employer contributions that are qualified nonelective contributions, then the employer can elect, for purposes of the special nondiscrimina-

tion test for matching contributions and employee contributions, to aggregate (1) elective deferrals under the qualified cash or deferred arrangement, (2) after-tax employee contributions, (3) employer matching contributions, and (4) qualified nonelective contributions. Further, for purposes of the special nondiscrimination test applicable to qualified cash or deferred arrangements, the employer can elect (subject to any other rules that may apply) to aggregate (1) elective deferrals under the qualified cash or deferred arrangement, (2) employer matching contributions that satisfy vesting and distribution rules, and (3) qualified nonelective contributions.

For purposes of the special nondiscrimination test, if 2 or more plans of an employer to which matching contributions, employee contributions, or elective contributions are made are treated as a single plan for purposes of the coverage requirements for qualified plans (sec. 410(b)), then the plans are treated as a single plan for purposes of the special nondiscrimination test. In addition, if a highly compensated employee participates in 2 or more plans of an employer to which matching contributions, employee contributions, or elective contributions are made, then all such contributions made on behalf of the highly compensated employee are aggregated for purposes of the special nondiscrimination test.

Under the conference agreement, any employee who is eligible to make an employee contribution (or, if the employer takes elective deferrals into account, is eligible to make elective deferrals) or is eligible to receive a matching contribution is treated as an eligible employee for purposes of the special nondiscrimination test. In addition, under the conference agreement, if an employee contribution is required as a condition of participation in a plan, an employee who is eligible to participate, but fails to make a required contribution, is treated as an eligible employee on behalf of whom no employer contributions are made.

Definition of highly compensated employee

The conference agreement modifies the definition of highly compensated employees to which the special nondiscrimination test applies and provides that this uniform definition applies generally for purposes of the nondiscrimination requirements for qualified plans and employee benefit programs (*see* the description in Part B.7., below).

Excess contributions

The conference agreement generally follows the House bill and the Senate amendment with respect to the treatment of excess contributions (i.e., contributions for highly compensated employees that violate the special nondiscrimination requirements applicable to employer matching and employee contributions). The conference agreement modifies the rules for determining the amount of income attributable to excess contributions. Under the conference agreement, the amount of income attributable to excess contributions is that portion of the income on the participant's account balance for the year that bears the same ratio as the excess contributions bear to the total account balance.

For purposes of assessing any withholding penalties, the excess contributions are treated as the first contributions made for a year.

In addition, the conferees intend that the Secretary will prescribe rules relating to the coordination of an employee's excess deferral (i.e., amounts in excess of the annual limit on elective deferrals under a qualified cash or deferred arrangement) and the excess contributions and that, generally, the excess deferrals are to be calculated and distributed first and then the excess contributions are to be allocated among the highly compensated employees and distributed.

Under the conference agreement, the provision in the Senate amendment under which excess contributions that are distributed to a highly compensated employee are not subject to the additional income tax on early withdrawals from qualified plans is adopted. In addition, the conferees intend that a plan is not required to obtain the consent of the participant or the participant and spouse to distribute an excess contribution.

The conference agreement provides that a plan can cash out excess contributions without regard to the terms of the plan until the first plan year for which plan amendments are required (*see* Part E.5., below).

Effective dates

The provisions generally are effective for plan years beginning after December 31, 1986.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, in the case of (employees covered under) a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective for plan years beginning before the earlier of (1) January 1, 1989, or (2) the date on which the last of the collective bargaining agreement terminates (determined without regard to any extensions in the collective bargaining agreement). In the case of a tax-sheltered annuity, the provisions are effective for plan years beginning after December 31, 1988.

4. Unfunded Deferred Compensation Arrangements of State and Local Governments

Present Law

Constructive receipt

On February 3, 1978, the Internal Revenue Service issued proposed regulations that provide generally that, if payment of an amount of a taxpayer's fixed basic or regular compensation is deferred at the taxpayer's individual election to a taxable year later than that in which the amount would have been payable but for the election, then the deferred amount will be treated as received in the earlier taxable year.[5]

In the Revenue Act of 1978, Congress exempted from the scope of the proposed regulations compensation deferred under an unfunded deferred compensation plan maintained by a taxable employer. Under the 1978 Act, the year that deferred compensation is to be included in gross income under certain private deferred compensation plans is determined under the principles set forth in the rulings, regulations, and judicial decisions relating to deferred compensation that were in effect on February 1, 1978.

The 1978 Act also exempted from the scope of the proposed regulation certain unfunded deferrals under an eligible deferred compensation plan of a State or local government (sec. 457). Certain tax-exempt rural electric cooperatives are also eligible for this exemption. There is currently no specific provision governing deferred compensation arrangements of nongovernmental tax-exempt organizations.

[5] Prop. reg. sec. 1.61-16.

Eligible unfunded deferred compensation plan

Under an eligible unfunded deferred compensation plan of a State or local government, amounts of current compensation that are deferred on behalf of an employee are included in gross income when they are paid or made available. The maximum annual deferral under such a plan is the lesser of (1) $7,500, or (2) 33⅓ percent of compensation (net of the deferral). Amounts contributed to a tax-sheltered annuity (both elective and nonelective) are taken into account in calculating whether an employee's deferrals exceed the limits.

In general, amounts deferred under an eligible deferred compensation plan may not be made available to an employee before separation from service with the employer or an unforeseeable emergency.

Under an eligible deferred compensation plan, distributions must be made primarily for the benefit of participants, rather than beneficiaries. If a participant's benefits commence prior to death, the total amount of payments scheduled to be made to the participant must be more than 50 percent of the maximum amount that could have been paid to the participant if no provision were made for payments to the beneficiary.

Under an eligible plan, if a participant dies before the date the entire amount deferred has been paid out, the entire amount deferred (or the remaining portion thereof, if payment commenced before death) must be paid to the participant's beneficiary over a period not exceeding 15 years, unless the beneficiary is the participant's surviving spouse. If the beneficiary is the participant's surviving spouse, benefits must be paid over the life of the surviving spouse or any shorter period.

House Bill

Application to tax-exempt employers

The House bill applies the limitations and restrictions applicable to eligible and ineligible unfunded deferred compensation plans of State and local governments to unfunded deferred compensation plans maintained by nongovernmental tax-exempt organizations. In addition, the House bill (1) requires that amounts deferred by an employee under a qualified cash or deferred arrangement that is grandfathered under the bill be taken into account in determining whether the employee's deferrals under an eligible deferred compensation plan exceed the limits on deferrals under the eligible plan; (2) modifies the distribution requirements applicable to eligible deferred compensation plans; (3) permits rollovers between eligible deferred compensation plans; and (4) modifies the rule that an employee is taxable on deferrals under an eligible plan when such amounts are made available.

Distribution requirements

The House bill modifies the distribution requirements for eligible deferred compensation plans maintained by State and local governments and nongovernmental tax-exempt entities. As modified, distributions commencing prior to the death of a participant under an eligible deferred compensation plan are required to satisfy a payout schedule under which benefits projected to be paid over the lifetime of the participant are at least 66⅔ percent of the total benefits payable with respect to the participant.

If the participant dies prior to the date that the participant's entire interest has been distributed, or if the participant dies prior to commencement of the distribution

of benefits, the bill requires that payments to the participant's beneficiary commence within 60 days of the close of the plan year in which the participant's death occurs and that the entire amount deferred be distributed over a period not in excess of 15 years, unless the beneficiary is the participant's surviving spouse. If the beneficiary is the participant's surviving spouse, payments must be made over the life of the surviving spouse or any shorter period.

Whenever distributions (pre- or post-death) are to be made over a period extending beyond one year, the bill requires that the distribution be made in substantially nonincreasing periodic payments no less frequently than annually.

The House bill provides that benefits are not treated as made available under an eligible deferred compensation plan merely because an employee is allowed to elect to receive a lump-sum payment within 60 days of the election. However, the 60-day rule only applies if the employee's total deferred benefit does not exceed $3,500 and no additional amounts may be deferred with respect to the employee.

The House bill also amends present law to permit the rollover of benefits between eligible deferred compensation plans under certain circumstances.

State judicial plans

The House bill exempts from the new requirements for eligible deferred compensation plans any qualified State judicial plan (as defined in sec. 131(c)(3)(B) of the Revenue Act of 1978, as amended by sec. 252 of the Tax Equity and Fiscal Responsibility Act of 1982).

Effective date

The provisions are effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that the rules relating to unfunded deferred compensation plans of State and local governments are not extended to tax-exempt employers.

The provisions are effective for taxable years beginning after December 31, 1988.

Conference Agreement

Application to tax-exempt employers

The conference agreement follows the House bill provision extending the rules relating to eligible unfunded deferred compensation plans of State and local governments to tax-exempt organizations. In addition, the conference agreement provides that a plan maintained by a tax-exempt organization that does not meet the requirements of an eligible deferred compensation plan is immediately treated as not meeting such requirements without regard to notification by the Secretary or a grace period. The conference agreement also provides that amounts deferred under an eligible deferred compensation plan are treated as elective contributions under a tax-sheltered annuity for purposes of the special catch-up election.

Distribution requirements

The conference agreement follows the House bill and the Senate amendment, except that the conference agreement provides that employees under an eligible unfunded deferred compensation plan are subject to the required beginning date and minimum required distribution requirements applicable to qualified plans (sec. 401(a)(9)), in addition to the special distribution rules applicable under section 457. The conference agreement permits transfers, rather than rollovers, between eligible plans.

Effective dates

The provision extending the eligible unfunded deferred compensation rules to tax-exempt employers is effective for taxable years beginning after December 31, 1986.

An exception is provided under the conference agreement for amounts deferred under a plan which (1) were deferred from taxable years beginning before January 1, 1987, or (2) are deferred from taxable years beginning after December 31, 1986, pursuant to an agreement that (i) was in writing on August 16, 1986, and (ii) on August 16, 1986, provided for a deferral for each taxable year of a fixed amount or an amount determined pursuant to a fixed formula. This exception does not apply with respect to amounts deferred in a fixed amount or under a fixed formula for any taxable year ending after the date on which the amount or formula is modified after August 16, 1986. Providing the participant with any discretion regarding the amount of the deferral constitutes a modification to this purpose.

For purposes of the grandfather rule, amounts are considered deferred from a taxable year if, but for the deferral, they would have been paid in that year. Also, in applying the limits to a deferral not grandfathered, grandfathered amounts are taken into account.

The modifications to the distribution requirements applicable to eligible unfunded deferred compensation plans generally are effective for taxable years beginning after December 31, 1988. However, the provisions (1) permitting transfers between eligible unfunded deferred compensation plans and (2) permitting cashouts of certain benefits without constructive receipt are effective with respect to transfers or distributions in years beginning after December 31, 1985.

5. Deferred Annuity Contracts

Present Law

Under present law, income credited to a deferred annuity contract is not currently includible in the gross income of the owner of the contract nor is the income taxed to the insurance company issuing the contract. In general, amounts received by the owner of an annuity contract before the annuity starting date (including loans under or secured by the contract) are includible in gross income as ordinary income to the extent that the cash value of the contract exceeds the owner's investment in the contract. A portion of each distribution received after the annuity starting date is treated as ordinary income based on the ratio of the investment in the contract to the total distributions expected to be received.

Present law provides an additional income tax on certain early withdrawals under an annuity contract. Under present law, amounts withdrawn from an annuity contract before the owner of the contract attains age 59½ are subject to an additional income tax equal to 5 percent of the amount of the withdrawal includible in income. This additional tax is not imposed if the distribution is (a) one of a series of substantially equal periodic payments made for the life of the taxpayer or over a period extending for at least 60 months after the annuity starting date, or (b) is allocable to investment in the contract before August 14, 1982.

House Bill

Income on the contract

Under the House bill, if any annuity contract is held by a person who is not a natural person (such as a corporation), then the contract is not treated as an annuity contract for Federal income tax purposes and the income on the contract for any taxable year is treated as ordinary income received or accrued by the owner of the contract during the taxable year. In the case of a contract the nominal owner of which is a person who is not a natural person (e.g., a corporation or a trust), but the beneficial owner of which is a natural person, the contract is treated as held by a natural person.

Income on the contract means the excess of (1) the sum of the net surrender value of the contract at the end of the taxable year and any amounts distributed under the contract for all years, over (2) the investment in the contract (i.e., the aggregate amount of premiums paid under the contract minus policyholder dividends or the aggregate amounts received under the contract that have not been included in income).

The provision does not apply to any annuity contract that is acquired by the estate of a decedent by reason of the death of the decedent, is held under a qualified plan (sec. 401(a) or 403(a)), as a tax-sheltered annuity (sec. 403(b)) or under an IRA, or is a qualified funding asset for purposes of a structured settlement agreement (sec. 130).

Early withdrawal tax

In addition, the House bill extends the additional income tax on early withdrawals from qualified plans and IRAs to deferred annuity contracts. In the case of a withdrawal from a deferred annuity contract prior to the owner's attainment of age 59½, death, or disability, an additional income tax is imposed equal to 15 percent of the amount includible in income. The additional income tax does not apply in the case of substantially equal periodic payments over the life of the owner or over the lives of the owner and a beneficiary.

Effective dates

The provisions of the House bill are effective for contributions made or withdrawals occurring after December 31, 1985. An exception to the provision that modifies the additional income tax on early withdrawals is provided for individuals who, as of November 6, 1985, have commenced receiving benefits under the contract pursuant to a written election designating a specific schedule of benefit payments.

Senate Amendment

Income on the contract

Same as the House bill.

Early withdrawal tax

The Senate amendment retains the present-law 5-percent early withdrawal tax and modifies the circumstances under which the tax is imposed. In the case of a withdrawal from a deferred annuity contract before the owner attains age 59½, dies, or becomes disabled, the 5-percent additional income tax applies unless the distribution is part of a series of substantially equal periodic payments over the life of the owner or over the lives of the owner and a beneficiary.

Effective dates

The provision of the Senate amendment relating to the taxation of income on a deferred annuity contract is effective for amounts invested after February 28, 1986. The provision of the bill modifying the additional income tax on early withdrawals is effective for distributions in taxable years beginning after December 31, 1986. An exception to the provision that modifies the addi-

tional income tax on early withdrawals is provided for individuals who, as of March 1, 1986, have commenced receiving benefits under the contract pursuant to a written election designating a specific schedule of benefit payments.

Conference Agreement

Income on the contract

The conference agreement follows the House bill and the Senate amendment with modifications. Under the conference agreement, the exceptions to the tax treatment of annuity contracts held by nonnatural persons is expanded in three respects.

First, an exception is provided for an annuity which constitutes a qualified funding asset (as defined in sec. 130(d), but without regard to whether there is a qualified assignment). Thus, an exception is provided for (1) qualified funding assets purchased by structured settlement companies, and (2) annuity contracts (which otherwise meet the definition of a qualified funding asset) purchased and held directly by a property or casualty insurance company to fund periodic payments for damages.

Second, the conference agreement provides an exception in the case of a deferred annuity that (1) is purchased by an employer upon the termination of a qualified plan and (2) is held by the employer until the employee separates from service with the employer.

Third, an exception is provided for an immediate annuity, which is defined as an annuity (1) which is purchased with a single premium or annuity consideration, and (2) the annuity starting date of which commences no later than 1 year from the date of purchase of the annuity.

The provision is effective for contributions to annuity contracts after February 28, 1986.

Early withdrawal tax

Under the conference agreement, the early withdrawal tax on deferred annuities is increased from 5 to 10 percent. The conference agreement follows the Senate amendment with respect to the exception to the tax in the case of certain distributions over the life (or joint lives) of the taxpayer (and the taxpayer's beneficiary) and, in addition, provides an exception to the tax in the case of an immediate annuity.

As under the Senate amendment, the conference agreement provides that if distributions to an individual are not subject to the tax because of application of the substantially equal payment exception, the tax will nevertheless be imposed if the individual changes the distribution method prior to age 59½ to a method which does not qualify for the exception. The additional tax will be imposed in the first taxable year in which the modification is made and will be equal to the tax (as determined under regulations) that would have been imposed had the exception not applied. For example, if, at age 50, an individual begins receiving payments under a distribution method which provides for substantially equal payments over the individual's life expectancy, and, at age 58, the individual elects to receive the remaining benefits in a lump sum, the additional tax will apply to the lump sum and to amounts previously distributed.

In addition, the recapture tax will apply if an individual does not receive payments under a method that qualifies for the exception for at least 5 years, even if the method of distribution is modified after the individual attains age 59½. Thus, for example, if an individual begins receiving payments in substantially equal installments at age 56, and alters the distribution method to a form that does not qualify for the exception prior to attainment of age 61, the additional tax will be imposed on amounts distributed prior to age 59½ as if the exception had not applied. The additional tax will not be imposed on amounts distributed after attainment of age 59½.

Further, the conference agreement provides an exception to the additional income tax on early withdrawals in the case of an annuity which constitutes a qualified funding asset (as defined in sec. 130(d), but without regard to whether there is a qualified assignment).

The provision is effective for taxable years beginning after December 31, 1986.

6. Elective Contributions Under Tax-Sheltered Annuities

Present Law

Under present law, public schools and certain tax-exempt organizations (including churches and certain organizations associated with churches) may make payments on behalf of an employee to purchase a tax-sheltered annuity contract (sec. 403(b)). Payments to a custodial account investing in stock of a regulated investment company (e.g., a mutual fund) are also permitted.

The amount paid by the employer is excluded from the employee's income for the taxable year to the extent the payment does not exceed the employee's exclusion allowance for the taxable year. The exclusion allowance is generally equal to 20 percent of the employee's includible compensation from the employer multiplied by the number of the employee's years of service with that employer, reduced by amounts already paid by the employer to purchase the annuity (sec. 403(b)(2)).

Employer payments to purchase a tax-sheltered annuity contract for an employee are also subject to the overall limits on contributions and benefits under qualified plans. Because tax-sheltered annuities generally are defined contribution plans, the limit on the annual additions on behalf of an employee generally is the lesser of 25 percent of compensation or $30,000. Certain catch-up elections allow an employer to contribute in excess of the usual percentage limits in certain years.

House Bill

Limit on elective deferrals

Under the House bill, the maximum amount that an employee can elect to defer for any taxable year under all tax-sheltered annuities in which the employee participates is limited to $7,000. In addition, the $7,000 limit is coordinated with elective 401(k) deferrals and the annual deduction limit for IRA contributions.

Special catch-up election

The House bill provides an exception to the $7,000 annual limit (but not to the otherwise applicable exclusion allowance (sec. 403(b) or the overall limit on contributions and benefits (sec. 415)) in the case of employees of an educational organization, a hospital, a home health service agency, or a church, or a convention or association of churches. Under this exception, any eligible employee who had completed 15 years of service with the employer would be permitted to make an additional salary reduction contribution under the following conditions:

(1) In no year can the additional contributions be more than $3,000;

(2) An aggregate limit of $15,000 applies to the total amount of contributions that, in any year, exceed $7,000; and

(3) In no event can this exception be used if an individual's lifetime elective deferrals exceed the individual's lifetime limit.

The lifetime limit on elective deferrals for an individual, solely for purposes of the special catch-up rule, is $5,000 multiplied by the number of years of service that the individual performed with the employer.

Effective dates

The provisions generally are effective for years beginning after December 31, 1985. A delayed effective date is provided for collectively bargained plans.

Senate Amendment

No provision.

Conference Agreement

Limit on elective deferrals

The conference agreement follows the House bill, except that the annual limit on elective deferrals under a tax-sheltered annuity is increased to $9,500. The $9,500 limit applies until the cost-of-living adjustments to the annual limit on elective deferrals under a qualified cash or deferred arrangement raise that limit from $7,000 to $9,500, at which time the limit on elective deferrals under a tax-sheltered annuity is also indexed in the same manner as the indexing of the annual limit for elective deferrals under a qualified cash or deferred arrangement.

The conference agreement clarifies the definition of elective deferrals to which the annual limit applies. In the case of an employer that allows employees a one-time election to participate in a contributory defined benefit pension plan with a single mandatory contribution rate or a tax-sheltered annuity program with elective deferrals, neither the election of an employee to participate in the defined benefit plan nor the employee contributions made to the defined benefit plan are to be treated as elective deferrals for purposes of the annual limit. Similarly, if an employee is required to contribute a fixed percentage of compensation to a tax-sheltered annuity as a condition of employment, the contributions are not treated as elective deferrals. This is considered elective deferrals if the employer and employee enter into temporary employment contracts. The conferees do not intend these examples to constitute the only situations in which contributions are not treated as elective deferrals. The conferees direct the Secretary to provide guidance to employers on other contributions that are not to be treated as elective deferrals.

Special catch-up election

The conference agreement follows the House bill and extends the special catch-up election to employees of health and welfare service agencies.

Effective dates

The provisions are effective for taxable years beginning after December 31, 1986.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, with respect to employees covered under a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective for plan years beginning before the earlier of (1) January 1, 1989, or (2) the date on which the last of the collective bargaining agreement terminates (determined without regard to any extensions in the collective bargaining agreement).

7. Special Rules for Simplified Employee Pensions

Present Law

Under present law, if an IRA qualifies as a simplified employee pension (SEP), the annual IRA deduction limit is increased to the lesser of $30,000 or 15 percent of compensation. The increased deduction limit applies only to employer contributions made on behalf of an employee to the SEP and does not apply to an employee's salary reduction contributions.

House Bill

No provision.

Senate Amendment

In general

The Senate amendment revises the qualification requirements relating to SEPs to permit employees to elect to have SEP contributions made on their behalf or to receive the contributions in cash. In addition, the Senate amendment makes miscellaneous changes to the SEP requirements to decrease the administrative requirements applicable to an employer maintaining a SEP.

Salary reduction SEPs

Under the Senate amendment, employees who participate in a SEP would be permitted to elect to have contributions made to the SEP or to receive the contributions in cash. If an employee elects to have contributions made on the employee's behalf to the SEP, the contribution is not treated as having been distributed or made available to the employee. Elective deferrals under a SEP are to be treated as similar to elective deferrals under a qualified cash or deferred arrangement and, thus, are subject to the $7,000 (indexed) cap on elective deferrals.

The Senate amendment provides that the election to have amounts contributed to a SEP or received in cash is available only if at least 50 percent of the employees of the employer elect to have amounts contributed to the SEP. This exception to the constructive receipt principle is available only in a taxable year in which the employer maintaining the SEP has 25 or fewer employees as of the beginning of the year.

Under the Senate amendment, the deferral percentage for each highly compensated employee cannot exceed 150 percent of the average deferral percentage for all other eligible employees. Matching and nonelective contributions may not be taken into account in determining the deferral percentage.

SEP deduction converted to exclusion from income

Under the Senate amendment, the amounts contributed to a SEP by an employer on behalf of an employee and the elective deferrals under a SEP are excludable from gross income, rather than deductible as under present law. The elective deferrals are included as wages for employment tax purposes.

In addition, the Senate amendment (1) modifies the rules relating to maintaining a SEP on a calendar year basis, and (2) prescribes rules for maintaining a SEP on a taxable year basis.

Participation requirements

Under the Senate amendment, the participation requirements for SEPs are modified to require that an employer make contributions for a year on behalf of each employee who (1) has attained age 21,[6] (2) has performed services for the employer during at least 3 of the immediately preceding 5 years, and (3) received at least $300 in compensation from the employer for the year.

In addition, the Senate amendment provides that this 100-percent participation requirement applies separately to elective arrangements and, for purposes of such elective arrangements, an individual who is eligible is deemed to receive an employer contribution. If nonelective SEP contributions are made for any employee, nonelective contributions must be made for all employees satisfying the participation requirements. Similarly, if any employee is eligible to make elective SEP deferrals, all employees satisfying the participation requirements must be eligible to make elective SEP deferrals.

Wage-based contribution limitation for SEPs

Under the Senate amendment, the $200,000 limit on compensation taken into account and the $300 de minimis threshold are indexed at the same time and in the same manner as the dollar limits on benefits under a defined benefit pension plan (sec. 415(d)).

Definition of computation period

The Senate amendment permits an employer to elect to use its taxable year rather than the calendar year for purposes of determining contributions to a SEP.

Integration rules

The Senate amendment eliminates the current rules under which nonelective SEP contributions may be combined with employer OASDI contributions for purposes of the applicable nondiscrimination requirements. In place of these rules, the Senate amendment permits nonelective SEP contributions to be tested for nondiscrimination under the new rules for qualified defined contribution plans permitting a limited disparity between the contribution percentages applicable to compensation below and compensation above the social security wage base.

Effective date

The provisions are effective for years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment with two modifications of the special nondiscrimination test applicable to salary reduction SEPs.

Under the first modification, the deferral percentage for each highly compensated employee cannot exceed the average deferral percentage for all other nonhighly compensated eligible employees by more than 125 percent.

Under the second modification, the exception from the rule of constructive receipt is limited to employers that did not have more than 25 employees at any time during the prior taxable year.

The provisions apply for taxable years beginning after December 31, 1986.

8. Deductible Contributions Permitted under Section 501(c)(18) Plans

Present Law

Under present law, a trust or trusts created before June 25, 1959, forming part of a pension plan funded solely by contributions of employees is entitled to tax-exempt status under section 501(a) of the Code (sec. 501(c)(18)).

Rev. Rul. 54-190, 1954-1 C.B. 46, concluded that contributions to a pension plan described above were deductible as union dues by an employee making such contributions. In 1982, the Internal Revenue Service declared Rev. Rul. 54-190 obsolete.[7]

House Bill

No provision.

Senate Amendment

Under the amendment, employees who participate in a section 501(c)(18) pension plan are permitted to elect to make deductible contributions if certain requirements are met. If an employee elects to make a deductible contribution to the plan, the contribution is deductible up to the lesser of $7,000 (coordinated with the limit on elective deferrals) or 25 percent of the compensation of the employee includible in income for the taxable year.

The amendment provides that the election to make deductible contributions to a section 501(c)(18) plan is available only if the plan satisfies a special nondiscrimination test similar to the test applicable to a qualified cash or deferred arrangement. If the test is not satisfied, rules similar to the rules applicable to excess contributions under a qualified cash or deferred arrangement are to apply.

Conference Agreement

The conference agreement follows the Senate amendment.

The provision is effective for contributions made in taxable years beginning after December 31, 1986.

B. Nondiscrimination Requirements

1. Minimum Coverage Requirements for Qualified Plans

Present Law

A plan generally satisfies the present-law coverage rule if (1) it benefits a significant percentage of the employer's workforce (percentage test), or (2) it benefits a classification of employees determined by the Secretary not to discriminate in favor of employees who are officers, shareholders, or highly compensated (classification test).

Percentage test

A plan meets the percentage test if (1) it benefits at least 70 percent of all employees, or (2) it benefits at least 80 percent of the employees eligible to benefit under the plan and at least 70 percent of all employees are eligible (i.e., the plan benefits at least 56 percent of all employees).

Classification test

A plan meets the classification test if the Secretary determines that it covers a classification of employees that does not discriminate in favor of employees who are officers, shareholders, or highly compensated (highly compensated employees).

Under Treasury regulations, the determination as to whether a classification discriminates in favor of highly compensated employees is to be made on the basis of the surrounding facts and circumstances of each case, allowing for a reasonable difference between the ratio of highly compensated employees who are benefited by the plan to all such employees and the corresponding ratio calculated for employees who are not highly compensated.

Published rulings (e.g., Rev. Rul. 83-58) applying the classification test include as relevant facts and circumstances the percentage of total employees covered and the compensation of the covered employees and the compensation of the excluded employ-

[6] Age 25 is reduced to age 21 under the provisions of the conference agreement making technical corrections to the Retirement Equity Act of 1984.

[7] Rev. Rul. 82-127, 1982-1 C.B. 215.

ees. The regulations also provide that a showing that a specified percentage of participants in a plan are not highly compensated is not sufficient to establish that the plan does not discriminate in favor of highly compensated employees.

Nondiscriminatory contributions or benefits

Additional tests are applied to determine whether contributions or benefits under the plan discriminate in favor of highly compensated employees (sec. 401(a)(4)). The present-law nondiscrimination requirements are satisfied if either the contributions or the benefits under a qualified plan do not discriminate in favor of highly compensated employees (sec. 401(a)(4)).

Aggregation rules

Aggregation of employers.—In applying the qualification rules (including the coverage and nondiscrimination tests), all employees of corporations that are members of a controlled group of corporations, or all employees of trades and businesses (whether or not incorporated) that are under common control, are aggregated and treated as if employed by a single employer (sec. 414(b) and (c)). Similarly, all employees of employers that are members of an affiliated service group are treated as employed by a single employer for purposes of the qualification requirements (sec. 414(m)).

In addition, for purposes of certain rules applicable to qualified plans and simplified employee pensions (SEPs), an individual (a leased employee) who performs services other than as an employee for a person and who meets certain requirements is treated as an employee of that person (sec. 414(n)). Finally, the Secretary has general regulatory authority to prevent avoidance of certain pension requirements (sec. 414(o)).

Aggregation of plans and comparability.—Under present law, an employer may designate two or more plans as a single plan for purposes of satisfying the coverage requirements.[1] However, if several plans are designated as a single plan, the plans, considered as a unit, must provide contributions or benefits that do not discriminate in favor of highly compensated employees.

In determining whether one or more plans designated as a unit provide benefits or contributions that do not discriminate in favor of highly compensated employees, it is necessary to determine whether the designated plans provide "comparable" benefits or contributions. Rev. Rul. 81-202[2] provides guidance that may be applied to determine whether the amount of employer-derived benefits or contributions provided under several plans discriminate in favor of highly compensated employees.

Excludable employees

In applying the percentage test, employees who have not met a minimum service or age requirement under the plan are disregarded. In addition, in applying the percentage test or the classification test, employees not covered by the plan and subject to a collective bargaining agreement between employee representatives and one or more employers are disregarded.

Tax-sheltered annuities

Under present law, no coverage or nondiscrimination rules prohibit an employer's tax-sheltered annuity program from favoring highly compensated employees.

a. Qualified plan coverage

House Bill

The House bill does not amend the present-law rules relating to the coverage requirements for qualified plans. However, the House bill directs the Secretary to study the effect of the present-law coverage tests and to report to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate, as well as the Joint Committee on Taxation, with respect to the study by July 1, 1986.

Senate Amendment

With respect to the coverage rules applicable to qualified plans, the Senate amendment (1) increases, to 80 percent of all employees, the level of coverage necessary to satisfy the "percentage test"; (2) replaces the "classification test" of present law with a "reasonable classification test" and provides the Treasury with guidance as to the manner in which the test is to be interpreted; (3) establishes an alternative method for satisfying the reasonable classification test ("alternative reasonable classification test"); (4) clarifies the circumstances under which an employee will be treated as benefiting under a plan for purposes of the coverage rules; (5) generally permits, for purposes of satisfying any of the tests, the exclusion from consideration of employees who have not satisfied certain minimum age and service requirements; (6) establishes an objective definition of those employees in whose favor discriminatory coverage is prohibited; (7) permits satisfaction of certain of the coverage rules on a line of business or operating unit basis; (8) establishes a definition of a line of business or operating unit with a special safe-harbor rule; and (9) contains a special transition rule for certain dispositions or acquisitions of a business.

The provisions of the Senate amendment generally are effective for plan years beginning after December 31, 1988. However, in the case of a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective for plan years beginning before the earlier of (1) the later of (i) January 1, 1989, or (ii) the date on which the last of the collective bargaining agreements terminates, or (2) January 1, 1991. Extensions or renegotiations of the collective bargaining agreement, if ratified after February 28, 1986, are disregarded.

Conference Agreement

Overview

With respect to the coverage rules applicable to qualified plans, the conference agreement follows the Senate amendment, except as outlined below.

General coverage rules

Under the conference agreement, a plan is not qualified unless the plan satisfies at least one of the following requirements:

(1) the plan benefits at least 70 percent of all nonhighly compensated employees (referred to herein as the "percentage test");

(2) the plan benefits a percentage of nonhighly compensated employees which is at least 70 percent of the percentage of highly compensated employees benefiting under the plan (referred to herein as the "ratio test"); or

(3) the plan meets the average benefits test.

An employer that has no nonhighly compensated employees in its workforce is considered to pass the coverage test.

Average benefits test

A plan meets the average benefits test if (1) the plan benefits such employees as qualify under a classification set up by the employer and found by the Secretary not to be discriminatory in favor of highly compensated employees ("classification test"); and (2) the average benefit percentage for nonhighly compensated employees of the employer is at least 70 percent of the average benefit percentage for highly compensated employees of the employer.

Classification test.—For purposes of the average benefits test, the conferees intend that the classification test is generally to be based on the present-law section 410(b)(1)(B) (as modified judicially and administratively in the future). However, it is to be applied using the new definitions of highly compensated employees and excludable employees.

Thus, the test is to be applied on the basis of the facts and circumstances of each case, including the difference between the coverage percentages of the highly compensated employees and the other employees, the percentage of total employees covered, and the difference between the compensation of the covered employees and the compensation of the excluded employees. Nevertheless, the conferees expect that the Secretary will consider providing an objective safe harbor based on these and other relevant factors to facilitate compliance with the test.

Average benefit percentage.—The term "average benefit percentage" means, with respect to any group of employees, the average of the benefit percentages calculated separately with respect to each employee in such group. The term "benefit percentage" means the employer-provided contributions (including forfeitures) or benefits of an employee under all qualified plans of the employer, expressed as a percentage of such employee's compensation. If benefit percentages are determined on the basis of employer-provided contributions, all employer-provided benefits must be converted into contributions for testing purposes. Similarly, if benefit percentages are determined on the basis of employer-provided benefits, all employer-provided contributions are to be converted into benefits. In determining the amount of contributions or benefits, the approach of Rev. Rul. 81-202 is to be the sole rule applicable, as modified in the manner described below. Thus, in the case of benefits testing, the benefit percentages are determined based on projected benefits.

The conferees further intend that the rules of Rev. Rul. 81-202 be modified in several respects, both for purposes of the average benefit percentage test and for purposes of determining whether 2 or more plans that are treated as a single plan under the percentage test, ratio test, or classification test discriminate in favor of highly compensated employees (sec. 401(a)(4)). First, Rev. Rul. 81-202 is to be modified to reflect the new limits contained in the conference agreement on the extent to which a plan may be integrated. Also, the new limitation on the amount of compensation that may be taken into account and the new definition of compensation applies under Rev. Rul. 81-202 as they apply for all nondiscrimination rules.

---

[1] Treas. Reg. sec. 1.410(b)-1(d)(3)(ii) prohibits this designation in certain cases involving TRASOPs and, prior to 1984, certain plans subject to sec. 401(a)(17). In addition, Treas. Reg. sec. 54.4975-11(e)(1) prohibits this designation in certain cases involving ESOPs.

[2] 1981-2 C.B. 93.

Rev. Rul. 81-202 is also to be modified to take into account other significant plan features. For example, determinations under Rev. Rul. 81-202 are to take into account the rate at which benefits actually accrue and, in appropriate cases, may take into account the existence of different plan options such as loans or lump-sum distributions that are available to highly compensated participants, but not to a proportionate number of nonhighly compensated participants. Moreover, the conferees clarify that under Rev. Rul. 81-202 the same actuarial assumptions are to be used in valuing different benefits or contributions. In appropriate circumstances, Rev. Rul. 81-202 may also be modified to take into account reasonable salary projections. The Secretary may also, in circumstances justifying special scrutiny, consider requiring a certificate of comparability from an enrolled actuary.

Finally, the conferees do not intend to restrict the authority of the Secretary to modify, as appropriate, aspects of Rev. Rul. 81-202 not discussed above. Also, the conferees do not intend that application of the rules of Rev. Rul. 81-202 to the average benefit percentage test be interpreted as requiring that an averaging approach be adopted for purposes of applying these rules to multiple plans being tested as a single plan under section 401(a)(4).

For purposes of determining benefit percentages, all pre-tax contributions or benefits provided under a qualified plan are considered employer-provided and must be taken into account, including, for example, elective contributions under a qualified cash or deferred arrangement. In no case may an employer disregard any qualified plan in determining benefit percentages, even if such qualified plan satisfies the percentage test or ratio test standing alone. Contributions or benefits under other types of plans or programs (such as SEPs or tax-sheltered annuity programs (sec. 403(b)) are not taken into account.

After the benefit percentage of each employee is determined in the manner described above, the average for the two groups (highly compensated employees and nonhighly compensated employees) is then to be determined by averaging the individual benefit percentages of each employee (including employees not covered by any plan) in a manner similar to the computation of the actual deferral percentage of a group of employees under a qualified cash or deferred arrangement.

Period of computing percentage.—The conference agreement provides that each employee's benefit percentage is to be computed, at the election of the employer, on the basis of contributions or benefits for (a) the current plan year, or (b) a period of consecutive plan years (not in excess of 3 years) ending with the current plan year. As under the Senate amendment, the period of consecutive plan years chosen by the employer is to be uniformly applied in computing each employee's benefit percentage, and may not be changed without the consent of the Secretary.

In addition, the conferees clarify that the fact that a failure to meet the new coverage tests was due to unforeseen circumstances does not affect application of the tests.

Employees benefiting under the plan

The conference agreement follows the Senate amendment. The conference agreement also clarifies that, for purposes of the average benefit percentage component of the average benefits test, it is actual benefits, not eligibility, that is taken into account. As under current law, this is also true for purposes of establishing comparability between plans.

Aggregation of plans and comparability

The conference agreement follows the Senate amendment, except that Rev. Rul. 81-202 is to be modified in the manner described above.

Excludable employees

For purposes of (a) the percentage test, (b) the ratio test, and (c) the average benefits test, the conference agreement generally follows the Senate amendment, with the following exceptions.

Minimum age and service.—The rules applicable under the Senate amendment to the percentage and reasonable classification tests apply to the percentage, ratio and classification tests. The rules applicable to the alternative reasonable classification test apply to the average benefits test (other than the classification test).

The conference agreement reflects the Senate amendment rule permitting employees who do not meet the age 21 and one year of service requirements to be tested separately. However, under the conference agreement, such separate testing is permissible even if such employees are not covered by a separate plan. Under the agreement, an employer may elect to test all such excludable employees separately. Alternatively, an employer may elect to test one group of excludable employees separately without testing all excludable employees separately if such group is defined in a nondiscriminatory manner solely by reference to the age or service requirements. For example, an employer may elect to test separately all employees excludable solely on the grounds that they do not have one year of service, but not include in such testing group employees excluded under the age rule. Also, the employer may test separately a group of employees who would pass an age or service requirement that is less restrictive than the age 21 or one year of service requirement. For example, an employer could test separately all employees excludable solely on the grounds that they are not age 21, but who are at least 18.

Collective bargaining agreement.—For purposes of applying (a) the percentage test, (b) the ratio test, or (c) the average benefits test to qualified plan coverage of employees who are not included in a unit of employees covered by a collective bargaining agreement, all employees covered by such an agreement are disregarded. However, in applying the same tests to employees covered by any such agreement, an employee may not be disregarded based on the fact that such employee is not covered under the collective bargaining agreement.

Separate line of business

The conference agreement follows the Senate amendment, with the modifications described in Part E.1., below. The conference agreement also clarifies that the line of business rule applies to the percentage test, as well as to the ratio test and the average benefits test.

Compensation

The conference agreement provides that, for purposes of applying the nondiscrimination rules (including the actual deferral percentage limits for cash or deferred arrangements and for employee and employer matching contributions), except as otherwise expressly provided (e.g., the definition of compensation for purposes of identifying the highly compensated employees), the term "compensation" means the total includible compensation of the employees of the employer. In addition, an employer may elect to treat salary reduction amounts under a cash or deferred arrangement, tax-sheltered annuity program, SEP, or cafeteria plan, as compensation, provided that such treatment is applied on a consistent basis. Thus, if an employer elects to treat elective deferrals under one cash or deferred arrangement as compensation, it must treat all elective deferrals under all cash or deferred arrangements as compensation. Further, the Secretary is directed to prescribe alternative definitions of compensation for use by employers in applying the nondiscrimination tests. Such alternative definitions are to include the basic or regular compensation of employees (e.g., disregarding bonuses and overtime). An employer may use an alternative definition prescribed by the Secretary only if it does not discriminate in favor of that employer's highly compensated employees; such determination is to be made in an objective fashion on the basis of the total includible compensation of employees.

Special rules for certain dispositions and acquisitions

The conference agreement follows the Senate amendment.

Former employees

Under rules prescribed by the Secretary, the coverage rules are to apply separately to former employees. The conferees intend that for this purpose rules similar to those applicable to employee benefits may be applied. (*See* Part E.1., below.)

Sanction

The conference agreement modifies the sanction applicable to a plan that fails to qualify due solely to a failure to satisfy the new coverage rules. Under the agreement, nonhighly compensated employees are not taxable on amounts contributed to or earned by the trust merely because a plan fails to satisfy the coverage requirements. Highly compensated employees, on the other hand, are taxable on the value of their vested accrued benefit attributable to employer contributions and income on any contributions to the extent such amounts have not previously been taxed to the employee. Except for these two changes, the sanctions applicable under current law are not modified. Thus, as under present law, in appropriate circumstances, apply lesser sanctions than those authorized.

Effective date

The conference agreement follows the Senate amendment.

2. Tax-Sheltered Annuities

House Bill

In general

The House bill generally applies the qualified plan coverage and nondiscrimination rules of present law (secs. 410(b) and 401(a)(4)), except to the extent otherwise modified by the House bill, to the nonelective and matching contributions or benefits of tax-sheltered annuity programs (other than those maintained for church employees). To the extent the program permits elective employer deferrals, a special coverage and nondiscrimination rule applies to those elective deferrals.

Elective deferrals

The bill provides a special coverage and nondiscrimination rule applicable to tax-

sheltered annuity programs that permit elective deferrals. If the employer provides nonelective or matching contributions or benefits under a program, the special rule applies only to the elective deferrals and the general nondiscrimination rules described above apply to the other contributions or benefits. If, however, the employer maintains a tax-sheltered annuity program that permits only elective deferrals (i.e., no nonelective or matching contributions or benefits are provided), only the special rule for elective deferrals applies.

A tax-sheltered annuity program will be considered discriminatory with respect to elective deferrals unless the opportunity to make such deferrals is available to all employees of the entity sponsoring the tax-sheltered annuity program. Thus, the employer generally is not to require any minimum dollar amount (or percentage of compensation) as a condition of participation, other than a reasonable de minimis amount (such as minimum annual contributions of $300 (or one percent of compensation) or minimum monthly contributions of $25).

Elective deferrals under a tax-sheltered annuity program consist of those employer contributions made pursuant to a salary reduction agreement, whether evidenced by a written instrument or otherwise (sec. 3121(a)(5)(D)), to the extent those contributions are excludable from the employee's gross income. In applying the special test for deferrals, no employees of the entity sponsoring the tax-sheltered annuity program (other than nonresident aliens with no U.S.-source earned income) may be excluded from consideration. For example, the qualified plan rules permitting the exclusion of certain employees based upon age and service and coverage under collective bargaining agreements do not apply.

Aggregation of employers

As with respect to qualified plans, the new coverage and nondiscrimination rules generally apply with respect to the "employer" as defined in sections 414 (b), (c), (m), and (o). In addition, the qualified plan rules relating to leased employees apply (sec. 414(n)). However, the rules relating to elective deferrals apply, pursuant to Treasury regulations, with respect to the entity of the employer sponsoring the tax-sheltered annuity program.

Employers subject to the nondiscrimination rule

In general, all employers eligible to sponsor a tax-sheltered annuity program are subject to the nondiscrimination rules added by the bill. However, these rules do not apply to tax-sheltered annuity programs maintained for church employees.

For purposes of this exclusion, the term "church" is defined to include only a church described in section 501(c)(3) or a qualified church-controlled organization. These terms generally have the same meaning as they do for purposes of exclusion from the SECA and FICA taxes (secs. 1402 and 3121). Accordingly, for purposes of this provision, the term "church" includes (1) a convention or association of churches, and (2) an elementary or secondary school that is controlled, operated, or principally supported by a church or by a convention or association of churches.

Similarly, the term "qualified church-controlled organization" means any church-controlled tax-exempt organization described in section 501(c)(3) other than an organization that both (1) offers goods, services, or facilities for sale (other than on an incidental basis) to the general public (e.g., to individuals who are not members of the church), other than goods, services, or facilities that are sold at a nominal charge which is substantially less than the cost of providing such goods, services, or facilities, and (2) normally receives more than 25 percent of its support from either (a) governmental sources, or (b) receipts from admissions, sales of merchandise, performance of services, or furnishing of facilities in activities that are not unrelated trades or businesses, or from (a) and (b) combined.

These nondiscrimination rules generally apply for years beginning after December 31, 1985. However, with respect to tax-sheltered annuity programs maintained by State and local governments, these nondiscrimination rules generally apply for plan years beginning after November 21, 1987.

Senate Amendment

No provision.

Conference Agreement

In general

The conference agreement generally follows the House bill, subject to the following modifications.

If an employer provides nonelective or matching contributions or benefits under a tax-sheltered annuity program, the conference agreement requires that such employer contributions or benefits satisfy the new coverage and nondiscrimination rules applicable to qualified plans, as modified or added pursuant to the conference agreement (*see* Part B.1., above), rather than the coverage and nondiscrimination rules applicable to qualified plans under present law.

Except as otherwise noted below, these rules apply in the same manner to tax-sheltered annuity programs as they do to qualified plans. Thus, the full array of rules relating to nondiscrimination apply (such as, for example, the limit on the amount of compensation that may be taken into account, the special nondiscrimination rule applicable to matching contributions, the employee leasing rules, and the minimum participation rules).

Integration

As with respect to qualified plans, employers maintaining tax-sheltered annuity programs generally may integrate contributions or benefits under the new integration rules for purposes of the average benefits test (sec. 410(b)), for establishing comparability between programs (or between a program and a plan), and for satisfying the benefits test within a plan (sec. 401(a)(4)). However, under rules prescribed by the Secretary, there is no permitted disparity under the new integration rules for employees who are not covered by social security.

Permissive aggregation

If a tax-sheltered annuity program, standing alone, fails to satisfy the percentage test, the ratio test, or the classification test, the employer may elect to treat the tax-sheltered annuity program and a qualified plan or another tax-sheltered annuity program as a single plan solely for purposes of demonstrating that the tax-sheltered annuity program satisfies the coverage requirements. If a tax-sheltered annuity program is aggregated with another tax-sheltered annuity or with a qualified plan for purposes of satisfying the coverage rules, the aggregated arrangements must provide contributions or benefits that do not discriminate in favor of highly compensated employees (secs. 401(a)(4) and 401(m)).

The requirement that such aggregated arrangements provide comparable contributions or benefits generally applies in the same manner to tax-sheltered annuity programs as it does to qualified plans. Thus, the principles of Rev. Rul. 81-202, as modified in the ways described in Part B.1., above, are to apply. However, the conferees intend that the Secretary is to prescribe rules applicable to tax-sheltered annuities that reduce the administrative burden of applying Rev. Rul. 81-202. For example, the Secretary might permit, under appropriate circumstances, testing less frequently than annually.

In applying the average benefit percentage component of the average benefits test to a tax-sheltered annuity program, an employer may at its election include all qualified plans in determining the average benefit percentages.

As under the House bill, a tax-sheltered annuity program may not be aggregated with a qualified plan for purposes of determining whether the qualified plan satisfies the applicable coverage and nondiscrimination rules, including the average benefits test.

Excludable employees

The categories of employees that are excluded in applying the coverage rules to tax-sheltered annuities are the same as those that are excluded in applying the rules to qualified plans, except that, in addition, an employer is to exclude from consideration students who normally work less than 20 hours per week. This additional category of excludable employees is treated in the same manner as the category of employees who do not meet the service requirements for qualified plans. Thus, for example, the 20-hour requirement only applies if the employer excludes all students normally working less than 20 hours per week.

Elective deferrals

The conference agreement follows the House bill, except that in applying the nondiscriminatory coverage rule applicable to elective deferrals under a tax-sheltered annuity program, the employer is to exclude from consideration students who normally work fewer than 20 hours per week, as discussed above. The conference agreement also clarifies that, in applying the average benefits test, elective deferrals under a tax-sheltered annuity are to be disregarded.

The conference agreement also clarifies the definition of an elective deferral. If an employee has a one-time election to participate in a program that requires an employee contribution, such contribution will not be considered an elective deferral to the extent that the employee is not permitted subsequently to modify the election in any manner. In addition, the Secretary is authorized to prescribe additional instances in which employer contributions to a plan will not be considered elective despite the existence of limited rights of election by the employee.

Employers subject to the nondiscrimination rule

The conference agreement follows the House bill. In addition, the conference agreement provides that for purposes of the nondiscrimination rules applicable to tax-sheltered annuity programs, the general rules regarding aggregation of employers and testing on a line of business or operating unit basis shall apply under rules prescribed by the Secretary. The Secretary may provide for a narrower definition of

employer for purposes of the rules applicable to elective deferrals.

Effective date

The application of the nondiscrimination rules to tax-sheltered annuity programs is effective for plan years beginning after December 31, 1988.

3. Minimum Participation Rule

Present Law

Under present law, an employer may designate two or more plans as a single plan for purposes of satisfying the coverage requirements applicable to qualified plans (sec. 410(b)). (*See* Part B.1., above, for a discussion of the coverage rules applicable to qualified plans.) However, if several plans are designated as a single plan, the plans, considered as a unit, must be provided for the exclusive benefit of employees and also must provide contributions or benefits that do not discriminate in favor of highly compensated employees (sec. 401(a)(4)).

In determining whether several different plans designated as a unit provide benefits or contributions that do not discriminate in favor of highly compensated employees, it is necessary to determine whether the different plans provide "comparable" benefits or contributions. Rev. Rul. 81-202 [3] provides guidance that may be applied to determine whether the amount of employer-derived benefits or contributions provided under several plans discriminate in favor of highly compensated employees. That ruling provides (1) methods for adjusting all types of benefits to a standard form; (2) methods for converting benefits into contributions, and contributions into benefits; and (3) methods for imputing the value of employer-provided social security benefits.

The ruling generally provides that the amount of employer-derived benefits provided by a plan or plans will be considered nondiscriminatory if (1) the normalized employer-provided benefits, or (2) both the actual employer contributions and the adjusted contributions do not constitute a greater percentage of nondeferred compensation for any highly compensated employee than for any nonhighly compensated employee. The ruling allows either contributions or benefits to be compared regardless of the type of plans involved.

House Bill

No provision.

Senate Amendment

Under the Senate amendment, a plan is not a qualified plan unless it benefits no fewer than the lesser of (a) 50 employees of the employer or (b) 40 percent or more of all employees of the employer. The requirement may not be satisfied by aggregating comparable plans. Also, the requirement applies on an employer-wide basis and may not be applied on a line of business or operating unit basis. In the case of a cash or deferred arrangement or the portion of a defined contribution plan (including the portion of a defined benefit plan treated as a defined contribution plan (sec. 414(k)) to which employee contributions or employer matching contributions are made, an employee will be treated as benefiting under the plan if the employee is eligible to make contributions to the plan.

The Senate amendment generally provides that, for purposes of applying the minimum participation rules, the same categories of employees may be disregarded as may be disregarded for purposes of applying the general coverage rules. In the case of a plan covering only employees included in a unit of employees covered by a collective bargaining agreement, all employees not included in such unit may be disregarded for purposes of satisfying the minimum participation rule.

The provisions are generally effective for plan years beginning after December 31, 1988.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, in the case of a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective for plan years beginning before the earlier of (1) the later of (i) January 1, 1989, or (ii) the date on which the last of the collective bargaining agreements terminates, or (2) January 1, 1991. Extensions or renegotiations of the collective bargaining agreement, if ratified after February 28, 1986, are disregarded.

Conference Agreement

The conference agreement follows the Senate amendment with the following modifications and clarifications.

First, the minimum participation rule generally does not apply to a multiemployer plan. However, this exemption does not apply to a multiemployer plan that covers any professional (e.g., doctor, lawyer, or investment banker). In addition, the special rule in the Senate amendment regarding plans covering only employees included in a unit of employees covered by a collective bargaining agreement also does not apply to a plan that covers any professional. No inference is intended from these rules that a plan covering a professional may be a multiemployer plan.

Second, the conference agreement provides that, under regulations prescribed by the Secretary, any separate benefit structure, any separate trust, or any separate arrangement with respect to a defined benefit plan may be treated as a separate plan for purposes of applying the minimum participation rule. Thus, for example, a plan that provides two different formulas for calculating participants' benefits or contributions may be treated as at least two plans. Also, if defined benefit plan assets are payable from more than one source, such as from more than one trust, each source of assets may be considered a separate plan. If any particular person or persons have any priority (under the terms of the plan or by arrangement outside of the plan) with respect to a source of assets for defined benefits, such as a right to some or all of a possible reversion, such person or persons may be considered the sole participant or participants with respect to that "plan."

In general, it is the intent of the conferees to define "plan" in such a way as to carry out the purposes of the minimum participation rule. Thus, if there is a single defined benefit structure and a single source of assets, there may be more than one plan for purposes of this rule if, under all the facts and circumstances (including those outside of the plan), the arrangement has an effect similar to providing a plan or account to a group of employees that would not satisfy the minimum participation rule. For example, a group of employees might agree to provide each one of them with investment authority with regard to a separate pool of assets held with respect to the defined benefit structure. If such employees may be compensated in any manner, inside or outside the plan, by reference to the results of their investments, each part of the pool of assets may be considered a separate plan benefiting the participant controlling the investment thereof.

In addition, "plan" is to be defined so as to preclude the use of structures such as defined benefit plan-defined contribution plan combinations (with benefit offsets) to avoid the rule.

If any plan, as specially defined herein, fails to satisfy the minimum participation rule, the entire plan (as otherwise defined) fails to satisfy the qualification standard (sec. 401(a)). Also, except to the extent provided in regulations, a plan will not satisfy this rule for a year unless it satisfies it on each day of the year.

The conferees also clarify how the minimum participation rules apply with respect to coverage of employees who could be excluded under the age or service rules from participation in a qualified plan. Generally, the rule is to apply as if the only employees of the employer were the excludable employees who may be tested separately under the coverage tests. However, all employees of the employer must be taken into account if any highly compensated employee is covered as an excludable employee for more than one year. Also, if any excludable employee is covered under a defined benefit pension plan, all employees of the employer are to be taken into account in applying the minimum participation rule to such plan, except where (1) the benefits provided under such coverage are comparable (or less than comparable) to the coverage of nonexcludable employees; and (2) the plan covering such excludable employees would satisfy the minimum participation rule (taking into account all employees of the employer) but for the fact that such plan has a different defined benefit structure from the plan covering the nonexcludable employees. Thus, payments with respect to defined benefits provided to excludable employees must come from the same source as payments with respect to defined benefits provided to nonexcludable employees. All employees of the employer are to be taken into account if only the excludable employees are covered by a defined benefit plan.

If excludable employees may be tested separately under the rules described above, such employees may be disregarded in applying the minimum participation rule to other employees.

The Secretary may exempt from the application of this rule two limited situations. The Secretary may, under appropriate conditions, exempt a plan that benefits no employee who is or ever has been a highly compensated employee with respect to service being credited under the plan, provided that such plan is not necessary for another plan or plans to satisfy the applicable coverage rules (sec. 410(b)).

The Secretary may, under appropriate conditions, also exempt a plan that may not be terminated on account of the provisions of the Single Employer Pension Plan Amendment Act (SEPPAA) because it is underfunded. However, such exemption may not apply unless benefit accruals cease, the plan obtains a letter of insufficiency for each plan year of exemption, and the plan eliminates, under rules prescribed by the Secretary, any different benefit structure or separate arrangement (as described above).

Further, the conference agreement provides that if (i) a plan is in existence on August 16, 1986, (ii) the plan would fail to meet the requirements of the minimum par-

[3] 1981-2 C.B. 93.

ticipation rule if such rule were in effect on August 16, 1986, and (iii) there is no transfer of assets to or liabilities from the plan, or merger or spinoff involving the plan, after August 16, 1986, such plan may be terminated and the 10-percent excise tax on the reversion of assets (*See* Part D.3., below) is not imposed on any employer reversion from such plan. Such termination and reversion are permissible even though the terminating plan relies on another plan that is not terminated for qualification. In determining the amount of any such employer reversion, the present value of the accrued benefit of any individual who is a highly compensated employee, is to be determined by using an interest rate that is equal to the maximum interest rate that may be used for purposes of calculating a participant's accrued benefit under section 411(a)(11)(B). (*See* Part E.4., below.) The Secretary is to prescribe rules preventing avoidance of this interest rate rule through distributions prior to or in lieu of a reversion.

4. Vesting Standards

Present Law

In general

To ensure that employees with substantial periods of service with the employer do not lose plan benefits upon separation from employment, the Code generally requires that under a qualified plan (1) a participant's benefits be fully vested upon attainment of normal retirement age under the plan; (2) a participant be fully vested at all times in the benefit derived from employee contributions; and (3) employer-provided benefits vest at least as rapidly as under one of three alternative minimum vesting schedules (Code sec. 411(a)). Under these schedules, an employee's right to benefits derived from employer contributions becomes nonforfeitable (vested) to varying degrees upon completion of specified periods of service with an employer.

Under one of the schedules, full vesting is required upon completion of 10 years of service (no vesting is required before the end of the 10th year). Under a second schedule, vesting begins at 25 percent after completion of 5 years of service and increases gradually to 100 percent after completion of 15 years of service. The third schedule takes both age and service into account, but, in any event, requires 50-percent vesting after 10 years of service, and an additional 10-percent vesting for each additional year of service until 100-percent vesting is attained after 15 years of service.

Patterns of discrimination

Vesting more rapid than under the 3 schedules described above may be required under a qualified plan to prevent discrimination if (1) there has been a pattern of abuse under the plan tending to discriminate in favor of employees who are officers, shareholders, or highly compensated, or (2) there has been, or there is reason to believe there will be, an accrual of benefits or forfeitures tending to discriminate in favor of employees who are officers, shareholders, or highly compensated (sec. 411(d)(1)).

Top-heavy plans

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) required that for any plan year for which a qualified plan is top heavy, an employee's right to accrued benefits must become nonforfeitable under one of two alternative schedules. Under the first top-heavy schedule, a participant who has completed at least 3 years of service with the employer maintaining the plan must have a nonforfeitable right to 100 percent of the accrued benefit derived from employer contributions.

A plan satisfies the second alternative (6-year graded vesting) if a participant has a nonforfeitable right to at least 20 percent of the accrued benefit derived from employer contributions at the end of 2 years of service, 40 percent at the end of 3 years of service, 60 percent at the end of 4 years of service, 80 percent at the end of 5 years of service, and 100 percent at the end of 6 years of service with the employer.

Class year plans

Special vesting rules also apply to "class year plans." A class year plan is a profit-sharing, money purchase, or stock bonus plan that provides for the separate vesting of employee rights to employer contributions on a year-by-year basis. The minimum vesting requirements are satisfied if the plan provides that a participant's right to amounts derived from employer contributions with respect to any plan year are nonforfeitable not later than the close of the fifth plan year following the plan year for which the contribution was made.

Changes in vesting schedule

Under present law, if a plan's vesting schedule is modified by plan amendment, the plan will not be qualified unless each participant with no less than 5 years of service is permitted to elect within a reasonable period after the adoption of the amendment to have the nonforfeitable percentage of the participant's accrued benefit computed under the plan without regard to the amendment.

House Bill

No provision.

Senate Amendment

In general

The Senate amendment provides that a plan is not a qualified plan (except in the case of a multiemployer plan), unless a participant's employer-provided benefit vests at least as rapidly as under one of 2 alternative minimum vesting schedules.

A plan satisfies the first schedule if a participant has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions upon the participant's completion of 5 years of service. A plan satisfies the second alternative schedule if a participant has a nonforfeitable right to at least 20 percent of the participant's accrued benefit derived from employer contributions after 3 years of service, 40 percent at the end of 4 years of service, 60 percent at the end of 5 years of service, 80 percent at the end of 6 years of service, and 100 percent at the end of 7 years of service.

Top-heavy plans

The provisions of the Senate amendment relating to vesting do not alter the requirements applicable to plans that become top heavy. Thus, a plan that becomes top heavy is required to satisfy one of the two alternative vesting schedules applicable under present law to top-heavy plans.

Class-year plans

A plan with class year vesting will not meet the qualification standards of the Code unless, under the plan's vesting schedule, a participant's total accrued benefit derived from employer contributions becomes nonforfeitable at least as rapidly as under one of the two alternative vesting schedules specified in the bill.

Changes in vesting schedule

If a plan's vesting schedule is modified by a plan amendment, the plan will not be qualified unless each participant with at least 3 years of service is permitted to elect, within a reasonable period after the adoption of the amendment, to have the nonforfeitable percentage of the participant's accrued benefit computed without regard to the amendment.

Multiemployer plans

As an exception to the general vesting requirements, the bill requires that, in the case of a multiemployer plan, a participant's accrued benefit derived from employer contributions be 100 percent vested no later than upon the participant's completion of 10 years of service.

Effective date

The provisions of the Senate amendment are generally applicable for plan years beginning after December 31, 1988, to participants who perform at least one hour of service in a plan year to which the new provision applies.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, in the case of a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective for plan years beginning before the earlier of (1) the later of (i) January 1, 1989, or (ii) the date on which the last of the collective bargaining agreements terminates, or (2) January 1, 1991. Extensions or renegotiations of the collective bargaining agreement, if ratified after February 28, 1986, are disregarded.

Conference Agreement

The conference agreement follows the Senate amendment. In addition, the conference agreement modifies the rule permitting an employer to condition participation in a plan on 3 years of service. Under the conference agreement a plan may require, as a condition of participation, that an employee complete a period of service with the employer of no more than two years. A plan that requires that an employee complete more than one year of service as a condition of participation must also provide that each participant in the plan has a nonforfeitable right to 100 percent of the accrued benefit under the plan when the benefit is accrued.

In addition, the conference agreement limits the special rule for multiemployer plans to employees covered by a collective bargaining agreement.

Also, benefits that become vested due to these provisions are to be immediately guaranteed by the PBGC (without regard to the phase-in rule).

The conference agreement also modifies the effective date so that the provision applies to all employees who have one hour of service after the effective date. This revised effective date also applies to the conference agreement modification regarding years of service required for participation.

In addition, the conference agreement limits the delayed effective date for plans maintained pursuant to a collective bargaining agreement to employees covered by such agreements.

5. Application of Nondiscrimination Rules to Integrated Plans

Present Law

In general

Present law provides nondiscrimination standards for qualified pension, profit-sharing, and stock bonus plans. These standards prohibit discrimination in favor of employees who are officers, shareholders, or highly compensated. Under these standards, coverage tests are applied to determine whether the classification of employees who participate in a plan is discriminatory. Additional tests are applied to determine whether contributions or benefits under the plan discriminate in favor of highly compensated employees.

The present-law nondiscrimination requirements are satisfied if either the contributions or the benefits under a qualified plan do not discriminate in favor of highly compensated employees.

Generally, in applying the nondiscrimination test to benefits under a plan, the benefits that are provided by the plan for highly compensated participants (as a percentage of their compensation) is compared to the benefits that are provided for other participants. A similar test may be applied to employer contributions under a plan. A plan fails the nondiscrimination standard if both benefits and contributions discriminate in favor of highly compensated employees.

Under present law, in determining whether defined benefit pension plan benefits, as a percentage of compensation, discriminate in favor of employees who are highly compensated, the portion of each employee's social security benefits that is considered to be paid for by the employer may be taken into account. For this purpose, social security benefits mean old age, survivors, and disability insurance (OASDI) benefits provided under the social security system.

Section 401(l) and Revenue Rulings 71-446 and 83-110 provide guidance for calculating the maximum amount of social security benefits that may be taken into account under an employer's qualified plan. In addition, section 401(a)(25) prevents increases in social security benefits after an employee's separation from service with an employer from reducing plan benefits. Also, section 411(b)(1)(G) provides that an employee's accrued benefit (other than a social security supplement) under a defined benefit plan may not be reduced on account of any increase in the employee's age or service. Finally, section 411(d)(6) provides that, with limited exceptions, the accrued benefit of a participant may not be decreased by plan amendment. A plan that meets the nondiscrimination standards of the Code only if social security benefits are taken into account is referred to as an integrated plan. Either benefits or contributions under a plan may be integrated.

Integration of defined benefit pension plans

Two basic approaches to integration of defined benefit pension plans have been developed: (1) the "offset" approach, and (2) the "excess" approach.

Offset plans

A defined benefit pension plan that integrates under the offset approach is referred to as an offset plan. An offset plan initially provides each employee with an annual pension benefit which (as a percentage of compensation) does not discriminate in favor of highly compensated employees. For each employee, this initial benefit is then reduced, or offset, by the employer-provided portion of that employee's social security benefit to arrive at the actual pension benefit under the plan.

In 1971, the Internal Revenue Service determined that the value of employer-provided social security benefits is equal to 83⅓ percent of the annualized primary insurance amount (PIA) to which an employee is entitled under the Social Security Act. This calculation forms the basis of the present-law rules for integrating offset plans. Consequently, an offset plan without integrated ancillary benefits could integrate its benefits with social security by providing each employee retiring under the plan an annual benefit of, for example, 50 percent of pay offset by 83⅓ percent of the employee's PIA. If an offset plan provides employees with integrated ancillary benefits (e.g., normal retirement benefits not in the form of an annuity, preretirement death benefits, and early retirement benefits), the present-law rules require that the 83⅓ percent factor be reduced.

Excess plans

A pension plan that integrates under the excess approach is referred to as an excess plan. The basic theory underlying the excess approach is that the social security system provides benefits based on only a certain portion of an employee's earnings. An excess plan is designed to provide benefits (or added benefits) based on the portion of an employee's earnings "in excess" of the integration level, on the earnings on which social security benefits are provided. An excess plan properly integrates if the benefits with respect to compensation in excess of the integration level are not greater, as a percentage of pay, than the benefits provided by social security on compensation up to the integration level.

The Internal Revenue Service determined that the employer-provided portion of benefits under social security averages 37½ percent of the average annual maximum wages on which social security benefits are based (covered compensation). This calculation forms the basis of the present-law rules for integrating excess plans. Consequently, for an employee retiring at age 65 with at least 15 years of service in 1986, an excess plan will integrate properly if it provides benefits at a rate no greater than 37½ percent of final average compensation in excess of approximately $15,000 (covered compensation for such an employee), although it provides no benefits with respect to the first $15,000 of final pay.

If an excess plan provides benefits on compensation up to covered compensation, then it can provide benefits at a higher rate on pay above the level of covered compensation. However, the rate at which benefits are provided above covered compensation cannot exceed the rate at which benefits are provided on compensation up to covered compensation by more than 37½ percent. For example, an integrated excess plan could provide benefits at the rate of 12½ percent for all final average compensation plus 50 percent (i.e., 37½ percent plus 12½ percent) of final pay in excess of covered compensation.

As is the case with an offset plan, if an excess plan has integrated ancillary benefits, the 37½ percent factor must be reduced. In addition, the 37½ percent factor must be reduced for an excess plan that uses an integration wage level higher than covered compensation (or the otherwise applicable maximum integration wage level) or determines a participant's final average compensation on the basis of a period shorter than 5 consecutive years.

A defined benefit plan formula may be either a flat benefit formula, as illustrated above, or a unit benefit formula under which the benefit is based on the number of an employee's years of service with the employer. Examples of fully integrated unit benefit formulas (assuming no required adjustments for ancillary benefits or alternative integration wage levels) are (i) annual benefit at age 65 equal to 1.4 percent of career average compensation in excess of the integration wage level (the taxable wage base) for each year of service with the employer, and (ii) annual benefit at age 65 equal to 1 percent of final average compensation in excess of covered compensation times years of service with the employer. Of course, these 1.4 percent and 1 percent factors must be reduced if the excess plan has integrated ancillary benefits or uses a higher integration wage level.

Under present law, the integration rules allow an employer to implicitly take credit for the OASDI contributions of former employers of an employee. Thus, for example, an employee who retires at age 65 with 15 years of service under a flat benefit excess plan may receive a benefit under an integrated plan of 37½ percent of final average compensation in excess of covered compensation, even though the employee worked with the employer only for the last 15 years. The current integration rules are even more generous under an offset plan because the maximum offset of 83⅓ percent could be applied to an employee retiring at age 65 with as little as one year of service. OASDI benefits are earned, however, over the entire working career of the employee.

Integration of defined contribution plans

Defined contribution plans do not provide specified benefit formulas. Defined contribution plans provide for contributions to be accumulated in a separate account for each employee. Accordingly, such plans are integrated by taking into account the employer-paid portion of social security taxes. Specifically, a defined contribution plan is integrated by reducing contributions to the plan with respect to the portion of an employee's pay subject to the social security OASDI tax (i.e., the taxable wage base or $42,000 for 1986).

Since 1983, an employer has been able to integrate a defined contribution plan by reducing contributions on behalf of an employee by no more than an amount equal to the employee's taxable wage base multiplied by the actual OASDI tax rate. Thus, a profit-sharing plan could provide contributions of 5.7 percent (the OASDI tax rate) of 1986 pay in excess of $42,000 (the 1986 taxable wage base) and no contributions for 1986 with respect to the first $42,000 of pay. Similarly, if a plan provided for 1986 contributions of 10 percent of pay in excess of $42,000, it would integrate properly only if it provided for 1986 contributions of at least 4.3 percent with respect to the first $42,000 of pay. For a profit-sharing or stock bonus plan to be properly integrated, the plan must also provide benefits only upon retirement, death, or other separation from service. Adjustments to the 5.7 percent factor are required only if the plan uses an integration wage level higher than the current taxable wage base.

Top-heavy plans

A qualified plan that is top-heavy must provide a minimum nonintegrated benefit or contribution derived from employer contributions for each employee who is a participant in the plan and who is not a key

employee (sec. 416). The rule is designed to reflect the higher proportion of tax advantages allocated to the benefit of key employees in a top-heavy plan. Generally, a plan is top heavy if more than 60 percent of the benefits it provides are for key employees (sec. 416).

A defined benefit pension plan satisfies this minimum benefit requirement if, on a cumulative basis, the accrued benefit of each participant who is not a key employee, when expressed as an annual retirement benefit, is not less than two percent of the employee's average annual compensation from the employer, multiplied by the number of the employee's years of service with the employer. However, an employee's minimum benefit is not required to exceed 20 percent of such average annual compensation. This required minimum benefit may not be eliminated or reduced on account of the employee's social security benefits (i.e., the minimum benefit is a "nonintegrated" benefit).

For a plan year for which a defined contribution plan is a top-heavy plan, the employer generally must contribute on behalf of each plan participant who is not a key employee an amount not less than three percent of the participant's compensation. The minimum contribution must be made for each year in which the plan is top-heavy. However, if the employer's contribution rate for each participant who is a key employee for the plan year is less than three percent, the required minimum contribution rate for each non-key employee generally is limited to the highest contribution rate for any key employee. The required minimum contribution must be a nonintegrated contribution.

House Bill

The House bill revises the manner in which a pension plan may be integrated with social security. Pursuant to regulations to be issued by the Secretary of the Treasury, the maximum amount of social security benefits that may be taken into account by an employer for any year of service with such employer may not exceed 1/40 of the total social security benefits permitted to be taken into account. Thus, the bill precludes an employer from taking into account benefits attributable to OASDI contributions of former employers of an employee.

Under a flat-benefit excess plan, the full 37½ percent excess amount (reduced for integrated ancillary benefits) could be applied only to an employee who had 40 years of service with the employer upon retirement at age 65. If an employee only had 20 years of service with the employer, the maximum excess benefit at age 65 would be 16.75 percent (37½ multiplied by 20/40, the ratio of 20 years of service to 40), assuming that the plan has no integrated ancillary benefits.

For an offset plan, the full 83⅓ percent offset (reduced for integrated ancillary benefits) could be applied only to an employee who retired at age 65 with 40 years of service with the employer. Thus, if an employee retired at age 65 with 30 years of service with the employer, the maximum offset would be 62.5 percent (83⅓ multiplied by 30/40, the ratio of 30 years of service to 40), assuming the plan has no integrated ancillary benefits.

The bill generally would not have a significant effect on unit benefit plans because such plans will automatically reduce the social security benefit taken into account under the plan for employees retiring with less than 37½ years of service due to the reduced number of years taken into account under the unit benefit formula for such employees. Furthermore, the bill generally would not affect the integration of defined contribution plans integrated with OASDI benefits (except to the extent such plans are determined to be nondiscriminatory on the basis of benefits). Also, the committee anticipates that similar rules would apply to the integration of other employer-provided benefits under Federal, State, or foreign law.

The provision applies to plan years beginning after December 31, 1986.

Senate Amendment

In general

The Senate amendment provides that a plan is not to be considered discriminatory merely because the contributions and benefits of (or on behalf of) employees under the plan favor highly compensated employees if the plan meets the new requirements of the bill relating to the integration of contributions or benefits.

Permitted disparity in defined contribution plans

In general.—Under the Senate amendment, a defined contribution plan meets the disparity limits for integrated plans only if the excess contribution percentage under the plan does not exceed the base contribution percentage by an amount specified in the bill. The bill provides that the excess contribution percentage is not to exceed the lesser of (1) 200 percent of the base contribution percentage, or (2) the sum of the base contribution percentage and the rate of the tax imposed on employers under the Federal Insurance Contributions Act (5.7 percent for 1986) as of the beginning of the plan year.

For example, under the Senate amendment, if a defined contribution plan provided for contributions of 10 percent of pay on compensation in excess of the taxable wage base, then the plan is required to provide contributions of at least 5 percent of pay on compensation up to the taxable wage base in order to satisfy the integration rules for defined contribution plans. Alternatively, if the plan provided contributions of 10 percent of pay on compensation up to the taxable wage base, then the contributions for compensation in excess of the taxable wage base are limited to 15.7 percent because the permitted disparity cannot be greater than the OASDI tax rate (i.e., 5.7 percent in 1986).

Contributions to a plan that are subject to the nondiscrimination rules in section 401(k) or 401(m) (or, in the case of simplified employer pensions, sec. 408(k)(6)) may not rely on these integration requirements, but rather must satisfy the separate nondiscrimination rules under such other provisions.

Excess contribution percentage.—Under the Senate amendment, the excess contribution percentage is the percentage of remuneration that is contributed under the plan with respect to that portion of remuneration in excess of the compensation level specified under the plan for the year.

Base contribution percentage.—The Senate amendment provides that the base contribution percentage is the percentage of remuneration contributed under the plan with respect to that portion of remuneration not in excess of the compensation level specified under the plan for the year.

Under the Senate amendment, the compensation level refers to the dollar amount of remuneration specified under the plan as the compensation level for the year. The compensation level specified in the plan may not exceed the contributions or benefit base under the Social Security Act (i.e., the taxable wage base) in effect at the beginning of the plan year ($42,000 for plan years beginning in 1986). In addition, an employer may not set a lower compensation level if such level discriminates in favor of highly compensated employees.

Remuneration.—Remuneration is defined as total compensation, or basic or regular compensation, whichever is used in determining contributions or benefits under the plan. With respect to a self-employed individual, the Senate amendment provides that compensation includes the individual's earned income. The self-employed individual's basic or regular rate of compensation is equal to the portion of the individual's earned income that bears the same ratio to his earned income as the regular or basic compensation of employees under the plan bears to the total compensation of such employees.

Permitted disparity in defined benefit pension plans

In general

Under the Senate amendment, a defined benefit pension plan meets the requirement for integrated plans only if it meets the requirements for integrated offset plans or those for integrated excess plans. Under a special limitation provided by the Senate amendment, a defined benefit pension plan will not fail to meet the nondiscrimination rules (sec. 401(a)(4)) merely because it limits benefits by reference to the final pay of a participant.

Excess plans

In general.—A defined benefit pension plan meets the disparity limits for integrated excess plans if (1) the excess benefit percentage does not exceed 200 percent of the base benefit percentage, and (2) any optional form of benefit, preretirement benefit, actuarial factor, or other benefit or feature provided by the plan with respect to remuneration in excess of the compensation level specified by the plan for the year is provided with respect to remuneration that is not in excess of that level.

Benefit percentages.—Under the rules for integration of defined benefit pension plans as excess plans, the excess and base benefit percentages are to be computed in the same manner as those percentages are to be computed for defined contribution plans, except that the computation is to be based on benefits rather than contributions. Thus, the term the "excess benefit percentage" refers to the benefits provided under the plan (expressed as a percentage of remuneration) with respect to that portion of remuneration in excess of the compensation level specified in the plan. The base benefit percentage refers to the benefits provided under the plan (expressed as a percentage of remuneration) with respect to that portion of remuneration not in excess of the compensation level specified in the plan.

For purposes of the rules relating to defined benefit excess plans, the terms "compensation level" and "remuneration" have the same meanings as for purposes of the rules relating to defined contribution plans.

Offset plans

In general.—A defined benefit pension plan meets the requirements for integrated offset plans if it provides that a participant's accrued benefit derived from employer contributions (sec. 411(c)(1)) may not be reduced by reason of the offset by more than 50 percent of the benefit that would

have accrued without regard to the reduction. The bill provides that a defined benefit pension plan is an offset plan if each participant's normal retirement benefit derived from employer contributions (sec. 411) is reduced (offset) by a dollar amount specified by the plan and if the same dollar amount of reduction is applicable to all plan participants. The Secretary is directed to prescribe rules for "normalizing" benefits, though not necessarily in the manner described in Rev. Rul. 81-202, and to prevent discriminatory modifications in the amount of the dollar offset from year to year.

Example.—Under an offset plan, the offset may never reduce a participant's accrued benefit by more than 50 percent, and may accrue no faster than the rate at which the participant's benefit under the plan would accrue without regard to the offset. For example, assume that a plan provides for a normal retirement benefit of 50 percent of final pay, less $20,000. The plan provides that the participant's accrued benefit is to accrue under the fractional accrual rule of section 411(b). Normal retirement age under the plan is age 65. Assume that a participant commences working for the employer and becomes a participant in the plan at age 40. Upon the date that the participant has completed 5 years of service with the employer, the participant has an accrued benefit (without regard to the dollar offset) of 5/25ths of 50 percent of final pay (or 10 percent of final pay). At that time, the value of the offset "accrued" to the participant may not exceed the lesser of (a) 5/25ths of $20,000 ($4,000), or (b) one-half of the participant's accrued benefit (determined without regard to the offset) to date.

Multiple plans

The bill provides rules that apply to a plan that benefits a highly compensated employee who participates in 2 or more plans maintained by the employer that would be considered discriminatory but for the integration rules. In such a case, the integration rules are to be applied to each of the plans by taking into account the total contributions and benefits for such highly compensated employee under all of such plans of the employer.

Benefits limited by reference to final pay

The bill provides that a defined benefit pension plan (including an offset or excess plan) is not to be considered discriminatory merely because it provides that the employer-provided accrued retirement benefit for any participant under the plan is not to exceed the excess (if any) of (1) the participant's final pay with the employer, over (2) the employer-provided retirement benefit, created under Federal law, that is attributable to the participant's service with the employer. The Secretary shall prescribe rules for "normalizing" accrued benefits for purposes of this rule. Also, this limit may not be applied to reduce minimum benefits under the top-heavy rules.

Under the bill, for purposes of determining the final-pay limit that may be imposed by an integrated defined benefit pension plan, a participant's final pay is the total compensation paid to the participant by the employer during the participant's highest year of compensation ending with or within the 5-year period ending with the year in which the participant separated from service with the employer.

Effective date

The provisions are effective with respect to benefits accrued in plan years beginning after December 31, 1988.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, in the case of a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective for plan years beginning before the earlier of (1) the later of (i) January 1, 1989, or (ii) the date on which the last of the collective bargaining agreements terminates, or (2) January 1, 1991. Extensions or renegotiations of the collective bargaining agreement, if ratified after February 28, 1986, are disregarded.

Conference Agreement

In general

The conference agreement generally follows both the House bill and the Senate amendment with the following modifications: (1) the deemed accrual period for social security benefits in the House bill is reduced from 40 years to 35 years and is applied for purposes of integrating offset plans, flat excess plans, and unit benefit excess plans; (2) in order to limit the extent to which an employer may increase, relative to the present law integration rules, the disparity between benefits accruing with respect to compensation above and below the integration level, additional limits on such disparity are applied; and (3) the uniform definition of compensation under new section 414(s) is applied (*see* Part B.1., above).

The additional limits added by the agreement on the permitted disparity are a simplified form of the present-law integration rules, modified to eliminate the need for offset plans to determine an employee's actual lifetime social security benefit, provide for parity between offset plans and excess plans, provide uniform rules for both final average excess plans and career average excess plans, and eliminate the adjustments for integrated ancillary benefits (except for early retirement benefits).

The conferees recognize that some plans that satisfy both the present-law integration rules and the rules adopted in the House bill and the Senate amendment may not satisfy the additional limits added by the agreement. Similarly, the conferees realize that for some other plans the additional limits will permit a greater disparity in benefits above and below the integration level than that permitted under present law. However, the conferees have determined that, in attempting to limit the disparity permitted under the new rules to approximately the levels permitted under present law, the goals of simplifying the integration rules, providing consistent rules for different types of plans, and updating the rules to reflect the current social security system justify the simplified approach adopted under the agreement.

Permitted disparity in defined contribution plans

Under the agreement, a defined contribution plan meets the disparity limits for integrated plans only if the excess contribution percentage (i.e., the contribution with respect to compensation over the integration level, expressed as a percentage of compensation) does not exceed the base contribution percentage (i.e., the contribution with respect to compensation up to the integration level, expressed as a percentage of such compensation) by more than the lesser of (i) the base contribution percentage, or (ii) the greater of 5.7 percentage points or the percentage equal to the portion of the rate of tax in effect under section 3111(a) attributable to old-age insurance as of the beginning of the plan year.

The conferees understand that for 1986 the rate of tax attributable to old-age insurance is less than 5 percent. The conferees expect that the Social Security Administration will advise the Secretary when such rate becomes greater than 5.7 percent and, thereafter, will determine the amount of such rate and advise the Secretary for timely publication.

As under the Senate amendment, a plan must specify the applicable integration level for a year. The maximum integration level permitted for a year, however, is the OASDI contribution and benefit base under social security (taxable wage base) in effect at the beginning of the year ($42,000 for plan years beginning in 1986). The Secretary may develop such rules as are necessary to prevent an employer from selecting a lower integration level that discriminates in favor of highly compensated employees. Also, contributions subject to the nondiscrimination rules of section 401(k), 401(m), or 408(k)(6) may not rely on the integration rules to satisfy such rules. Finally, the agreement does not modify any other requirements currently applicable to integrated defined contribution plans, including, for example, the requirement that an integrated profit-sharing or stock bonus plan provide benefits only upon retirement, death, or other separation from service.

Permitted disparity in defined benefit pension plans

In general

The agreement provides both ratio limits and percentage point limits on the maximum disparity permitted under a defined benefit excess plan and on the maximum offset permitted under a defined benefit offset plan. The ratio limits are the same as the limits adopted in the Senate amendment. The percentage point limits are a simplified form of the present-law integration rules.

Excess plans

In general.—The agreement provides that the excess benefit percentage (i.e., benefits provided with respect to compensation in excess of the applicable integration level, expressed as a percentage of compensation) under a defined benefit excess plan may not exceed the base benefit percentage (i.e., benefits provided with respect to compensation not in excess of such integration level, expressed as a percentage of such compensation) by more than the maximum excess allowance.

Maximum excess allowance.—In the case of an excess plan, the maximum excess allowance with respect to benefits attributable to any year of service taken into account under the plan is the lesser of (i) the base benefit percentage, or (ii) 3/4 of a percentage point. The maximum excess allowance for such a plan with respect to total benefits is the lesser of (i) the base benefit percentage, or (ii) 3/4 of a percentage point times the participant's years of service (not in excess of 35) taken into account under the plan.

These limits apply to excess plans that base benefits on final average compensation as well as excess plans that base benefits on career average compensation. Under the conference agreement, an integrated final

pay plan may not base plan benefits on less than 3 years of service (or for a participant's full period of service, if less).

A year is treated as taken into account under a plan for purposes of applying the maximum excess allowance if benefits are treated as accruing on behalf of the participant for such year. Thus, for example, an excess plan that provides for the accrual of benefits over a participant's years of participation is to be treated as taking only years of participation into account.

This maximum excess allowance applies to both a flat-benefit final pay plan and a unit benefit final pay plan. For example, assume a flat-benefit plan with a benefit formula providing a retirement benefit for any participant retiring at age 65 with at least 15 years of service equal to 20 percent of the participant's final average compensation not in excess of the applicable integration level. Assume further that the plan provides for the accrual of the retirement benefit under the fractional rule of section 411(b). In order to satisfy the new integration rules with respect to a participant retiring at age 65 with 20 years of participation, the plan may not provide a benefit in excess of 35 percent of compensation over the integration level. If this participant had 35 years of participation at age 65, the plan would be precluded from providing a benefit with respect to final average compensation over the integration level in excess of 40 percent of such compensation. If an employee with 10 years of participation in this plan separated from service at age 50, such employee's accrued benefit would be 8 percent of his final average compensation up to the applicable integration level plus up to 15.5 percent of his final average compensation over the integration level.

Reductions of the 3/4 percent factor.—The Secretary is directed to prescribe regulations requiring the reduction of the 3/4 percent factor in the maximum excess allowance for plans (both final average and career average plans) using integration levels in excess of covered compensation. The conferees direct the Secretary to provide for such reductions on the basis of brackets of integration levels in excess of covered compensation. Such reductions and brackets should correspond to the comparable reductions and brackets for offset plans. The Secretary is not authorized, however, to provide for an increase in the 3/4 factor for plans using integration levels lower than covered compensation.

The term "covered compensation" has the same meaning as under present law, i.e., with respect to an employee, the average of the taxable wage bases in effect for each year during the 35-year period ending with the year the employee attains age 65, assuming no increase in such wage base for years after the current year and before the employee actually attains age 65.

The conferees intend that the reductions for higher integration levels will reflect the decreasing percentages of compensation replaced by the employer-provided PIA under social security as compensation increases above covered compensation. The Secretary is directed to consult with the Social Security Administration in developing the prescribed reductions.

Optional forms of benefits and other features.—The agreement follows the requirement in the Senate amendment that any optional form of benefit, preretirement benefit, actuarial factor, and other factor or feature under the plan provided with respect to compensation above the integration level also be provided with respect to compensation below the integration level. Thus, for example, if a lump sum distribution option, calculated using particular actuarial assumptions, is available with respect to benefits relating to compensation above the integration level, the same lump sum option must be available on an equivalent basis with respect to benefits based on compensation up to the integration level.

Multiple integration levels.—The Secretary is directed to provide rules under which an excess plan may use 2 or more integration levels. The permitted disparity with respect to each such integration level should be based on the percentages of compensation up to each such level replaced by the employer-provided portion of PIA under social security.

Offset plans

The agreement provides that in the case of a defined benefit offset plan, a participant's accrued benefit may not be reduced by reason of the offset by more than the maximum offset allowance for such participant. The maximum offset allowance with respect to a participant for any year of service taken into account under the plan is the lesser of (i) 50 percent of the benefit that would have accrued without regard to the offset reduction, or (ii) 3/4 percent of the participant's final average compensation times the participant's years of service with the employer (not in excess of 35) taken into account under the plan. For purposes of this allowance, a participant's final average compensation is to be calculated by disregarding compensation in any year over the taxable wage base for such year.

The Secretary is directed to reduce the 3/4 factor under the maximum offset allowance for participants with final average compensation in excess of covered compensation. Such reductions are to be based on the decreasing percentages of compensation replaced by the employer-provided PIA under social security as compensation increases above covered compensation. The Secretary is directed to consult with the Social Security Administration in developing such prescribed reductions. In addition, the reductions applicable to the 3/4 factor for offset plans should correspond to the reductions applicable to the 3/4 factor for excess plans using integration levels in excess of covered compensation. Finally, the conferees direct the Secretary to publish annually a table setting forth the appropriate offset factors for brackets of final average compensation in excess of covered compensation.

The term "offset plan" means any defined benefit plan under which the employer-provided benefit for each participant is reduced by an amount specified in the plan not in excess of the maximum offset allowance for such participant. In addition, an offset plan must base benefits on average annual compensation for at least the lesser of (1) a 3-year period or (2) the total number of the participant's years of service. Such term does not include a qualified plan merely because the benefits under such plan are reduced by benefits under another qualified plan. An offset plan may reduce participants' benefits by less than the maximum offset allowance so long as the offset amount or formula is specified in the plan, does not discriminate in favor of highly compensated employees, and is not otherwise inconsistent with the purposes of the integration rules.

Reductions for early retirement benefits

Under the conference agreement, the Secretary is also directed to reduce the 3/4 percent factor in the maximum excess allowance and maximum offset allowance for plans providing for unreduced benefits (other than for disability, as defined under the Social Security Act) commencing before the social security retirement age (as defined in section 415). As under current law, the 3/4 factor is to be reduced by 1/15 for each of the first five years that the benefit commencement date precedes the social security retirement age (currently age 65), and by an additional 1/30 for each of the next five years that the benefit commencement date precedes the social security retirement age. If the benefit commencement date is earlier than 10 years before the social security retirement age, the factor is to be actuarially reduced for each such additional year. Also, as under current law, the determination of whether early retirement benefits require an adjustment is based on a comparison of the benefit actually provided under the plan at the early retirement age with the benefit that would be provided under a plan at such age that has the maximum disparity permitted under the integration rules (calculated by applying the 1/15, 1/30 adjustment).

Multiple integrated plans

The agreement directs the Secretary to develop rules to prevent excessive use of the disparity permitted under this subsection with respect to any employee through the integration of more than one qualified plan. Such rules are to limit to 100 percent the sum of the percentages, calculated separately for each plan with overlapping coverage, of the maximum benefit disparity actually used in each plan.

Benefits limited by reference to final pay

The agreement adopts the Senate amendment rule permitting a defined benefit plan to limit the employer-provided accrued retirement benefit under the plan for any participant to the excess of the participant's final pay with the employer over the employer-provided PIA actually provided for such participant under social security and attributable to service by the participant with the employer. This limit is applied to the participant's accrued retirement benefit (disregarding ancillaries) under the defined benefit plan. Similarly, the limit is applied by taking into account only the worker's benefit (PIA) under social security, disregarding auxiliary benefits (spousal, survivor, children's, and disability benefits). The agreement clarifies that for purposes of determining the portion of the employer-provided PIA under social security for a participant that is attributable to service with the employer, such PIA is treated as accruing ratably over 35 years. However, the conferees do not intend that the limit also be pro rated. Finally, as under the Senate amendment, this limit may not be applied either to reduce minimum benefits under the top-heavy rules or to reduce accrued benefits within the meaning of section 411(d)(6).

Effective date

The new integration rules apply with respect to benefits accruing in plan years beginning after December 31, 1988. A special effective date applies with respect to benefits accruing under a plan maintained pursuant to a collective bargaining agreement.

6. Benefits Treated as Accruing Ratably for Purposes of Determining Whether Plan is Top Heavy

Present Law

In general

For years beginning after December 31, 1983, present law provides additional qualification requirements for plans that primarily benefit an employer's key employees (top-heavy plans) (sec. 416). These additional requirements (1) limit the amount of a participant's compensation that may be taken into account; (2) require more rapid vesting; (3) provide minimum nonintegrated contributions or benefits for plan participants who are non-key employees; and (4) reduce the aggregate limit on contributions and benefits.

Top-heavy plan calculation

A defined benefit pension plan generally is top heavy for a year if, as of the determination date for such year, the present value of the cumulative accrued benefits for participants who are key employees exceeds 60 percent of the present value of the cumulative accrued benefits for all employees under the plan. A defined contribution plan is a top-heavy plan for a year if, as of the determination date for such year, the sum of the account balances of participants who are key employees exceeds 60 percent of the sum of the account balances of all employees under the plan (sec. 416(g)).

Accrued benefits

In general, a defined benefit pension plan will not be considered a qualified plan unless participants accrue benefits at a rate that meets one of three alternative schedules (sec. 411(b)). The purpose of these schedules generally is to limit the extent to which an employer may defer (i.e., "backload") benefit accruals.

Under one of the three alternatives, known as the "fractional rule," each plan participant's accrued benefit at the end of any year must be at least equal to a fractional portion of the retirement benefit to which the participant would be entitled under the plan's benefit formula if the participant continued to earn annually until normal retirement age the same rate of compensation. The fractional portion is determined by dividing the participant's actual years of participation by the total number of years of participation that would have been completed if the participant had continued in service until normal retirement age.

In determining whether a plan is top heavy, cumulative accrued benefits are calculated using the benefit accrual method selected by the plan. If the plan is determined to be top heavy, the plan generally must provide that each participant's minimum benefit is, on a cumulative basis, at least equal to two percent of compensation for each year of service during which the plan is top heavy, not to exceed 20 percent (sec. 416(c)). Under the top-heavy rules, benefits accrued under the plan's benefit formula must be at least equal to the required minimum benefit.

House Bill

Under the House bill, a uniform accrual rule is used in testing whether a qualified plan is top heavy (or super top heavy) (sec. 416(g)(4)(f)). Thus, solely for determining whether the present value of cumulative accrued benefits for key employees exceeds 60 percent of the present value of cumulative accrued benefits for all employees (90 percent for purposes of the super top heavy plan rules), cumulative accrued benefits would be uniformly measured by applying the fractional rule. Thus, benefits will be treated as accruing no more rapidly than required fractional rule.

This rule applies only for purposes of determining whether the plan is top heavy or super top heavy. The rule does not require that the plan actually use the fractional rule for purposes of accruing benefits under the plan.

The provision applies for plan years beginning after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that the provision applies for plan years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment except that the conference agreement provides that if benefits under all plans of the employer accrue at the same rate, then that accrual rate is to be used in determining whether the plans are top heavy or super top heavy. If there is no single accrual rate used by all plans of the employer, then the plans' top-heavy status is to be determined by treating the benefits of the participants in each plan as accruing no more rapidly than the slowest permitted rate under the fractional accrual rule.

The provision applies for plan years beginning after December 31, 1986.

7. Modification of Rules for Benefit Forfeitures

Present Law

When a participant in a qualified plan separates from service, and receives a distribution of the vested plan interest or incurs a five-year break in service, nonvested benefits may be forfeited. In a defined benefit pension plan, forfeitures may not be used to increase promised benefits because benefits must be definitely determinable; instead, forfeitures must be used to reduce future employer contributions or to offset plan administrative expenses.

The treatment of forfeitures in a defined contribution plan depends on whether or not the plan is a money purchase pension plan. In a defined contribution plan that is not a money purchase plan (e.g., a profit-sharing or stock bonus plan), forfeitures may be reallocated to the remaining participants under a formula that does not discriminate in favor of employees who are officers, shareholders, or highly compensated. These reallocated forfeitures increase the benefits of the remaining participants. Alternatively, forfeitures can be used to reduce future employer contributions or to offset administrative expenses.

A money purchase pension plan, like a defined benefit plan, is subject to the requirement that benefits be definitely determinable. Accordingly, a money purchase plan must contain a definite contribution formula. Present law also provides that forfeitures may not be used to increase benefits, but must be applied to reduce future employer contributions or administrative costs (sec. 401(a)(8)).

House Bill

The House bill creates uniform rules for forfeitures under any defined contribution plan. The bill permits, but does not require, forfeitures to be reallocated to other participants. Thus, forfeitures arising in any defined contribution plan (including a money purchase pension plan) can be either (1) reallocated to the accounts of other participants in a nondiscriminatory fashion, or (2) used to reduce future employer contributions or administrative costs.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and Senate amendment.

8. Definition of Highly Compensated Employees

Present Law

Under present law, an employee who is an officer, shareholder, or highly compensated is considered a highly compensated individual in whose favor discrimination is prohibited. Present law does not further define the term "highly compensated" and, under judicial and administrative precedent, the level of compensation that makes an employee highly compensated depends on the facts and circumstances of each case.

House Bill

The House bill modifies the definition of the group of employees in whose favor discriminatory contributions are prohibited under a qualified cash or deferred arrangement. An employee is treated as highly compensated with respect to a year if, at any time during the year or any of the 2 preceding years, the employee (1) is a 5-percent owner of the employer (as defined in sec. 416(i)); (2) earns in excess of $50,000 in annual compensation from the employer; or (3) is a member of the top-paid group of the employer.

The top-paid group of employees includes all employees who (1) are in the top 10 percent of all employees on the basis of compensation paid during such year, and (2) are paid more than $20,000 during such year. However, an employee is not included in the top-paid group if the employee is paid less than $35,000 and is not in the top 5 percent of all employees on the basis of compensation paid during such year.

In determining whether an employee is in the top-paid group during any year, the House bill provides that employees who may be excluded in applying the percentage test of section 410(b)(1)(A) generally are disregarded. In addition, an employee will not be treated as in the top-paid group or as earning in excess of $50,000 based on compensation during the current year unless such employee also is among the 100 employees who have earned the highest compensation during such year.

The House bill provides a special rule for the treatment of family members of certain highly compensated employees. Under the special rule, if a family member (1) benefits under the qualified cash or deferred arrangement, and (2) is a family member of either a 5-percent owner or one of the top 10 highly compensated employees by compensation, then any compensation paid to such family member and any employer contribution under the plan on behalf of such family member is aggregated with the amounts paid and contributed on behalf of the 5-percent owner or the highly compensated employee in the top 10 employees by pay. Therefore, such family member and employee are treated as a single highly compensated employee in applying the special nondiscrimination tests.

An individual is considered a family member if, with respect to an employee, the individual is a spouse, lineal ascendant or descendant, or spouse of a lineal ascendant or descendant of the employee.

The House bill does not adopt the above definition of highly compensated employees for purposes of applying the nondiscriminatory coverage rules to qualified plans.

Senate Amendment

In general

Under the Senate amendment, an employee is treated as highly compensated with respect to a year if, at any time during the year or the preceding year, the employee (1) was a 5-percent owner of the employer (as defined in sec. 426(i)); (2) received more than $100,000 in annual compensation from the employer; (3) received more than $50,000 in annual compensation from the employer and was a member of the top-paid group of the employer during the same year; or (4) was an officer of the employer (as defined in sec. 416(i)). The $50,000 and $100,000 thresholds are indexed at the same time and in the same manner as the adjustments to the dollar limits on benefits for defined benefit plans. The identity of the highly compensated employees is to be determined on an employer-wide basis.

Top-paid group

The top-paid group of employees includes all employees who are in the top 20 percent of the employer's workforce on the basis of compensation paid during the year. Under a special rule, an employer may exclude the following employees solely for purposes of determining the size of the top-paid group (but not for identifying the particular employees in the top-paid group): (1) employees who have not completed 180 days of service; (2) employees who work less than half-time; (3) employees who normally work fewer than 6 months a year; (4) except to the extent provided in regulations, employees who are included in a unit of employees covered by a collective bargaining agreement; (5) employees who have not attained age 21; and (6) employees who are nonresident aliens and who receive no U.S. source earned income. An example of an instance in which it is appropriate to consider employees covered by a collective bargaining agreement is the case in which the plan being tested is maintained pursuant to a collective bargaining agreement.

For purposes of this special rule, an employer may elect to apply numbers (1), (2), (3), and (5) above by substituting any shorter period of service or lower age than is specified in (1), (2), (3), or (5), as long as the employer applies the test uniformly for purposes of determining its top-paid group with respect to all its qualified plans and employee benefit plans (and for purposes of the line of business rules described below).

For example, assume an employer's total workforce is 100 employees, 20 of whom have not completed 180 days of service. Assume that none of the 100 employees is within any of the other excluded categories under this rule. Under the above rules, the 20 employees who have not completed the minimum requirements for eligibility may be disregarded in determining the size of the top-paid group. If the 20 employees are disregarded, the top-paid group is 20 percent of 80 employees (the number of employees who are not disregarded), or 16. Thus, the 16 employees who receive the highest compensation (including any employees who have not completed 180 days but who are among the 16 highest paid employees of the employer) are in the top-paid group. Each of these 16 employees who receives more than $50,000 a year is treated as a highly compensated employee. Other employees (and any of the 16 employees receiving less than $50,000) may also be a highly compensated employee under one of the other tests (i.e., officer or 5-percent owner).

Special rule for determining top-paid group for current year

Under the Senate amendment, an employee will not be treated as in the top-paid group, as an officer, or as receiving more than $50,000 or $100,000 solely because of the employee's status during the current year, unless such employee also is among the 100 employees who have received the highest compensation during such year. Under this rule, an individual who was a highly compensated employee for the preceding year (without regard to the one-year lookback or to the application of this special rule) remains highly compensated for the current year.

Thus, the 100-employee rule is intended as a rule of convenience to employers with respect to new employees hired during the current year, with respect to increases in compensation, and with respect to certain other factors. If any employee is not a 5-percent owner or within the top-100 employees by compensation for the current year (and was not a highly compensated employee in the preceding year (without regard to this special rule)), then that employee is not treated as highly compensated for the year, but will be treated as highly compensated for the following year if the employee otherwise falls within the definition of highly compensated employee. However, under the conference agreement, an employer may elect not to apply the 100-employee rule for the current year.

For example, assume that a calendar year employer has 12,000 total employees in 1990 and 1991, and for each year 4,000 employees may be disregarded in determining the number of employees that is to be treated as the number in the top-paid group. Thus, 1,600 (20 percent of 8,000) employees are in the top-paid group. This employer's highly compensated employees for 1991 will include the following:

(1) any employee who owned at any time during 1990 or 1991 more than 5 percent of the employer;

(2) any employee who, in 1990, (i) received more than $100,000 in annual compensation, (ii) was an officer (for top-heavy purposes), or (iii) received more than $50,000 in annual compensation and was among the 1,600 most highly compensated employees; and

(3) any employee who, in 1991, (i) was an officer (for top-heavy purposes) or received more than $50,000 in annual compensation, and (ii) was among the 100 most highly compensated employees.

Thus, an employee who is not a highly compensated employee in 1990 (without regard to this special 100-employee rule) will not be treated as highly compensated for 1991, unless such employee either (i) acquires ownership of more than 5 percent of the employer in 1991 or (ii) both becomes one of the 100 most highly compensated employees in 1991 and either becomes an officer or receives more than $50,000 in 1991.

Treatment of family members

The Senate amendment provides a special rule for the treatment of family members (as defined in the House bill) of certain highly compensated employees. Under the special rule, if an employee is a family member of either a 5-percent owner or one of the top 10 highly compensated employees by compensation, then any compensation paid to such family member and any contribution or benefit under the plan on behalf of such family member is aggregated with the compensation paid and contributions or benefits on behalf of the 5-percent owner or the highly compensated employee in the top 10 employees by compensation. Therefore, such family member and employee are treated as a single highly compensated employee.

For example, if the spouse of the most highly compensated employee of an employer is also an employee and participates in the employer's qualified cash or deferred arrangement, the elective deferrals made by the spouse and the compensation received by the spouse are aggregated with the elective deferrals made by, and the compensation received by, the most highly compensated employee for purposes of applying the special nondiscrimination test to the elective deferrals of the most highly compensated employee.

Former employees

The Senate amendment provides that an employee who has separated from service as a highly compensated employee continues to be treated as a highly compensated employee. In addition, the Secretary is to prescribe rules to treat other former employees as highly compensated employees, if appropriate.

Because an individual may attempt to avoid these rules by continuing to perform a small amount of services for the employer after retirement and maintaining that separation from service has not occurred, the Secretary is to prescribe rules to treat an individual as separated from service if the employee performs only de minimis services for the employer during the year.

Conference Agreement

In general

The conference agreement follows the Senate amendment definition of highly compensated employees, except as follows. First, the conference agreement provides that an employee with compensation in excess of $75,000 (rather than $100,000) is treated as highly compensated in all cases. Second, the $50,000 and $75,000 amounts are indexed at the same time and in the same manner as the dollar limit on benefits under a defined benefit plan (sec. 415(d).

Third, the definition of an officer is modified to mean an individual who was an officer and received compensation greater than 150 percent of the defined contribution plan dollar limit in effect for that year. For purposes of this rule, no more than 50 employees (or if lesser, the greater of 3 employees or 10 percent of the employees) are to be treated as officers. If for any year no officer has compensation in excess of 150 percent of the defined contribution plan dollar limit, then the highest paid officer of the employer for such year is treated as an officer for purposes of the rules identifying highly compensated employees. As under the rules applicable for determining top-heavy status (sec. 416), a partnership is considered to have officers.

As under the Senate amendment, the determination of the number and identity of the highly compensated employees is made on the basis of the entire employer, not on the basis of, for example, a line of business or operating unit.

Top-paid group

The conference agreement follows the Senate amendment, with certain modifications. For purposes of determining the size of the top-paid group (but not for identifying the particular employees in the top-paid

group), the following employees may be excluded: (1) employees who have not completed 6 months of service, (2) employees who normally work less than 17½ hours per week, (3) employees who normally work during not more than 6 months during any year, (4) employees who have not attained age 21, (5) except to the extent provided in regulations, employees who are included in a unit of employees covered by a bona fide collective bargaining agreement, and (6) employees who are nonresident aliens and receive no U.S. source income.

As under the Senate amendment, the employer may substitute a shorter period of service or lower age than that specified in (1), (2), (3), or (4), provided that the employer applies the test uniformly in determining its top-paid group for all purposes, including, for example, the employee benefit nondiscrimination rules and the line of business rules described below.

The conference agreement also clarifies that the determination of the top-paid group is made solely with respect to active employees. Former employees are not taken into account in determining the top 20 percent of employees by compensation.

Special rule for determining top-paid group for current year

The conference agreement follows the Senate amendment.

Treatment of family members

The conference agreement follows the Senate amendment. The conference agreement also clarifies that even if a family member is excluded for purposes of determining the number of employees in the top-paid group, such family member is subject to the aggregation rule.

Former employees

Under the conference agreement, a former employee is treated as highly compensated if the employee was highly compensated when (a) such employee separated from service or (b) at any time after the employee attained age 55. In addition, as under the Senate amendment, the conferees intend that the Secretary is to prescribe rules treating an employee who performs only de minimis services as separated from service for purposes of determining whether such employee is a highly compensated employee.

Scope of highly compensated employee definition

Under the conference agreement, the new definition of highly compensated employees applies for purposes of sections 79, 89, 106, 117(d), 120, 127, 129, 132, 274, 401(a)(4), 401(a)(5), 401(k)(3), 401(l), 401(m), 406(b), 407(b), 408(k), 410(b), 411(d), 414(m), 415(c), 423(b), 424(c), 501(c)(17), 501(c)(18), 505, and 4975 of the Code, and 29 U.S.C. sec. 1108.

Compensation

As under the Senate amendment, for purposes of identifying an employer's highly compensated employees, "compensation" is defined as compensation within the meaning of section 415 (c)(3), increased by elective contributions under a cafeteria plan (sec. 125), qualified cash or deferred arrangement (sec. 401(k)), SEP (sec. 408(k)), and tax-sheltered annuity (sec. 403(b)).

Effective date

The new definition of "highly compensated employee" is generally effective for years beginning after December 31, 1986, except to the extent that the substantive rule to which it relates is effective at a later time.

C. Treatment of Distributions

1. Uniform Minimum Distribution Rules

Present Law

Under present law, a trust is not a qualified trust unless the plan of which it is a part provides that the entire interest of each participant will be distributed no later than the participant's required beginning date (sec. 401(a)(9)). Alternatively, the requirements of present law may be satisfied if the participant's entire interest is to be distributed in substantially nonincreasing annual payments, beginning no later than the participant's required beginning date, over (1) the life of the participant, (2) the lives of the participant and a designated beneficiary, (3) a period (which may be a term certain) not extending beyond the life expectancy of the participant, or (4) a period (which may be a term certain) not extending beyond the life expectancies of the participant and designated beneficiary.

A participant's required beginning date is generally April 1 of the calendar year following the calendar year in which (1) the participant attains age 70½ or (2) the participant retires, whichever is later. If a participant is a 5-percent owner with respect to the plan year ending in the calendar year in which the participant attains age 70½, then the required beginning date is generally April 1 of the calendar year following the calendar year in which the participant attains age 70½ even though the participant has not retired.

In addition, the distribution of benefits under a qualified plan must satisfy the incidental benefits rule. Under the incidental benefits rule, a qualified plan generally is required to provide for a form of distribution under which the present value of the payments projected to be made to the participant, while living, is more than 50 percent of the present value of the total payments projected to be made to the participant and the participant's beneficiaries. However, a distribution pattern is not prohibited by the incidental benefits rule to the extent that it is required by the rules relating to qualified joint and survivor annuities.

Present law provides a minimum distribution requirement with respect to benefits payable from a qualified plan with respect to a participant who has died. The applicable rules depend upon whether benefits commenced before or after the participant's death.

With respect to tax-sheltered annuities and custodial accounts, present law provides after-death minimum distribution rules similar to the rules for qualified plans.[1]

Present law provides before- and after-death minimum distribution rules for IRAs corresponding to the rules applicable to qualified plans. Distributions from an IRA, however, are required to commence no later than April 1 of the calendar year following the calendar year in which the owner of the IRA attains age 70½ without regard to separation from service.

House Bill

The House bill establishes a uniform commencement date for benefits under all qualified plans, IRAs, tax-sheltered annuities, and custodial accounts. In addition, the House bill establishes a new sanction in the form of an excise tax, as an alternative to plan disqualification, for failure to satisfy the minimum distribution rules.

Under the House bill, distributions under all qualified defined benefit and defined contribution plans, individual retirement accounts and annuities, and tax-sheltered custodial accounts and annuities must commence no later than April 1 of the calendar year following the calendar year in which the participant attains age 70½, without regard to the actual date of retirement or termination of employment.

The sanction for failure to make a minimum required distribution to a particular participant under a qualified retirement plan is a 50-percent nondeductible excise tax on the excess in any taxable year of the amount that should have been distributed (the "minimum required distribution") over the amount that actually was distributed. The tax is imposed on the individual required to take the distribution. However, as under present law, a plan will not satisfy the qualification requirements unless it expressly provides that, in all events, the distribution under the plan must satisfy the minimum distribution requirements and the incidental benefit rule.

Under the House bill, the Secretary of the Treasury is authorized to waive the tax for a given taxpayer year if the taxpayer to whom the tax would otherwise apply is able to establish that any shortfall between the minimum required distribution for that year and the amount actually distributed during the year is due to reasonable error and that reasonable steps are being taken to remedy the shortfall.

The minimum required distribution in any given taxable year is to be determined under regulations to be issued by the Secretary.

The provisions generally apply to distributions made after December 31, 1985. However, for purposes of the required beginning date for commencement of benefits, employees who are not 5-percent owners and who have attained age 70½ by January 1, 1988, may defer the commencement of benefit payments until retirement. In addition, an employee is not subject to the 50-percent excise tax for failure to satisfy the minimum distribution requirements merely because distributions are made pursuant to a designation made before January 1, 1984, by the employee in accordance with section 242(b)(2) of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA).

Senate Amendment

The Senate amendment is the same as the House bill, except that the provision requiring that distributions from a qualified plan commence no later than April 1 of the year following the year in which a participant attains age 70½ applies only to a participant who is a highly compensated employee (as defined in the Senate amendment). The provisions of the Senate amendment do not apply to distributions under tax-sheltered annuities.

The Senate amendment is generally effective for distributions made after December 31, 1986, with an exception for distributions made pursuant to a designation made in accordance with section 242(b)(2) of TEFRA.

Conference Agreement

The conference agreement generally follows the House bill. In addition, the conference agreement extends the provisions of the House bill to unfunded deferred compensation plans of State and local governments and tax-exempt employers (sec. 457 plans).

[1] The technical corrections provisions of the House bill make it clear that both the before and after-death distribution rules applicable to qualified plans also apply to all tax-sheltered annuities.

As under the House bill, the conference agreement provides that the minimum required distribution in any given taxable year is to be determined under regulations to be issued by the Secretary of the Treasury. The conferees intend that, if a participant selects a permissible distribution option, the minimum required distribution in any given year is the amount required to be distributed in that year under the payout option selected.

With respect to a defined benefit pension plan, if the participant selects an impermissible payout option and designates a beneficiary, the minimum required distribution in any year is the amount that would have been distributable to the participant in that year had the participant selected a joint and survivor annuity payable over the joint life and last survivor expectancies of the participant and the beneficiary designated by the participant, taking into account their actual ages at the required beginning date. The survivor benefit is assumed to be the maximum percentage of the annuity payable during the participant's lifetime that will not violate the incidental benefit rule, but not a percentage in excess of 100 percent of the benefit payable to the participant. It is intended that the excise tax apply even if the distribution is described in the plan and the plan receives a favorable determination later.

If the participant selects an impermissible payout option and does not designate a beneficiary, the minimum required distribution in any year is the amount that would have been distributable to the participant in that year had the participant selected an annuity payable over the life expectancy of the participant, taking into account the participant's actual age on the required beginning date.

With respect to a defined contribution plan, the minimum required distribution is determined as under present law.

The provisions generally apply to distributions made after December 31, 1988. The conference agreement includes (1) the exception in the House bill and the Senate amendment for distributions made pursuant to a designation made in accordance with section 242(b)(2) of TEFRA and (2) the special effective date provision in the House bill relating to individuals who are not 5-percent owners and who have attained age 70½ by January 1, 1988.

The conference agreement clarifies that the provision relating to individuals who are not 5-percent owners and who have attained age 70½ by January 1, 1988, applies only if the individual is not a 5-percent owner in the plan year ending with or within the calendar year in which the individual attains age 66½ or any succeeding plan year.

A special effective date applies to collectively bargained plans with respect to individuals who are subject to the collective bargaining agreement.

2. Uniform Additional Income Tax for Early Distributions

Present Law

Withdrawal restrictions

Under present law, benefits may be distributed to a participant in a qualified pension plan only on account of plan termination or the employee's separation from service, disability, or death. Withdrawals under qualified profit-sharing or stock bonus plans are subject to fewer restrictions than those under qualified pension plans. Qualified profit-sharing or stock bonus plans generally may permit the withdrawal of employer contributions after the expiration of a stated period of time (e.g., 2 years or longer) or after the occurrence of a stated event (e.g., hardship).

Special restrictions apply to the withdrawal of benefits under a qualified cash or deferred arrangement. Under present law, a qualified cash or deferred arrangement, by its terms, may not permit a participant to withdraw elective deferrals (or earnings on such deferrals) before the participant dies, becomes disabled, separates from service, or (except in the case of a pre-ERISA money purchase pension plan) attains age 59½ or encounters hardship. Under proposed regulations, an employee is treated as having incurred a hardship only to the extent that the employee has an immediate and heavy bona fide financial need and does not have other resources reasonably available to satisfy the need.

Under present law, withdrawals under a tax-sheltered annuity program invested in a custodial account of a regulated investment company (i.e., a mutual fund) may not be made prior to the time the account owner attains age 59½, dies, becomes disabled, separates from service, or encounters financial hardship. In contrast, amounts invested in tax-sheltered annuities are not subject to any withdrawal restrictions.

Additional income tax on early withdrawals

Generally, under present law, a 10-percent additional income tax is imposed on withdrawals from an IRA before the owner of the IRA attains age 59½, dies, or becomes disabled. The tax also applies to any withdrawals from qualified plans by or on behalf of 5-percent owners who have not yet attained age 59½, died, or become disabled.

House Bill

Withdrawal restrictions

Under the House bill, a qualified cash or deferred arrangement may make distributions on account of the plan's termination (provided no successor plan is established), as well as on account of the employee's death, disability, separation from service, or (except in the case of a pre-ERISA money purchase pension plan) attainment of age 59½. (See the discussion in Part A.2., above.) The House bill provides that a distribution on account of the termination of a qualified cash or deferred arrangement must consist of the participant's total account balance under the plan. Distributions on account of hardship are permitted only to the extent of an employee's elective deferrals (but not income on those deferrals under the cash or deferred arrangement). Present law standards governing what constitutes a "hardship" continue to apply.

Under the House bill, the withdrawal restrictions currently applicable to tax-sheltered custodial accounts generally are extended to other tax-sheltered annuities. Thus, early distributions from a tax-sheltered annuity are prohibited unless the withdrawal is made on account of death, disability, separation from service, or attainment of age 59½. In addition, withdrawals on account of hardship from a tax-sheltered annuity or custodial account are permitted only to the extent of the contributions made pursuant to a salary reduction agreement (but not earnings on those contributions). The present-law standards defining "hardship" for purposes of a qualified cash or deferred arrangement will apply.

The provisions are generally effective for years beginning after December 31, 1985. The provision permitting distributions from a cash or deferred arrangement upon plan termination applies to plan terminations after December 31, 1984. The provisions relating to restrictions on distributions from tax-sheltered annuity or custodial accounts do not apply to amounts contributed to tax-sheltered annuities or custodial accounts before December 31, 1985.

Additional income tax on early withdrawals

Under the House bill, the 10-percent additional income tax on withdrawals from an IRA by the owner prior to attainment of age 59½, death, or disability is increased to 15 percent, and is extended to early withdrawals by any participant from any qualified retirement plan. Under the bill, the term "qualified retirement plan" includes a qualified defined benefit pension plan or defined contribution plan, a tax-sheltered annuity or custodial account, or an IRA. An exemption from the tax is provided for any distribution that is part of a scheduled series of substantially equal periodic payments (made not less frequently than annually) for the life of the participant (or the joint lives of the participant and the participant's beneficiary).

The provision generally applies to all distributions made in taxable years beginning after December 31, 1985. However, the bill contains an exception from the tax for individuals who, as of November 6, 1985, separated from service and commenced receiving benefits pursuant to a written election designating a specific schedule of benefit payments. The bill also exempts from the additional income tax on early withdrawals a total distribution of a participant's accrued benefit on account of a plan termination occurring prior to December 31, 1985.

Senate Amendment

Withdrawal restrictions

The Senate amendment follows the House bill with respect to distributions from a qualified cash or deferred arrangement.

In addition, the Senate amendment provides that, upon the sale by a corporation of the corporation's interest in a subsidiary, a distribution may be made to an employee of the subsidiary even if the employee continues employment with the subsidiary. The Senate amendment also permits distribution upon the sale by a corporation of substantially all the assets used by a corporation in a trade or business, even if the employee continues employment with the corporation acquiring such assets. These provisions are effective with respect to sales occurring after December 31, 1984.

Additional income tax on early distributions

The Senate amendment is generally the same as the House bill, except that (1) the Senate amendment does not extend the tax to distributions from a tax-sheltered annuity, (2) the tax is waived under certain additional circumstances, and (3) the rate of tax under the amendment varies depending on the character of the contribution to which the distribution relates.

The amendment exempts from the additional tax: (1) any distribution that is part of a scheduled series of substantially equal periodic payments over the life of the participant (or the joint lives of the participant and the participant's beneficiary) or the life expectancy of the participant (or the joint life expectancies of the participant and the participant's beneficiary), (2) a distribution to an employee (other than a 5-percent owner) who has attained age 55, separated from service, and satisfied the requirements for early retirement under the plan, (3) cer-

tain hardship distributions (other than distributions to a 5-percent owner or from an IRA), and (4) certain distributions from an employee stock ownership plan. Hardships that qualify for the exemption include certain medical expenses, casualty losses, and cessation of unemployment benefits. If the additional tax does not apply because of the substantially equal payment exception and the individual changes the method of distribution prior to age 59½ to a method that does not qualify for the exception, the tax will be imposed on all distributions received prior to age 59½.

The provisions are generally effective with respect to distributions made in taxable years beginning after December 31, 1986. The amendment provides an exception from the tax for individuals who, as of March 1, 1986, separated from service and commenced receiving benefits pursuant to a written election designating a specific schedule of benefit payments.

Direct transfer option

The Senate amendment provides that, if an employee separates from service and is to receive a distribution that could be rolled over to another qualified plan or IRA, the employer is required to offer the employee the option of electing a direct transfer of the employee's accrued benefit to an IRA or to another qualified plan. The provision is effective for years beginning after December 31, 1986.

Conference Agreement

Withdrawal restrictions

The conference agreement includes the provision in the House bill and the Senate amendment with respect to the hardship distributions from qualified cash or deferred arrangements, effective for plan years beginning after December 31, 1988. (*See*, also, the discussion in Part A.2., above.)

The conference agreement also includes the provision in the House bill and the Senate amendment with respect to distributions on termination of a qualified cash or deferred arrangement. Under the conference agreement, however, the distribution must consist of the participant's entire interest in the cash or deferred arrangement.

The conference agreement includes the provisions in the Senate amendment with respect to distributions from a qualified cash or deferred arrangement in connection with the sale of a subsidiary or substantially all the assets of a trade or business, effective with respect to sales occurring in plan years beginning after December 31, 1984. As under the termination rule, these rules apply only if the distribution consists of the participant's entire interest in the cash or deferred arrangement.

Under the conference agreement, the withdrawal restrictions with respect to amounts under a tax-sheltered annuity program invested in a custodial account are extended to elective deferrals and earnings thereon under a tax-sheltered annuity. Thus, elective deferrals and earnings thereon may not be withdrawn prior to the time the annuitant attains age 59½, dies, becomes disabled, or separates from service. The conference agreement adopts the provision in the House bill restricting hardship withdrawals from a tax-sheltered annuity or custodial account to elective deferrals (excluding earnings). The provisions are effective for taxable years beginning after December 31, 1988.

Additional income tax on early withdrawals

The conference agreement generally follows the Senate amendment, with modifications. Under the agreement, the additional income tax applies to early distributions from any "qualified retirement plan" as defined under the agreement. Thus, the tax applies to amounts distributed from plans qualified under section 401(a) of the Code, tax-sheltered annuities and custodial accounts, and IRAs, but does not apply to amounts distributed from unfunded deferred compensation plans of tax-exempt or State and local government employers (sec. 457 plans). Under the conference agreement, the rate of the tax is 10 percent for all early distributions includible in gross income, regardless of the character of the contribution to which the distribution relates.

The conference agreement includes the following exceptions to the tax: (1) a distribution that is part of a scheduled series of substantially equal periodic payments for the life of the participant (or the joint lives of the participant and the participant's beneficiary) or the life expectancy of the participant (or the joint life expectancies of the participant and the participant's beneficiary); (2) a distribution to an employee who has attained age 55, separated from service, and met the requirements for early retirement under the plan; (3) a distribution which is used to pay medical expenses to the extent that the expenses are deductible under section 213 (determined without regard to whether the taxpayer itemizes deductions), and (4) distributions after the death of the employee. The conference agreement includes the exception in the Senate amendment for certain distributions made from an employee stock ownership plan, but restricts the exception to distributions made prior to January 1, 1990.

In addition, the conference agreement exempts from the distribution tax: (1) lump-sum distributions made prior to March 15, 1987, if the distribution is made on account of separation from service in 1986 and the employee treats the distribution for Federal tax purposes as paid in 1986; (2) payments made to or on behalf of an alternate payee pursuant to a qualified domestic relations order; and (3) certain distributions of excess contributions to and excess deferrals under a qualified cash or deferred arrangement; and (4) dividend distributions under section 404(k).

The conferees intend that the additional income tax on early withdrawals does not apply to cashouts not requiring the participant's consent of amounts not in excess of $3,500.

The conference agreement does not follow the Senate amendment with respect to the exclusion of 5-percent owners from certain of the exceptions to the tax. Thus, the exceptions are available to 5-percent owners to the same extent they are available to other employees. In the case of distributions from IRAs, the early retirement, medical expense, and ESOP exceptions do not apply. The exception for distributions pursuant to a qualified domestic relations order applies to an individual retirement arrangement only to the extent the arrangement in subject to qualified domestic relations orders. The exception for substantially equal payments applies to distributions from plans qualified under 401(a) and tax-sheltered annuities and custodial accounts only if the distribution is made after separation from service.

The exception for retirement under a plan after separation from service following attainment of age 55 applies in the case of both normal and early retirement following attainment of age 55, and will continue to apply if the employee returns to work for the same employer or for a different employer. Thus, for example, the exception will apply to a distribution to an employee who retires following attainment of age 55 under a plan which provides for a normal retirement age of 55. In addition, the exception will continue to apply if the employee returns to work as long as the employee did, in fact, separate from service before the distribution.

In all cases, the exception applies only if the participant has attained age 55 on or before separation from service. Thus, for example, the exception does not apply to a participant who separates from service at age 52 and, pursuant to the early retirement provisions of the plan, begins receiving benefits at or after age 55. Of course, one of the other exceptions to the tax may still apply.

The early retirement exception applies if, upon retirement under one plan of the employer pursuant to the terms of the exception, the employee is entitled to a lump sum distribution from any other plan of the employer. For example, if an employer maintains a defined benefit plan that provides for early retirement upon separation from service after age 55 and also maintains a profit-sharing plan which permits the participant to obtain a lump sum upon retirement under the defined benefit plan, the distributions from both plans qualify for the exception.

An existing plan which does not have an early retirement provision can be amended to add an early retirement provision which qualifies for the exception.

The substantially equal payment exception is available with respect to forms of payment which contain a term certain and otherwise qualify for the exception (such as a life annuity with a 10-year certain provision).

As under the Senate amendment, the conference agreement provides that if distributions to an individual are not subject to the tax because of application of the substantially equal payment exception, the tax will nevertheless be imposed if the individual changes the distribution method prior to age 59½ to a method which does not qualify for the exception. The additional tax will be imposed in the first taxable year in which the modification is made and will be equal to the tax (as determined under regulations) that would have been imposed had the exception not applied. For example, if, at age 50, a participant begins receiving payments under a distribution method which provides for substantially equal payments over the individual's life expectancy, and, at age 58, the individual elects to receive the remaining benefits in a lump sum, the additional tax will apply to the lump sum and to amounts previously distributed.

In addition, the recapture tax will apply if an individual does not receive payments under a method that qualifies for the exception for at least 5 years, even if the method of distribution is modified after the individual attains age 59½. Thus, for example, if an individual begins receiving payments in substantially equal installments at age 56, and alters the distribution method to a form that does not qualify for the exception prior to attainment of age 61, the additional tax will be imposed on amounts distributed prior to age 59½ as if the exception had not applied. The additional tax will not be imposed on amounts distributed after attainment of age 59½. This 5-year minimum

payout rule is waived upon the death or disability of the employee.

Under the ESOP exception, certain distributions from an ESOP are exempt from the tax to the extent that, on average, a majority of the plan's assets have been invested in employee securities for the 5-plan year period immediately preceding the plan year in which the distribution occurs. In a case in which an ESOP has been in existence for less than 5 years, the plan must have been so invested during the entire period prior to distribution. In a case in which a plan is converted to an ESOP, plan assets must have been so invested for 5 plan years prior to distribution. However, a distribution from an ESOP that satisfies the preceding conditions will not qualify for this exception from the early distribution tax unless such distribution is attributable to assets that have been invested in employer securities for the 5-year period. Tacking of investment periods is permitted.

For example, amounts transferred to an ESOP would qualify for the exception 3 years after transfer provided such amounts meet the investment criteria for 2 years prior to such transfer. In addition, amounts transferred to an ESOP following a reversion from a defined benefit pension plan would qualify for this exception if a majority of such amounts are invested in employer securities upon transfer and the 5 year investment requirement is met. The conferees intend that a first-in, first-out rule be used for purposes of determining the length of time a plan has held securities distributed to a participant.

The conference agreement follows the effective date provisions of the Senate amendment.

Direct transfer option

The conference agreement does not contain the provision in the Senate amendment.

3. Taxation of Distributions

Present Law

In general

Under present law, a distribution of benefits from a tax-favored retirement arrangement generally is includible in gross income unless the amount distributed represents the employee's investment in the contract (i.e., basis). In the case of a distribution from a qualified plan or an IRA, such a distribution is includible in the year in which it is paid or distributed. Under a tax-sheltered annuity, benefits are includible in income when paid or made available.

Lump-sum distributions

Under present law, a lump-sum distribution from a qualified plan may qualify for special 10-year forward income averaging. In addition, the portion of a lump sum attributable to contributions prior to January 1, 1974, may qualify for capital gains treatment.

Basis recovery rules

Present law provides special rules for the treatment of basis (e.g., employee contributions) when an individual receives a distribution from a tax-favored retirement arrangement. If an amount is received before the annuity starting date (i.e., the date on which an amount is first received as an annuity), the individual is treated as first receiving employee contributions, which are nontaxable, and then taxable income.

In the case of amounts received after the annuity starting date, each payment received by an employee generally is treated, in part, as a return of the employee's contributions and, in part, as taxable income. The portion of each payment treated as a return of employee contributions is that amount which bears the same ratio to each payment as the employee's total contributions bear to the total expected payments over the period of the annuity. In the case of a straight-life annuity, the employee's life expectancy, as of the annuity starting date, is treated as the period over which the annuity is to be paid for purposes of computing his total expected return under the contract. Where the employee dies prior to the expiration of the employee's anticipated life expectancy, no deduction is provided for the employee's unrecovered basis. On the other hand, an employee whose actual life is longer than anticipated at the time benefits commence effectively excludes from income an amount in excess of the employee's total contributions.

In addition, under present law, a special rule applies under certain circumstances to annuity payments from qualified plans. Under the special rule, if an individual's first 3 years of annuity payments after the annuity starting date will equal or exceed the individual's aggregate employee contributions, all distributions are treated as a return of employee contributions (and thus nontaxable) until all of the individual's employee contributions have been recovered. Thereafter all distributions are fully taxable.

House Bill

Constructive receipt under a tax-sheltered annuity

Under the House bill, benefits under a tax-sheltered annuity are includible in income only when benefits are actually received. The provision is effective for distributions after December 31, 1985.

10-year averaging and pre-1974 capital gains treatment

Effective for distributions made after December 31, 1985, the House bill repeals 10-year forward averaging, phases out pre-1974 capital gains treatment over a 6-year period, makes 5-year forward averaging (calculated in the same manner as 10-year averaging under present law) available for one lump-sum distribution received by an individual after age 59½ and, under a transition rule, permits certain individuals to apply 5-year averaging to one lump-sum distribution received before age 59½.

Under the House bill, individuals are permitted to make a one-time election with respect to a single lump sum received after the individual attains age 59½ (1) to claim, pursuant to the 6-year phase-out, capital gains treatment on that portion of the lump sum (if any) attributable to amounts contributed prior to 1974 and (2) to use 5-year forward averaging on the balance of the lump sum. In addition, the House bill provides a special transition rule under which any participant who attains age 50 before January 1, 1986, is permitted to make one election with respect to a single lump-sum distribution received prior to age 59½ (1) to claim pre-1974 capital gains treatment pursuant to the 6-year phase-out, and (2) to use 5-year forward averaging on the balance of the lump sum.

The House bill also permits individuals who separate from service in December 1985 and receive a lump-sum distribution in January 1986 to elect to treat the distribution as received in 1985 and to claim 10-year averaging (and capital gains treatment if appropriate) with respect to the distribution.

Basis recovery rules

The House bill modifies the basis recovery rules applicable to distributions from plans in which there are after-tax employee contributions. Under the House bill amounts received prior to the annuity starting date are treated as being made first out of taxable amounts (employer contributions and income) and, second, as being made out of nontaxable amounts (employee contributions). If an employee is only partially vested in the portion of the employer's benefits attributable to employer contributions (for example, in the case of a plan with a graduated vesting schedule), the employee is not taxed on a distribution to the extent that the distribution, when added to any prior distributions under the plan, exceeds the sum of (1) the employee's vested benefits attributable to employer contributions, plus (2) income on the employee's contributions.

With respect to amounts received after the annuity starting date, the special three-year basis recovery rule is eliminated. Thus, an employee must include in income a portion of each payment made on or after the employee's annuity starting date.

The House bill provides that in computing the portion of each payment that may be excluded from income, the employee's expected total return is to be determined as of the date of the payment. The bill limits the total amount that an employee may exclude from income to the total amount of the employee's contribution. In addition, if an employee's benefits cease prior to the date the employee's total contributions have been recovered, the amount of unrecovered contributions is allowed as a deduciton to the annuitant for his last taxable year. For purposes of the provisions of present law relating to net operating losses, the deduction is treated as related to a trade or business of the employee.

The provisions relating to the basis recovery rules for amounts received before a participant's annuity starting date are generally effective for distributions made after December 31, 1985, but do not apply to employee contributions made prior to January 1, 1986.

The repeal of the special 3-year basis recovery rule generally is effective with respect to any individual whose annuity starting date is after July 1, 1986.

Senate Amendment

Constructive receipt under a tax-sheltered annuity

The Senate amendment is the same as the House bill, except that the provision is effective for distributions after December 31, 1986.

10-year averaging and pre-1974 capital gains treatment

The Senate amendment follows the House bill, except for the effective date and the special transition rule for individuals who have attained age 50 before January 1. The general effective date of the Senate amendment is taxable years beginning after December 31, 1986.

The Senate amendment provides a transition rule under which a participant who has attained age 50 before January 1, 1986, is permitted (1) to make one election (before or after attainment of age 59½) to use 5-year forward averaging (under the new tax rates) or 10-year averaging (under the new rates) without regard to the requirement of attainment of age 59½, and (2) to elect capital gains treatment with respect to a lump-

sum distribution, without regard to the six-year phase-out of capital gains treatment. An election under this transition rule to use income averaging on a lump sum received prior to age 59½ eliminates the availability of an election after age 59½ under the general rule.

Basis recovery rules

With respect to pre-annuity starting date distributions, the Senate amendment modifies the basis recovery rules to provide for pro-rata recovery of employee contributions. Thus, with respect to a pre-annuity starting date distribution, a participant is entitled to exclude that portion of the payment that bears the same ratio to the total payment as the participant's after-tax employee contributions (and amounts treated as after-tax employee contributions) bears to the total value of the participant's accrued benefit (or account balance) under the plan as of the date of distribution or as of such other time as the Secretary may prescribe. The Secretary is authorized to prescribe appropriate rules for estimating the amounts referred to in the prior sentence where precise calculation would be unjustifiably burdensome.

If an employee is only partially vested in the portion of the employee's benefits attributable to employer contributions (for example, in the case of a plan with a graded vesting schedule), the portion of the employee's accrued benefit that has not yet vested is not taken into account in determining the total value of the participant's accrued benefit.

With regard to post-annuity starting date distributions, the Senate amendment follows the House bill.

The Senate amendment also provides basis recovery rules for distributions from an IRA to which nondeductible contributions have been made. The rules are generally similar to the rules applicable to distributions from qualified plans.

The provisions relating to the basis recovery rules for amounts received before a participant's annuity starting date are generally effective for distributions made after December 31, 1986, but do not apply to employee contributions made prior to January 1, 1987 to the extent that, on May 5, 1986, such contributions were available for distribution under a plan before separation from service. Thus, except in the case of plans in which substantially all contributions are employee contributions, withdrawals made after the effective date, but prior to an individual's annuity starting date, are to be treated as made first from pre-1987 employee contributions that were available for in-service withdrawal. After all such contributions have been recovered, any subsequent distributions are taxed under the new pro-rata basis recovery rules of the bill. The repeal of the special 3-year basis recovery rule generally is effective with respect to any individual whose annuity starting date is after January 1, 1988.

Conference Agreement

Constructive receipt under a tax-sheltered annuity

The conference agreement follows the House bill and the Senate amendment.

10-year averaging and pre-1974 capital gains treatment

The conference agreement follows the Senate amendment. Under the conference agreement, if an individual who has attained age 50 by January 1, 1986, elects, pursuant to the transition rule, to retain the capital gains character of the pre-1974 portion of a lump sum distribution, the capital gains portion is taxed at a rate of 20 percent. The 20 percent rate applies to all taxpayers, regardless of the maximum effective capital gains rate under present law.

Basis recovery rules

Pre-annuity starting date

The conference agreement generally follows the Senate amendment. However, under the conference agreement, employee contributions to a defined contribution plan or a separate account of a defined benefit plan (and the income attributable thereto) are treated as a separate contract for purposes of section 72 and application of the pro-rata rule. Thus, under the conference agreement, if an employee withdraws employee contributions from such a plan or account, then for tax purposes, the distribution will be considered to be part nontaxable, i.e., a return of employee contributions, and part taxable, i.e., a distribution of earnings on those contributions. The distribution will not, however, be considered to be attributable to employer contributions. If an employee withdraws all amounts attributable to employee contributions and such amount is less than the employee's contributions, the employee may recognize a loss.

Post-annuity starting date

The conference agreement follows the House bill and the Senate amendment, except that it extends the separate contract rule to post-annuity starting date distributions.

Rollovers

The conference agreement modifies the rules relating to rollovers of partial distributions. Under the conference agreement, partial distributions may be rolled over only if the distribution is due to the death of the employee, is on account of the employee's separation from service (including the separation from service of a self-employed individual) or is made after the employee has become disabled. The requirement that a partial distribution not be one of a series of periodic payments is eliminated.

Under a special rule, a distribution in satisfaction of the diversification requirements applicable under the agreement to employee stock ownership plans may be rolled over even if the distribution does not otherwise qualify for rollover treatment.

The conference agreement contains a special rule permitting amounts deposited in certain financially distressed financial institutions to be rolled over into an IRA or qualified plan notwithstanding that the rollover does not occur within 60 days of the date of the original distribution to the employee. Under this rule, the 60-day period does not include periods while the deposit is frozen. In addition, the individual has a minimum 10 days after the release of the funds to complete the rollover.

Individual retirement arrangements

The conference agreement follows the Senate amendment, with modifications. (*See* discussion in Part A.1., above.)

Effective dates

The basis recovery rules are generally effective with respect to distributions received after December 31, 1986. The repeal of the 3-year basis recovery rule is effective with respect to individuals whose annuity starting date is after July 1, 1986. The provision limiting the income exclusion to the amount of the employee's investment in the contract applies to individuals whose annuity starting date is after December 31, 1986.

The new rules with respect to partial distributions are effective with respect to amounts distributed after December 31, 1986. The special rule for frozen deposits is generally effective with respect to distributions after the date of enactment. With respect to amounts which were frozen and released prior to the date of enactment, the rollover must be completed within 60 days following the date of enactment.

4. Treatment of Loans

Present Law

An individual is permitted, under present law, to borrow from a qualified plan in which the individual participates (and to use his or her accrued benefit as security for the loan) provided the loan bears a reasonable rate of interest, is adequately secured, provides a reasonable repayment schedule, and is not made available on a basis that discriminates in favor of employees who are officers, shareholders, or highly compensated. However, no loan is permitted under the Employee Retirement Income Security Act of 1974 (ERISA) or the Code from a qualified plan to an owner-employee (i.e., a sole proprietor or more than 10-percent partner). Interest paid on a loan from a qualified plan is deductible.

Subject to certain exceptions, a loan to a plan participant is treated as a taxable distribution of plan benefits. An exception to this general rule of income inclusion is provided to the extent that the loan (when added to the outstanding balance of all other loans to the participant from all plans maintained by the employer) does not exceed the lesser of (1) $50,000 or (2) the greater of $10,000 or one-half of the participant's accrued benefit under the plan. This exception applies only if the loan must, by its terms, be repaid within five years or, if the loan is used to acquire or improve a principal residence of the participant or a member of the participant's family, within a reasonable period of time.

House Bill

The House bill modifies the exception to the income inclusion rule by reducing the $50,000 limit on a loan by the participant's highest outstanding loan balance during the preceding 12-month period.

In addition, the extended repayment period permitted for purchase or improvement of a principal residence is amended to apply only to the purchase of the principal residence of the participant. Plan loans to improve an existing principal residence, to purchase a second home, and to finance the purchase of a home or home improvements for other members of the employee's family are subject to the 5-year repayment rule.

The House bill also requires that a plan loan be amortized in level payments, made not less frequently than quarterly, over the term of the loan.

The House bill also provides for the deferral of the deduction for interest paid by (1) all employees on loan secured by elective deferrals under a qualified cash or deferred arrangement or tax-sheltered annuity, and (2) key employees with respect to loans from any qualified plan or other tax-favored retirement plan. The deferral is to be accomplished by denying a current deduction for the interest paid and increasing the participant's basis under the plan by the amount of nondeductible interest paid.

The provisions would be effective for amounts received as a loan after December 31, 1985. Any renegotiation, extension, renewal, or revision after December 31, 1985,

of an existing loan is treated as a new loan on the date of such renegotiation, etc.

Senate Amendment

As under the House bill, the Senate amendment modifies the exception to the income inclusion rule by reducing the $50,000 limit on a loan by the participant's highest outstanding balance during the preceding 12-month period.

In addition, the extended repayment period permitted for purchase or improvement of a principal residence is amended to apply only to the purchase of the principal residence of the participant or a lineal descendant of the participant. Thus, for example, plan loans to improve an existing principal residence, or to purchase a second home, are subject to the 5-year repayment rule.

The provisions are generally effective with respect to loans made after December 31, 1986. Any renegotiation, extension, renewal, or revision after December 31, 1986, of an existing loan is treated as a new loan on the date of such renegotiation, etc. The provision denying basis is effective for interest paid after December 31, 1986. The general effective date applies to the provision denying a deduction for interest paid on certain loans. Of course, prior to the effective date, the deductibility of interest will be subject to the general limits on deductibility of interest contained in the conference agreement.

Conference Agreement

The conference agreement follows the House bill, with modifications and clarifications as described below.

The conference agreement follows the House bill with respect to the reduction of the $50,000 limit on loans, with a clarification. Under the conference agreement, a loan, when added to the outstanding balance of all other loans from the plan, cannot exceed $50,000 reduced by the excess of the highest outstanding balance of loans from the plan during the 1-year period ending on the day before the date the loan is made over the outstanding balance of loans from the plan on the date the loan is made.

For example, a participant with a vested benefit of $200,000 borrows $30,000 from a plan on January 1. On November 1, the participant wants to borrow an additional amount without triggering a taxable distribution. At that time, the outstanding balance on the first loan is $20,000. The maximum amount the participant can borrow is $50,000, i.e., $20,000–$20,000–($30,000–$20,000).

The conference agreement follows the House bill with respect to the principal residence exception to the 5-year repayment rule and the level amortization rule. The conferees intend that the level amortization requirement does not apply to a period when the employee is on a leave of absence without pay for up to 1 year. In addition, the requirement does not preclude repayment or acceleration of the loan prior to the end of the commitment period. Thus, for example, the provision does not preclude a plan from requiring full repayment upon termination of employment.

The provisions are generally effective with respect to loans made after December 31, 1986. Any renegotiation, extension, renewal, or revision after December 31, 1986, of an existing loan is treated as a new loan on the date of such renegotiation, etc.

Under the conference agreement, the deduction of interest on all loans from a qualified plan or tax-sheltered annuity is subject to the general limits on deductibility of interest contained in the conference agreement. In addition, effective with respect to loans made, renegotiated, extended renewed, or revised after December 31, 1986, no deduction is allowed with respect to interest paid on (1) loans secured with elective deferrals under a qualified cash or deferred arrangement or a tax-sheltered annuity, and (2) any loan to a key employee (even if the interest on such loans is otherwise deductible under the general interest provisions of the agreement). Effective for interest paid after December 31, 1986, no basis is allowed with respect to any interest paid on a loan from a qualified plan or tax-sheltered annuity.

D. Tax Deferral Under Qualified Plans

1. Overall Limits on Contributions and Benefits

Present Law

In general

Under present law, overall limits apply to contributions and benefits provided to an individual under all qualified plans, tax-sheltered annuity programs, and simplified employee pensions (SEPs) maintained by any private or public employer or by certain related employers. Beginning in 1988, the limits are to be indexed for post-1986 inflation by reference to the consumer price index. Present law provides a limit on the annual addition for an employee under all defined contribution plans maintained by the same employer and a limit on the annual benefit that may be provided for an employee under all defined benefit pension plans (sec. 415). A combined plan limit applies with respect to an employee who participates in a defined contribution plan and a defined benefit pension plan of the same employer. A plan or program that does not comply with the overall limits is not a qualified plan.

Defined contribution plans

The annual addition under a defined contribution plan is limited to the lesser of (1) 25 percent of compensation for the year, or (2) $30,000. The annual addition consists of employer contributions, certain employee contributions, and reallocated forfeitures.

In applying the limits, only a portion of nondeductible employee contributions to a qualified plan is taken into account. The amount taken into account is the lesser of one-half of the employee contributions or total employee contributions in excess of six percent of compensation.

Defined benefit pension plans

Under a defined benefit pension plan, the limit on the annual benefit derived from employer contributions is the lesser of (1) 100 percent of average compensation, or (2) $90,000. The $90,000 limit is reduced for retirement benefits commencing before age 62. In no event, however, is the dollar limit applicable to benefits commencing at or after age 55 less than $75,000. If retirement benefits commence before age 55, the dollar limit is actuarially reduced so that it is the actuarial equivalent of a $75,000 annual benefit commencing at age 55. Under present law, the $90,000 limit is actuarially increased for benefits commencing after age 65.

Present law provides that reduced limits apply to participants with less than 10 years of service. The limits are reduced by 10 percent per year for each year of service less than 10.

Combined plan limit

Under present law, a combined plan limit applies if an employee participates in a defined contribution plan and a defined benefit pension plan maintained by the same employer. Present law provides no special limit on an employee's benefits from qualified plans of more than one employer.

Tax-sheltered annuity programs

Subject to limits, public schools and certain tax-exempt organizations (including churches and certain organizations associated with churches) may make payments on behalf of an employee to purchase a tax-sheltered annuity contract (sec. 403(b)). Payments to a custodial account investing in stock of a regulated investment company (e.g., a mutual fund) are also permitted.

The amount paid by the employer is excluded from the employee's income for the taxable year to the extent that the payment does not exceed the employee's exclusion allowance for the taxable year. The exclusion allowance is generally equal to 20 percent of the employee's includible compensation from the employer multiplied by the number of the employee's years of service with that employer, reduced by amounts already paid by the employer to purchase the annuity.

In addition, an increased exclusion allowance is provided for certain church employees whose adjusted gross income does not exceed $17,000. The special exclusion allowance for such employees is not less than the lesser of $3,000 or the employee's includible compensation for the year.

Employer payments to purchase a tax-sheltered annuity contract for an employee are also subject to the overall limits on contributions and benefits under qualified plans. Tax-sheltered annuities are generally defined contribution arrangements. Under the overall limits, annual additions to tax-sheltered annuities and other defined contribution arrangements for the employee may not exceed the lesser of a specified dollar amount ($30,000, for 1986), or 25 percent of the employee's compensation from the employer for the year. Under a special rule, an employee of an educational institution, hospital, home health service agency, or church may elect to compute the annual exclusion allowance for payments under a tax-sheltered annuity solely by reference to the maximum annual employer payment that could be made under the overall limit.

In addition, to allow catch-up payments for certain lower-paid employees, alternative special elections are provided to increase the overall limit for the year of the election. Catch-up payments are payments permitted under the exclusion allowance on account of prior years of service, but denied under the overall annual limit (that takes into account only the current year). An individual is allowed only one of the special elections under section 415.

Further, a church employee may make an additional election pursuant to which the church may make payments for the year in excess of the otherwise applicable overall annual limit. The election may not be made for the same year in which a catch-up election is effective.

A plan is not required to include a specific provision as a condition of meeting the requirements of the overall limits on contributions and benefits (sec. 415). The plan, however, must preclude the accrual of benefits in excess of the level permitted by the overall limits.

House Bill

Defined contribution plans

The House bill provides that the dollar limit on annual additions under a defined contribution plan is decreased to the lesser of $25,000 or 25 percent of the dollar limit for defined benefit pension plans, as adjusted for inflation. Also, under the bill, the entire amount of nondeductible employee contributions to a plan is taken into account in computing the annual addition.

Defined benefit pension plans

In general

The House bill reduces the dollar limit on the employer-derived annual benefit under a defined benefit pension plan from $90,000 to $77,000. The $77,000 limit applies for benefits commencing at age 62 or thereafter. The bill conforms the limit on benefits commencing after age 65 to the reduced limit. The bill also reduces the limits applicable to early retirement.

Early retirement benefits

Under the House bill, if retirement benefits under a defined benefit pension plan commence before age 62, then the $77,000 limit generally is reduced so that it is the actuarial equivalent of an annual benefit of $77,000 commencing at age 62. The bill provides, however, that the limit on the annual benefit for a participant who has attained age 55 is not to be less than $65,000.

The House bill provides special rules for commercial airline pilots and participants in a qualified police or firefighters' pension plan.

Under the House bill, in the case of a commercial airline pilot, the reduction in benefits for early retirement applies only to those airline pilots whose benefits begin before age 60 and the dollar limit applicable to annual benefits beginning at age 60 is $77,000. If benefits begin before age 60, the House bill provides that the dollar limit applicable to the annual benefits is determined under the general rules.

With respect to participants in a qualified police of firefighters' pension plan, the House bill provides that the dollar limit on benefits payable are never actuarially reduced to an amount less than $50,000, regardless of the age at which benefits commence.

Although the $77,000 limit provided by the House bill is adjusted for post-1986 inflation, no inflation adjustment is provided for the $65,000 limit. Under the bill, the limit on the annual benefit for a participant who has not attained age 55 is the actuarial equivalent of the limit at age 55.

Cost-of-living adjustments

The House bill does not change the rules for making cost-of-living adjustments to the dollar limit on annual benefits under a defined benefit pension plan. Under the bill, however, cost-of-living adjustments to the dollar limit on annual additions under a defined contribution plan are suspended until cost-of-living adjustments to the limit on annual benefits increase that limit to an amount in excess of $100,000.

Qualified cost-of-living arrangements

The House bill permits a defined benefit pension plan to maintain a qualified cost-of-living arrangement under which employer and employee contributions may be applied to provide cost-of-living increases to the primary benefit under the plan. If the arrangement qualifies, an employee contribution under the arrangement will not be treated as an annual addition in applying the separate limit on annual additions under defined contribution plans, but will be treated as an annual addition for purposes of applying the combined plan limit (sec. 415(e)). Further, under a qualified arrangement, the benefit attributable to an employee's contribution will be treated as a benefit derived from employer contributions for purposes of the limit on annual benefits. A qualified cost-of-living arrangement is required to comply with the dollar limits, election procedures, and nondiscrimination requirements of the bill.

Under the House bill, a key employee is generally not eligible to participate in a qualified cost-of-living arrangement. In a plan that is not top heavy, however, an employee who is a key employee solely because of officer status can participate in a qualified cost-of-living arrangement.

Phase-in of maximum benefit limit

The House bill provides that the limit on annual benefits under a defined benefit plan is phased in on the basis of years of participation in a plan instead of years of service with the employer. For an employee who has not completed 10 years of plan participation, the otherwise applicable dollar limit for such employee is multiplied by a fraction. The numerator of the fraction is the number of years of participation completed, and the demominator of the fraction is 10. The 10-year phase-in period applies with respect to an increase in benefits due to a change in the benefit structure of a plan, except as provided under Treasury regulations. The phase-in generally does not apply to cost-of-living increases (within the meaning of sec. 415(d)) or post-retirement benefit increases. The application of the phase-in to plan mergers or spin-offs is to be determined under Treasury regulations.

Includible compensation

The House bill provides a limit on compensation that may be taken into account under a plan. Under the bill, the $200,000 limit applicable under present law to top-heavy plans is reduced to seven times the limit on annual additions under a defined contribution plan ($175,000) and is applied to all qualified plans (whether or not top heavy). The limit applies for all purposes in testing a plan for discrimination (e.g., secs. 401(a)(4) and 401(k)(3)).

Excess distributions

In general

The House bill provides a new excise tax on excess distributions from tax-favored retirement savings arrangements (qualified retirement plans, tax-sheltered annuity programs, and IRAs). To the extent that aggregate annual distributions paid to a participant from tax-favored retirement savings arrangements during a calendar year are excess distributions, the distributions are subject to a 15-percent excise tax.

Generally, the excess distribution for a calendar year is the excess of (1) the aggregate amount of retirement distributions made with respect to an individual during the year, over (2) the greater of $112,500 or 125 percent of the limit for the year on annual benefits commencing at age 62 under a defined benefit pension plan. However, the bill provides that certain amounts are excluded in making this calculation. Under the bill, excludable distributions include amounts excluded from the participant's income because they are payable to a former spouse pursuant to a qualified domestic relations order (sec. 414(p)) and includible in the spouse's income. Of course, distributions payable to the former spouse are aggregated with any other retirement distributions payable to such spouse for purposes of determining whether the spouse has excess retirement distributions subject to the tax. (Distributions paid to other alternate payees (e.g., minor children) are includible in applying the limit.) In addition, distributions made with respect to a participant after the death of the participant are disregarded in applying this annual limit and are subject instead to an additional estate tax.

Under this provision, the ceiling amount is not adjusted to reflect the age at which benefit payments commence. Thus, the limit is neither decreased to reflect early commencement of benefits nor increased to reflect deferred commencement. However, this tax will be reduced by the amount, if any, of income tax on early distributions (sec. 72(t)) to the extent attributable to such excess distribution.

In applying the additional tax, all distributions made with respect to any individual during a calendar year will be aggregated, regardless of the form of the distribution or the number of recipients. Thus, for example, all distributions received during a year, whether paid under a life annuity, a term certain, or any other benefit form (including an ad hoc distribution) generally will be aggregated in applying the tax.

Lump sum distributions

A special higher ceiling applies for purposes of calculating the excess distribution for any calendar year in which an individual receives a lump sum distribution that is taxed under the favorable long-term capital gains or five-year averaging rules. The higher ceiling will be the lesser of (i) the portion of the lump sum distribution that is treated as long-term capital gains or taxed under the five-year averaging rules, or (ii) five times the otherwise applicable ceiling for such calendar year.

Post-death distributions

In lieu of subjecting post-death distributions (including distributions of death benefits) to the annual tax on excess distributions, the bill adds an additional estate tax equal to 15 percent of the individual's excess retirement accumulation (sec. 4980(A)). After the estate tax is imposed, post-death distributions are disregarded entirely in applying this tax. For example, beneficiaries who are receiving distributions with respect to a participant after the participant's death (other than certain former spouses receiving benefits pursuant to a qualified domestic relations order) are not required to aggregate those amounts with any other retirement distributions received on their own behalf.

The excess retirement accumulation is defined as the excess (if any) of the value of the decedent's interests in all qualified retirement plans, tax-sheltered annuities, and individual retirement accounts, over the present value of annual payments equal to the annual ceiling ($112,500 or, if greater, 125 percent of the applicable defined benefit plan dollar limit in effect on the date of death), over a period equal to the life expectancy of the individual immediately before death.

In calculating the amount of the excess retirement accumulation, the value of the decedent's interest in all plans, tax-sheltered annuities and individual retirement arrangements will be taken into account regardless of the number of beneficiaries. In addition, the decedent's interests are to be valued as of the date of death or, in the case of a decedent for whose estate an alternate

valuation date has been elected, such alternate valuation date (sec. 2032).

Effective dates

In general

The provision generally applies to years beginning after December 31, 1985. Special rules are provided that permit deferral, until years beginning after December 31, 1987, of the time for amendment of plans to conform to the bill. For years beginning after December 31, 1985, however, the reduced limits are to be reflected in the computation of the amount of deductible employer contributions to a plan. A special effective date is provided for collectively bargained plans.

Current accrued benefits

Transition rules are provided to insure that a participant's current accrued benefit under a defined benefit pension plan is not reduced merely because of the changes made by the provision. The protection of current accrued benefits applies to any individual who is a participant before January 1, 1985, in a plan that was in existence on November 6, 1985. Under the bill, an individual's current accrued benefit is the individual's accrued benefit as of the close of the last year beginning before January 1, 1986, expressed as an annual benefit determined pursuant to the rules in effect prior to the amendments made by the bill.

Generally, for purposes of determining an individual's current accrued benefit, no change in the terms and conditions of the plan after November 6, 1985, is taken into account. Under the bill, no later than the first plan year beginning after December 31, 1987, any accruals in excess of the greater of (1) the limit, as amended by the bill, or (2) the current accrued benefit, are to be reduced.

In the case of a plan maintained pursuant to one or more collective bargaining agreements ratified before November 6, 1985, the current accrued benefit of an individual is the individual's accrued benefit as of the close of the last year beginning before the earlier of (1) the date on which the last of the collective bargaining agreements terminates, or (2) January 1, 1991.

Employee contributions

The provision specifies that inclusion of all employee contributions in the computation of the annual addition under a defined contribution plan does not affect the computation of the defined contribution fraction for years beginning before January 1, 1986.

Tax on excess distributions

The 15-percent tax on excess distributions applies to benefits received in taxable years beginning after December 31, 1985.

Senate Amendment

Defined contribution plans

Under the Senate amendment, the cost-of-living adjustment to the dollar limit on the annual addition under a defined contribution plan is deferred until the dollar limit on the annual benefit under a defined benefit pension plan exceeds $120,000. The Senate amendment follows the House bill with respect to the provision under which all nondeductible employee contributions to a plan are taken into account in computing the annual addition.

Defined benefit pension plans

Early retirement benefits

The Senate amendment conforms the normal retirement age used in determining the limit on annual benefits under a qualified defined benefit pension plan with the retirement age in effect under the Social Security Act (currently, age 65). Under the Senate amendment, the limit on the annual benefit under a defined benefit pension plan is actuarially reduced if the benefit commences before the social security normal retirement age. To the extent benefits commence on or after age 62, this reduction generally follows the manner in which the social security benefits are reduced for early benefit commencement. If benefits commence before age 62, the limit is the actuarial equivalent of the limit at age 62.

The provisions of the Senate amendment relating to limits on early retirement benefits for airline pilots, police, and firefighters generally are the same as under the House bill except that the Senate amendment (1) provides an exemption from the changes in the Senate amendment relating to the social security retirement age and (2) extends the special limits to certain correctional officers.

Cost-of-living adjustments

The Senate amendment provides that the limit on the annual benefit under a defined benefit pension plan is to be adjusted for increases in the social security wage base. Under the amendment, legislative changes in the wage base are not to be reflected in making the adjustment to the limit on annual benefits under a defined benefit pension plan. The amendment provides that the limit on the annual addition under a defined contribution plan is determined by reference to the limit on annual benefits under a defined benefit pension plan.

Qualified cost-of-living arrangements

The provisions of the Senate amendment relating to qualified cost-of-living arrangements are similar to the provisions of the House bill. Under the Senate amendment, however, additional rules are provided to limit accrued benefits under a qualified cost-of-living arrangement.

The Senate amendment provides that a right to an accrued benefit derived from employer contributions under a plan which contains a qualified cost-of-living arrangement is not treated as forfeitable solely because the plan provides that a participant is not entitled to receive that portion of the cost-of-living adjustment derived from employer contributions if the participant (1) fails to contribute the amount required to be paid under the plan for the cost-of-living adjustment, or (2) receives a distribution of the present value of the participant's accrued benefit derived from employer contributions in the form of a lump sum. The provision does not modify the fiduciary obligations or other rules of ERISA under which a plan administrator is to provide appropriate notice to a participant or beneficiary with respect to the consequences of a failure to make contributions required as a condition of obtaining a cost-of-living adjustment, or the consequences of receiving benefits in the form of a lump sum.

Phase-in of maximum benefit limit

The provisions of the Senate amendment relating to the phase-in of the maximum limit on the annual benefit under a defined benefit pension plan are the same as under the House bill.

Includible compensation

Under the Senate amendment the $200,000 limit on compensation that may be taken into account under a top-heavy plan is extended to all plans. The limit applies for most purposes for which compensation is taken into account under the Code, including the provisions relating to nondiscrimination. The limit is indexed at the same time and in the same manner as the dollar limit under defined benefit plans (sec. 415(d)).

Excess distributions

The Senate amendment does not adopt the House bill provision relating to the excise tax on excess distributions.

Effective dates

In general

The provision generally applies to years beginning after December 31, 1986. Special rules are provided that permit deferral, until years beginning after December 31, 1988, of the time for amendment of plans to conform to the bill. For years beginning after December 31, 1986, however, the reduced limits are to be reflected in the computation of the amount of deductible employer contributions to a plan. A special effective date is provided for collectively bargained plans.

Current accrued benefits

Transition rules are provided to insure that a participant's current accrued benefit under a defined benefit pension plan is not reduced merely because of the changes made by the provision.

The protection of current accrued benefits applies to any individual who is a participant, as of the first day of the first year to which the provision applies, in a plan that was in existence on May 6, 1986, and in all prior years satisfied the limits on contributions and benefits. Under the bill, an individual's current accrued benefit is the individual's accrued benefit as of the close of the last year beginning before January 1, 1987, expressed as an annual benefit determined pursuant to the rules in effect prior to the amendments made by the bill.

Generally, for purposes of determining an individual's current accrued benefit, no change in the terms and conditions of the plan after May 5, 1986, and no cost-of-living adjustment occurring after May 5, 1986, are to be taken into account. Under the bill, no later than the first plan year beginning after December 31, 1988, any accruals in excess of the greater of (1) the limit, as amended by the bill, or (2) the current accrued benefit, are to be reduced.

In the case of a plan maintained pursuant to one or more collective bargaining agreements ratified before May 6, 1986, the current accrued benefit of an individual is the individual's accrued benefit as of the close of the last year beginning before the earlier of (1) the date on which the last of the collective bargaining agreements terminates, or (2) January 1, 1991. In addition, a change in the terms of the plan ratified before May 6, 1986, is treated as a change made before May 6, 1986.

Employee contributions

The provision specifies that inclusion of all employee contributions in the computation of the annual addition under a defined contribution plan does not affect the computation of the defined contribution fraction for years beginning before January 1, 1987.

Conference Agreement

In general

The conference agreement generally follows the Senate amendment with respect to the separate limits applicable to defined benefit pension plans and defined contribution plans except that the method of index-

ing the dollar limits is the same as under the House bill and present law, i.e., by reference to increases in the consumer price index. The conference agreement generally follows the House bill with respect to the imposition of an excise tax on benefit payments in excess of a specified level.

Defined benefit plans

Normal retirement age

The conference agreement follows the Senate amendment, except that the conference agreement exempts plans maintained by tax-exempt or governmental employers and a specified class of merchant seamen from the provisions relating to the normal retirement age and the elimination of the $75,000 floor for benefits beginning at age 55.

The conference agreement generally follows the special rules in the Senate amendment for commercial airline pilots and participants in a qualified police or firefighters' defined benefit pension plan. The conference agreement clarifies the definition of a qualified police or firefighters' plan and provides for indexing of the $50,000 limit applicable under the special rules for those plans. The conference agreement does not adopt the special rules for correctional officers.

In addition, the conference agreement clarifies the application of the special rules for pilots who retire before age 60. Under the conference agreement, in the case of any participant who is a commercial airline pilot, the actuarial reduction for early retirement does not reduce the limitation on benefits below (1) $75,000, if the participant's benefit begins at or after age 55 or (2) the actuarial equivalent of the $75,000 limitation at age 55, if the benefit begins before age 55. In addition, if, as of the time an individual retires, Federal Aviation Administration regulations require an individual to separate from service as a commercial airline pilot after attaining any age occurring on or after age 60 and before the social security retirement age, the age prescribed in such regulations is to be substituted for the social security retirement age, unless the individual separates from service prior to age 60. The conference agreement also clarifies that the special rule for commercial airline pilots is limited to individuals whose services as a pilot constitute substantially all of their services to which the benefit relates.

Phase-in of maximum benefit limit

The conference agreement adopts the House bill and the Senate amendment provision under which the dollar limit on annual benefits under a qualified defined benefit pension plan is phased in over 10 years of plan participation is adopted.

As under both bills, the conference agreement also provides that, to the extent provided in regulations, the phase-in is to be applied to any benefit increases under a plan as though such increase were a new plan. Thus, for example, an amendment improving the benefit formula may increase benefits by up to one-tenth of the applicable dollar limit under section 415 for each year of participation after the amendment. A second amendment within 10 years of a prior amendment increasing benefits is subject to the limit under the phase-in triggered by the prior amendment (along with benefit increases under the prior amendment).

In addition, the conferees do not intend the phase-in for benefit increases to apply to benefit improvements due to updating compensation in a career average pay plan, cost-of-living increases for retirees, the beginning of a new collective bargaining cycle, and other reasonable benefit improvements that are not primarily for highly compensated employees. Thus, the conferees expect that the Secretary will apply a concentration test under which the phase-in will not apply to a benefit increase if the resulting increase in benefits is not primarily for highly compensated employees. In addition, the Secretary is to provide rules permitting the tacking of participation under separate plans in circumstances not inconsistent with the purposes of the phase-in.

Qualified cost-of-living arrangements

The conference agreement generally follows the House bill with respect to qualified cost-of-living arrangements. The agreement clarifies the terms under which an employee may obtain an employer-provided cost-of-living subsidy. In addition, the conferees intend that the right to the employer-derived portion of a qualified cost-of-living benefit is part of an employee's accrued benefit subject to the vesting and benefit accrual requirements and the prohibition on a retroactive reduction in accrued benefits and is to be treated under rules similar to the rules applicable to employer-derived early retirement benefits.

For example, the employer-derived portion of the cost-of-living benefit need not be provided to an employee who fails to satisfy the applicable conditions for receipt of the benefit, including any required employee contributions. Further, the cost-of-living benefit need not be provided to an employee who has separated from service and received a distribution of the employee's benefit without making the required contributions for the cost-of-living benefit. The employee could, however, return to service and buy back the benefit by proper repayment of the cashed out benefit.

Defined contribution plans

With respect to defined contribution plans, the conference agreement adopts the rules of the House bill applicable to cost-of-living adjustments and adopts the Senate amendment with respect to the amount of the current dollar limitation ($30,000). Although cost-of-living adjustments will be made to the defined benefit pension plan limit beginning in 1988, no cost-of-living adjustments to the defined contribution plan limit will be made until the $30,000 defined contribution plan limit is equal to 25 percent of the defined benefit dollar limit. The cost-of-living adjustment will be determined by reference to the consumer price index.

Under the agreement, contributions made by retired nonkey employees for retiree medical coverage are not subject to the percentage-of-compensation limit on annual additions.

Tax-sheltered annuities

Under the conference agreement, the class of employers whose employees are entitled to the special catch-up elections for tax-sheltered annuities is expanded to include employers that are health and welfare service agencies. The agreement also provides a technical modification clarifying that the catch-up rules apply before separation from service.

Excess benefits

The conference agreement generally follows the House bill with respect to the 15-percent excise tax on benefit payments in excess of $112,500 (indexed at the same time and in the same manner as the dollar limitation on annual benefits under a defined benefit pension plan). The conference agreement also clarifies that distributions attributable to after-tax employee contributions and distributions not includible in income by reason of a rollover contribution are not taken into account in applying the tax. All other amounts not specifically exempted are taken into account.

The conference agreement does not permit accrued benefits to be reduced retroactively to avoid the excise tax.

The conference agreement also modifies the rule providing an increased limit in the case of a lump-sum distribution. Under the agreement, if an individual elects lump-sum treatment (or long-term capital gains treatment), the $112,500 limit is applied separately to such lump-sum distribution and the limit is increased to 5 times the generally applicable limit with respect to the lump-sum distribution.

Also, the conference agreement clarifies that, with respect to the special provision relating to the estate tax, the tax may not be offset by any credits against the estate tax (such as the unified credit). In addition, the conferees intend that, in calculating the excess retirement accumulation, individuals are required to use reasonable interest rates in accordance with rules prescribed by the Secretary. The Secretary may, by regulations, prescribe a range of interest rates and other permissible assumptions for purposes of applying the excise tax.

Under the conference agreement, an individual may elect to be covered by (1) a special grandfather rule which exempts from the tax benefits accrued on August 1, 1986, or (2) an alternative rule which increases the $112,500 limit.

Under the grandfather, in the case of a defined contribution plan, the accrued benefit on August 1, 1986, is the participant's account balance on that date. In the case of a defined benefit plan, the accrued benefit on August 1, 1986, is determined assuming the participant separated from service on that date.

The grandfathered amounts are treated as if received on a pro-rata basis and are taken into account in determining whether the $112,500 limit is exceeded. Under the pro-rata rule, the portion of a distribution not subject to the excise tax is determined by multiplying the distribution by a fraction, the numerator of which is the grandfathered amount and the denominator of which is the accrued benefit on the date of the distribution under all plans or programs subject to the tax. Distributions after August 1, 1986, and before the effective date will reduce the grandfathered amount in the same manner.

For example, assume that at the time of a distribution of $250,000 an individual's grandfathered benefit is equal to 80% of the individual's accrued benefit on such date under all plans or programs subject to the tax. Under the grandfather, $200,000 (80 percent of $250,000) would be exempt from the tax. The remaining $50,000 would be subject to the tax because the grandfathered amounts are taken into account in determining whether the distribution exceeds the $112,500 limit.

The Secretary also has the authority to provide for an alternative grandfather rule for such individuals. The conferees intend that the Secretary consider providing an alternative grandfather rule based on a fraction, the numerator of which is the months of service between age 35 and August 1, 1986, and the denominator of which is total months of service after age 35. This rule ap-

plies as long as grandfathered amounts are taken into account in applying the excise tax to nongrandfathered amounts (as under the general grandfather rule).

The grandfather rule applies only with respect to an individual who (1) elects to have the grandfather rule apply and (2) has a grandfathered benefit of at least five times the $112,500 limit ($562,500). The election must be made on a return for a year beginning no later than January 1, 1988, and shall be in such form and shall contain such information as the Secretary may prescribe.

If an individual does not elect the grandfather rule, then the amount of a distribution subject to the tax under the general rule is computed by substituting for $112,500 (as indexed), the greater of $150,000 and $112,500 (as indexed).

Includible compensation

The conference agreement follows the Senate amendment. Under the agreement, the $200,000 limit applies for purposes of computing allowable deductions (sec. 404) as well as for purposes of determining the qualified status of a plan.

The conferees also clarify that, with respect to a defined benefit pension plan, the $200,000 limit applies to each year's compensation (including years prior to 1987), not solely to the final average or career average compensation of an individual.

Incorporation of limits by reference

Under the conference agreement, a plan does not fail to meet the requirements for qualified status merely because the plan incorporates the benefit and contribution limits of section 415 of the Code by reference. The agreement provides that incorporation by reference is permitted except that, if the limitation may be applied in more than one manner, the plan is to specify the manner in which the limitation is to be applied.

For example, in the case of a defined contribution plan, Treasury regulations provide several methods for establishing a suspense account for excess annual additions and allocating amounts in the suspense account. Thus, the plan must specify which method is to be used.

The agreement does not change the requirements of present law relating to definitely determinable benefits and the requirement that profit-sharing and stock bonus plans must specify a definite allocation formula. Under the conference agreement, however, a plan does not fail to provide definitely determinable benefits merely because it incorporates the limits by reference. For example, if an employee participates in both a defined contribution plan and a defined benefit pension plan maintained by the same employer, the manner in which the employee's benefits will be adjusted to comply with the combined limitation (sec. 415(e)) is to be specified.

Effective dates

The conference agreement follows the Senate amendment except that it does not allow a plan to accrue benefits in excess of the new limits (or the grandfathered current accrued benefit, if higher), even during the period prior to the time the plan must be amended.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, in the case of employees covered under a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective for plan years beginning before the earlier of (1) January 1, 1989, or (2) the date on which the last of the collective bargaining agreement terminates (determined without regard to any extensions in the collective bargaining agreement).

2. Deductions for Contributions to Qualified Plans

Present Law

In general

The contributions of an employer to a qualified plan are deductible in the year for which the contributions are paid, within limits. No deduction is allowed, however, for a contribution that is not an ordinary and necessary business expense or an expense for the production of income. The deduction limits applicable to an employer's contribution depend on the type of plan to which the contribution is made and may depend on whether an employee covered by the plan is also covered by another plan of the employer. Under the Code, if a contribution for a year exceeds the deduction limits, then the excess generally may be deducted in succeeding years as a carryover. Deductions are not allowed with respect to contributions or benefits in excess of the overall limits on contributions or benefits.

Profit-sharing and stock bonus plans

In the case of a qualified profit-sharing or stock bonus plan, employer contributions for a year not in excess of 15 percent of the aggregate compensation of covered employees are generally deductible for the year paid. Under the Code, if employer contributions for a group of employees for a particular year exceed the deduction limits, then the excess may be carried over and deducted in later years. On the other hand, if the contribution for a particular year is lower than the deduction limit, then the unused limitation may be carried over and used in later years. In the case of a limitation carryover, the amount deducted in a later year is not to exceed 25 percent of the aggregate compensation of employees covered by the plan during that year.

Defined benefit pension plans

In general

Employer contributions under a defined benefit pension plan are required to meet a minimum funding standard. The deduction allowed by the Code for an employer's contribution to a defined benefit pension plan is limited to the greatest of the following amounts:

(1) The amount necessary to meet the minimum funding standard for plan years ending with or within the taxable year.

(2) The level amount (or percentage of compensation) necessary to provide for the remaining unfunded cost of the past and current service credits of all employees under the plan over the remaining future service of each employee. Under the Code, however, if the remaining unfunded cost with respect to any three individuals is more than 50 percent of the cost for all employees, then the cost attributable to each of those employees is spread over at least five taxable years.

(3) An amount equal to the normal cost of the plan plus, if past service or certain other credits are provided, an amount necessary to amortize those credits in equal annual payments over 10 years. Generally, this rule permits contributions in excess of the contributions required by the minimum funding standard.

Certain excess contributions

The minimum funding standard includes provisions (the full funding limitation) designed to eliminate the requirement that additional employer contributions be made for a period during which it is fully funded. The funding standard, however, does not prohibit employers from making contributions in excess of the full funding limitation.

Employer contributions in excess of the deduction limits provided by the Code are not currently deductible. A deduction carryover is generally allowed, however, for employer contributions to a qualified plan in excess of the deductible limits.

A pension, profit-sharing, or stock bonus plan does not meet the requirements of the Code for qualified status unless it is for the exclusive benefit of employees and their beneficiaries. Under some circumstances, employer contributions in excess of the level for which a deduction is allowed may indicate that the plan is not being maintained for the exclusive benefit of employees.

Money purchase pension plans

Employer contributions to a money purchase pension plan are generally deductible under the same rules that apply to defined benefit pension plans. Under a qualified money purchase pension plan, the amount required under the minimum funding standard is the contribution rate specified by the plan.

Combination of pension and other plans

If an employer maintains a pension plan (defined benefit or money purchase) and either a profit-sharing or a stock bonus plan for the same employee for the same year, then the employer's deduction for contributions for that year is generally limited to the greater of the contribution necessary to meet the minimum funding requirements of the pension plan for the year or 25 percent of the aggregate compensation of employees covered by the plans for the year. Deduction and limitation carryovers are provided.

House Bill

The House bill repeals the limit carryforward applicable to profit-sharing and stock bonus plans, extends the combined plan deduction limit to a combination of a defined benefit and a money purchase pension plan, requires that certain social security taxes be taken into account in applying the 15 percent and 25 percent of compensation deduction limits, and imposes a 10-percent excise tax on nondeductible contributions to qualified plans.

The provisions of the House bill relating to deduction limits generally apply to employer taxable years beginning after December 31, 1985. However, certain unused pre-1986 limit carryforwards are not affected by the provision generally repealing limit carryforwards.

Senate Amendment

The Senate amendment is the same as the House bill except that (1) the Senate amendment does not require that certain social security taxes be taken into account in applying the 15 percent and 25 percent of compensation deduction limits, and (2) the Senate amendment does not impose an excise tax on nondeductible contributions to qualified plans. The Senate amendment also clarifies that a fully insured plan (sec. 412(i)) is treated as a defined benefit pension plan for purposes of the combined plan deduction limit.

The Senate amendment is effective for employer taxable years beginning after December 31, 1986.

Conference Agreement

In general

The conference agreement generally follows the Senate amendment with modifications. The conference agreement adopts the House bill applying a 10-percent excise tax to nondeductible employer contributions. The conferees clarify that, with respect to an employer that is exempt from tax, the 10-percent excise tax is to apply to contributions that would, if the employer were not exempt, be nondeductible. The conference agreement also imposes a limit of $200,000 on the amount of compensation that may be taken into account in computing deductions for plan contributions. The limit is to be adjusted for cost-of-living increases at the time and in the manner provided for adjusting the overall limits on annual benefits under a qualified defined benefit pension plan (sec. 415(d)).

Fully insured plans

The conference agreement includes a technical modification relating to fully insured plans which provides that the annual premium payments are deemed to be the amount required to meet the minimum funding requirements in the case of a fully insured plan.

Effective date

The provisions are effective for taxable years beginning after December 31, 1986.

3. Asset Reversions Under Qualified Plans

Present Law

A qualified plan must be for the exclusive benefit of employees. Prior to the satisfaction of all liabilities with respect to employees and their beneficiaries, the assets held under a qualified plan may not be used for, or diverted to, purposes other than the exclusive benefit of employees. However, if assets remain in a defined benefit pension plan upon plan termination as a result of actuarial error, then those assets may be paid, as a reversion, to the employer after the plan has satisfied all liabilities, if the plan provides for such payment.

A surplus generally is considered to be due to actuarial error if it is not due to specific action of the employer such as decreasing employer liabilities. In general, no amounts may revert to an employer upon termination of a defined contribution plan.

House Bill

The House bill imposes a 10-percent nondeductible excise tax on a reversion occurring upon the termination of a qualified plan. The tax is imposed on the person who receives the reversion. Under the bill, the tax applies to amounts received as a reversion pursuant to the termination of a plan occurring after December 31, 1985.

Senate Amendment

The Senate amendment is generally the same as the House bill except that (1) it provides a new definition of the amount of a reversion, (2) it does not apply the tax in the case of certain amounts transferred to an employee stock ownership plan, and (3) it provides an exception to the application of the tax in the case of a certain employer.

The Senate amendment defines a reversion as the amount of cash and the fair market value of other property received (directly or indirectly) from a qualified plan. Under the Senate amendment, the amount of a reversion does not include any amount distributed to an employee (or beneficiary) if the amount could have been distributed before the termination of the plan without violating the plan qualification requirements. In determining the amount of a reversion, an obligation (e.g., an obligation to pay a benefit) that causes the disqualification of a plan (or that would cause the disqualification of the plan if the plan were otherwise qualified) is to be taken into account as a reversion if it is provided pursuant to the termination of the plan.

Under the Senate amendment, the tax applies to amounts received as a reversion pursuant to the termination of a plan occurring after December 31, 1985. The tax applies to reversions received after December 31, 1985, other than reversions attributable to plan terminations occurring on or before December 31, 1985. Under the Senate amendment, a termination is considered to occur on the proposed date of termination.

Conference Agreement

The conference agreement follows the Senate amendment under which a 10-percent nondeductible excise tax is imposed on a reversion from a qualified plan. In addition, the tax is imposed on reversions from programs described in section 403(a). The tax is imposed on the employer maintaining the plan. In the case of a partnership that is treated as the employer maintaining the plan under section 401(a), the partners are liable for the tax. The agreement provides that the excise tax does not apply to a reversion to an employer that has at all times been tax-exempt. Of course, this exception does not apply to the extent that such employer has been subject to unrelated business income tax or has otherwise derived a tax benefit from the qualified plan.

In addition, the conference agreement clarifies that a return of mistaken contributions within section 401(a)(2) is not a reversion subject to the excise tax. Similarly, amounts which may be returned under section 403(c)(2) of the Employee Retirement Income Security Act of 1974, as amended, are not considered reversions subject to the tax. A payment to an employer under a participating annuity purchased upon plan termination is treated as a reversion subject to the tax.

The conference agreement adopts the provision in the Senate amendment waiving the excise tax with respect to the portion of a reversion that is transferred to an employee stock ownership plan (ESOP) under certain circumstances. No inference is to be drawn from this exception as to the circumstances in which asset transfers will or will not satisfy the exclusive benefit rule and any other applicable qualification requirements (e.g., sec. 414(1)).

As under the Senate amendment, in order to prevent undue market disruption due to the requirement that the assets transferred to the ESOP must be invested in employer securities or used to repay a loan used to acquire employer securities within 90 days of the transfer, the Secretary is authorized to extend the 90-day period. For purposes of determining which plan participants in the defined benefit plan from which assets where transferred to the ESOP are required to be participants in the ESOP, the conferees intend that only active employees, as opposed to retirees, who are participants in the plan need be included.

The conferees clarify that the prohibition against employer contributions (including elective deferrals) to an ESOP in receipt of a transfer from a terminated defined benefit plan is not intended to prohibit contributions to an ESOP to the extent that the amount of the suspense account required to be allocated for a year, when combined with additional contributions, does not exceed the limits under section 415.

The conferees are aware that the Secretary is currently considering the circumstances in which asset transfers between ongoing plans, plan mergers and spinoffs, and transfers of plan sponsorship in connection with the sale of a business may result in income tax consequences to the employer. The conferees stress that no inference is to be drawn from the agreement as to either the income or reversion tax consequences of such transactions.

The provision generally applies to reversions received after December 31, 1985 but does not apply to a reversion received after December 31, 1985, if the termination date of the plan is before January 1, 1986. Under the agreement, the special provision for transfers to an ESOP applies with respect to reversions occurring after December 31, 1985, and before January 1, 1989, and reversions received pursuant to terminations occurring after December 31, 1985, and before January 1, 1989. Under the conference agreement, the date of termination of a plan is the dates of termination under section 411(d)(3).

E. Miscellaneous Pension and Deferred Compensation Provisions

1. Discretionary Contribution Plans

Present Law

Under present law, a profit-sharing or stock bonus plan may provide that the level of employer contributions to the plan varies from year to year at the discretion of the employer. An employer's discretion with respect to the level of contributions to a profit-sharing plan is limited by the requirement that the employer's contribution to the plan in any given year may not exceed the employer's current or accumulated profits. It is unclear under present law whether a tax-exempt employer may maintain a profit-sharing plan because a tax-exempt employer generally does not have profits in the ordinary sense.

House Bill

Under the House bill, employer contributions to a profit-sharing plan that satisfy the immediate vesting and withdrawal restrictions applicable to elective deferrals under a qualified cash or deferred arrangement (sec. 401(k)) are not limited to the employer's current or accumulated profits (whether or not the plan contains a qualified cash or deferred arrangement). This provision applies without regard to whether the employer is a tax-exempt organization. The provision applies to plan years beginning after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that the provision does not require a plan to meet the vesting and distribution requirements applicable to qualified cash or deferred arrangements. The provision applies to plan years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, except that the provision is effective for plan years beginning after December 31, 1985. The conferees also intend that the Secretary may require defined contribution plans to contain provisions specifying whether they are pension plans or discretionary contribution plans.

2. Requirement That Collective Bargaining Agreements Be Bona Fide

Present Law

Under present law, many of the nondiscrimination standards and effective dates of the Code applicable to qualified plans apply separately (or do not apply) to plans or programs maintained pursuant to an agreement that is found to be a collective bargaining agreement if there is evidence that retirement benefits were the subject of good faith bargaining between the employer and employee representatives. Similar exclusions are provided with respect to certain employee benefits provided to employees. In addition, effective dates for new provisions are often delayed with respect to plans or programs maintained pursuant to a collective bargaining agreement. Present law provides no clear definition of a collective bargaining agreement, but does limit the scope of the term "employee representatives" (sec. 7701(a)(46)).

House Bill

The House bill clarifies that no agreement will be treated as a collective bargaining agreement unless it is a bona fide agreement between bona fide employee representatives and one or more employers. The provision is effective upon enactment.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment. Because the provision is a clarification of present law, the conferees intend that this provision be given retroactive effect where appropriate.

3. Treatment of Certain Fishermen as Self-Employed Individuals

Present Law

Under present law, certain fishermen who otherwise would be treated as common-law employees under the usual rules for determining an employer-employee relationship are treated as self-employed individuals for purposes of employment taxes (secs. 3121(b)(20) and 3306(c)(20)).

The Internal Revenue Service has held that, although these individuals are treated as self-employed individuals for employment tax purposes, they are treated as employees for purposes of determining whether a pension, profit-sharing, or stock bonus plan maintained by the owner or operator of the boat (or boats) is a qualified plan under section 401(a).[1]

House Bill

No provision.

Senate Amendment

Under the Senate amendment, members of fishing boat crews (described in sec. 3121(b)(20)) are treated as self-employed individuals for purposes of the rules relating to qualified plans. The provision applies to taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, effective for taxable years beginning after December 31, 1986.

4. Cash-Out of Certain Accrued Benefits

Present Law

Under present law, in the case of an employee who separates from service, a pension, profit-sharing, or stock bonus plan may not immediately distribute any portion of the participant's benefit without the participant's consent, if the present value of the participant's accrued benefit exceeds $3,500 (sec. 411(a)(11) of the Code and sec. 203 of the Employee Retirement Income Security Act (ERISA)). The interest rate used in determining the present value of a benefit for purposes of these cash out rules may not exceed the interest rate that would be used (as of the date of the distribution) by the Pension Benefit Guaranty Corporation (PBGC) for purposes of determining the present value of a lump-sum distribution upon termination of the plan. The PBGC rate in effect at the beginning of a plan year may be used throughout the plan year if the plan so provides.

With respect to those plans subject to the automatic survivor benefit requirements (Code secs. 401(a)(11) and 417 and ERISA sec. 205), if the present value of the benefit under either the qualified joint and survivor annuity or the qualified preretirement survivor annuity exceeds $3,500, then the consent of the participant and spouse (or the surviving spouse if the participant has died) must be obtained before the plan can immediately distribute any part of the present value in a form other than a qualified joint and survivor annuity or a qualified preretirement survivor annuity. The interest rate used for determining the present value of a benefit may not exceed the interest rate that would be used (as of the date of the distribution) by the PBGC for purposes of determining the present value of a lump sum distribution on plan termination. The PBGC rate in effect at the beginning of a plan year may be used throughout the plan year if the plan so provides.

House Bill

No provision.

Senate Amendment

The Senate amendment modifies the interest rate required to be used for purposes of determining the present value of (1) a participant's accrued benefit, (2) a qualified preretirement survivor annuity, or (3) a qualified joint and survivor annuity. Under the Senate amendment, a plan is required to compute the first $3,500 of the present value of a benefit by using an interest rate no greater than the interest rate (deferred or immediate, whichever is appropriate) that would be used by the PBGC (as of the date of distribution) upon the plan's termination. The remaining portion of the present value of the benefit is required to be determined using an interest rate no greater than 120 percent of the interest rate (deferred or immediate, whichever is appropriate) that would be used by the PBGC (as of the date of distribution) upon the plan's termination.

The provision applies to distributions after December 31, 1984, except for distributions made after December 31, 1984, and before the date of enactment if such distributions were made in accordance with the regulations issued under the Retirement Equity Act of 1984.

Conference Agreement

The conference agreement follows the Senate amendment, except that a plan is required to use an interest rate no greater than the interest rate (deferred or immediate, whichever is appropriate) that would be used by the PBGC (as of the date of distribution) upon the plan's termination for purposes of determining whether (1) a participant's accrued benefit can be cashed out without consent because the present value of the vested accrued benefit is less than $3,500 and (2) the present value of a participant's vested accrued benefit is less than $25,000.

If the present value of the vested accrued benefit is no more than $25,000, then the amount to be distributed to the participant or beneficiary is calculated using the PBGC rate.

If the present value of the accrued benefit exceeds $25,000 (using the PBGC interest rate), then the conference agreement provides that the amount to be distributed is determined using an interest rate no greater than 120 percent of the interest rate (deferred or immediate, whichever is appropriate) that would be used by the PBGC (as of the date of distribution) upon the plan's termination. In no event, however, is the amount to be distributed reduced below $25,000 when the interest rate used is 120 percent of the applicable PBGC rate.

For example, assume that, upon separation from service, the present value of an employee's total accrued benefit (including, e.g., any accrued benefits within section 411(d)(6) for which the employee is not yet eligible) is $50,000 using the applicable PBGC rate. Under the conference agreement, the plan may distribute to this employee (if the employee and, if applicable, the employee's spouse consents) the total accrued benefit, calculated using 120 percent of the applicable PBGC rate (e.g., $47,000).

The conferees recognize that the PBGC is considering adopting a new method and interest rate structure for valuing accrued benefits on plan termination. If a new method and structure are adopted, the Secretary is directed to provide timely guidance regarding the method of compliance with this provision of the conference agreement.

As under current law, the PBGC rate in effect at the beginning of the plan year may be used throughout the plan year if the plan so provides.

The provision is effective for distributions for plan years beginning after December 31, 1984, and for distributions to which section 303(c) of REA applies, except that the provision does not apply to distributions in plan years beginning after December 31, 1984, and before January 1, 1986, that were made in accordance with the temporary Treasury regulations issued under the Retirement Equity Act of 1984.

In addition, the conference agreement provides that any reduction in accrued benefits is not to be treated as an impermissible cutback in accrued benefits (sec. 411(d)(6) of the Code and sec. 204(g) of ERISA) to the extent the reduction is attributable to the calculation of the present value of an accrued benefit in a manner no less favorable to a participant than the manner of determining the present value under the provision. This rule applies if the plan is amended to provide for such calculation before the close of the first plan year beginning on or before January 1, 1989.

5. Time Required for Plan Amendments, Issuance of Regulations, and Development of Section 401(k) Model Plan

Present Law

If the qualification requirements of the tax laws are changed, present law generally requires that conforming plan amendments be adopted no later than the last day of the first plan year to which the change applies and the amendment must be effective, for

[1] Rev. Rul. 79-101, 1979-1 CB 156.

all purposes, not later than the first day of that plan year.[2]

House Bill

Plan amendments

Under the House bill, the provisions generally apply as of the separately stated effective date (generally, years beginning after December 31, 1985). However, a plan will not fail to be a qualified plan on account of changes made in the bill for any year beginning before January 1, 1988, provided—

(1) the plan complies, in operation, with the changes as of the separately stated effective date;

(2) the plan is amended to comply with the changes no later than the last day of the first plan year beginning after December 31, 1987; and

(3) the amendment applies retroactively to the first day of the first plan year beginning on the separately stated effective date.

During this period, a plan will not be disqualified merely because the plan is not operated in a manner that conforms to the plan document and, therefore, violates the requirement that (1) benefits be definitely determinable, (2) a plan's terms be set forth in a written document, or (3) the plan operate in accordance with its terms.

Senate Amendment

Plan amendments

The provisions of the Senate amendment generally apply as of the separately stated effective date (generally, years beginning after December 31, 1986, or December 31, 1988). However, a plan will not fail to be a qualified plan on account of changes required to be made by the Senate amendment for any year beginning before January 1, 1989, provided—

(1) the plan complies, in operation, with the required changes as of the separately stated effective date;

(2) the plan is amended to comply with the required changes no later than the last day of the first plan year beginning after December 31, 1988; and

(3) the amendment applies retroactively to the separately stated effective date.

During this period, a plan will not be disqualified merely because the plan is not operated in a manner that conforms to the plan document and, therefore, violates the requirements that (1) benefits be definitely determinable, (2) a plan's terms be set forth in a written document, or (3) the plan operate in accordance with its terms. Of course, plan modifications not required by the Senate amendment (e.g., benefit increases; allocation of forfeitures under a money purchase pension plan) are not within this special amendment rule and are to be made in accordance with the generally applicable rules.

Collectively bargained plans

Under the Senate amendment, the separately stated effective dates may be delayed for certain collectively bargained plans. A collectively bargained plan to which the delayed effective dates apply will not fail to be a qualified plan for any year beginning before the later of (1) January 1, 1989, or (2) the earlier of (a) January 1, 1991, or (b) the first plan year beginning after the termination of the collective bargaining agreement (determined without regard to any extension of the terms of the agreement ratified after February 28, 1986) provided three conditions are satisfied.

First, the plan must operate in compliance with the changes for the first plan year beginning after the generally applicable effective date.

Second, plan amendments must be adopted no later than the last day of the first plan year beginning after the later of (1) December 31, 1988, or (2) the earlier of (a) December 31, 1990, or (b) the termination of the collective bargaining agreement, and such amendments must be made effective as of the first day of the first plan year for which the plan amendments are required.

Issuance of regulations

The Senate amendment provides that the Secretary is to issue final regulations with respect to certain qualified plan provisions of the amendment by February 1, 1988. The provisions for which these regulations are required to be issued include (1) the rules relating to the integration of benefits; (2) the coverage requirements; (3) the minimum vesting standards; (4) the amendments applicable to qualified cash or deferred arrangements (sec. 401(k) plans); and (5) the new nondiscrimination rules for employer matching and employee contributions (sec. 401(m)).

Master and prototype and model 401(k) plans

The Senate amendment provides that the Internal Revenue Service is required, not later than May 1, 1987, to begin issuing opinion letters with respect to master and prototype plans for cash or deferred arrangements. In addition, the Secretary of the Treasury is to publish, no later than May 1, 1987, a model plan document for qualified plans that include qualified cash or deferred arrangements.

Conference Agreement

The conference agreement generally follows the Senate amendment provisions with respect to the time allowed for plan amendments and the issuance of regulations. In addition, under the conference agreement, the IRS is to issue a model amendment within 60 days after the date of enactment that plans may adopt for the period ending with the required plan amendment dates under this provision. Such model amendment is to address only those amendments that are required to be made under the conference agreement to maintain qualification for the period ending with the first plan year beginning after December 31, 1988.

The conference agreement clarifies that the rule regarding issuance of regulations applies to the coverage requirements applicable to tax-sheltered annuity programs, the definitions of highly compensated employees and the 10 percent tax on excess distributions.

Further, the conference agreement follows the Senate amendment with respect to opinion letters for master and prototype 401(k) plans, but does not adopt the Senate amendment provision relating to 401(k) model plans. The conference agreement provides that the IRS must begin accepting opinion letter requests by May 1, 1987, rather than begin issuing letters by such date.

6. Penalty for Overstatement of Pension Liabilities

Present Law

Under present law, an employer is allowed a deduction for contributions (within limits) to a trust that is part of a qualified plan. Similar rules apply to plans funded with annuity contracts.

Under present law, if the Internal Revenue Service determines that the actuarial assumptions used to calculate employer liabilities under a defined benefit plan are unreasonable, the limit on employer deductions is recalculated using reasonable assumptions and the excess deduction is disallowed.

Present law does not provide a specific penalty for overvaluations of employer liability under a defined benefit pension plan.

House Bill

The House bill provides a penalty on the taxpayer in the form of a graduated addition to tax applicable to certain income tax overstatements of deductions for pension liabilities. As an addition to tax, this penalty is to be assessed, collected, and paid in the same manner as a tax. This addition to tax applies only to the extent of any income tax underpayment that is attributable to such an overstatement.

The underpayment resulting from a valuation overstatement is the excess of the taxpayer's (1) actual tax liability (i.e., the tax liability that results from a proper valuation of deductions for pension liabilities and takes into account any other proper adjustments) over (2) actual tax liability as reduced by taking into account the valuation overstatement.

If there is an overstatement of deductions for pension liabilities, the following percentages are used to determine the applicable addition to tax:

If the valuation claimed is the following percent of the correct valuation is—	*The applicable percentage is—*
Less than 150 percent	0
150 percent or more but not more than 200 percent	10
More than 200 percent but not more than 250 percent	20
More than 250 percent	30

The valuation overstatement penalty does not apply if the underpayment for a taxable year attributable to the valuation overstatement is less than $1,000. In addition, the bill grants the Secretary discretionary authority to waive all or part of the penalty on a showing by a taxpayer that there was a reasonable basis for the deduction claimed on the return and that the claim was made in good faith.

The provision applies to taxable years beginning after December 31, 1985.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill. It is expected that the IRS will assess the penalty on account of the use of unreasonable actuarial assumptions as well as on account of the use of methods that accelerate deductions with respect to a plan.

[2] This "remedial amendment period" may be further extended by the Secretary (sec. 401(b)). Under present law, disqualifying provisions created by statutory changes (other than those made by ERISA and TEFRA) generally are not "disqualifying provisions" eligible for this extended remedial amendment period.

The conference agreement recognizes that the overstatement of liabilities has taken place primarily with respect to defined benefit pension plans of professional corporations covering a small number of employees and has involved the use of unreasonable actuarial assumptions. In such instances, the enrolled actuary for the plan has used an interest rate assumption of 5 percent (or less) even though the plan's assets were invested so as to earn rates of return in excess of 9 percent. In addition, the enrolled actuary in these cases has sometimes calculated plan funding requirements (and deductions) by either explicitly or implicitly (through the use of high annuity purchase rates, based on low interest rates, at retirement) assuming cost-of-living increases in the dollar limitation of section 415 of the Code even though this is not permitted. The conferees intend that such cases should be closely scrutinized. Of course, the conference agreement does not override the rule of present law under which individual actuarial assumptions are not required to be reasonable per se, as long as all actuarial assumptions are reasonable in the aggregate.

The conferees intend that reliance on an enrolled actuary or other professional by an employer with respect to the proper amount of the deduction will not constitute a reasonable basis or good faith claim by the employer.

The provision applies to overstatements occurring after the date of enactment.

7. Retirement Equity Act of 1984 (REA) Effective Date

Present Law

Under the Retirement Equity Act of 1984 (REA), a pension plan is to provide automatic survivor benefits (1) in the case of a participant who retires under the plan, in the form of a qualified joint and survivor annuity, and (2) in the case of a vested participant who dies before the annuity starting date and who has a surviving spouse, in the form of a qualified preretirement survivor annuity. The qualified joint and survivor annuity and preretirement survivor annuity provisions apply to any participant who performs at least one hour of service under the plan on or after the date of enactment.

REA provided a special transition rule for participants who separated from service before the date of enactment and whose benefits were not in pay status as of the date of enactment. This provision applies if (1) a participant completed at least one hour of service under the plan after September 1, 1974, (2) the participant separated from service before the first day of the first plan year beginning on or after January 1, 1976, and (3) the plan is required to provide a qualified joint and survivor annuity. Under this special rule, the participant is to be provided the right to elect to receive benefits in the form of a qualified joint and survivor annuity.

House Bill

No provision.

Senate Amendment

Under the Senate amendment, a plan is exempt from the survivor benefit requirements of REA if (1) the plan was established prior to January 1, 1954, as a result of an agreement between employee representatives and the Federal Government during a period of Government operation, under seizure powers, of a major part of the productive facilities of the industry, and (2) under the plan, participation is substantially limited to participants who, before January 1, 1976, ceased employment covered by the plan.

The provision is effective on the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment, effective as of the date of enactment.

8. Employee Leasing

Present Law

For purposes of specified pension requirements, a leased employee is treated as the employee of the person for whom the leased employee performs services (the "recipient"). A leased employee is generally defined as any person who is not an employee of the recipient and who provides services to the recipient if 3 requirements are met. First, such services must be provided to the recipient under an agreement between the recipient and the organization providing the person's services (the "leasing organization"). Second, the person must have performed such services for the recipient (or for the recipient and related persons) on a substantially full-time basis for at least one year. Third, such services must be of a type historically performed, in the business field of the recipient, by employees.

Generally, the pension requirements for which a leased employee is treated as an employee are the rules regarding nondiscrimination, vesting, limitations on benefits and contributions, top-heavy plans, and simplified employee pensions (SEPs).

A leased employee covered by a safe-harbor plan maintained by the leasing organization is not treated as an employee of the recipient. A safe-harbor plan is a money purchase pension plan that provides for immediate participation and for full and immediate vesting and that has a nonintegrated employer contribution rate of at least 7½ percent.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

In light of the substantial changes made by the conference agreement to the pension requirements to which the employee leasing rules apply, the conference agreement modifies the employee leasing rules.

The conference agreement modifies the definition of a safe-harbor plan in two ways. First, the agreement raises the required contribution rate from 7½ percent to 10 percent.

Second, the conference agreement requires that, to be a safe-harbor plan, a plan must cover all employees of the leasing organization (beginning with the date they become employees) other than (1) employees whom the leasing organization demonstrates to the satisfaction of the Secretary performed substantially all of their services for the leasing organization (rather than for recipients), and (2) employees whose total compensation from the leasing organization is less than $1,000 during the plan year and during each of the 3 prior plan years.

As under present law, an employee covered under a safe-harbor plan is to receive the required allocation regardless of the number of hours of service credited to the employee for the year, regardless of whether the employee is employed by the leasing organization on any specified date during the year and regardless of the participant's age.

In addition, a definition of compensation is provided by the agreement for purposes of the 10 percent contribution rate and the $1,000 rule. For these purposes, compensation is to have the same meaning used for purposes of the limitation on benefits or contributions (sec. 415), except that there is to be added to such amount elective deferrals under a qualified cash or deferred arrangement, SEP, or tax-sheltered annuity program and elective contributions under a cafeteria plan.

The conference agreement also provides that each leased employee is to be treated as an employee of the recipient, regardless of the existence of a safe-harbor plan, if more than 20 percent of an employee's nonhighly compensated workforce are leased employees (as specially defined below). The term "nonhighly compensated workforce" is defined to mean the number of persons (other than highly compensated employees) who are (1) employees of the recipient (other than leased employees (as specially defined below)) and have performed services for the recipient (or for the recipient and related persons) on a substantially full-time basis for a period of at least one year, and (2) leased employees (as specially defined below) with respect to the recipient. For purposes of this 20 percent rule, the term "leased employee" includes any person who performs services for the recipient both as a nonemployee and as an employee, and who would be a leased employee if all such services were performed as a nonemployee.

The conference agreement also applies the employee leasing rules for purposes of certain employee benefit requirements (see Part F, below) and adjusts certain rules accordingly. The exemption from the application of the employee leasing rules with respect to individuals covered by a safe-harbor plan is inapplicable to employee benefits. In addition, with respect to core health benefits, the period during which an individual must perform services on a substantially full-time basis is reduced from one year to 6 months.

Also, with respect to the employee leasing rules generally, the conference agreement clarifies that in the case of an employee of the recipient (whether by reason of being a leased employee or otherwise), for purposes of the applicable requirements, service is to include any period of service during which the employee would have been a leased employee but for the requirement that substantially full-time services be performed for at least one year (6 months in the case of core health benefits). Of course, service as an employee (whether by reason of being a leased employee or otherwise) is also credited.

The conference agreement also clarifies that the rules aggregating certain employers (sec. 414(b), (c), (m), and (o)) apply for purposes of the employee leasing rules. Thus, for example, the term "recipient" includes, in addition to the employer or employers for which the services are performed, other aggregated employers.

Finally, regulations are to be issued to minimize the recordkeeping requirements attributable to the employee leasing provisions in the case of an employer that has no top-heavy plans (sec. 416) and that uses the services of nonemployees only for an insignificant percentage of the employer's total workload.

The conferees intend that this recordkeeping rule be applied for employers with respect to which the number of individuals performing substantial services as nonem-

ployees is less than 5 percent of the number of nonhighly compensated employees performing substantial services.

Further, it is intended that the Secretary is to prescribe objective rules to determine if an individual has performed substantial services. With respect to individuals performing services both as an employee and as a nonemployee, services in both capacities generally are to be taken into account and, for purposes of this recordkeeping rule, counted as service as a nonemployee. In addition, it is intended that an individual is to be treated as having performed substantial services as a nonemployee only if such individual has at least 1,500 hours of service. Also, in lieu of requiring that the number of nonhighly compensated employees performing substantial services be determined, the Secretary may generally deem the number of nonhighly compensated employees performing substantial services to be equal to the number of nonhighly compensated employees covered by a qualified plan of the employer (other than those also performing services as a nonemployee). (For an employer that does not maintain a qualified plan, the Secretary may allow use of the number of participants in, for example, a health plan.)

The conferees further intend that the Secretary is to prescribe appropriate rules to minimize the recordkeeping necessary to determine if this 5-percent test has been satisfied. Thus, for purposes of determining whether an employee has performed substantial services, the Secretary may permit an employer not to check whether an individual who performed less than substantial services at one division also performed services at another geographically separate division, unless such checking would be reasonable under the circumstances (such as in the case where the employer transfers the individual). The Secretary may also permit employers to rely on records maintained by all leasing organizations providing the services of an individual in determining the amount of services performed by such individual as a nonemployee, unless, of course, the employer has reason to believe such records are not accurate. Also, in cases where determining the exact numbers of nonemployees performing substantial services would be burdensome due to the large numbers involved, the Secretary may permit employers to rely on a statistically valid sample performed by an independent third party.

With respect to the requirement that the employer have no top-heavy plans, the Secretary, by regulation, is to adjust this requirement to apply to the other benefits to which the leasing rules now apply. In such situations, the Secretary may substitute a comparable test applicable to employee benefits. For example, the recordkeeping exemption might not be available with respect to a type of employee benefit if at least 60 percent of that type of benefit was being provided to highly compensated employees.

For an employer that satisfies the requirements for recordkeeping relief, it is intended that an employer need not treat an individual as a leased employee unless such individual provides the employer satisfactory evidence of entitlement to such treatment.

Finally, the conference agreement deletes the rule providing regulatory authority to render the employee leasing rules inapplicable in certain circumstances. The recordkeeping exemption provided under the conference agreement serves the purpose for which the regulatory authority was created.

In general, these new rules are effective with respect to services performed after December 31, 1986. The recordkeeping exemption, however, shall apply as if it were originally enacted as part of the employee leasing legislation in the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), except that for plan years of recipients beginning before January 1, 1987, the only requirement for the relief is that the employer have no top-heavy plan. Further, the clarifying changes regarding crediting service and aggregating employers are effective as if originally part of the employee leasing legislation in TEFRA. The changes relating to employee benefits are effective when the new nondiscrimination rules apply to employee benefits. (See XI. F., below.)

9. Federal Thrift Savings Fund

Present Law

Under present law, beginning in 1987, an employee is allowed to contribute up to 10 percent of the employee's rate of basic pay to the Thrift Savings Plan maintained by the Federal government. These employee contributions to the Thrift Savings Plan are not includible in the employee's income for the year of deferral, but rather are includible in income when distributed from the Plan. The tax treatment of an employee's contributions to the Plan is not currently specified in the Internal Revenue Code.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement provides, in the Internal Revenue Code, for the tax treatment of an employee's contributions to the Thrift Savings Plan maintained by the Federal government. Under the provision, an employee's contributions to the Plan are not treated as made available merely because the employee had an election to receive the amounts in cash. Therefore, the amounts deferred are not includible in an employee's income until distributed.

The provision is effective on the date of enactment.

F. Employee Benefit Provisions

1. Nondiscrimination Rules for Certain Statutory Employee Benefit Plans

Present Law

Overview

Under present law, certain employer-provided employee benefits are excluded from the gross income of employees if provided under certain statutorily prescribed conditions. Similar exclusions generally apply for employment tax purposes.

Among those conditions that generally apply to the exclusion of employer-provided employee benefits is the requirement that employee benefits be provided on a nondiscriminatory basis. With the exception of the exclusion for employer-provided health insurance, each employee benefit exclusion is not available unless the benefit is provided on a basis that does not favor certain categories of employees who are officers, owners, or highly compensated. Failure to satisfy the applicable nondiscrimination test for a specific benefit results in a denial of the tax exclusion for all employees receiving the benefit or only for the employees in whose favor discrimination is prohibited, depending on the benefit.

Separate nondiscrimination rules apply with respect to each benefit. An individual in whose favor discrimination is prohibited for one benefit may or may not be such an individual for another benefit. Also, what constitutes impermissible discrimination and the consequences of such discrimination differ with respect to different benefits.

Health benefit plans

Under present law, a nondiscrimination test is not applied as a condition of the exclusion of health benefits provided by an employer under an insured plan, or of the exclusion of medical benefits and reimbursements provided under such insurance (secs. 105 and 106). However, if an employer provides its employees with health benefits under a self-insured medical reimbursement plan (sec. 105(h)), the exclusion of a medical reimbursement under such plan is available to a highly compensated individual only to the extent that the plan does not discriminate in favor of highly compensated employees. A self-insured health plan is discriminatory if it favors highly compensated individuals either as to eligibility to participate or as to benefits.

Group-term life insurance plans

Under present law, an exclusion is provided for the cost of group-term life insurance coverage (up to $50,000) under a plan maintained by an employer (sec. 79). If a group-term life insurance plan is determined to be discriminatory, the exclusion of the cost of $50,000 of group-term life insurance does not apply with respect to key employees. A discriminatory plan is one that discriminates in favor of key employees as to eligibility to participate or as to the type or amount of benefits available under the plan. Group-term life insurance benefits will not be considered discriminatory merely because the amount of life insurance provided to employees bears a uniform relationship to compensation.

Group legal services plans

The exclusion for contributions to or services provided under an employer-maintained group legal services plan is available to employees only if (1) the plan benefits a class of employees that does not discriminate in favor of employees who are officers, shareholders, self-employed individuals, or highly compensated, and (2) the contributions or benefits provided under the plan do not discriminate in favor of such employees (sec. 120). In addition, the exclusion is available only if no more than 25 percent of the amounts contributed during a year may be provided for 5-percent owners (or their spouses or dependents). The exclusion for group legal services benefits expired for taxable years ending after 1985. (*See* the discussion in 2., below.)

Educational assistance programs

Under present law, the amounts paid or expenses incurred (up to $5,000 a year) for an employee under an employer-provided educational assistance program are excluded from income (sec. 127). The exclusion is not available if the program benefits a class of employees that is discriminatory in favor of employees who are officers, owners, or highly compensated (or their dependents). Also, the exclusion is available only if no more than 5 percent of the amounts paid or incurred by the employer for educational assistance may be provided for 5-percent owners (or their spouses or dependents). The exclusion for educational assistance benefits expired for taxable years beginning after 1985. (*See* the discussion in 2., below.)

Dependent care assistance programs

Present law provides an exclusion from income for amounts paid or incurred for an employee under a dependent care assistance

program (sec. 129). The exclusion is not available unless (1) the program benefits a class of employees that does not discriminate in favor of employees who are officers, owners, or highly compensated (or their dependents), and (2) the contributions or benefits provided under the plan do not discriminate in favor of such employees. In addition, under the applicable concentration test, the exclusion is not available if more than 25 percent of the amounts paid or incurred by the employers for dependent care assistance are provided for 5-percent owners (or their spouses or dependents).

Welfare benefit funds

A voluntary employees' beneficiary association or a group legal services fund that is part of an employer plan is not exempt from taxation unless the plan of which the association or fund is a part meets certain nondiscrimination rules (sec. 505). (These nondiscrimination rules also apply for certain other purposes, such as the deductibility of contributions to a welfare benefit fund to provide post-retirement health benefits.) Under these rules, no class of benefits may be provided to a classification of employees that is discriminatory in favor of highly compensated employees. In addition, with respect to each class of benefits, the benefits may not discriminate in favor of highly compensated employees. A life insurance, disability, severance pay, or supplemental unemployment compensation benefit will not fail the benefits test merely because the amount of benefits provided to employees bears a uniform relationship to compensation.

Cafeteria plans

Under a cafeteria plan, a participant is offered a choice between cash and one or more employee benefits. The mere availability of cash or certain taxable benefits under a cafeteria plan does not cause an employee to be treated as having received the available cash or taxable benefits for income tax purposes if certain conditions are met (sec. 125). This cafeteria plan exception to the constructive receipt rules does not apply to any benefit provided under the plan if the plan discriminates in favor of highly compensated individuals as to eligibility to participate or as to contributions and benefits. In addition, under a cafeteria plan, no more than 25 percent of the aggregate of the statutory nontaxable benefits provided to all employees under the plan may be provided to key employees.

Eligibility tests

For purposes of the eligibility tests applicable to the employee benefits described above, the same rules applicable to the classification test for qualified plan coverage (sec. 410(b)(1)(B)) apply.

a. Overview

House Bill

The House bill establishes new nondiscriminatory eligibility and benefits rules for statutory employee benefit plans, welfare benefit funds, and cafeteria plans (sec. 89). Under the rules, a highly compensated employee who is a participant in any discriminatory plan generally is only taxed on the value of the discriminatory portion of such employee's employer-provided benefit under the plan.

The House bill (1) establishes uniform definitions of employer, highly compensated employee, and excludable employee, and (2) permits satisfaction of the nondiscrimination rules on a line of business or operating unit basis. Further, the House bill extends reporting requirements to all statutory employee benefit plans and requires that Treasury conduct a study of abuses in the health insurance area.

Senate Amendment

The Senate amendment establishes new nondiscriminatory benefits rules for accident or health plans (insured or self-insured) and group-term life insurance plans. In addition, the Senate amendment provides that a highly compensated employee who is a participant in any discriminatory plan is taxed on the value of such employee's employer-provided benefit under the plan.

The Senate amendment also: (1) establishes a new nondiscrimination benefits test applicable (at the election of the employer) to other types of statutory employee benefit plans, in lieu of certain present law nondiscrimination rules; (2) establishes a concentration test applicable to both group-term life insurance plans and accident or health plans, and an additional concentration test applicable only to group-term life insurance plans; (3) establishes uniform definitions of employer, highly compensated employee, and excludable employee; and (4) permits satisfaction of the nondiscrimination rules on a line of business or operating unit basis.

Conference Agreement

The conference agreement generally follows the House bill with regard to the amount of the inclusion in income in the case of a discriminatory plan subject to the new nondiscrimination rules. The conference agreement also (1) establishes new eligibility and benefits nondiscrimination rules applicable to group-term life insurance plans and accident or health plans (insured or self-insured); (2) allows employers to elect to apply these new rules to certain other types of plans; (3) establishes a special benefits rule for dependent care assistance programs; (4) establishes uniform definitions of employer, highly compensated employee, compensation, and excludable employee; and (5) permits satisfaction of the nondiscrimination rules for group-term life insurance plans and accident or health plans on a line of business or operating unit basis.

b. General rule for inclusion

House Bill

In general

Under the House bill, a highly compensated employee who is a participant in a discriminatory statutory employee benefit plan is required to include in income an amount equal to the employee's employer-provided benefit under the plan.

The House bill also provides that the gross income of any employee, whether or not highly compensated, includes such employee's employer-provided benefit under a statutory employee benefit plan, unless (1) the plan is in writing; (2) the employee's rights under the plan are legally enforceable; and (3) the employer established the plan with the intention of maintaining it indefinitely.

Statutory employee benefit plan

The term "statutory employee benefit plans" includes employer-maintained group-term life insurance plans, accident or health benefit plans (whether self-insured or funded through an insurance company), qualified group legal services plans (whether self-insured or funded through an insurance company), educational assistance programs, and dependent care assistance programs. With respect to disability coverage, only coverage attributable to employer contributions (including elective contributions) that provides disability benefits that are excludable from income (sec. 105(b) or (c)) is subject to the nondiscrimination rules applicable generally to statutory employee benefit plans.

Employee's employer-provided benefit

In the case of an insurance-type plan (i.e., an accident or health plan, group-term life insurance plan, or group legal services plan) the House bill defines the employee's employer-provided benefit as the value of the coverage provided during the taxable year to or on behalf of such employee, to the extent attributable to contributions made by the employer. In the case of any other plan, an employee's employer-provided benefit is defined as the value of the benefits provided to or on behalf of such employee, to the extent attributable to contributions made by the employer. Of course, in all cases, employer contributions include elective contributions under a cafeteria plan.

In the case of a discriminatory statutory employee benefit plan (other than a group-term life insurance plan), the coverage or benefit may be considered to be provided under more than one plan so that highly compensated employees are only taxed on the discriminatory portion of the benefit provided (i.e., the discriminatory excess).

Senate Amendment

In general

The Senate amendment generally is the same as the House bill, except that the definitions of the terms "statutory employee benefit plan" and "employer-provided benefit" are modified.

Statutory employee benefit plan

The Senate definition of a "statutory employee benefit plan" is the same as the House bill definition except that qualified tuition reduction programs (sec. 117(d)) and fringe benefit programs providing no-additional-cost services, qualified employee discounts, or employer-operated eating facilities (sec. 132) are also included in the definition in the Senate amendment.

Employer-provided benefit

The Senate amendment is the same as the House bill with two modifications. First, in the case of an insurance-type plan that does not satisfy the writing, enforceability, and indefinite duration requirement described above, an employee's employer-provided benefit is defined as the value of the benefits provided to or on behalf of such employee, to the extent attributable to contributions made by the employer (including elective contributions).

Second, for purposes of determining the amount includible in income of a highly compensated employee for discriminatory benefits, the employer-provided benefit of any highly compensated employee in a discriminatory plan is equal to the employer-provided benefits to such employee under all statutory employee benefit plans of the employer of the same type (i.e., the benefits are excludable from income under the same section of the Code).

Conference Agreement

The conference agreement generally follows the House bill with certain modifications. First, the conference agreement provides that group legal services plans, educational assistance programs, and dependent care assistance programs are only statutory employee benefit plans with respect to an employer if the employer elects to treat them as such.

Second, with respect to the method of determining the amount includible in the income of a highly compensated employee who participates in a discriminatory statutory employee benefit plan, the conference agreement applies the House bill rule that only the discriminatory excess is includible in income. In the case of group-term life insurance plans, the conference agreement provides that the value of the discriminatory excess, expressed in terms of insurance coverage, is the greater of the cost of the coverage under section 79(c) or the actual cost of the coverage.

The conference agreement also provides rules regarding the definition of the discriminatory excess, how to allocate the excess among highly compensated employees, timely reporting, and the year of inclusion. The discriminatory excess is defined as the amount of employer contributions (including elective contributions) that would have to have been made as after-tax employee contributions on behalf of the highly compensated employees in order for all of the nondiscrimination tests to be satisfied. In applying this definition, the objective nondiscrimination tests are, except as provided by the Secretary, to be applied in the following order: the "50-percent test", the "90-percent/50-percent test" and then the benefits test. Alternatively, the definition of the discriminatory excess be applied to the alternative 80-percent test. The determination of the discriminatory excess with respect to the third eligibility test is to be made under rules prescribed by the Secretary. See the discussion of these tests, below.

Any discriminatory excess determined with respect to the benefits test shall be allocated to highly compensated employees by reducing the tax-favored dollars of highly compensated employees (beginning with the employees with the greatest nontaxable benefits) until the plan (or plans) being tested would not be discriminatory.

The discriminatory excess is includible in the employee's income in the employee's taxable year with or within which the plan year ends.

Except to the extent provided by the Secretary, if an employer (including an employer exempt from tax) does not report the discriminatory excess to the affected employees and the IRS on Forms W-2 by the due date (with any extension) for filing such forms W-2, all benefits of the same type provided to such employees are subject to an employer-level sanction without regard to whether the employees report some or all of the benefits as income. Under this sanction, the employer is liable for an excise tax at the highest individual rate on the total value of benefits of the same type. For group-term life insurance, the value is the greater of the table cost or actual cost of all coverage. This tax is not deductible and may not be offset by credits or deductions in any manner. This tax, however, does not apply if the employer can demonstrate that the failure to report was due to resonable cause, such as a reasonable difference in valuation of health benefits prior to the issuance of valuation regulations.

This employer-level sanction applies in a similar manner to a failure by the employer to report income includible by reason of the failure to meet the writing, enforceability, and indefinite duration rule, as modified below. However, in such cases, with respect to insurance-type benefits, this sanction applies to the value of benefits, rather than the value of coverage.

The conference agreement modifies the writing, enforceability, and indefinite duration rules by adding two other requirements to such rules. First, a plan must provide for reasonable notification to employees of benefits available under the plan. With respect to dependent care assistance, this notification is to include a description of the dependent care credit (sec. 21) and the circumstances under which the credit is more advantageous than the exclusion. Second, a plan is to be maintained for the exclusive benefit of employees (or, where permissible, spouses and dependents of employees). Also, the conference agreement provides that the writing, enforceability, etc., requirements will apply except to the extent provided by the Secretary.

With respect to the requirement that a statutory employee benefit plan be legally enforceable, the conferees intend that a plan will generally not be considered legally enforceable if it is discretionary with the employer. For example, if a plan of the employer provides that medical expenses will be reimbursed at the employer's discretion, the plan would not be legally enforceable, because the employee would have no right to compel payment of benefits. A plan will not fail to satisfy the legally enforceable requirement merely because the employer has the right to terminate the plan with respect to claims not yet incurred. If, however, the employer maintained the right to terminate the plan with respect to incurred claims, those claims would not be considered legally enforceable, and payment of the claims would not be excludable. Of course, termination in some circumstances could violate the permanency requirement.

The conference agreement also applies the writing, enforceability, etc., rules, in addition to accident or health plans and group-term life insurance plans, to the following plans: qualified tuition reduction programs, group legal services plans, cafeteria plans, educational assistance programs, dependent care programs, miscellaneous fringe benefit programs subject to nondiscrimination rules (sec. 132), and benefits provided under a welfare benefit fund.

The conference agreement clarifies that if a plan fails the writing, enforceability, etc., rules, the employer-provided benefit is, as under the Senate amendment, the value of the benefits provided rather than the value of the coverage under the plan. Thus, in the case of a health plan failing these requirements, the services provided and reimbursements made are includible in income. In addition, such amount is includible in an employee's gross income in the taxable year in which such benefits are received.

The conference agreement modifies the definition of insurance-type plans to include only group-term life insurance plans and accident or health plans.

The conference agreement also clarifies that, in the case of self-insurance, the employer-provided benefit is the value of the coverage and is not limited by the actual disbursements made by the employer.

c. Nondiscrimination rules

House Bill

Eligibility test

The House bill establishes a uniform nondiscriminatory eligibility rule for all statutory employee benefit plans. A plan satisfies the new eligibility rule if (1) at least 90 percent of all employees are eligible to participate in the plan; and (2) the plan contains no provisions relating to eligibility to participate that discriminate in favor of highly compensated employees.

Benefits test

The House bill also establishes a uniform nondiscriminatory benefits rule for all benefits provided under insurance-type plans.

In the case of an accident or health plan, the bill generally provides that the plan will not be treated as meeting the nondiscriminatory benefits test if (1) 25 percent or more of the employees benefiting under the plan are highly compensated employees, and (2) less than 75 percent of the employees eligible to participate in the plan actually benefit under the plan.

The amount of benefits provided under an employer-maintained health plan may be integrated (in a manner that does not discriminate in favor of highly compensated employees) with benefits provided under Medicare or any other Federal, State, or foreign law, or under any other health plan covering the employee or a member of the employee's family.

In the case of any insurance-type plan other than an accident or health plan, the plan will be treated as not meeting the requirements of the nondiscriminatory benefits test if less than 75 percent of the employees eligible to participate in the plan actually benefit under the plan.

Under the House bill, disability coverage attributable to employer contributions (including elective contributions) is subject to the nondiscrimination rules only to the extent that benefits provided under such coverage are excludable from income (sec. 105 (b) or (c)). Coverage for such disability benefits is tested under the same nondiscriminatory benefits rules as those applicable to health coverage.

In the case of any statutory employee benefit plan that is not an insurance-type plan, the plan meets the nondiscriminatory benefits requirement if (1) all benefits available under the plan to any highly compensated employee are available on the same terms and conditions to all other employees eligible to participate in the plan; and (2) the average benefit provided on behalf of nonhighly compensated employees equals or exceeds 80 percent of the average benefit provided to or on behalf of highly compensated employees.

Senate Amendment

In general

Accident or health plans and group-term life insurance

Under the Senate amendment, an accident or health plan (whether or not insured) or a group-term life insurance plan is considered discriminatory unless the plan satisfies the (1) percentage test; (2) reasonable classification test; (3) average benefits test; or (4) average income exclusion test. These tests (other than the average income exclusion test) do not apply to plans other than accident or health plans and group-term life insurance plans. The Senate amendment follows the House bill with respect to what type of disability coverage is subject to these tests.

Other plans

A plan other than an accident or health plan or a group-term life insurance plan is generally considered discriminatory unless the plan meets the applicable present law nondiscrimination rules or the new average income exclusion test.

Percentage test

Under the Senate amendment, a plan satisfies the percentage test if it benefits 80

percent or more of all employees of the employer.

Reasonable classification test

The Senate amendment provides that a plan meets the reasonable classification test if it benefits a reasonable classification of employees that the Secretary finds does not allow more than a reasonable difference (in favor of highly compensated employees) between the coverage percentage of highly compensated employees and the coverage percentage of other employees.

Average benefit test

Under the Senate amendment, an accident or health plan or group-term life insurance plan that does not meet the reasonable classification test will be treated as meeting that test if (1) the plan meets the requirements of section 410(b)(1)(B) as in effect immediately before the date of enactment of the Tax Reform Act of 1986; (2) the average benefit provided to employees not covered by an alternative plan is at least 60 percent of the average benefit provided to employees covered by an alternative plan (or plans); and (3) in the case of an accident or health plan, at least 80 percent of the employer's nonhighly compensated employees are eligible to participate in one or more plans of the same type and the benefits available to each such employee are equal to at least 40 percent of the average benefits provided to employees covered by an alternative plan.

The term "alternative plan" is defined as any plan that meets the requirements of section 410(b)(1)(B) as in effect immediately before the date of enactment of the Tax Reform Act of 1986, but does not meet the requirements of the reasonable classification test without regard to the average benefit test.

Average income exclusion test

In general

An accident or health plan or a group-term life insurance plan that does not satisfy the reasonable classification test will be treated as satisfying the test if the plan satisfies the average income exclusion test. In addition, in the case of a statutory employee benefit plan other than an accident or health plan or a group-term life insurance plan, and in the case of a cafeteria plan, a plan that satisfies the average income exclusion requirements test will generally be deemed to satisfy the present law nondiscrimination rules (other than concentration tests) applicable to such plan.

A plan meets the requirements of the average income exclusion test if the average exclusion amount for nonhighly compensated employees is at least 80 percent of the average exclusion amount for highly compensated employees.

Under the Senate amendment, the term "average exclusion amount" with respect to highly compensated employees is an amount equal to the aggregate excludable amount provided under all plans of the same type to highly compensated employees divided by the total number of highly compensated employees of the employer. The average exclusion amount with respect to nonhighly compensated employees is determined in the same manner.

Special rules for accident or health plans

Under the Senate amendment, for purposes of applying the average income exclusion test to accident or health plans (except in the case of a cafeteria plan that offers a health plan option, as well as other types of benefits), an employer may elect to disregard any employee if the employee and the employee's spouse and dependents (if any) are covered by an accident or health plan maintained by another employer.

In addition, if an employer maintains an accident or health plan that provides family coverage, the employer may elect to test separately the coverage for employees and the coverage for spouses or dependents as if the two types of coverage constituted two different types of plans. For purposes of testing the coverage for spouses or dependents, an employer may take into account only employees with spouses or dependents who are not covered by an accident or health plan maintained by the employers of the spouses and dependents.

An employer who elects either of these options must obtain and maintain, in such manner as the Secretary of the Treasury prescribes, adequate sworn statements to demonstrate whether individuals have spouses, dependents, or other accident or health coverage.

The Senate amendment follows the House bill with respect to coordination with accident or health benefits provided under a law or other plans.

Special rule for group-term life insurance

For purposes of determining whether the average income exclusion test is satisfied for a group-term life insurance plan, or a cafeteria plan offering such a benefit, the amount attributable to the group-term life insurance benefit that is excludable from income under the plan is to be determined under section 79 for an individual who is age 30. In addition, group-term life insurance coverage in excess of $50,000 may be disregarded. These special rules do not apply for income inclusion purposes if the plan being tested is determined to be discriminatory.

Conference Agreement

The conference agreement generally follows the House bill with respect to the eligibility test and generally follows the Senate amendment with respect to the benefits test, but modifies both tests. In addition, the conference agreement adds an alternative test that may be applied in lieu of the eligibility and benefits tests.

Scope of rules

With respect to the scope of the new nondiscrimination rules, the conference agreement generally follows the Senate bill. The new eligibility and benefits tests apply only to statutory employee benefit plans. As noted above, this term generally includes only accident or health plans and group-term life insurance plans.

As under both bills, no nondiscrimination rules apply to disability coverage to the extent that the proceeds payable under such coverage would be includible in the income of the employee.

All other accident or health plans are subject to these nondiscrimination rules, including, for example, plans providing ancillary benefits such as dental or vision plans and physical examination plans. With respect to accident or health plans, it is the value of the coverage provided, not the contributions, that is subject to the nondiscrimination rules. (Correspondingly, the conference agreement modifies the exclusion section to apply to the value of the coverage, rather than the contributions under the plan.)

With respect to dependent care assistance programs, the present-law eligibility standards continue to apply, but the conference agreement adds a special benefits test. The present-law nondiscrimination rules apply to qualified tuition reduction programs, group legal services plans, educational assistance programs, and employee benefit programs providing no-additional-cost services, qualified employee discounts, or employer-operated eating facilities (sec. 132).

The reason that the new nondiscrimination rules applicable to accident or health plans and group-term life insurance plans are not applicable to group legal services plans and educational assistance programs is that the latter types of plans are generally scheduled to expire prior to the effective date of the new nondiscrimination rules. The conferees anticipate, however, that if the group legal services plans and educational assistance programs are extended to periods after the effective date of the new nondiscrimination rules, such nondiscrimination rules shall be applied.

The conference agreement permits employers to elect to treat group legal services plans, educational assistance programs, and/or dependent care assistance programs as statutory employee benefit plans, and to apply the new eligibility and benefits tests to them in lieu of the present-law nondiscrimination tests (though not in lieu of the applicable concentration tests (secs. 120(c)(3), 127(b)(3), and 129(d)(4)). Such an election will enable an employer to use these types of plans for purposes of satisfying the benefits. (*See* the description in "Benefits test" below.)

Although the new nondiscrimination rules do not mandatorily apply to plans other than accident or health plans and group-term life insurance plans, the following definitions are also applied to qualified tuition reduction programs, group legal services plans, cafeteria plans, educational assistance programs, dependent care assistance programs, miscellaneous fringe benefits (sec. 132), and welfare benefit funds: (1) highly compensated employees; (2) compensation (including the limitation on the amount that can be taken into account) with respect to those plans for which compensation is relevant; (3) excludable employees; and (4) employer (including application of the employee leasing rules). These new definitions are discussed more fully below.

Eligibility tests

Under the conference agreement, a statutory employee benefit plan must satisfy an eligibility test consisting of 3 requirements. The first requirement is that nonhighly compensated employees must constitute at least 50 percent of the group of employees eligible to participate in the plan. This requirement will be deemed satisfied if the percentage of highly compensated employees who are eligible to participate is not greater than the percentage of nonhighly compensated employees who are eligible.

For example, assume that an employer has 20 employees, 15 of whom are highly compensated employees. Because more than 50 percent of its workforce is highly compensated, that employer could make all employees eligible but still not satisfy the "50-percent test." However, if all employees are eligible, the employer would be deemed to satisfy the 50-percent test because the percentage of highly compensated employees and nonhighly compensated employees who are eligible is the same (i.e., 100 percent).

For purposes of satisfying the 50-percent test, comparable plans (as defined below) may be aggregated.

Under the second eligibility requirement, a plan is discriminatory unless at least 90 percent of the employer's nonhighly com-

pensated employees are eligible for a benefit that is at least 50 percent as valuable as the benefit available to the highly compensated employee to whom the most valuable benefits are made available. For purposes of this test, all plans of the same type (i.e., all benefits excludable under the same Code section) are aggregated. Thus, if an employee is eligible to participate in two or more plans of the same type, the employee is considered eligible for a benefit with a value equal to the sum of the values in the plans for which the employee is eligible. Also, in determining the highly compensated employee with the most valuable benefits, benefits under all plans of the same type are aggregated in the same manner.

For purposes of this 90-percent/50-percent test, available salary reduction is not taken into account. (*See* "Cafeteria plan" below for rules applicable to salary reduction.) In addition, to the extent that benefits other than salary reduction amounts are available on the condition that an employee make a salary reduction election (or an after-tax contribution), the contingent benefits may be allocated among different types of plans in any reasonable manner permitted by the Secretary and determined by the employer.

Also, for purposes of the 90-percent/50-percent test, the conference agreement provides that coverage of an employee under accident or health plans may be tested separately from coverage of an employee's spouse and/or dependents under accident or health plans. Coverage of an employee's spouse and/or dependents is tested together regardless of whether the employer creates separate plans for employees with one spouse or dependent as opposed to employees with two or more.

The third eligibility requirement provides that a plan may not contain any provision relating to eligibility to participate that by its terms or otherwise discriminates in favor of highly compensated employees. This third test is not intended to disqualify arrangements where the discrimination is quantifiable. For example, if an employer maintains one health plan for its salaried employees and one health plan for its hourly employees, the fact that the hourly plan is less valuable will not cause the salaried plan to fail the third eligibility requirement. On the other hand, if a plan is designed to suit the highly individualized needs of the highly compensated employees, it may be discriminatory even if it applies to all employees.

For example, if an employer provides unusual coverage for a rare condition to which only the owner or the employer is subject, such coverage may fail the third eligibility requirement, even if theoretically provided to all employees of the employer.

Benefits test

In general

Under the conference agreement, a plan does not satisfy the benefits test unless the average employer-provided benefit received by nonhighly compensated employees under all plans of the employer of the same type is at least 75 percent of the average employer-provided benefit received by highly compensated employees under all plans of the employer of the same type (i.e., plans providing benefits excludable under the same Code section).

For purposes of this test, the term, "average employer-provided benefit" means with respect to highly compensated employees an amount equal to the aggregate employer-provided benefits received by highly compensated employees under all plans of the type being tested divided by the number of highly compensated employees (whether or not covered by any such plans). The term is defined in the same manner with respect to nonhighly compensated employees.

Aggregation of plans

In applying the benefits test to a plan other than an accident or health plan, the conference agreement provides that the employer may aggregate different types of statutory employee benefit plans. Thus, for example, an employer may aggregate benefits provided under all group-term life insurance plans and all group legal services plans (if the employer elects to treat such plans as statutory employee benefit plans) in order to satisfy the benefits tests with respect to all such plans. In addition, an employer may aggregate all accident and health plans with plans providing benefits excludable under one or more other Code sections for purposes of satisfying the benefits test with respect to plans other than accident and health plans.

In no case, however, may an employer aggregate with other plans some but not all of the plans providing benefits excludable under a Code section. Thus, an employer may not, for example, aggregate some but not all of its group-term life insurance plans with all of its group legal services plans.

When plans excludable under different Code sections are aggregated for purposes of the benefits test, the definition of excludable employees (for purposes of determining the average employer-provided benefit) shall be made as if the plans were excludable under the same Code section. This means that the lowest age and service requirements from any plans shall apply (see "Excludable employees" below), and if members of a collective bargaining unit are not excluded for one aggregated plan, they are not excluded for the group of plans. Thus, in determining the average employer-provided benefit, the denominator shall be all nonexcludable employees, determined under the employer's most expansive definitions of such term.

Alternative to eligibility and benefits tests

The conferees also provide an alternative single test which may be applied in lieu of the eligibility and benefits tests. If a plan benefits at least 80 percent of an employer's nonhighly compensated employees, such plan is considered to satisfy both the eligibility and benefits tests. For this purpose, comparable plans may be aggregated. This alternative test will not apply if the plan (or plans) contain any provision that by its terms or otherwise discriminates in favor of highly compensated employees.

This test applies only to insurance-type plans which, under the conference agreement, are defined as accident or health plans and group-term life insurance plans. Of course, for purposes of this test, an individual will only be considered to benefit under a plan if such individual receives coverage under the plan; eligibility to receive coverage is not considered benefiting under the plan.

Special rules for accident or health plans

The conference agreement adopts the special rules in the Senate amendment relating to accident or health plans with certain modifications. For purposes of applying the benefits test to accident or health plans, an employer may elect to disregard any employee if the employee and the employee's spouse and dependents (if any) are covered by a health plan that provides core benefits and that is maintained by another employer of the employee, spouse, or dependents. Also, in testing employee coverage only under the benefits test (see discussion in this section), an employee may be disregarded if such employee is covered by a health plan that provides core benefits and that is maintained by another employer of the employee, spouse, or dependents. An employee may not, however, be disregarded in applying the benefits test to any other type of plan, even if accident and health plans are aggregated with such other type of plan for purposes of applying the benefits test to such other type of plan.

For purposes of these rules, the term "core benefits" generally has the same meaning as for purposes of determining the excludable employees (*See* "Excludable employees," below) except to the extent provided by rules prescribed by the Secretary. For example, the Secretary is to except from the definition of core benefits for this purpose, any benefits attributable to a salary reduction medical reimbursement plan or a low-level nonelective medical reimbursement plan. In addition, in no event may disability coverage be considered a core benefit.

In addition, if an employer maintains an accident or health plan that provides family coverage to those employees with spouses or dependents, the employer may elect to test separately, for purposes of the benefits test, the alternative 80-percent test, and the 50-percent component of the 90-percent/50-percent test, the coverage for employees and the coverage for spouses or dependents as if the two types of coverage constituted two different types of plans (i.e., as if excludable under different Code sections). However, in applying the benefits test to plans other than accident or health plans an employer may not aggregate with such other plans only employee coverage or only family coverage.

Included in the definition of coverage for spouses or dependents are all plans covering one or more family members of an employee, regardless of whether certain of such plans may be limited to one family member while other plans cover two or more family members.

For purposes of testing the coverage for spouses or dependents separately under the alternative 80-percent test and the 50-percent component of the 90-percent/50-percent test, the conference agreement permits an employer to take into account only employees with spouses or dependents. For purposes of the benefits test, an employer testing coverage of spouses and dependents separately may take into account only employees with spouses or dependents who are not covered by a health plan that provides core benefits and that is maintained by another employer of the employee, spouse or dependents. If the employee's spouse or any dependent is not covered under another plan, the employee is taken into account, even if certain of the family members are so covered. This rule does not apply to the benefits test if all accident and health plans are aggregated with plans of a different type for purposes of applying the benefits test to such other plans.

If an employee or a family is disregarded for purposes of the benefits test, any coverage actually provided to the employee or family is disregarded in determining the average employer-provided benefit, as is the existence of that employee or family.

An exception to this rule provides that in no case may a highly compensated employ-

ee be disregarded if the coverage provided with respect to the highly compensated employee has a value in excess of 133⅓ percent of the average employer-provided benefit with respect to nonhighly compensated employees. If family coverage is tested separately, the family of a highly compensated employee may not be disregarded if the coverage provided to such family has a value in excess of 133⅓ percent of the average employer-provided benefit with respect to families of nonhighly compensated employees.

The rules described above allowing certain employees to be disregarded apply only to the tests specifically noted. Thus, for example, the fact that an employee has other core health coverage does not mean such employee may be disregarded for purposes of the eligibility tests or the alternative 80-percent test.

The Secretary shall prescribe rules, consistent with the rules described above, for the treatment of an employee who has a spouse or dependent who is also an employee of the same employer.

An employer who elects the optional rules described above must obtain and maintain, in such manner as the Secretary prescribes, adequate sworn statements to demonstrate whether individuals have spouses, dependents, or other accident or health coverage. Alternatively, the employer may sample a statistically valid sample of employees and secure sworn statements from the sample group. The conferees intend that an employer who elects the application of these optional rules may not treat a nonhighly compensated employee as having other coverage (of the employee or the employee's family), as not having a family, or both unless the employer has a statement to that effect that includes, with respect to other coverage, the name of the insurer and the employer providing the coverage. In the case of a highly compensated employee, the conferees intend that the opposite presumptions are to apply. Thus, a highly compensated employee may not be treated as not having other coverage (of the employee or the employee's family), as having a family, or both, unless the employer has a sworn statement to that effect.

The statements required for purposes of these special rules are to be collected annually on forms provided by the Internal Revenue Service that indicate whether other coverage was provided (or is expected to be provided) for the entire plan year and whether the employee has a family. The statements need not be notarized.

The conferees also intend that employers be permitted to secure sworn statements from a statistically valid sample of employees and to use the results of the sample to project the facts regarding health plan coverage of the entire workforce. Such a sampling must be performed by an independent third party in accordance with rules prescribed by the Secretary. If this sampling rule is used, the same rules apply, including the presumptions and the annual collection on IRS forms. In addition, the report by the third party to be attached to the employer's return shall include such facts regarding the sampling as are required by the Secretary.

The conference agreement follows the House bill and the Senate amendment with respect to coordination with accident or health benefits provided under any law or other plan, except that these coordination rules only apply if the coordination is otherwise permissible under law.

Plan safe harbor

The conferees intend that the benefits test may be adapted in rules prescribed by the Secretary to permit particular plans to pass the benefits test without the need for valuing all benefits excludable under the same Code section. Because the definition of a plan generally requires that all features be identical (see the discussion below), any plan would, standing alone, pass the benefits test if, based on the entire year, the percentage of nonhighly compensated employees benefited is not less than 75 percent of the percentage of highly compensated employees benefited. An example illustrates how this special rule reduces the need to value every plan of the employer. Assume an employer has 10 health plans. Nine of those plans would, standing alone, pass the benefits test in the manner described above; the tenth would not. An employer could aggregate with the tenth plan only so many of the other nine plans as would be necessary to enable that group of plans to satisfy the benefits test. Thus, only that group of plans would have to be valued.

Special group-term life insurance rule

Under the conference agreement, in applying the benefits test and the 50-percent component of the 90-percent/50-percent test to a group-term life insurance plan, the benefit provided under the plan is determined in the same manner as such amount is determined under section 79(c) for an individual who is age 40. Except in the case where group-term life insurance plans are aggregated with plans of a different type, this amount may be adjusted depending on the compensation of the employee. The adjustment shall be made by multiplying the amount by a fraction the numerator of which is a uniform amount for all plans and the denominator of which is the employee's compensation.

An employer may avoid valuing group-term life insurance in the above manner by using the plan safe harbor described above. For example, if an employer provides group-term life insurance of one times compensation to a group that satisfies the plan safe harbor rule, such plan passes the benefits test without regard to the valuation rules described above. If the employer aggregates that plan with another plan of the same or different type, the valuation rules described above are to be used.

For purposes of the above rules, the uniform definition of compensation (including the limitation on the amount that may be taken into account) applicable to qualified retirement plans (see Part B.1., above) and welfare benefit funds (see below) applies.

In contrast to the Senate amendment, the conference agreement provides that coverage in excess of $50,000 may not be disregarded. In other words, coverage in excess of $50,000 is treated as provided through tax-favored dollars.

In determining the value of the discriminatory excess (or the value of any inclusion amount), the special valuation rules described above do not apply. See the rules described above for valuing the discriminatory excess.

Special dependent care assistance test

A special benefits test applies to dependent care assistance programs that are not statutory employee benefit programs. Under this special rule, the benefit test applicable to statutory employee benefit plans applies, with two modifications.

First, the average employer-provided benefit received by nonhighly compensated employees is required to be at least 55 percent (as opposed to 75 percent) of the average employer-provided benefit received by highly compensated employees.

Second, for purposes of applying the average benefits test to salary reduction amounts, employees with compensation (sec. 414(q)(7)) below $25,000 are disregarded. If an employer-provided dependent care assistance both through salary reduction and otherwise, the treatment of the employees with compensation below $25,000 is to be determined under rules prescribed by the Secretary.

Part-time employee rule

In applying the benefits test to accident or health plans, the conference agreement provides that an employer may elect to adjust the benefits provided to certain employees. With respect to an employee who normally works less than 22½ hours per week, an employer may deem benefits provided to have a value equal to up to double the actual value of coverage provided. With respect to an employee who normally works less than 30 hours, an employer may deem benefits provided to have a value equal to up to 1⅓ times the actual value.

If this part-time employee rule is used, it is to be used on a uniform, nondiscriminatory basis for all employees. In applying the 50-percent component of the 90-percent/50-percent test to accident or health plans, the above rule applies with respect to the amount of benefits available. However, this special part-time employee rule does not apply for any purpose in a plan year unless during such year more than 50 percent of the nonexcludable employees (determined without regard to plan provisions) normally work more than 30 hours per week. In addition, the multiplication of the benefit under this rule does not apply to elective contributions.

State-mandated benefits

The conferees authorize the Secretary, in applying the nondiscrimination rules described above to accident or health plans, to disregard State-mandated benefits under certain circumstances. For example, in comparing the benefits of employees in one State to the benefits of employees in another State, the Secretary may disregard benefits that are mandated in one of the States but are not mandated in the other.

It is intended, however, that the benefits that may be disregarded are ancillary benefits, rather than core benefits. For example, if a State mandates an HMO option, the conferees do not intend that the value of coverage under an HMO may be disregarded.

d. Highly compensated employees

House Bill

Under the House bill, a uniform definition of highly compensated employees is provided for purposes of the new nondiscrimination rules applicable to statutory employee benefit plans, and for purposes of the special nondiscrimination test for qualified cash or deferred arrangements. (*See* the description in Part B.7., above.) An employee is treated as highly compensated with respect to a year if, at any time during the year or any of the two preceding years, the employee (1) is a five-percent owner of the employer (as defined in sec. 416(i)); (2) earns over $50,000 in annual compensation from the employer; or (3) is a member of the top-paid group of the employer.

The top-paid group includes all employees who (1) are in the top 10 percent of all em-

ployees on the basis of compensation, and (2) earn more than $20,000 a year. However, an employee is not included in the top-paid group if the employee earns less than $35,000 and is not in the top 5 percent of all employees on the basis of compensation.

In addition, under all statutory employee benefit plans, a former employee is to be treated as a highly compensated employee if such employee was highly compensated at the time of separation from service or at any time after attaining age 55.

Senate Amendment

Under the Senate amendment, a uniform definition of highly compensated employees is provided and is similar to the definition in the House bill. This definition applies, however, for purposes of the nondiscrimination rules for all statutory employee benefit plans, cafeteria plans, welfare benefit funds, qualified plans, and qualified cash or deferred arrangements. (*See* the description in Part B.7., above.)

An employee is treated as highly compensated with respect to a year if, at any time during the year or the preceding year, the employee (1) was a 5-percent owner of the employer (as defined in sec. 416(i)); (2) received more than $100,000 in annual compensation from the employer; (3) received more than $50,000 in annual compensation from the employer and was a member of the top-paid group of the employer during the same year; or (4) was an officer of the employer (as defined in sec. 416(i)). The $50,000 and $100,000 thresholds are indexed by reference to the method, as of May 1, 1986, for adjusting for percentage increases in the social security wage base (i.e., at the same time and in the same manner as the adjustments to the dollar limits on benefits under defined benefit pension plans under the Senate amendment).

In addition, a former employee is to be treated as a highly compensated employee if such employee was highly compensated at the time of separation from service or at such other times as the Secretary may prescribe.

Conference Agreement

The conference agreement follows the Senate amendment with certain modifications. (*See* the detailed description in Part B.7., above.) First, the $100,000 threshold in the Senate amendment is reduced to $75,000. Second, every employer shall have at least one officer; if necessary, this means that the compensation floor required for officer status shall not apply to one individual. Third, the House rule regarding former employees is adopted in lieu of the Senate rule. Further, the method of indexing the $50,000 and $75,000 figures is the same method used to index the dollar limit for defined benefit pension plans under the conference agreement.

The definition of highly compensated employee is the same as the definition used with respect to qualified plans. One clarification applies to employee benefits, however, that does not apply to qualified plans. With respect to those benefits for which family coverage is treated as a benefit separate from employee coverage, such as accident or health benefits, the special rule aggregating family members is modified. In such instances, where a family member would be aggregated with a 5-percent owner of one of the top 10 highly compensated employees, such family member shall be treated as a nonemployee family member.

e. Excludable employees

House Bill

The House bill generally provides that certain classes of employees may be disregarded in applying the 90-percent eligibility test if neither the plan nor any other plan providing similar benefits benefits any employee in such class. The classes of excludable employees generally are (1) employees who have not completed at least 180 days of service; (2) employees who normally work less than 20 hours per week; (3) employees who normally work less than 1,000 hours during any year; and (4) employees under age 21. In addition, employees covered by a bona fide collective bargaining agreement may be disregarded if the plan does not benefit any such employee. Further, nonresident aliens who receive no United States earned income may be disregarded, regardless of whether any such individuals are covered by the plan.

Treasury regulations are to provide a limited exception to the rule that employees who otherwise are excludable as employees who do not normally work 1,000 hours a year or 180 days may not be disregarded if any plan of the employer does not exclude such employees. The limited exception will be available if (1) substantially all employees of the employer (other than supplemental employees) generally are eligible to participate in an accident or health plan (or other employee benefit plan) within 30 days after the date of hire; (2) the employer also employs supplemental employees who generally do not work more than 1,000 hours or more than 180 days; (3) the supplemental employees generally are not rehired if they have previously been supplemental employees; and (4) the supplemental employees do not exceed 15 percent of the employer's workforce.

Under this limited exception, supplemental employees who are (1) retired employees of the employer who are covered under an accident and health plan of the employer maintained for retirees or (2) students hired by the employer under a work-study program, may be disregarded in determining whether the employer's employee benefit plans satisfy the nondiscrimination requirements. Of course, this limited exception would not be available if any supplemental employees are eligible to participate in any employee benefit plan of the employer (other than a plan maintained for retired employees).

Senate Amendment

In general

The Senate amendment follows the House bill by providing that certain classes of employees may be disregarded in applying the eligibility and benefits tests if neither the plan, nor any other plan of the same type, benefits any employee in such class. The classes of excludable employees under the Senate amendment are (1) in the case of an accident or health plan (other than a plan providing only noncore benefits) employees who have not completed at least 180 days of service (or such shorter period of service as may be specified in the plan); (2) in the case of any other statutory employee benefit plan (including an accident or health plan providing only noncore benefits), employees who have not completed one year of service (or such shorter period of service as may be specified in the plan); (3) employees who normally work less than half time (or such lesser amount as may be specified in the plan); (4) employees who normally work fewer than six months during any year (or such lesser amount as may be specified in the plan); and (5) employees who have not attained age 21 (or such lower age as may be specified in the plan). In addition, employees included in a unit of employees covered by a collective bargaining agreement may be disregarded if the plan does not benefit any employee in that unit. Finally, nonresident aliens who receive no United States earned income may be disregarded, regardless of whether any such individuals are covered by a plan.

Conditions for exclusions

In applying the nondiscrimination rules, an employer may exclude from consideration a category of excludable employees only if no excludable employee in that category benefits under the plan being tested or any other employee benefit plan of the employer that provides the same type of statutory employee benefit. Statutory employee benefits are treated as being of the same type if they are eligible to be excluded from income under the same section of the Code. Thus, if an employer maintains two group-term life insurance plans, only one of which excludes employees with less than a year of service, the employer is not permitted to exclude from consideration employees with less than a year of service in testing either plan for compliance with the nondiscrimination rules.

In the case of a cafeteria plan (including a plan that would be a cafeteria plan if employees could elect cash or a taxable benefit), for purposes of applying the nondiscrimination rules, an employer may exclude a category of excludable employees from consideration only if those employees are excluded from benefiting under any option offered by the cafeteria plan.

The Senate amendment contains certain exceptions, generally described below, to the rule that if even one excludable employee is covered by a plan, all employees who are excludable on the same basis (and on no other basis) as the covered employee must be taken into account in applying the nondiscrimination rules to the plan (and any other statutory employee benefit plan offering the same type of benefits).

Core and noncore benefits

If a plan offering only noncore accident or health benefits excludes employees with less than a year of service, the employer sponsoring the plan is not required to take into consideration employees with less than a year of service merely because another plan maintained by the employer offering core accident or health benefits has a shorter service requirement. Noncore accident or health benefits consist of coverage for dental, vision, psychological and orthodontia expenses and elective cosmetic surgery.

Line of business

If an employer elects to apply the nondiscrimination rules on a separate line of business or separate operating unit basis, the employees who may be excluded from consideration are determined on a separate line of business or separate operating unit basis. Thus, for example, if (1) an employer maintains a statutory employee benefit plan for a line of business, (2) the nondiscrimination rules are applied to the plan on a line of business basis, and (3) all plans providing benefits of the same type to employees in that line of business exclude all employees who have not attained the age of 21, then the employer may exclude from consideration in applying the nondiscrimination rules to the plan, all employees in that line

of business who have not attained age 21, even if the employer maintains a plan that does not impose an age requirement for employees in another line of business.

Collective bargaining agreement

If no employee in a unit of employees covered by a collective bargaining agreement is covered by a plan, employees in that unit may be disregarded in testing a plan for discrimination, even if the employer maintains a second plan that provides similar benefits and that covers employees in such collective bargaining unit. However, for purposes of applying the average benefits test and the average income exclusion test, if any employees in a unit of employees covered by a collective bargaining agreement are covered by any plan of the type being tested, then all employees in that unit are required to be taken into account.

Nonresident aliens

Nonresident aliens with no United States source income may be disregarded regardless of whether any such individuals are covered by the plan being tested for nondiscrimination or by any other plan maintained by the employer providing the same type of benefits.

Separate testing

The Senate amendment also provides that if, for purposes of applying the nondiscrimination rules to a plan ("first plan"), certain employees ("the excludable employees") could be excluded from consideration but for the fact that certain of such employees are covered by another plan ("second plan") that provides the same type of employee benefits, the excludable employees may be disregarded for purposes of testing the first plan if the second plan satisfies the nondiscrimination rules with respect to the excludable employees (treating the excludable employees as the only employees of the employer).

Supplemental employees

The Senate amendment follows the House bill regarding supplemental employees.

Conference Agreement

The conference agreement follows the Senate amendment with certain modifications. First, in lieu of permitting the exclusion of employees who normally work less than half-time, only employees who normally work less than 17½ hours per week may be excluded. Also, the seasonal employee exclusion is modified to exclude employees who normally work during no more than six months during a year.

Third, the "separate testing" rule is modified to allow employees excludable on the basis of the age and service requirements to be tested separately even if some or all of the excludable employees are covered by a plan that also covers nonexcludable employees. Under the conference agreement, an employer may test all such excludable employees separately. Alternatively, an employer may elect to test one group of excludable employees separately without testing all excludable employees separately if such group is defined in a nondiscriminatory manner solely by reference to the age or service requirements. For example, an employer may elect to test separately all employees excludable solely on the grounds that they do not have six months of service, but not include in such testing group employees excluded under the other age and service rules. Also, an employer may test separately a group of employees who would pass less restrictive age or service requirements. For example, an employer could test separately all employees excludable solely on the grounds that they are not age 21, but who are at least age 18.

Third, an employer may exclude an employee, on the grounds that such employee has not satisfied the required period of initial service, during the period prior to the first day of the calendar month following the actual satisfaction of the initial service requirement. For example, assume an employer required 30 days of service for participation in a health plan, but did not allow participation to begin other than on the first day of a calendar month. Assume further that the employer hires two employees, A on July 2 and B on July 3. Under the terms of the employer's plan, A would be a participant on August 1 and B would be a participant on September 1. Thus, A is a participant after 30 days of service while B has to wait 60 days. Because of the special rule allowing B to be disregarded prior to the first day of the next month following satisfaction of the period of service requirement, B need not be taken into account for nondiscrimination purposes until September 1, even though B would have 30 days of service after the end of the day on August 1.

Fourth, the rule permitting exclusion of employees who have not had 180 days of service is modified by substituting 6 months of service for 180 days of service. It is also clarified that this service requirement is satisfied if an employee is continuously employed for a 6-month period without regard to the number of hours or days worked. A period during which an employee does not perform services for the employer counts toward this service requirement unless there has been a bona fide, indefinite cessation of the employment relationship. These same rules apply to the one year of service requirement.

Further, the conference agreement modifies the Senate amendment rule permitting exclusion of an employee only if no employee in the same category (e.g., under age 21) benefits under a plan of the same type. Under the conference agreement, the exclusion applies only if no employee in the same category is eligible under a plan of the same type.

Also, it is clarified that if an employer aggregates plans of different types of purposes of satisfying the benefits test, the excludable employee rules apply as if such plans were the same type. Thus, the lowest age and service requirements in any plans shall apply. The lowest age requirement may come from one plan, the shortest waiting period may come from another plan, the lowest hour requirement for part-time status may come from a third plan, etc.

The conference agreement also clarifies that, for purposes of the initial service rules, core accident or health benefits may be considered provided under a separate plan from noncore benefits.

The conference agreement modifies the supplemental employee rule by applying the rule to employees who normally work during no more than six months and to employees who do not have six months of service.

f. Separate lines of business or operating units

House Bill

The House bill provides an exception to the general eligibility rule if the employer, for bona fide business reasons, operates a separate line of business or separate operating unit. In that event, the requirements of the general eligibility rule may be satisfied separately with respect to employees in each separate line of business or operating unit.

An employer may not separately apply the nondiscrimination rule to any line of business or operating unit unless (1) there are at least 100 nonexcluded employees employed by the line of business or operating unit; and (2) at least 5 percent, but no more than 25 percent, of the employees in the line of business or operating unit are highly compensated. In addition, the House bill provides that if employees of more than one line of business or operating unit are eligible to participate in the same plan, such lines of business or operating units are treated as a single line of business or operating unit for purposes of the nondiscriminatory eligibility requirement.

Senate Amendment

In general

Under the Senate amendment, if an employer establishes to the satisfaction of the Secretary that the employer operates separate lines of business or operating units for bona fide business reasons, the reasonable classification test, the average benefits test, and the average income exclusion test may be applied separately with respect to employees in each line of business or operating unit. A plan will not be treated as satisfying the nondiscriminatory coverage rules on a line of business or operating unit basis unless the plan also satisfies the present-law classification test on an employer-wide basis.

Safe harbor

The Senate amendment provides a safe-harbor rule under which a separate line of business or operating unit is treated as being operated for bona fide business reasons if such line of business or operating unit is a separate self-sustaining unit and if (1) each line of business or operating unit has at least 50 employees who do not perform services for any other line of business or operating unit; and (2) the "highly compensated employee percentage" of the line of business or operating unit is (a) not less than one-half, and (b) not more than twice, the percentage of all employees of the employer who are highly compensated. For purposes of this requirement, the highly compensated employee percentage of a line of business or operating unit will be treated as not less than one-half of the percentage of all employees of the employer who are highly compensated employees if at least 10 percent of all highly compensated employees of the employer are employed by the line of business or operating unit. The term "highly compensated employee percentage" means the percentage of all employees performing services for a line of business or operating unit who are highly compensated employees.

Definition of line of business

The Senate amendment provides that the Secretary shall prescribe by regulation what constitutes a line of business or operating unit. The line of business or operating unit concept shall not be used to undermine the nondiscrimination rules. Thus, for example, certain job classifications (such as hourly employees or leased employees) are not considered to be separate lines of business or operating units. Also, for example, secretaries and other support service personnel shall not be treated as in a line of business or operating unit separate from the lawyers or other professionals for whom such personnel perform services, and nurses and laboratory personnel shall not be treated as in

a line of business or operating unit separate from the medical doctors for whom they perform services. In addition, the members of an affiliated service group (sec. 414(m)) may not be treated as separate lines of business or operating units.

In general, a headquarters or home office is not to be treated as a separate line of business or operating unit. It is generally intended that a line of business or operating unit include all employees necessary for preparation of certain classes of property for sale to customers or for the provision of services to customers. Certain exceptions to this rule may be established by regulation where one employer has two operations that are vertically integrated and that are traditionally operated by unrelated entities.

Combining lines of business

If a line of business or operating unit would be recognized, but for the fact that it does not satisfy the 50 employee or the highly compensated employee percentage tests, it may be combined with another line of business or operating unit to satisfy such tests. With respect to any plan maintained for employees of one of the combined lines of business, the plan is required to satisfy the coverage rules with respect to the aggregate entity.

Excludable employees

For purposes of determining (1) the number of employees in a line of business or operating unit; (2) the highly compensated employee percentage of a line of business or operating unit; and (3) the percentage of all employees of the employer who are highly compensated, an employer shall disregard the categories of employees that are disregarded for purposes of determining which employees are highly compensated employees. (See the description in B.7., above.).

Common plan for more than one line of business

If employees of more than one line of business or operating unit are eligible to participate in a plan, then all such lines of business or operating units are to be treated as one line of business or operating unit.

Conference Agreement

The conference agreement follows the Senate amendment with the following modifications. For convenience, the conference agreement uses the term "line of business" to refer both to a line of business and to an operating unit.

First, it is clarified that if the employer establishes to the satisfaction of the Secretary that the employer operates separate lines of business or operating units for bona fide business reasons, both the eligibility tests and the benefits tests (as well as the alternative 80-percent test) may be applied separately with respect to employees in each line of business or operating unit, subject to the requirement that the classification test be satisfied with respect to any plan on an employer-wide basis.

The conference agreement also clarifies the definition of a line of business or operating unit. Whether claimed separate lines of business or operating units are bona fide is a facts and circumstances determination requiring examination of each particular situation. Differences and similarities between the services provided and products produced by such claimed lines of business are of course important considerations. In addition, the manner in which the employer organizes itself is relevant. Thus, if an employer fails to treat itself as comprised of separate lines of business or operating units and treats employees from different claimed lines or units in an equivalent fashion for certain purposes, it may not be appropriate to allow such activities to be treated as separate lines of business or operating units. These factors do not, however, override the rules relating to the definition of a line of business, discussed above with respect to the Senate amendment, to the extent that such rules would deny separate line of business or operating unit status.

In addition, the conference agreement modifies the definition of an operating unit by requiring that it be operated in a significantly separate geographic area from another operating unit in the same line of business. For example, two plants in the same city would not be considered to be in significantly separate geographic areas and thus would not be considered separate operating units.

Also, the requirement that a separate line of business or operating unit have at least 50 employees is deleted from the safe harbor rule and made a substantive requirement. Thus, a line of business or operating unit shall not be treated as separate for purposes of the nondiscrimination rules unless it has at least 50 employees. As under the Senate amendment, more than one line of business or operating unit may be aggregated to satisfy this requirement.

Also, the requirement that a line of business or operating unit be a separate self-sustaining unit is deleted from the safe harbor rule, since such a requirement is part of the definition of a line of business or operating unit.

The conferees clarify the proper treatment of employees of a headquarters or home office and of other employees serving more than one line of business or operating unit (e.g., payroll personnel). Like all other employees, these employees are to be allocated to one line of business or operating unit. Generally, this allocation shall, under rules prescribed by the Secretary, be made in accordance with their performance of services. Thus, if a majority of an employee's services are performed for a particular line of business or operating unit, such employee must be allocated to that line of business or operating unit.

Other employees rendering services to more than one line of business or operating unit must be allocated in one of two ways. First, the employer may allocate such employees on a pro-rata basis among its lines of business or operating units, under rules prescribed by the Secretary. Alternatively, such employees may be allocated to any one line of business or operating unit for which they perform substantial services provided that such allocation does not cause any line of business or operating unit to violate or further violate the highly compensated percentage rule. Thus, for this purpose, the highly compensated employee percentage rule serves as a substantive rule, not a safe harbor. This means, for example, that if any lines of business or operating units do not pass the 50-percent rule, highly compensated employees at the home office or headquarters who do not perform a majority of their services for any particular line of business or operating unit must be allocated first to such lines of business or operating units. This also means that in no event may such highly compensated employees be allocated to any line of business or operating unit if after such allocation the 200-percent rule would be violated (regardless of whether it was violated prior to such allocation).

It is also intended that the Secretary is to prescribe for annual reporting by employers using the line of business or operating unit rule for purposes of the nondiscrimination rules (including the qualified plan rules). Such reporting shall include the basis for the position that an employer is maintaining separate lines of business or operating units. Where an employer maintains a line of business or operating unit that does not fall within the safe harbor rule, this must be specifically reported and may trigger additional reporting requirements.

In addition, the Secretary is also to establish guidelines identifying circumstances in which there is to be special scrutiny of claimed lines of business or operating units. For example, if a plan maintained for a claimed line of business or operating unit is significantly better or worse than plans for other lines of business or operating units, such a situation shall trigger special scrutiny. Also, if a disproportionate percentage of the accrued benefits under the plan of a claimed line of business or operating unit is for the highly compensated employees, such employer's claim of a separate line of business or operating unit shall also be specially examined.

If a claimed line of business or operating unit does not satisfy the safe-harbor rule and a plan or plans of such line of business or operating unit warrants special scrutiny under the standards set forth in the applicable guidelines, then the claimed line of business or operating unit will not be recognized for purposes of the applicable nondiscrimination rules unless the employer obtains a determination from the Secretary (e.g., by determination letter or private letter ruling) that such line of business or operating unit is separately operated for bona fide business reasons.

Further, the conferees intend to clarify that if an employer is using the separate line of business or operating unit rule with respect to any plan, all employees must be considered part of a line of business or operating unit. Thus, it would not be permissible to maintain that an employer has, in addition to one line of business with 50 employees, 10 other employees who are not part of any line of business or operating unit and who would be tested separately. The 10 other employees would have to be treated as part of one or more lines of business or operating units. Such lines of business or operating units would have to be aggregated with the 50-employee line of business in order to satisfy the requirement that to be tested separately, a line of business or operating unit must have at least 50 employees.

The conference agreement also deletes the rule providing that if employees from more than one line of business or operating unit are eligible to participate in a plan, all such lines of business and/or operating units are treated as one line of business or operating unit. This would, however, be a fact to consider in ascertaining whether an employer treats itself as comprised of separate lines of business or operating units. Instead, the conference agreement requires that benefits attributable to services for a line of business or operating unit shall be considered as provided by that line of business or operating unit. For purposes of such rules, an employee who performs services for more than one line of business or operating unit, but is allocated to one line of business or operating unit under the rules described above, shall be considered to render services solely for that line of business or operating unit.

g. Definitions and special rules

(1) Time for testing

House Bill

The House bill did not contain a provision regarding the time at which the eligibility or benefits test had to be applied. However, one component of the benefits test—the comparability test—would have to be determined based on the value of the benefits provided during the entire year.

Senate Amendment

The Senate amendment did not provide for the time at which the percentage test, the reasonable classification test, or the classification test had to be applied. However, the alternative reasonable classification test and the benefits test would be applied on the basis of the benefits provided during the entire year.

Conference Agreement

Under the conference agreement, it is clarified that the tests applied to the amount of benefits available or provided must be applied on the basis of the benefits provided during the entire year. Thus, the benefits test, the 50-percent component of the 90-percent/50-percent test, and the comparability tests all apply based on the entire year.

An example will illustrate how this rule applies for purposes of the benefits test. Assume employee A becomes nonexcludable on July 1 and on that day A is covered under a health plan that provides coverage that on an annual basis has a value of $1,000. The employer's plan year is the calendar year, so for that plan year, A only receives $500 worth of benefits. That $500 goes in the numerator in determining the average employer-provided benefit. However, because A was only taken into account for half the year, A is only counted as half an employee in the denominator.

The conferees further intend to provide, for accident or health plans and group-term life insurance plans, a rule of convenience to ease the administrative burden on employers. Under this rule of convenience, an employer may, for purposes of applying the benefits test to active employees, treat employees who separate from service during the last 3 months of the plan year as continuing to work and receive benefits for the remainder of the plan year. For employees who separate from service earlier in the plan year, an employer may treat such employees as continuing to work and receive benefits through the end of the month in which they separate. The effect of these rules is that employers will not have to use the exact day that employees separate in calculating the average employer-provided benefit. Instead, an employer may deem employees to have separated only on the end of a month and in the case of employees separating in the last quarter, on the last day of the plan year.

For purposes of this rule of convenience, employees shall be considered to receive after separation whatever benefit they had been receiving prior to separation, provided such benefit had been provided for at least 90 days prior to separation. If there had been a change in the benefit during such 90 day period, then the benefit deemed provided during the period of separation shall be the average benefit provided to the employee during the period beginning on the date in the plan year on which the employee first had to be taken into account for purposes of the nondiscrimination rules and ending on the date of separation from service.

The rule illustrated by the example treating A as only half an employee for purposes of the benefits test and the rule of convenience described do not apply to group-term life insurance plans with respect to which the employer adjusts the value of the benefit provided based on the employee's compensation. See the discussion above, for a description of the adjustment.

The rule of convenience described above shall also apply to the alternative 80-percent test, the 90-percent component of the 90-percent/50-percent test, the 50-percent test, and the plan safe harbor for the benefits test, except that for purposes of the eligibility tests, employees who have separated from service would be deemed to have available to them after separation the benefits available prior to separation. For purposes of determining the benefits available prior to separation, the same rules applicable for the actual benefits rule apply. Other than this one difference, the rule of convenience applies in the same manner. Thus, in determining whether the tests are satisfied, an employer must look at the entire year, but may use the rule of convenience to substantially reduce the administrative burden. For example, assume that an employee (A) who was not excludable on the first day of the plan year separated from service during the sixth month of the plan year. A may be considered to be employed through the end of the sixth month and have available benefits determined under the rule of convenience described above. During the second 6 months, A is not an active employee for purposes of applying the tests.

Of course, the rule of convenience under which employees are deemed to receive or have available to them benefits after separation from service does not apply in testing benefits actually received by or available to former employees. (See 8., below.)

As is true with respect to the nondiscrimination rules applicable to qualified retirement plans, the fact that a failure to meet any of the nondiscrimination rules was attributable to unforeseen circumstances does not affect the application of the rules.

The conferees also intend to provide an additional rule of convenience for employers that do not require any initial period of service for participation in a statutory fringe benefit plan. Under this second rule of convenience, an employer may, for purposes of the 90-percent/50-percent test and the benefits test, disregard benefits provided to an employee during the period between the employee's commencement of employment and the first day of the calendar month following such commencement. (This rule does not apply to an employee who commences employment on the first day of a calendar month.) However, benefits provided during such period that relate to any other period may not be disregarded. For example, if an employer pays for a year's worth of dependent care or provides an annual physical examination, only a proportionate part of the value of such benefit may be disregarded. This second rule of convenience applies to all statutory employee benefit plans. If an employer uses this rule of convenience, it must do so with respect to all employees.

(2) Employer and employees

House Bill

Aggregation

Under certain circumstances, the House bill provides that related employers are treated as a single employer for purposes of the nondiscrimination requirements (sec. 414 (b), (c), and (m)). In addition, leased employees are treated for purposes of the nondiscrimination rules as employees of the person or organization for whom they perform services (sec. 414(n)). The bill provides that the Secretary's general regulatory authority to prevent abuse of employee benefit requirements shall apply (sec. 414(o)).

Self-employed individuals

For purposes of the nondiscrimination rules governing qualified group legal services plans, educational assistance programs and dependent care assistance programs, self-employed individuals are treated as employees. An individual who owns the entire interest in an unincorporated trade or business is treated as his own employer and a partnership is treated as the employer of each partner.

Senate Amendment

The Senate amendment follows the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment and clarifies that the aggregation of employers applies to all aspects of the employee benefit rules, not only the nondiscrimination rules.

(3) Special rules for certain dispositions and acquisitions

House Bill

No provision.

Senate Amendment

The Senate amendment contains special transition rules for certain dispositions or acquisitions of a business. Under the Senate amendment, if a person becomes or ceases to be a member of a controlled group or affiliated service group, the coverage rules will, with respect to a plan maintained by the person or group, be deemed satisfied during the transition period, provided that (1) the coverage rules were satisfied immediately before the acquisition or disposition, and (2) the coverage under the plan does not change significantly during the transition period (other than by reason of the acquisition or disposition). The transition period begins on the date of the acquisition or disposition and ends on the last day of the first plan year beginning after the transaction.

Conference Agreement

The conference agreement follows the Senate amendment.

(4) Definition of a plan

House Bill

Separate plans

Under the House bill, for purposes of both the eligibility test and the benefits tests, each option or different benefit offered under a statutory employee benefit plan is treated as a separate plan. This means, for example, that if two types of insurance coverage vary in any way (including the amount of the employee contribution), they will be considered separate plans. Thus, in t e case of health plans under which there are different levels or types of health benefit coverage, each separate level or type of health coverage must be tested as a separate plan under both the eligibility test and the applicable benefits test.

Under a special rule for an accident or health plan, an employee who has available or receives coverage both for himself and any member of his family is to be treated as having available or received two separate

coverages: individual coverage with respect to himself, and family coverage with respect to his family. Each coverage must be tested separately.

In the case of noninsurance-type plans, the House bill requires that if a highly compensated employee benefits under two or more educational assistance programs, all such plans under which such employee benefits shall be treated as one plan for purposes of applying the eligibility and benefits tests. The same rule applies to dependent care assistance programs. For purposes of satisfying the eligibility and benefits tests, an employer may elect to treat as one plan any two or more educational assistance programs. The same rule applies to dependent care assistance programs.

Single plan

The House bill provides that two or more plans which are identical in all respects, except for the group of employees covered, may be treated as a single plan. For purposes of determining what constitutes a single plan, two exceptions are provided to the rule that insurance coverage (or available noninsurance benefits) be identical. The first exception is that variations may be disregarded if the coverage varies in a purely mechanical manner that clearly favors those with less compensation, as in the case where the same health insurance is available on the same terms to employees, but the required employee contribution increases in proportion to compensation. The second exception is based on the House bill provision that allows the employer to reduce the employer subsidy for employees who normally work less than 30 hours per week. Under this provision, if the same health insurance is available on the same terms to employees, except that the employer subsidy is proportionately reduced for employees who normally work less than 30 hours per week, such health insurance is considered a single plan.

Senate Amendment

Separate plans

The Senate amendment follows the House bill, except that the amendment also provides that in the case of group-term life insurance, the provision of insurance coverage that varies in proportion to compensation is not to be considered as the provision of different options or benefits with respect to such varying coverage. In addition, the Senate amendment deletes the special aggregation rules for noninsurance type plans.

Single plan

The Senate amendment follows the House bill except that it deletes the two exceptions to the rule that coverage within a plan must be identical.

The Senate amendment also provides that, for purposes of determining what constitutes a single plan, employees should be allowed to structure options in different ways as long as all coverage within a plan is identical. For example, if the deductible for all highly compensated employees is $200 and the deductible for all nonhighly compensated employees is $50, it would be inconsistent with the purposes of these rules to classify the $200 deductible coverage as a separate plan that covers only highly compensated employees and thus is discriminatory. Instead, the employer could classify the coverage as one plan for all employees providing coverage for expenses in excess of a $200 deductible and a second plan covering costs between $50 and $200 covering only nonhighly compensated employees. Both such plans would be nondiscriminatory.

Conference Agreement

The conference agreement follows the Senate amendment, with one modification. That modification is that, as under the House bill, if accident or health coverage available or provided to employees is identical except that the employer subsidy is proportionately reduced for employees who normally work less than 30 hours per week, such health insurance may be considered a single plan.

The permissible proportionate reduction corresponds to the special rule for the benefits test and the 50-percent component of the 90-percent/50-percent test. Thus, if an employee normally works at least 22½ hours per week but less than 30 hours per week, the above rule applies if the employer subsidy is reduced by no more than 25 percent, and if the employee normally works less than 22½ hours per week, the above rule applies if the employer subsidy is reduced by no more than 50 percent. If the above rule is used, it must be used on a uniform, nondiscriminatory basis with respect to all employees. Of course, this rule does not affect the benefit actually made available or provided for purposes of any other tests.

As with the other part-time rule, this rule does not apply in any plan year unless during such year more than 50 percent of the nonexcludable employees (determined without regard to plan provisions) normally work more than 30 hours per week. Also, this special rule allowing a proportionate reduction in benefits within a plan does not apply to elective contributions.

In addition, the conference agreement clarifies that limitations on family coverage give rise to separate plans. For example, if an employer offers "employee plus one family member" health coverage and "employee plus two or more family members" health coverage, that constitutes 3 plans: (1) employee coverage, (2) coverage of one family member, and (3) coverage of additional family members.

(5) Aggregation of health plans and comparability

House Bill

For purposes of satisfying the benefits test, the House bill provides that two or more comparable accident or health plans of the same type may be aggregated if comparable. A plan is comparable to a second plan that would otherwise fail the benefits test if the average employer cost (including elective contributions) per covered employee in the first plan is at least 80 percent of the average employer cost (including elective contributions) per covered employee in the second plan.

Senate Amendment

Under the Senate amendment, if an accident or health plan standing alone would fail the reasonable classification test or the percentage test, the plan may be aggregated with one or more other accident or health plans ("helper plans"), provided that the average value of the employer-provided coverage per employee in each "helper plan" is at least 90 percent of the average value of employer-provided coverage per covered employee in the plan that would otherwise fail.

In the case of an accident or health plan that would otherwise fail the classification test, the Senate amendment provides that the plan may be aggregated with one or more other accident or health plans ("helper plans"), provided that the average value of the employer-provided coverage per employee in each "helper plan" is at least 100 percent of the value of employer-provided coverage per covered employee in the plan that would otherwise fail the classification test.

Conference Agreement

The conference agreement follows the Senate amendment with certain modifications. First, it is clarified that the 95-percent comparability standard (instead of the 100-percent standard that applies to the classification test) applies only for purposes of the 50-percent test and the alternative 80-percent test. Second, for purposes of the 50-percent test, a "helper plan" is any plan in the group of aggregated plans that satisfies such test without regard to aggregation. The average value of the employer-provided coverage per employee in the helper plan with the lowest such value must be at least 95 percent of the average value of the employer-provided coverage per employee in the nonhelper plan in the group of aggregated plans with the highest such value. For purposes of the 80-percent test, the general rule is that the average value of the employer-provided coverage per employee in the plan in the group of aggregated plans with the lowest such value must be at least 95 percent of the average value of the employer-provided coverage per employee in the plan in the group of aggregated plans with the highest such value. However, if a plan with a greater value than permitted under the previous sentence consists solely of nonhighly compensated employees, such plan may be aggregated with the group of less valuable plans for purposes of the 80-percent test.

In addition, the special part-time employee rule applicable in defining what constitutes a plan also applies for comparability purposes. Thus, if two plans that would be comparable but for the fact that the employer-provided benefit is proportionately reduced for employees who normally work less than 30 hours per week, the plans may still be comparable under rules similar to those applicable under the definition of a plan.

(6) Valuation

House Bill

Under the House bill, the Secretary will prescribe regulations that provide guidance in determining the value of insurance coverage and of noninsurance benefits. The Secretary may establish safe-harbor methods of valuing the coverage or benefits.

The Secretary may, in prescribing such regulations, provide adjustments to the safe harbors to take account of factors, such as geographical cost differences, relevant to the determination of the value of a benefit.

Senate Amendment

The Senate amendment follows the House bill with two modifications. First, the Secretary is authorized to establish administrable, mechanical methods of valuing coverage or benefits that are not only safe harbors. Second, the Secretary is directed to specify an index that takes into account differences in costs for plans maintained in geographically dispersed areas.

Conference Agreement

Under the conference agreement, the Secretary is to prescribe rules regarding valuation. With respect to health coverage, the Secretary is to set forth values for various standard types of coverage. The values shall be set forth in the form of tables which establish the relative values of plans with cer-

tain characteristics. Such tables may use as a reference point an identifiable standard plan.

Such tables shall be adjusted to take into account the specific coverage and group involved. For example, in determining the value of discriminatory coverage, the actual costs expended by the employer may be taken into account and allocated among all coverages, including the discriminatory coverage, on the basis of the relative values of such coverages, as determined under the tables. Another example is that in certain instances it may be appropriate to adjust the table value of coverage based on whether such coverage would have been provided at group rates by an insurance company. Thus, an individually designed plan shall be valued higher than a group plan with the same characteristics. Further, it is appropriate to reduce the table valuation to the extent the employer provides the same coverage under more than one plan.

With respect to group-term life insurance, special valuation rules apply for purposes of the nondiscrimination rules. However, if certain coverage is found to be discriminatory, such coverage shall be valued, as under present law, at the higher of actual cost or table cost (sec. 79).

(7) Concentration tests

House Bill

No provision.

Senate Amendment

Accident or health plans and group-term life insurance plans

The Senate amendment establishes a new concentration test for any accident or health plan or group-term life insurance plan. No more than 40 percent of the employees benefiting under such a plan may be highly compensated employees. A plan is not treated as failing to meet this requirement if it benefits all employees of the employer.

The Senate amendment also establishes a second new concentration test for group-term life insurance plans. No more than 25 percent of the value of the coverage provided under the plan may be provided to individuals who are at any time during the current or preceding year, 5 percent owners (within the meaning of section 416(i)(1)(B)(i)). A plan is not treated as failing to meet this requirement if the plan provides the same dollar amount of group-term life insurance coverage for each employee eligible to participate in the plan.

The new concentration tests apply to health plans and group-term life insurance plans in addition to the nondiscriminatory coverage rules applicable to those plans. A plan that fails an applicable concentration test is considered to be a discriminatory plan.

Other plans

The present-law concentration tests applicable to qualified group legal services plans, educational assistance programs, and dependent care assistance programs continue to apply to those types of plans in addition to the nondiscriminatory coverage requirements. Thus, regardless of whether a plan satisfies the relevant present law nondiscrimination rules, or the new average income exclusion test, the plan is also required to satisfy the applicable present-law concentration tests. A plan that fails an applicable concentration test is considered to be a discriminatory plan.

Conference Agreement

The conference agreement follows the House bill. Thus, plans must satisfy present-law concentration tests in addition to any applicable nondiscrimination tests.

(8) Former employees

House Bill

The House bill provides that, except to the extent provided by the Secretary, rules similar to the nondiscriminatory eligibility and benefits tests are to be applied separately to former employees. In applying the rules to former employees, the Secretary is to prescribe rules under which certain special rules shall apply.

Employers may generally restrict the class of former employees to be tested to those who have retired on or after a reasonable retirement age, or to those who have separated from service due to disability. In addition, employers may generally limit the class further to employees who have, for example, retired within a certain number of years. Finally, in testing whatever class of employees is chosen, employers may make reasonable assumptions regarding mortality, so that they do not have to determine those former employees who are still alive.

Senate Amendment

The Senate amendment follows the House bill as applied to the Senate amendment nondiscrimination tests.

Conference Agreement

The conference agreement follows the House bill and Senate amendment, as applied to the nondiscrimination rules of the conference agreement.

(9) Cafeteria plans

House Bill

Under the House bill, a cafeteria plan is subject to the same 90 percent nondiscriminatory eligibility test applicable to all statutory employee benefit plans.

The House bill also repeals the present-law rule that, in the case of a cafeteria plan that does not satisfy the relevant nondiscrimination rules or concentration test, benefits under the plan are taxed to highly compensated employees or key employees in the taxable year of the employee in which the plan year in which the benefit was provided ends.

Senate Amendment

Under the Senate amendment, a cafeteria plan will be considered discriminatory unless the plan satisfies (1) the nondiscrimination tests of present law applicable to cafeteria plans (sec. 125(b)(1)) or (2) the present-law eligibility test and the average income exclusion test.

For purposes of applying the average income exclusion test to a cafeteria plan, all benefits offered under the cafeteria plan are aggregated and treated as if they were the same type of benefit, except that if the employer elects, health coverage provided for spouses or dependents of employees may be tested separately. If a cafeteria plan satisfies the average income exclusion test, each of the statutory employee benefits offered under the cafeteria plan is treated as meeting the average income exclusion test, but must separately satisfy any applicable concentration test.

It is also intended that cafeteria plans may limit the elections by highly compensated employees of excludable benefits to the extent necessary to comply with the nondiscrimination rules.

Conference Agreement

The conference agreement retains the present-law eligibility test for cafeteria plans. The conference agreement deletes the special cafeteria plan benefits tests, although the concentration test is retained. Thus, each type of benefit available or provided under a cafeteria plan is subject to its own applicable nondiscrimination rules and to any applicable concentration test. For example, group-term life insurance benefits under a cafeteria plan must satisfy the eligibility and benefits tests applicable to group-term life insurance plans. As discussed above, certain aggregation of plans excludable under different Code sections is permissible for purposes of the benefits test.

The conference agreement also modifies the definition of a cafeteria plan to include a plan under which an employee may only choose among qualified benefits and may not choose cash or a taxable benefit. Also, if a cafeteria plan does not satisfy the cafeteria plan eligibility or concentration test, the benefits under the plan are taxable.

The conference agreement follows the Senate amendment by retaining present law with respect to the year of inclusion for a discriminatory cafeteria plan.

The conference agreement follows the Senate amendment allowing employers to limit the elections of highly compensated employees to the extent necessary to comply with the applicable nondiscrimination rules. However, the limitations are applied, under rules prescribed by the Secretary, in a nondiscretionary manner set forth in the plan, consistent with the rules for allocating the discriminatory excess among highly compensated employees.

The conference agreement applies the following uniform definitions applicable to statutory employee benefit plans to cafeteria plans: (1) highly compensated employees; (2) excludable employees; and (3) employer (including application of the leased employee rules). The compensation definition does not apply because compensation is not relevant for the cafeteria plan tests.

(10) Welfare benefit funds

House Bill

The House bill extends rules similar to the new nondiscriminatory eligibility and benefits tests applicable to statutory employee benefit plans to welfare benefit funds.

Senate Amendment

The Senate amendment substitutes the new definitions of highly compensated employees and of excludable employees for those applicable to welfare benefit funds under present law.

Conference Agreement

The conference agreement generally follows the Senate amendment, retaining the present-law nondiscrimination tests for the welfare benefit fund benefits that are not subject to a nondiscrimination test otherwise modified under the conference agreement.

The conference agreement applies the following uniform definitions applicable to statutory employee benefit plans to welfare benefit funds: (1) highly compensated employees: (2) compensation (including the limitation on the amount that may be taken into account) with respect to life insurance, disability, severance pay, and supplemental unemployment compensation; (3) excludable employees; and (4) employer (including application of the leased employee rules). With respect to nonemployees participating

in a plan that is part of a welfare benefit fund, the Secretary shall prescribe appropriate rules defining which of such nonemployees shall be considered highly compensated employees.

(11) Reporting requirements

House Bill

The House bill expands the present-law requirement that the employers that maintain cafeteria plans, educational assistance programs and group legal services plans file information returns in accordance with Treasury regulations (sec. 6039D). Under the House bill, this requirement would apply to all statutory employee benefit plans, as well as to cafeteria plans.

In addition, if benefits provided under a cafeteria plan or statutory employee benefit plan are includible in the income of a highly compensated or key employee, the employer is required to file an information return, pursuant to regulations to be provided by the Treasury, setting forth the amount of the benefit and the name and address of the employee in whose income the benefit is includible. The employer is also required to furnish to each such employee a written statement showing the amount of the employee benefits includible in the employee's income.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill with two modifications. First, the conference agreement requires that all employers maintaining statutory employee benefit plans or cafeteria plans report the number of highly compensated employees (1) of the employer, (2) eligible to participate in the plan, and (3) participating in the plan. Second, the conference agreement clarifies that the requirement that certain employers file an additional return only applies to a representative sample of employers.

(12) Study

House Bill

The House bill requires that the Treasury Department conduct a study of abuses in the health insurance area and, not later than July 1, 1986, make recommendations for changes in the nondiscrimination rules.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the Senate amendment.

(13) Effective date

House Bill

The House bill provisions are effective for years beginning after December 31, 1986.

Senate Amendment

The Senate amendment provisions are generally effective for years beginning after December 31, 1986.

The Senate amendment contains an exception to the new rules for certain group-term life insurance plans. In the case of a plan described in section 223(d)(2) of the Tax Reform Act of 1984, such plan shall be treated as meeting the requirements of the new nondiscrimination rules with respect to individuals described in section 223(d)(2) of the Act. In addition, an employer may elect to exclude such individuals in applying the new nondiscrimination rules.

In addition, the Senate amendment provides a delayed effective date for church plans. Under the bill, such plans are not required to comply with the new nondiscrimination requirements until years beginning after December 31, 1988.

Conference Agreement

The conference agreement follows the Senate amendment except that the general effective date is plan years beginning after the later of (1) December 31, 1987, or (2) the earlier of December 31, 1988, or the date 3 months following the issuance of Treasury regulations.

A special effective date applies to plans maintained pursuant to a collective bargaining agreement. Under this special rule, in the case of employees covered under a plan maintained pursuant to a collective bargaining agreement between employee representatives and one or more employers ratified before March 1, 1986, the amendments are not effective for plan years beginning before the earlier of (1) January 1, 1989, or (2) the date on which the last of the collective bargaining agreement terminates (determined without regard to any extensions in the collective bargaining agreement). With respect to employees not described in the previous sentence, employees so described may be disregarded prior to the effective date of the rules for such employees.

2. Deductibility of Health Insurance Costs of Self-Employed Individuals

Present Law

Under present law, an employer's contribution to a plan providing accident or health benefits is excludable from an employee's income (sec. 106). No similar exclusion is provided for self-employed individuals (sole proprietors or partners).

Individuals who itemize deductions may deduct amounts paid during the taxable year, if not reimbursed by insurance or otherwise, for medical care of the taxpayer and of the taxpayer's spouse and dependents, to the extent that the total of such expenses exceeds five percent of adjusted gross income (sec. 213).

House Bill

No provision.

Senate Amendment

The Senate amendment provides a deduction for 50 percent of the amounts paid for health insurance for a taxable year on behalf of a self-employed individual and the individual's spouse and dependents. This deduction is allowable in calculating adjusted gross income. A self-employed individual means an individual who has earned income for the taxable year (sec. 401(c)(1)). However, under the bill, no deduction is allowable to the extent the deduction exceeds the self-employed individual's net earnings from self employment (sec. 1402(a)) for the taxable year. In addition, no deduction is allowable for any taxable year for which the self-employed individual is eligible to participate (on a subsidized basis) in a health plan of an employer of the self-employed individual or such individual's spouse.

In addition, the deduction is not allowable unless (1) the self-employed individual provides coverage under one or more accident or health plans for all employees in all unincorporated trades or businesses with respect to which the self-employed individual is a 5-percent owner (as defined in sec. 416(i)), and (2) the nondiscrimination requirements (as modified by the amendment) applicable to accident or health plans are satisfied with respect to each such plan tested as though all coverage for which a 50-percent deduction is allowable under this section were employer-provided. Of course, this requirement is inapplicable if no unincorporated trade or business with respect to which the self-employed individual is a 5-percent owner has employees other than the self-employed individual and such individual's family members.

Under the Senate amendment, the amount allowable as a deduction for health coverage for a self-employed individual is not also taken into account for purposes of determining the amount of any medical deduction to which the self-employed individual is entitled. Thus, such amounts deductible under this provision are not treated as medical expenses of the individual for purposes of determining whether the threshold for the itemized medical expense deduction (sec. 213(a)) is met.

Further, the Senate amendment provides that the amount deductible under this provision is not taken into account in computing net earnings from self-employment (sec. 1402(a)). Therefore, the amounts deductible under this provision do not reduce the income base for the self-employed individual's social security tax.

The bill directs the Secretary of the Treasury to provide guidance to self-employed individuals to whom this deduction applies with respect to the nondiscrimination requirements applicable to insured accident or health plans.

The provision is effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, except as outlined below. First, the deduction is reduced from 50 percent of the amounts paid for health insurance to 25 percent of such amounts.

In addition, the conference agreement deletes the requirement that coverage be provided for all employees in all unincorporated trades or businesses with respect to which the self-employed individual is a 5-percent owner. Instead, the deduction is allowed only if the coverage is provided under one or more plans meeting the applicable nondiscrimination requirements, as if the coverage were employer-provided. The conference agreement also limits the deduction to the taxpayer's earned income for the taxable year. The provision allowing this deduction does not apply to any taxable year beginning after December 31, 1989.

3. Exclusions for Educational Assistance Programs, Qualified Group Legal Plans, and Dependent Care Assistance Programs

Present and Prior Law

Educational assistance

Under present law, an employee is required to include in income for income and employment tax purposes the value of educational assistance provided by an employer to the employee, unless the cost of such assistance qualifies as a deductible job-related expense of the employee. Amounts expended for education qualify as deductible employee business expenses if the education (1) maintains or improves skills required for the employee's job, or (2) meets the express requirements of the individual's employer that are imposed as a condition of employment. Under prior law, an employee's gross income for income and employment tax purposes did not include amounts paid or expenses incurred by the employer for educational assistance provided to the employee if such amounts were paid or such expenses were incurred pursuant to an educational assistance program that met certain requirements (Code sec. 127).

Under prior law, the maximum amount of educational assistance benefits that an employee could receive tax-free during any taxable year was limited to $5,000; thus, the excess benefits over this amount were subject to income and employment taxes. In the case of an employee who worked for more than one employer, the $5,000 cap applied to the aggregate amount of educational assistance benefits received from all employers.

The exclusion for educational assistance benefits expired for taxable years beginning after December 31, 1985.

Group legal services

Under prior law, amounts contributed by an employer to a qualified group legal services plan for employees (or their spouses or dependents) were excluded from an employee's gross income for income and employment tax purposes (sec. 120). The exclusion also applied to any services received by an employee or any amounts paid to an employee under such a plan as reimbursement for the cost of legal services for the employee (or the employee's spouse or dependents). In order to be a qualified plan under which employees were entitled to tax-free benefits, a group legal services plan was required to fulfill several requirements. An employer maintaining a group legal services plan was required to file an information return with respect to the program at the time and in the manner required by Treasury regulations.

In addition, under prior law, an organization, the exclusive function of which was to provide legal services or indemnification against costs of legal services as part of a qualified group legal services plan, was entitled to tax-exempt status (sec. 501(c)(20)). The tax exemption for such an organization expired for years ending after December 31, 1985.

The exclusion for group legal services benefits expired for taxable years ending after December 31, 1985.

Dependent care assistance

Under present law, amounts paid or incurred by an employer for dependent care assistance provided to an employee through a dependent care assistance program are excludable from income (sec. 129). The amount excludable is limited to the employee's earned income for the year or, in the case of married couples, the lesser of the employee's earned income and the earned income of the employee's spouse. A dependent care assistance program must be a written plan for the exclusive benefit of employees, must not discriminate in favor of employees who are officers, shareholders, or highly compensated, and must meet certain other requirements.

House Bill

The House bill retroactively extends the educational assistance and group legal services exclusions for two years. In effect, this also extends the tax-exempt status of group legal services organizations (sec. 501(c)(20)). Thus, these exclusions are scheduled to expire for taxable years beginning after December 31, 1987, and ending after December 31, 1987, respectively.

The House bill limits the exclusion for dependent care assistance to $5,000 a year ($2,500 for a married individual filing separately). The provision is effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment retroactively makes permanent the exclusions from gross income for educational assistance and group legal services and the tax exemption for qualified group legal services organizations.

In addition, the Senate amendment increases the cap on annual excludable educational assistance benefits to $5,250 from $5,000. This cap is indexed, under the Senate amendment, by reference to the method, as of May 1, 1986, for determining percentage increases in the social security taxable wage base. The Senate amendment does not contain a provision limiting the exclusion for dependent care assistance.

The Senate amendment provides a transition rule with respect to group legal services benefits provided under a cafeteria plan. Under the transition rule, the enactment of the bill is treated in the same manner as a change in family status under proposed Treasury regulations relating to cafeteria plans (Prop. Reg. sec. 1.125-1). Thus, an employee will be permitted to revoke an election to take cash or a taxable benefit after the period of coverage has commenced and to make a new election with respect to the remainder of the period of coverage. This transition rule applies to an election made to revoke a prior benefit election if the new election is made (1) with respect to group legal services benefits and (2) within 60 days after the date of enactment of the bill.

Conference Agreement

The conference agreement follows the House bill with respect to extending for two years, rather than making permanent, the educational assistance and group legal services exclusions and the tax-exempt status of group legal services organizations. The agreement follows the Senate amendment raising the cap on annual excludable educational assistance benefits from $5,000 to $5,250, but does not adopt the Senate amendment indexing this cap. The conference agreement follows the House bill with respect to the limit on the exclusion for dependent care assistance, effective for taxable years beginning after December 31, 1986.

The conference agreement modifies the transition rule for group legal services benefits provided under a cafeteria plan. Under the modified transition rule, an employee will be permitted to revoke an election to take cash or a qualified benefit other than group legal services and to make a new election to take group legal services instead. Such revocation and new election must be made no later than 60 days after the date of enactment and may relate to any period after December 31, 1985. This transition rule is limited to cafeteria plans that, prior to the date of conference action, did not allow employees to elect group legal services benefits with respect to a period after December 31, 1985.

4. Treatment of Certain Full-Time Life Insurance Salespersons

Present Law

Under a cafeteria plan, an employee is offered a choice between cash and one or more employee benefits. If certain requirements are met, then the mere availability of cash or certain permitted taxable benefits under a cafeteria plan does not cause an employee to be treated as having received the available cash or taxable benefits for income tax purposes.

Under present law, a full-time life insurance salesperson is treated as an employee for purposes of eligibility for certain enumerated employee benefit exclusions (sec. 7701(a)(20)). However, although such a salesperson is eligible to receive certain excludable employee benefits that may be provided under a cafeteria plan, the salesperson is not treated as an employee for purposes of the cafeteria plan provisions.

House Bill

The House bill permits a full-time life insurance salesperson to be treated as an employee for purposes of the cafeteria plan provisions to the extent the salesperson is otherwise permitted to exclude from income the benefit elected.

The provision applies for years beginning after December 31, 1985.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill.

5. Exclusion of Cafeteria Plan Elective Contributions From Wages for Purposes of Employment Taxes

Present Law

No amount is included in the gross income of a participant in a cafeteria plan meeting certain requirements solely because, under the plan, the participant may choose among the benefits of the plan. However, the fact that remuneration is not subject to income tax withholding does not necessarily mean that such remuneration is not subject to tax under the Federal Insurance Constributions Act (FICA) or under the Federal Unemployment Tax Act (FUTA). Both the FICA and FUTA taxes apply to all remuneration for employment, with certain exceptions. There is no provision with respect to either the FICA or the FUTA which would render inapplicable the principles of constructive receipt.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement clarifies that the cafeteria plan exception from the principles of constructive receipt also applies for purposes of the FICA and FUTA taxes. This clarification does not apply to elective contributions under a qualified cash or deferred arrangement that is part of a cafeteria plan.

The provision is effective with respect to years beginning before, on, or after the date of enactment.

6. Exclusion for Post-Retirement Group-Term Life Insurance Under a Cafeteria Plan

Present Law

The cost of permanent benefits under a life insurance policy provided by an employer to an employee is includible in income. In general, a permanent benefit is a benefit with an economic value extending beyond one policy year, such as a paid-up policy for future years.

No amount is includible in the gross income of a participant in a cafeteria plan meeting certain requirements solely because, under the plan, the participant may choose among the benefits. Except with respect to elective contributions under a qualified cash or deferred arrangement, the term "cafeteria plan" does not include any plan which provides for deferred compensation.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

Under the conference agreement, with respect to employees of educational institutions (within the meaning of section 170(b)(1)(A)(ii)), a cafeteria plan may allow participants to choose among cash, qualified benefits, or post-retirement life insurance coverage that meets certain conditions. The coverage would have to be fully paid up upon retirement and have no cash surrender value at any time prior to retirement from the service of the employer.

In addition, the conference agreement provides that such coverage shall be treated as term insurance for purposes of the exclusion for group-term life insurance.

7. Tax Treatment of Qualified Campus Lodging

Present Law

Section 119 excludes from an employee's gross income the value of lodging provided by the employer if (1) the lodging is furnished for the convenience of the employer, (2) the lodging is on the business premises of the employer, and (3) the employee is required to accept the lodging as a condition of employment.

Several court decisions have held that on-campus housing furnished to faculty or other employees by an educational institution does not qualify for the section 119 exclusion. Therefore, the fair rental value of the housing (less any amounts paid for the housing by the employee) was includible in the employee's gross income and constituted wages for income tax withholding and employment tax purposes in those cases.

Section 531(g) of the Deficit Reduction Act of 1984 (P.L. 98-369) prohibited the Treasury Department from issuing, prior to January 1, 1986, any income tax regulations that would provide for inclusion in gross income of the excess of the fair market value of qualified campus lodging over the greater of (1) the operating costs paid in furnishing the lodging, or (2) the rent received. This moratorium on regulations applied only with respect to qualified campus lodging furnished after December 31, 1983 and before January 1, 1986.

Qualified campus lodging was defined as lodging furnished by a school, college, or university to any of its employees, including nonfaculty employees, or to the employee's spouse or dependents. The moratorium applied only with respect to employer-furnished lodging that is located on a campus of, or in close proximity to a campus of, the educational institution. Under the 1984 Act, the moratorium did not apply with respect to any amount of the value of lodging if such amount was treated as wages or included in income when furnished.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that for Federal tax purposes, the fair market value of use (on an annualized basis) of qualified campus lodging furnished by, or on behalf of, an educational institution (within the meaning of sec. 170(b)(1)(A)(ii)) shall be treated as not greater than 5 percent of the appraised value for the lodging, but only if under rules prescribed by the Secretary an independent appraisal of the fair market value of the lodging is obtained by a qualified appraiser. Thus, the appraiser must be qualified to make appraisals of housing, and the appraisal cannot be made by the employer institution or any officer, trustee, or employee thereof.

The committee does not intend that a new appraisal must be obtained each year. However, the committee intends that the appraisal must be reviewed annually, in a manner prescribed by the Secretary, but that such review should not impose undue cost on the educational institution.

Accordingly, under the safe-harbor valuation rule of the Senate amendment, if the rent paid for qualified campus lodging is equal to or exceeds on an annualized basis five percent of the value determined by such an appraisal, no amount is included, on account of such housing, in the employee's gross income for income tax purposes or in the wage or benefit base for social security and other employment tax purposes.

The provision applies to lodging furnished to any employee of the educational institution (or to the employee's spouse or dependents), including nonfaculty employees, for use as a residence, if the employer-furnished lodging is located on a campus of, or in the proximity of, the educational institution.

If no appraisal is obtained that meets the requirements of the provision, then the fair rental value for tax purposes is to be determined in the manner as would be done absent a special rule, taking into account all the relevant facts and circumstances. This does not preclude a taxpayer whose appraisal is found defective from subsequently obtaining a qualified appraisal and using the safe-harbor rule. For purposes of applying the first sentence of this paragraph to determine the fair rental value of campus lodging, the average of the rentals paid by individuals (other than employees or students of the educational institution) during such year for lodging provided by the educational institution that is comparable to the campus lodging provided to the employee is to be considered the fair rental value.

The new provision relating to qualified campus lodging does not affect the applicability of section 119(a) to lodging that qualifies for the exclusion in section 119(a).

The provision applies for taxable years beginning after December 31, 1985.

For prior taxable years, it is intended (1) that the IRS is to follow the safe-harbor valuation rule of the bill as if in effect for those years (except with respect to any amount of value of campus lodging that was treated by the taxpayer as wages or included in income when furnished), and (2) that the value of the property as assessed by State or local tax authorities for State or local property tax purposes is to be treated as if it were the value determined by a qualified appraisal.

Conference Agreement

The conference agreement generally follows the Senate amendment (including the directive to the IRS with respect to prior taxable years).

8. Health Benefits for Retirees

Present Law

Under present law, special deduction timing rules and deduction limits govern the deductibility of employer contributions to a welfare benefit fund (sec. 419). The deduction limit for any taxable year may include a reserve to provide certain post-retirement medical benefits. This reserve is computed under the assumption that the medical benefits provided to retirees will have the same cost as medical benefits currently provided to retirees. Thus, future inflation is not to be taken into account and it is to be assumed that the level of utilization will not increase in the future.

The Deficit Reduction Act of 1984 (DEFRA) directed the Secretary of the Treasury to study the possible means of providing minimum standards for employee participation, vesting, accrual, and funding under welfare benefit plans for current and retired employees (including separated employees). The Secretary was required to report to the Congress with respect to the study by February 1, 1985. This study has not yet been completed.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that projected increases in medical costs may be taken into account in the funding for post-retirement medical benefits. The amount of such projected increases that is to be used is determined under an index specified by the Secretary of the Treasury. Thus, under the Senate amendment, the account limit for post-retirement medical benefits under a welfare benefit fund is not limited to the projected costs of such benefits assuming no increase in medical costs until such increases occur.

In addition, the Senate amendment extends the due date of the study of retiree benefits mandated by DEFRA to the date that is one year after the date of enactment of the bill.

The provision relating to the funding of retiree medical benefits is effective for taxable years beginning after December 31, 1986. The extension of the due date of the study required by DEFRA is effective on the date of enactment.

Conference Agreement

The conference agreement follows the House bill except that it adopts the Senate amendment regarding the due date of the Treasury study.

9. Accrued Vacation Pay

Present Law

Under present law, an accrual-method taxpayer generally is permitted a deduction in the taxable year in which all the events have occurred that determine the fact of a liability and the amount thereof can be determined with reasonable accuracy (the "all-events" test). In determining whether an amount has been incurred with respect to any item during the taxable year, all events that establish liability for such amount are not treated as having occurred any earlier than the time economic performance occurs (sec. 461(h)). With respect to a liability that arises as a result of another person's providing services to the taxpayer (such as the liability to provide vacation pay in exchange for services by an employee), economic performance generally occurs when such other person provides the services.

Under present law, an exception applies under which certain expenses may be treated as incurred in the taxable year in which the "all-events" test is otherwise met even though economic performance has not yet occurred. This exception applies if four conditions are met: (1) the "all-events" test (determined without regard to economic performance) is satisfied with respect to the item during the taxable year; (2) economic performance occurs within a reasonable period (but in no event more than 8½ months) after the close of the taxable year; (3) the item is recurring in nature and the taxpayer consistently from year to year treats items of that type as incurred in the taxable year in which the all-events test is met; and (4) either (a) the item is not mate-

rial, or (b) the accrual of the item in the year in which the all-events test is met results in a better matching of the item with the income to which it relates than would result from accruing the item in the year in which economic performance occurs. This exception does not apply to workers' compensation or tort liabilities.

In order to ensure the proper matching of income and deductions in the case of deferred benefits (such as vacation pay earned in the current taxable year, but paid in a subsequent year) for employees, an employer generally is entitled to claim a deduction in the taxable year of the employer in which ends the taxable year of the employee in which the benefit is includible in gross income (sec. 404(b)).[1] Consequently, an employer is entitled to a deduction for vacation pay in the taxable year of the employer in which ends the earlier of the taxable year of the employee for which the vacation pay (1) vests (if the vacation pay plan is funded by the employer), or (2) is paid.

An exception to this rule applies to amounts that are paid within 2½ months after the close of the taxable year of the employer in which the vacation pay is earned. Such amounts are not subject to the deduction-timing rules applicable to deferred benefits, but are subject to the general rules under which an employer is entitled to a deduction when economic performance occurs (i.e., when the services of the employee for which vacation pay is earned are performed). Because amounts paid within 2½ months after the close of the employer's taxable year generally will qualify for the exception to the economic performance requirements, such amounts generally will be deductible for the preceding taxable year (the year in which the vacation pay is earned).

Under a special rule of present law, an employer may make an election under section 463 to deduct an amount representing a reasonable addition to a reserve account for vacation pay (contingent or vested) earned by employees before the close of the current year and expected to be paid by the close of that year or within 12 months thereafter.

House Bill

Under the bill, the special rule allowing a deduction for additions to a reserve account for vacation pay (sec. 463) is limited to the vacation pay that is paid during the current taxable year or within 8½ months after the close of the taxable year of the employer with respect to which the vacation pay was earned by the employees. The provision applies to taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment follows the House bill, except that it applies to taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

10. Military Fringe Benefits

Present Law

Under current law, a variety of benefits provided to military personnel and their dependents is excludable from gross income. These exclusions are by statute, regulation, or long-standing administrative practice.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conferees believe that rules for the tax treatment of military benefits should be consolidated and set forth in one statutory provision. This will better enable taxpayers and the IRS to understand and administer the tax rules. Also, consolidation of these rules will make clear the intent of the conferees that, consistent with the treatment of benefits generally in the Tax Reform Act of 1984, any benefits for military personnel that are not expressly excluded under the new provision or under other statutory provisions of the Code (e.g., sec. 132) are includible in gross income. The provision does not alter the definition of wages for withholding tax purposes.

The conference agreement excludes from income benefits which were authorized by law on September 9, 1986, and which were excludable from income on such date. Benefits are excludable only to the extent of the amount authorized and excludable on September 9, 1986, except that adjustments may be made pursuant to a provision of law or regulation in effect on September 9, 1986, if the adjustments are determined by reference to fluctuations in cost, price, currency or other similar index.

The conferees understand that the allowances which were authorized on September 9, 1986, and excludable from gross income on such date are limited to the following: veteran's benefits authorized under 28 U.S.C. sec. 3101; medical benefits authorized under 50 U.S.C. sec. 2005 or 10 U.S.C. secs. 1071–1083; combat zone compensation and combat related benefits authorized under 37 U.S.C. sec. 310; disability benefits authorized under 10 U.S.C. chapter 61; professional education authorized under 10 U.S.C. secs. 203, 205, or 141; moving and storage authorized under 37 U.S.C. secs. 404–412; group term life insurance authorized under 38 U.S.C. secs. 404–412; premiums for survivor and retirement protection plans authorized under 10 U.S.C. secs. 1445–1447; mustering out payments authorized under 10 U.S.C. sec. 771a(b)(3); subsistence allowances authorized under 37 U.S.C. secs. 209, 402; uniform allowances authorized under 37 U.S.C. secs. 415–418; housing allowances authorized under 37 U.S.C. secs. 403, 403a, or 405; overseas cost-of-living allowances authorized under 37 U.S.C. sec. 405; evacuation allowances authorized under 47 U.S.C. sec. 405a; family separation allowances authorized under 37 U.S.C. sec. 427; death gratuities authorized under 10 U.S.C. secs. 1475–1480; interment allowances authorized under 10 U.S.C. secs. 1481–1482; travel for consecutive overseas tours authorized under 37 U.S.C. sec. 411; emergency assistance authorized under 10 U.S.C. sec. 133 and 37 U.S.C chapter 1; family counseling services authorized under 10 U.S.C. sec. 133; defense counsel authorized under 10 U.S.C. secs. 133, 801–940, or 1181–1187; burial and death services authorized under 10 U.S.C. sec. 1481–1482; educational assistance authorized under 10 U.S.C. 141 and 37 U.S.C. secs. 203, 209; dependent education authorized under 20 U.S.C. sec. 921 and 10 U.S.C. sec. 7204; dental care for military dependents authorized under 10 U.S.C. secs. 1074 or 1078; temporary lodging in conjunction with certain orders authorized under 37 U.S.C. sec. 404a; travel to a designated place in conjunction with reassignment in a dependent-restricted status authorized under 37 U.S.C. sec. 406; travel in lieu of moving dependents during ship overhaul or inactivation authorized under 37 U.S.C. sec. 406b; annual round trip for dependent students authorized under 37 U.S.C. sec. 430; travel for consecutive overseas tours (dependents) authorized under 37 U.S.C. sec. 411b; and travel of dependents to a burial site authorized under 37 U.S.C. sec. 411f.

The conferees intend this list to be an exhaustive list of the allowances excludable under the new provision. The list is not intended, however, to limit benefits which are excludable under another section of the Code. Further, the conferees understand that there may be benefits which may have been unintentionally omitted from the list. Accordingly, the Secretary of the Treasury is authorized to expand the list if the Secretary finds that a benefit should have been included, i.e., that the benefit is a cash or reimbursement benefit which was authorized on September 9, 1986, and excludable from income on such date. Except as provided in the preceding sentence, the Secretary of the Treasury may not, by regulation or otherwise, expand the definition of excludable military benefits.

The provision is effective for taxable years beginning after December 31, 1986.

G. Changes Relating to Employee Stock Ownership Plans

Present Law

An employee stock ownership plan ("ESOP") is a qualified stock bonus plan or a combination of a stock bonus and a money purchase pension plan which may be utilized as a technique of corporate finance and under which employer stock is held for the benefit of employees. The stock, which is held by one or more tax-exempt trusts under the plan, may be acquired through direct employer contributions or with the proceeds of a loan to the trust (or trusts). An ESOP must be designed to be invested primarily in employer securities.

ESOPs are subject to the requirements generally applicable to qualified plans. A qualified plan is required to meet minimum standards relating to coverage (sec. 410) and vesting (sec. 411). Also, a qualified plan cannot discriminate in favor of employees who are officers, shareholders, or highly compensated (sec. 401(a)(4)).

Unless a participant otherwise elects in writing, the payment of benefits from a qualified plan generally must begin no later than 60 days after the close of the plan year in which occurs the latest of (1) the date on which the participant attains the normal retirement age under the plan (or age 65, if earlier), (2) the 10th anniversary of the year the participant commenced participation in the plan, or (3) the date the participant separates from service. In no event can distribution be deferred beyond the required beginning date (sec. 401(a)(9)).

An ESOP that is top-heavy is also subject to the qualification rules applicable generally to top-heavy plans, including, for example, accelerated vesting and limits on includible compensation.

In addition to the generally applicable qualification rules, ESOPs must satisfy special qualification requirements. For example, an ESOP that is maintained by an employer that has registration-type securities must provide that each participant is entitled to direct the trustee how to vote shares allocated to the participant's account. If the employer maintaining the ESOP does not have registration-type securities, the ESOP must provide that each participant is entitled to direct the trustee in the exercise of voting rights on any corporate issue that, by

[1] Special deduction-timing rules apply to benefits provided under a qualified pension, profit-sharing, or stock bonus plan.

law or charter, must be decided by more than a majority vote of outstanding common shares voted (sec. 409(e)(3)).

An ESOP must provide that participants have the right to demand that benefits be distributed in the form of employer securities. If the employer securities are not readily tradable, the employer must provide participants with a "put option", that is, the right to require that the employer repurchase the securities under a fair valuation formula. If the put option is exercised, provision for payment must be reasonable. If payment is deferred, the payment provisions will not be considered reasonable unless the employer provides security and a reasonable rate of interest.

In order to limit the extent to which individuals can use tax-favored arrangements to provide for employee benefits under a qualified plan, present law (sec. 415) provides overall limits on contributions and benefits under qualified pension, profit-sharing, and stock bonus plans. Present law provides a special limitation on annual additions under an ESOP. Under this special rule, the usual dollar limit on annual additions ($30,000 for 1986) is increased if the ESOP provides that no more than one-third of the employer contributions for the year are allocated to the group of employees consisting of officers, 10-percent shareholders, and highly compensated employees (i.e., employees whose annual compensation exceeds twice the dollar limit on annual additions or $60,000) (sec. 415(e)(6)).

Special tax benefits are available with respect to certain transactions involving ESOPs, including the exclusion of 50 percent of the interest income received by a bank, insurance company, or a corporation actively engaged in the business of lending money with respect to loans used to finance the acquisition of employer securities, the deduction of dividends paid to ESOP participants, the deferral of gain on certain sales of stock to an ESOP and the assumption of estate tax liability by an ESOP.

An ESOP under which an employer contributes employer securities (or cash with which to acquire employer securities) in order to qualify for a credit against income tax liability is referred to as a tax credit ESOP. The tax credit is limited to a prescribed percentage of the aggregate compensation of all employees under the plan. Under present law, no tax credit is allowed after 1987.

Tax credit ESOPs are subject to the requirements generally applicable to qualified plans and ESOPs. In addition, tax credit ESOPs are subject to special qualification requirements. In general, employer securities allocated to an employee's account under a tax credit ESOP may not be distributed before the end of the 84th month after the month in which the securities are allocated. This limitation does not apply to distributions of securities in the case of the employee's separation from service, death, or disability, or in the case of certain corporate acquisitions. Distributions of employer securities are generally not permitted upon termination of a tax credit ESOP unless the 84-month rule is satisfied.

House Bill

Changes in qualification requirements relating to ESOP's

Vesting

Under the House bill, any ESOP that is not top heavy is required to provide that a participant's right to the accrued benefit derived from employer contributions must become nonforfeitable no more slowly than under a special 10-year graded vesting schedule.

Nondiscrimination rules

Under the House bill, no more than one-third of the employer's contributions for a year may be allocated to the group of employees consisting of officers, 10-percent shareholders or highly compensated individuals. An individual is considered highly compensated if the individual's compensation exceeds an amount equal to 200 percent of the dollar limit on annual additions to a defined contribution plan (i.e., for 1985, 200 percent of $30,000, or $60,000).

The bill limits the amount of compensation that can be taken into account under any qualified plan, including an ESOP. The limit is 7 times the defined contribution plan dollar limit ($175,000 for 1986).

Voting rights

Under the House bill, if the employer does not have registration-type securities, then (1) participants with fewer than 10 years of participation must have the right to direct the trustee to vote allocated securities with respect to any corporate matter that, by law or charter, must be decided by more than a majority vote, and (2) participants with 10 or more years of participation must have the right to direct the trustee to vote allocated securities on all issues.

Diversification of investments

The House bill requires an ESOP to offer partial diversification elections to participants who meet certain age and participation requirements (qualified employees). Under the bill, a qualified employee must be entitled annually during any diversification election period occurring within the employee's qualified election period to direct diversification of up to 25 percent of the participant's account balance (50 percent after attainment of age 60). To the extent that a participant elects to diversify a portion of the account balance, the bill requires an ESOP to offer at least three investment options not inconsistent with regulations prescribed by the Secretary and to complete the diversification within a specified period. Distribution to the participant within 90 days after the close of the annual diversification election period of an amount not to exceed the maximum amount for which a participant elected diversification is deemed to satisfy the diversification requirement.

Timing of distributions

Under the House bill, an ESOP must permit earlier distributions to employees who separate from service before normal retirement age. Unless an employee otherwise elects in writing, the payment of benefits from an ESOP must begin no later than 60 days after the end of the plan year following the plan year in which the employee separates from service. However, to the extent a particpant's account balance consists of securities which were financed by an acquisition loan, the distribution does not have to be made until 60 days after the close of the plan year in which the loan is repaid.

The rules added by the House bill are intended as an acceleration of the otherwise applicable benefit commencement date. Accordingly, if the general rules (secs. 401(a)(9) and 401(a)(14)) would require the commencement of distributions at an earlier date, those general rules would override this special ESOP rule.

Put option requirements

The House bill generally retains the present-law requirement that a participant who receives a distribution of employer securities from an ESOP must be given a put option with respect to distributed employer securities that are not readily tradable. However, the bill modifies the permissible periods over which the employer may pay the option price to the participant.

For a participant who receives a lump-sum distribution of employer securities from an ESOP and exercises the put option, the employer must pay the option price to the participant in substantially equal annual installments over a period not exceeding 5 years and beginning no later than 30 days after the close of the 60-day option period. The employer must provide security for the installment payments and reasonable interest.

For a participant who receives a distribution of employer securities from an ESOP other than a lump-sum distribution and elects to exercise the put option, the employer must pay the full amount of the option price to the participant no later than 90 days after the exercise of the option.

Independent appraiser

Under the House bill, all valuations of employer securities contributed to or purchased by an ESOP with respect to activities carried on by the plan must be made by an independent appraiser (within the meaning of section 170(a)(1)). The appraiser's name must be reported to the Internal Revenue Service.

Effective Dates

The qualification requirements added by the House bill apply to stock acquired after December 31, 1985.

Tax credit employee stock ownership plans

Repeal of employee stock ownership credit

The House bill repeals the special ESOP tax credit for compensation paid or accrued after 1985.

Distribution requirements

The House bill amends the tax credit ESOP distribution provisions to permit certain distributions upon plan termination. Distributions eligible to be made upon plan termination must consist of the entire balance to the credit of the participant. The provision is effective for termination distributions made after December 31, 1984.

Certain additional tax benefits relating to ESOPs

The House bill generally repeals the special tax incentives for ESOP financing at the end of 1988. Transition rules are provided.

Senate Amendment

Statement of Congressional policy

Under the Senate amendment, a statement of Congressional policy with respect to ESOPs is adopted. This statement points out that the Congress, in a series of applicable laws and under the amendment, has reflected its interest in encouraging ESOPs as a bold and innovative tool of corporate finance for purposes of strengthening the private free enterprise system. The statement describes the policy of the Congress that ESOPs be used in a wide variety of corporate financing transactions in order to encourage the participation of employees as beneficiaries of such transactions. The statement makes clear Congressional concern that the policy articulated by the Congress will be made unattainable by regula-

tions and rulings that (1) characterize ESOPs as conventional retirement plans, (2) reduce the freedom of ESOPs and employers to take the necessary steps to utilize ESOPs in a wide variety of corporate financing transactions, and (3) impede the establishment and success of these plans.

Changes in qualification requirements relating to ESOPs

Vesting

The Senate amendment does not contain a special vesting provision for ESOPs. However, the amendment requires all single-employer qualified plans, including ESOPs, to satisfy one of two alternative vesting schedules. Under the first schedule, a participant must be 100 percent vested after 5 years of service. Under the second schedule, a participant must vest no more slowly than under a 7-year graded vesting schedule.

Nondiscrimination rules

The Senate amendment does not apply special nondiscrimination rules to ESOPs, but ESOPs generally are subject to the changes made by the amendment to qualified plan requirements. Also, the Senate amendment provides that no more than $200,000 of compensation may be taken into account under any qualified plan, including an ESOP.

Voting

The Senate amendment eliminates the pass-through voting requirements of present law in the case of employer securities issued by certain newspapers whose stock is not readily traded and also permits ESOPs established by such employers to acquire nonvoting common stock in certain cases.

Timing of distributions

Under the Senate amendment, an ESOP is to permit earlier distributions to employees who separate from service before normal retirement age. Unless an employee otherwise elects in writing, the payment of benefits under an ESOP must begin no later than one year after close of the plan year (1) in which the participant terminates employment due to retirement, disability, or death, or (2) which is the fifth plan year following the participant's separation from service for any other reason (provided the participant does not return to service with the employer prior to that time). For purposes of applying this rule, the account balance of a participant does not include securities acquired pursuant to an acquisition loan until the close of the plan year in which the loan is repaid. As under the House bill, the rules added by the Senate amendment are intended as an acceleration of the otherwise applicable benefit commencement date.

The Senate amendment also provides that, unless the participant elects a longer distribution period, the plan may provide distributions over a period not longer than 5 years. If the participant's account balance exceeds $500,000, this distribution period is extended by one year (up to 5 additional years) for each $100,000 (or fraction thereof) by which the account balance exceeds $500,000. These dollar amounts are indexed at the same time and in the same manner as the dollar limits on benefits under a defined benefit pension plan (sec. 415(d)).

Put option requirements

The Senate amendment generally retains the present-law requirement that a participant who receives a distribution of employer securities from a tax credit ESOP or a leveraged ESOP must be given a put option with respect to distributed employer securities that are not readily tradable. However, the bill modifies the permissible periods over which the employer may pay the option price to the participant.

In the case of a total distribution of employer securities to a participant that are put to the employer, the Senate amendment provides that the employer must pay the option price to the participant in substantially equal annual payments over a period not exceeding 5 years and beginning not more than 30 days after the exercise of the put option. The employer is not required to provide security with respect to such installment payments, but is required to credit a reasonable rate of interest with respect to the outstanding balance of the option price. A total distribution means the distribution within one taxable year of the recipient of the account balance under the plan.

In the case of a put option exercised as part of an installment distribution, the employer is required to pay the option price within 30 days after the exercise of the option.

Extension of put option requirements to stock bonus plans

Under the Senate amendment, distributions of nonreadily tradable securities of an employer from a stock bonus plan are subject to the put option requirements applicable to ESOPs.

Modification of limitations on annual additions to ESOPs

Under the Senate amendment, the definition of an employee who is subject to the one-third allocation limit for purposes of the special limitation on annual additions to ESOPs (sec. 415(c)(6)) is modified to conform to the new definition of highly compensated employee added under the amendment for purposes of qualified pension, profit-sharing, or stock bonus plans, and for purposes of employee benefit plans.

Effective dates

The distribution requirements and the extension of the put option requirement to stock bonus plans are effective with respect to distributions attributable to stock acquired after December 31, 1986. The put option requirements are effective for distributions attributable to stock acquired after December 31, 1986, except that a plan may elect to have the put option requirements apply to all distribution after the date of enactment. The modified definition of highly compensated employees is effective for years beginning after December 31, 1988. The elimination of the pass-through voting requirements for certain plans of newspapers is effective December 31, 1986. The provision permitting certain plans of newspapers to acquire nonvoting common stock is effective with respect to acquisitions of securities after December 31, 1986.

Tax credit employee stock ownership plans

Repeal of employee stock ownership credit

The Senate amendment is the same as the House bill, except that the repeal of the special ESOP tax credit is effective for compensation paid or accrued after December 31, 1986.

Distribution requirements

The Senate amendment is the same as the House bill.

Certain additional tax benefits relating to ESOPs

Deduction for dividends paid on ESOP stock

Under the Senate amendment, effective for taxable years beginning after the date of enactment, the deduction for dividends paid on ESOP stock is expanded to apply to dividends that are used to repay ESOP loans. Such repayments are not treated differently from repayments attributable to nondeductible dividends for purposes of applying the limit on employer deductions (sec. 404(j)) or for purposes of applying the limitations on benefits and contributions (sec. 415).

Partial exclusion of interest earned on ESOP loans

The Senate amendment modifies the 50-percent exclusion for interest paid on securities acquisition loans in two respects. First, the bill provides that the exclusion is also available with respect to a loan (with an original commitment period of 7 or fewer years) to a corporation to the extent that, within 30 days, employer securities are transferred to the plan in an amount equal to the proceeds of the loan and such contributions are allocable to participants' accounts within one year after the date of the loan. Second, the definition of a lender eligible for the interest exclusion is amended to include a regulated investment company (as defined in sec. 851). The provision is generally effective for loans used to acquire employer securities after the date of enactment.

Estate tax exclusion for sales to employees

The Senate amendment permits an exclusion from the gross estate of 50 percent of the qualified proceeds from a qualified sale of employer securities by the executor of an estate to an ESOP before the due date (including extensions) of the estate's tax return. The provision is effective for sales after the date of enactment by the executor of an estate required to file a return after that date.

Conference Agreement

Statement of Congressional policy

The conference agreement does not adopt the statement of Congressional policy relating to ESOPs contained in the Senate amendment.

Changes in qualification requirements relating to ESOPs

Vesting

The conference agreement does not include the special ESOP vesting provision contained in the House bill. Of course, ESOPs are subject to the vesting provisions applicable to all qualified plans under the conference agreement.

Nondiscrimination rules

The conference agreement does not include the special ESOP nondiscrimination rules contained in the House bill. Of course, ESOPs are subject to the provisions in the conference agreement generally applicable to all qualified plans, including, for example, the coverage and minimum participation requirements and the limit on includible compensation.

Voting

The conference agreement follows the Senate amendment. The conference agreement clarifies that the special rules for newspapers apply to employers (determined without regard to the controlled group rules) whose stock is not publicly traded and a substantial portion of whose business consists of publishing a newspaper for general circulation on a regular basis.

Diversification of investments

The conference agreement follows the House bill, except that the effective date of the diversification requirements is delayed

for one year. Thus, the diversification rules are effective with respect to acquired December 31, 1986.

Under the conference agreement, as under the House bill, a "qualified employee" is entitled annually during the participant's "qualified election period" to direct diversification of up to 25 percent of the participant's account balance (50 percent after attainment of age 60). Any employee who has attained age 55 and completed 10 years of participation is a qualified employee. An employee is entitled to an election in each year within the qualified election period.

In meeting the diversification requirements, it is not intended that plan sponsors offer employer securities as one of the diversification options. As under the House bill, the diversification requirement can be met by a distribution of the portion of the account balance for which diversification was elected, or cash in lieu thereof. If, under this rule, stock is distributed in satisfaction of the diversification requirement, the usual put option rules apply. Amounts which are distributed in satisfaction of the diversification requirement may be rolled over to an IRA or to another qualified plan. The diversification requirement is satisfied if an employer provides the option to transfer the portion of the account balance for which diversification is elected into a plan which provides for employee-directed investment and in which the required diversification options are available.

Timing of distributions

The conference agreement follows the Senate amendment.

Put option requirements

The conference agreement follows the Senate amendment, except that security is required if the employer defers payment of the option price. Thus, as under the House bill, deferred payments are not permitted unless the employer provides adequate security.

Extension of put option requirements to stock bonus plans

The conference agreement follows the Senate amendment.

Modification of limitations on annual additions to ESOPs

The conference agreement follows the Senate amendment.

Independent appraiser

The conference agreement follows the House bill, except that valuation by an independent appraiser is not required in the case of employer securities which are readily tradable on an established securities market. The requirement is effective with respect to stock acquired after December 31, 1986.

Tax credit employee stock ownership plans

Repeal of employee stock ownership credit

The conference agreement repeals the ESOP tax credit effective for compensation paid or accrued after December 31, 1986.

Distribution requirements

The conference agreement follows the House bill and the Senate amendment.

The conferees intend that, for purposes of the rule permitting distributions from a tax credit ESOP on termination of the plan, a termination includes a partial termination of such a plan as to the employees of a particular subsidiary or operating trade or business in situations where such employees no longer have a significant relationship with the sponsor of the plan.

Certain additional tax benefits relating to ESOPs

Deduction for dividends paid on ESOP stock

The conference agreement follows the Senate amendment.

Partial exclusion of interest earned on ESOP loans

The conference agreement generally follows the Senate amendment. Under the conference agreement, the interest exclusion is extended to refinancing of loans used to acquire employer securities after May 23, 1984.

Under the conference agreement, a securities acquisition loan which otherwise meets the requirements of section 133, and which is described in either section 133(b)(1)(B) or section 133(b)(3)(B) (see the technical corrections provisions of the Act), qualifies for the partial interest exclusion under section 133 if the total commitment period of the loan does not exceed 7 years. The total commitment period includes the original commitment period of the loan plus the commitment period of all refinancings of the loan.

If a loan which otherwise meets the requirements of section 133 and which is not described in either section 133(b)(1)(B) or section 133(b)(3)(B) is refinanced, the loan will continue to qualify for the partial interest exclusion under section 133 if the total commitment period of the loan does not exceed the greater of 7 years or the original commitment period of the loan.

If a securities acquisition loan which qualifies under section 133 is refinanced prior to the date of enactment of this Act and the repayment period of the loan is extended, the loan will continue to qualify under section 133 with respect to interest accruing during the first 7 years of the total commitment period of the loan. Thus, for example, if, prior to the date of enactment, an otherwise qualified securities acquisition loan with an original commitment period of 5 years is refinanced for an additional 4 years, section 133 will continue to apply with respect to interest accruing in the first 7 years of the loan. The application of section 133 is limited to interest accured during the 7-year period so that prepayment of interest that has not yet accrued does not qualify for the partial exclusion.

Of course, any refinancings must also comply with the requirements of section 4975.

With respect to loans described in section 133(b)(1)(B), the requirement that stock be transferred to the plan within 30 days is modified to provide that the stock must be transferred within 30 days of the date interest begins to accrue on the loan. Similarly, the requirement that the stock must be allocated to accounts within 1 year after the loan is modified to provide that the stock must be allocated within 1 year after the date interest begins to accrue on the loan.

With respect to the provision extending the interest exclusion to regulated investment companies, the conferees intend that a regulated investment company that is otherwise fully invested in ESOP obligations will be permitted to pay out exempt interest obligations despite having certain amounts of cash or other assets on hand at the end of a taxable quarter, and expects that the Secretary will promulgate appropriate regulations in this regard.

Because only 50 percent of the interest income from ESOP loans is exempt from tax, the conferees understand that for this purpose it may be appropriate for a mutual fund to have two classes of stock, one of which would pay exempt-interest dividends and the other of which would pay taxable dividends. (Rev. Rul. 74-177, 1974-1 C.B. 165.) Such allocation would be reflected in the notice of designation. Any such two-class arrangement would not be subject to the rules of section 654 (relating to series funds) because there will not be segregated portfolios of assets.

Tax-deferred rollover of gain derived from sales of stock to an eligible employee organization

The conference agreement does not contain the provision in the House bill.

Payment of estate tax by an employee organization

The conference agreement does not include the provision in the House bill.

Estate tax exclusion for sales to ESOPs

The conference agreement follows the Senate amendment, except that the exclusion is available only for sales after the date of enactment and before January 1, 1992.

TITLE XII. FOREIGN TAX PROVISIONS

A. Foreign Tax Credit

1. Separate Foreign Tax Credit Limitations

Present Law

The foreign tax credit is determined on an "overall" basis: a taxpayer adds up its net income and net losses from all sources outside the United States and calculates one aggregate limitation based on the total. Overall (rather than country-by-country) foreign tax credit limitations are calculated separately, or subject to special rules, for certain categories of income that frequently bear either high (for example, oil extraction income) or low (for example, FSC dividends) rates of foreign tax or that can easily be earned in low-tax countries rather than in the United States to inflate the foreign tax credit limitation (for example, passive interest). The reason for the separate limitations is to prevent distortion of the foreign tax credit.

House Bill

a. Passive income

The House bill replaces the separate limitation for passive interest income with a separate limitation for passive income generally. Passive income, for this purpose, generally is any income of a kind which would be subpart F foreign personal holding company (FPHC) income as that category of income is expanded by the House bill, except that foreign currency transaction gains of dollar taxpayers are passive income without regard to the business needs exception generally provided in the House bill's new subpart F rules for currency gains. Foreign personal holding company inclusions (under Code sec. 551) and passive foreign investment company inclusions (under the House bill's new rules for such entities) are also passive income.

The separate limitation for passive income does not apply to: banking and insurance income (which is subject to its own separate limitation (*see* b., below)); shipping income (which is subject to its own separate limitation (*see* c., below)); foreign oil and gas extraction income; or active business rents and royalties from unrelated parties.

High-taxed income is excluded from the separate limitation for passive income.

b. Financial services income

The House bill establishes a separate limitation for banking and insurance income. For this purpose, banking and insurance

income is any income derived in the conduct of a banking, financing, or similar business, or from the investment by an insurance company of its unearned premiums or reserves ordinary and necessary for the proper conduct of its insurance business. Banking and insurance income also includes any income of a kind which would be insurance income under subpart F, as subpart F is amended by the bill. Subpart F insurance income under the bill generally is any income attributable to the issuing (or reinsuring) of any insurance or annuity contract. However, insurance income generally is not subject to current taxation under subpart F if the risk insured is in the country in which the insurer is organized. For purposes of the separate limitation, this same-country risk exception does not apply.

c. Shipping income

A separate limitation is applied to shipping income, that is, income of a kind which would be foreign base company shipping income as that category of subpart F income is expanded by the House bill.

d. Foreign currency translation gains

A separate limitation for foreign currency translation gains is established.

e. Look-through rules

In applying the new separate limitations, certain payments from, and inclusions with respect to, related persons are subject to look-through rules that take into account the income of the payor.

f. Effective date

The new foreign tax credit limitation rules generally apply to taxable years beginning after 1985.

A transitional rule is provided for foreign tax credit carryforwards and carrybacks: Carryforwards from a pre-effective date year to a post-effective date year can offset U.S. tax on only the same kind of income, determined under the House bill's new rules, as the income on which the foreign taxes were actually paid. For example, pre-effective date foreign taxes on portfolio dividend income that are carried to a post-effective date year can offset the U.S. tax on only passive income in that later year. Carrybacks from a post-effective date year to a pre-effective date year can offset U.S. tax on only the same kind of income, determined under the House bill's new rules, as the income on which the foreign taxes were actually paid.

Senate Amendment

a. Passive income

Like the House bill, the Senate amendment replaces the separate limitation for passive interest income with a separate limitation for passive income generally. The Senate amendment defines passive income, for this purpose, generally as any income of a kind which would be subpart F foreign personal holding company (FPHC) income as that category of income is modified by the Senate amendment. (The Senate amendment's modifications to the definition of subpart F FPHC income differ in some respects from the House bill's modifications to that definition (*see* C.1.a., below).) FPHC inclusions (under Code sec. 551) and passive foreign investment company inclusions (under the Senate amendment's new rules for such entities) are also passive income.

Following the House bill, the Senate amendment excludes from the separate limitation for passive income: banking and insurance income (other than, under the Senate amendment, passive banking and insurance income); shipping income (other than, under the Senate amendment, passive shipping income); foreign oil and gas extraction income; and active business rents and royalties from unrelated parties.

The Senate amendment differs from the House bill in excluding from the separate limitation for passive income: interest on working capital (as under current law); dividends on working capital received from a regulated investment company; and high withholding tax interest (which is subject to its own separate limitation under the Senate amendment (*see* A.2., below)).

The Senate amendment does not include the House bill provision excluding high-taxed income from the separate limitation for passive income. Instead, under the Senate amendment, the Treasury Department may prescribe anti-abuse rules to prevent manipulation of the character of income the effect of which is to avoid the purposes of the separate limitation for passive income (or any other separate limitation).

b. Financial services income

No provision.

c. Shipping income

No provision.

d. Foreign currency translation gains

No provision.

e. Look-through rules

The Senate amendment is generally the same as the House bill except that, under a "stacking" approach, the look-through rule for payments by related persons with passive income treats payments as first attributable to the payor's passive income remaining after any subpart F FPHC inclusion with respect to the payor.

f. Effective date

The new foreign tax credit limitation rules generally apply to taxable years beginning after 1986.

The Senate amendment provides a transitional rule for foreign tax credit carryforwards and carrybacks that differs from that provided by the House bill. Under the Senate amendment, pre-effective date excess credits can be carried forward to post-effective date years only to reduce U.S. tax on income of the old-law limitation category they had been in. For example, pre-effective date foreign taxes on portfolio dividend income that are carried to a post-effective date year can offset U.S. tax on only overall limitation income in that later year. Post-effective date excess credits can be used in pre-effective date years to reduce the U.S. tax on overall limitation income only. Post-effective date credits that are excess credits solely because of the Senate amendment's rate reductions cannot be carried back to higher-rate years. These rules for carryforwards and carrybacks also apply to taxes on interest subject to the Senate amendment's separate limitation for high withholding tax interest (discussed at A.2., below).

An additional, targeted transitional rule is provided in the case of the separate limitation for passive income.

Conference Agreement

a. Passive income

Following the House bill and the Senate amendment, the conference agreement replaces the separate limitation for passive interest income with a separate limitation for passive income generally. Some of the conference agreement's rules relating to this new separate limitation follow the House bill; others follow the Senate amendment. The conference agreement also includes technical and clarifying amendments.

General definition of passive income

Following the House bill and the Senate amendment, the conference agreement generally defines passive income as any income of a kind which would be subpart F foreign personal holding company (FPHC) income. As discussed in greater detail at C.1.a., below, both the House bill and the Senate amendment modify the definition of subpart F FPHC income; the conference agreement generally adopts the Senate amendment's modifications to the subpart F FPHC income definition for both subpart F and passive "basket" purposes.

The conference agreement does not include the House bill rule that treats foreign currency transaction gains of U.S. dollar taxpayers as passive income without regard to the business needs exception provided for currency gains under the legislation's subpart F amendments. Thus, under the agreement, currency gains eligible for the business needs exception are excluded from the separate limitation for passive income, whether the taxpayer's functional currency is the U.S. dollar or a foreign currency.

FPHC and PFIC inclusions

Following the House bill and the Senate amendment, foreign personal holding company inclusions (under Code sec. 551) and passive foreign investment company inclusions (under new Code sec. 1293) are passive income.

Export financing exception

The conference agreement provides an export financing exception to the separate limitation for passive income. The agreement generally excludes from the new separate limitation (and treats as overall limitation income) interest derived from financing the sale (or other disposition) for use or consumption outside the United States of any property which is manufactured, produced, grown, or extracted in the United States by the interest recipient or a related person, and not more than 50 percent of the fair market value of which is attributable to products imported into the United States. For this purpose, the fair market value of any property imported into the United States is its appraised value, as determined by the Secretary under section 402 of the Tariff Act of 1930 (19 U.S.C. 1401a) in connection with its importation. A related person, for this purpose is an individual, corporation, partnership, trust, or estate which controls, or is controlled by, the interest recipient, or a corporation, partnership, trust, or estate which is controlled by the same person or persons which control the interest recipient. Control means, with respect to a corporation, the ownership, directly or indirectly, of stock possessing 50 percent or more of the total voting power of all classes of stock entitled to vote or of the total value of stock of the corporation. In the case of a partnership, trust, or estate, control means the ownership, directly or indirectly, of 50 percent or more (by value) of the beneficial interests in the partnership, trust, or estate. Rules for determining stock ownership similar to those applicable for subpart F purposes (Code sec. 958) apply.

Parallel export financing exceptions are provided by the conference agreement with respect to the separate limitations for financial services income (discussed at A.1. b., below) and high withholding tax interest (discussed at A.2., below) and the termination of tax deferral for banking income of

controlled foreign corporations (discussed at C.1.a., below). The conferees include these exceptions because of their concern that this tax reform legislation might otherwise have the effect of reducing the availability of export financing in some cases, which could, in turn, have a negative impact on the volume of exports.

Financial services income exception

Income that would otherwise meet the definitions of both financial services income (which is subject to its own separate limitation (*see* b., below)) and passive income is financial services income under the conference agreement if received in a taxable year in which the recipient is predominantly engaged in the active conduct of a banking, insurance, financing, or similar business. By contrast, amounts earned by an entity not predominantly engaged in the active conduct of a banking, insurance, financing, or similar business that arguably meet the definitions of both financial services income and passive income are passive income under the agreement. The latter rule is intended to prevent entities earning passive income from characterizing it as financial services income in order to avoid the high-tax kick-out and other anti-abuse rules applicable to the separate limitation for passive income.

Shipping income exception

Following the House bill, the conference agreement excludes shipping income subject to its own separate limitation (*see* c., below) from the definition of passive income. Income, such as rental payments for the use of a vessel, that otherwise is both of a kind which would be subpart F FPHC income and of a kind which would be foreign base company shipping income is subject to the separate limitation for shipping income rather than to the separate limitation for passive income. This priority rule parallels the present-law subpart F priority rule for income that is otherwise both subpart F FPHC income and foreign base company shipping income. It conforms more closely the separate limitation and subpart F rules and thereby simplifies the application of the separate limitation rules.

Oil and gas income exception

The separate limitation for passive income does not apply to foreign oil and gas extraction income. This rule follows the House bill and the Senate amendment.

Active rents and royalties exception

The separate limitation for passive income does not apply to active business rents and royalties from unrelated parties. This rule follows the House bill and the Senate amendment. As indicated in the Reports of the Committee on Ways and Means and the Committee on Finance on this tax reform legislation, it is anticipated that the standards contained in existing regulations defining rents and royalties for purposes of excluding them from subpart F taxation (Treas. Reg. sec. 1.954-2(d)(1)) generally will be followed in determining whether rents and royalties received from unrelated parties qualify for this exclusion from passive income. The conferees expect that the Secretary, in adapting the standards contained in the existing regulations for this purpose, will, to the extent possible, substitute for the facts and circumstances test included therein more objective rules for distinguishing between active and passive rents and royalties. The conferees believe that it may be appropriate in some cases to apply such rules on a consolidated group basis in the case of U.S. recipients of rents and royalties that join in filing a consolidated return.

High withholding tax interest exception

Following the Senate amendment, the conference agreement excludes high withholding tax interest (which is subject to its own separate limitation (*see* A.2., below)) from the definition of passive income.

De minimis exception

The conference agreement does not adopt the exception for interest on working capital contained in the Senate amendment. Instead, it provides that a controlled foreign corporation has no passive income (or financial services income, shipping income, high withholding tax interest, or separate limitation dividends from a 10- to 50-percent U.S.-owned foreign corporation) in a taxable year in which the corporation has no subpart F income by reason of the applicability of the subpart F de minimis rule (Code sec. 954(b)(3)(A)), as that rule is modified by the agreement. Under the agreement, the subpart F de minimis rule generally applies if the sum of gross foreign base company income and tax haven insurance income is less than the lesser of 5 percent of gross income or $1 million.

The conference agreement adopts this separate limitation de minimis rule in the interest of administrative convenience. The amount of passive income of a controlled foreign corporation is relevant for separate limitation purposes because (as discussed in greater detail at A.1.e., below), under look-through rules, that amount determines the extent to which subpart F inclusions with respect to the corporation, and payments by the corporation to its U.S. shareholders, are included in the passive income basket. To simplify the application of the look-through rules, the conference agreement includes this rule, and others, that conform more closely the operation of subpart F and the separate limitations. As a result of the separate limitation de minimis exception, a controlled foreign corporation that has no currently taxable FPHC income for a year under the subpart F de minimis rule will have no passive income for that year for separate limitation look-through purposes. Dividends paid from the year's earnings, and interest, rents, and royalties paid to U.S. shareholders during the year, will have no passive income component.

Assume, for example, that a foreign corporation wholly owned by a U.S. company has $100 of gross income. Ninety-six dollars of that income consists of manufacturing income and nonsubpart F sales income, $1 is foreign base company sales income, and $3 is FPHC income. The foreign corporation pays $10 of interest, $5 of royalties, and no dividends to its U.S. parent. The subpart F de minimis rule applies so the U.S. parent has no subpart F inclusion with respect to the foreign corporation. Consequently, under the separate limitation de minimis rule, the $3 of FPHC income is treated as overall limitation income rather than passive income. The look-through rules need not be applied to the $10 of interest and $5 of royalty payments. These payments are overall limitation income to the parent in their entirety. In addition, for purposes of determining the foreign tax credit limitation treatment of future dividends, earnings and profits of the foreign corporation for the year have no separate limitation component.

Regulated investment company exception

Under the conference agreement, dividends received by a controlled foreign corporation from a regulated investment company may be excluded from passive income under the de minimis rule for controlled foreign corporations described immediately above.

Exception for passive income that attracts high foreign tax

The conference agreement adopts the Senate amendment provision authorizing the Treasury Department to prescribe anti-abuse rules to prevent manipulation of the character of income the effect of which is to avoid the purposes of the separate limitations. It also adopts, with the clarifications discussed below, the House bill provision excluding high-taxed income from the separate limitation for passive income (the "high-tax kick-out").

The high-tax kick-out applies after allocation of expenses at the U.S. recipient level. For example, assume that a foreign corporation that earns only passive income for the year makes a $100 rent payment to its 100-percent U.S. owner. The payment attracts a $30 foreign withholding tax. Under the look-through rule for rents, the $100 would be passive income to the U.S. owner, absent the high-tax kick-out. Before the high-tax kick-out may be applied, parent expense must be allocated to the $100 of income. Assume that $40 of parent expense is properly allocated to the $100. Pursuant to the high-tax kick-out, the $60 of net rental income is recharacterized as overall limitation income (and the $30 withholding tax is placed in the overall basket) because the foreign income tax paid with respect to that income exceeds the highest U.S. tax rate multiplied by the amount of the income after allocation of parent expense (that is, $30 > (.34 x $60)).

The conference agreement does not mandate separate application of the high-tax kick-out to individual items of income which the Secretary determines can be grouped for purposes of applying the kick-out without diminishing substantially its effect. The conferees expect the Secretary, in making such determinations, to balance the administrative convenience that may be gained from grouping particular items of income against the increased sheltering opportunities that might be created by such grouping. The conferees believe that it would generally be appropriate to apply the high-tax kick-out to the passive portion of a subpart F inclusion *in toto*, rather than separately to each item of income included in the passive income inclusion. For example, assume that a U.S. company owns two foreign corporations. With respect to the first foreign corporation, the U.S. company has a $50 subpart F FPHC inclusion. The inclusion consists of 5 $10 interest payments received by the first foreign corporation from sources in 5 different countries. In the interest of administrative convenience, the conferees believe that the high-tax kick-out generally should apply once in this instance, to the full $50 inclusion (after allocation of parent expenses), rather than separately to each $10 item reflected in the inclusion, even though the foreign tax attracted by the different $10 items may vary.

With respect to the second foreign corporation, the U.S. company has a $75 passive subpart F inclusion. The high-tax kick-out is to be applied separately to the $75 and $50 inclusions.

Dividends paid by a controlled foreign corporation generally will not be passive under the conference agreement (*see* discussion of look-through rules at e., below). Such divi-

dends are, therefore, generally to be excluded from any income grouping to which the high-tax kick-out is applied.

The conferees expect the Secretary to examine the extent to which it would be feasible, consistent with the purposes of the kick-out, to apply it to a foreign branch's total passive income carrying direct foreign tax credits, rather than separately to each item of passive income of the branch that carries a direct foreign tax credit. A foreign branch might be defined for this purpose by reference to the definition of a "qualified business unit" provided in the conference agreement's rules for the tax treatment of foreign currency exchange gain and loss (*see* F., below).

The high-tax kick-out is to apply at the U.S. person level only. For example, assume that two foreign corporations are wholly owned by a common U.S. parent. The foreign corporations are incorporated in different countries. The first foreign corporation has $100 of income (after expenses other than foreign tax). All of the corporation's gross income is passive. The $100 attracts $45 of foreign tax. (The taxpayer does not elect to exclude this income from subpart F taxation under subpart F's high foreign tax rule (Code sec. 954(b)(4)).) This income is currently taxed to the U.S. parent under subpart F. For purposes of applying the high-tax kick-out, $5 of parent expense is allocated to this income. The income is overall limitation income to the U.S. parent because the foreign tax treated as paid by the parent on the income (under Code sec. 960) exceeds the highest U.S. tax rate multiplied by the amount of the income after allocation of parent expense and the Code section 78 gross-up for deemed-paid foreign tax (that is, $45 > (.34 x $95)).

Among the first foreign corporation's expenses is a $20 royalty payment to the second foreign corporation. The only foreign tax attracted by this royalty payment is a $1 withholding tax. Under the look-through rules, the $20 would generally be passive income to the second foreign corporation. The high-tax kick-out does not apply at the controlled foreign corporation level; thus, the $45 of foreign tax imposed on the first foreign corporation's income has no bearing on the characterization of its royalty payment to the second foreign corporation. This rule simplifies the application of the high-tax kick-out. The conferees also believe that it is appropriate for two additional reasons. First, the $20 royalty payment in the example bore none of the $45 of tax paid by the first foreign corporation: rather, it reduced the first foreign corporation's taxable income; the $45 of tax was imposed on the first foreign corporation's $100 of income after deductions, including that for the royalty payment. Second, foreign taxes are relevant for foreign tax credit limitation purposes only at that point at which direct or deemed-paid foreign tax credits are provided for them. Such credits are provided only when a *U.S.* person includes the associated income in its gross income for U.S. tax purposes.

Returning to the example, the $20 of passive royalty income is subpart F FPHC income to the second foreign corporation, currently taxable to its U.S. parent. One dollar of parent expense is allocated to the subpart F inclusion for purposes of applying the kick-out. The subpart F inclusion remains passive after application of the kick-out because the $1 of foreign withholding tax treated as paid by the U.S. parent on this income (under Code sec. 960) does not exceed the highest U.S. tax rate multiplied by the amount of the income after allocation of parent expense and the Code section 78 gross-up for deemed-paid foreign tax (that is, $1 < (.34 x $19)).

The Secretary is to prescribe rules for the proper application of the high-tax kick-out in cases involving distributions of income previously taxed under subpart F that themselves attract foreign tax. With respect to such distributions, any adjustment in tax liability will normally be required in the year of the distribution rather than in the year of the subpart F inclusion, and will be consistent with present law's special rules for determining foreign tax credits with respect to distributions of earnings and profits previously taxed under subpart F (*see* Code sec. 960(b)). With respect to *all* the separate limitations, the conferees intend that foreign taxes imposed on distributions of income previously taxed under subpart F, to the extent creditable under the special rules just noted, be assigned to the same limitation basket or baskets as the prior subpart F inclusions to which they relate.

b. Financial services income

The conference agreement generally follows the House bill in establishing a separate limitation for financial services income, with the modifications described below.

The conference agreement provides an export financing exception to the separate limitation for financial services income. The agreement generally excludes from the new separate limitation (and treats as overall limitation income) interest derived from financing the sale (or other disposition) for use or consumption outside the United States of any property which is manufactured, produced, grown, or extracted in the United States by the interest recipient or a related person, and not more than 50 percent of the fair market value of which is attributable to products imported into the United States. For this purpose, the fair market value of any property imported into the United States is its appraised value, as determined by the Secretary under section 402 of the Tariff Act of 1930 (19 U.S.C. 1401a) in connection with its importation. A related person, for this purpose, is an individual, corporation, partnership, trust, or estate which controls, or is controlled by, the interest recipient, or a corporation, partnership, trust, or estate which is controlled by the same person or persons which control the interest recipient. Control means, with respect to a corporation, the ownership, directly or indirectly, of stock possessing 50 percent or more of the total voting power of all classes of stock entitled to vote or of the total value of stock of the corporation. In the case of a partnership, trust, or estate, control means the ownership, directly or indirectly, of 50 percent or more (by value) of the beneficial interests in the partnership, trust, or estate. Rules for determining stock ownership similar to those applicable for subpart F purposes (Code sec. 958) apply.

The conference agreement renames the House bill's separate limitation for banking and insurance income the separate limitation for financial services income to emphasize the broad range of income types to which the separate limitation applies. Income derived in the active conduct of a banking, financing, or similar business normally would include income attributable to any of the activities listed in existing Treas. Reg. sec. 1.954(2)(d)(2)(ii)(A) through (G). In addition, it would normally include service fee income from investment and correspondent banking, earnings from interest rate and currency swap businesses, income from services provided to unrelated parties with respect to the management of funds, income from fiduciary services provided to unrelated parties, bank-to-bank participation income, charge and credit card services income from financing purchases from third parties, hedging gains with respect to other financial services income, and income from travellers' check services. As under the House bill, insurance income subject to the separate limitation consists of premium and other insurance income. Such income received by offshore captive insurance companies which the agreement taxes currently to these companies' U.S. owners (*see* C.1.a., below) is subject to the separate limitation.

The conference agreement provides a special rule for entities predominantly engaged in the active conduct of a banking, insurance, financing, or similar business. If an entity is so engaged for any taxable year, then the separate limitation for financial services income will apply to any passive income earned by the entity in that year as well as to its financial services income. Income of an entity so engaged that would otherwise meet the definitions of both shipping income and financial services income will be considered the latter for separate limitation purposes. This rule generally allows active banks, insurance companies, finance companies, and similar businesses, which, under the overall limitation of present law, can credit foreign taxes on one type of financial income against U.S. tax liability on another type of financial income, to retain that ability. The cross-crediting curtailed by the new separate limitation is, by contrast, primarily that between banking, insurance, financing, and similar income and income unrelated to financial services. The predominantly engaged rule also acknowledges the practical difficulty of distinguishing passive income of a bank, insurance company, finance company, or similar business—most or all of the income of which derives from financial activity—from its active income.

The conferees expect the Secretary to prescribe rules for determining whether an entity is predominantly engaged in the active conduct of a banking, insurance, financing, or similar business. Generally, if a high percentage of an entity's income is not attributable to financial services activities of the types enumerated above, such entity is not to be considered predominantly engaged in the active conduct of a banking, insurance, financing, or similar business. In cases involving the application of the separate limitation look-through rules (*see* e., below), the predominantly engaged test is to be deemed satisfied if either the U.S. income recipient or the related payor of the income independently satisfies it. Thus, for example, if a controlled foreign corporation satisfies the predominantly engaged test, any payment that it makes to a U.S. shareholder (or subpart F inclusion of a U.S. shareholder) that would otherwise be passive income to the shareholder under the look-through rules will be treated as financial services income without regard to whether the shareholder itself satisfies the predominantly engaged test. Conversely, if a U.S. shareholder of a controlled foreign corporation satisfies the predominantly engaged test, but the controlled foreign corporation does not, inclusions by the U.S. shareholder with respect to the corporation that would otherwise be subject to the separate limitation for passive income will be

subject instead to the separate limitation for financial services income.

If an entity satisfies the predominantly engaged test, then income it earns that is integrally related to its banking, insuring, or financing activity generally is to be treated as financial services income, notwithstanding that such income might not otherwise be financial services income. For example, the conferees anticipate that income from equipment leasing, precious metals trading, commodity trading, and the financing of trade that is integrally related to the banking, insuring, or financing activity of an entity satisfying the predominantly engaged test may be treated as financial services income of that entity. However, in no event is income attributable to nonfinancial activity to be treated as financial services income. Thus, for example, income from data processing services or the sale of goods or nonfinancial services is not financial services income, even if the recipient satisfies the predominantly engaged test.

High withholding tax interest subject to its own separate limitation (*see* 2., below) is not subject to the separate limitation for financial services income. This exclusion applies whether or not the recipient satisfies the predominantly engaged test. Income that might otherwise meet the definitions of both shipping and financial services income (for example, income from insuring vessels) is financial services income for separate limitation purposes. This priority rule applies whether or not the recipient satisfies the predominantly engaged test.

Income that might otherwise meet the definitions of both passive and financial services income is passive income for separate limitation purposes when the recipient fails to satisfy the predominantly engaged test. This rule prevents entities making essentially passive investments such as occasional loans from avoiding the high-tax kick-out and other anti-abuse rules applicable to the separate limitation for passive income by taking the position that the associated income is financial services income rather than passive income.

c. Shipping income

The conference agreement establishes a separate foreign tax credit limitation for shipping income, following the House bill.

d. Foreign currency translation gains

The conference agreement does not contain the House bill provision establishing a separate limitation for foreign currency translation gains. The treatment of such gains for foreign tax credit limitation purposes is discussed at F., below.

e. Look-through rules

Dividends, interest, rents, and royalties received from controlled foreign corporations by their U.S. shareholders generally will be subject to the separate limitation for passive income, the separate limitation for financial services income, the separate limitation for shipping income, the separate limitation for high withholding tax interest (discussed at 2., below), or the separate limitation for dividends from 10- to 50-percent U.S.-owned foreign corporations (discussed at f., below) in accordance with look-through rules that take into account the extent to which the income of the payor is itself subject to one or more of these limitations. Subpart F inclusions are also subject to a look-through rule. These look-through rules generally follow those of the Senate amendment, with substantial technical modifications.

Conformity with subpart F

The conference agreement conforms the separate limitation look-through rules more closely with the subpart F rules. In general, the modifications contained in the conference agreement, detailed below, are intended to limit the application of the look-through rules and to make their application, where required, simpler for taxpayers and the IRS.

U.S. ownership requirements for application of look-through rules

The conference agreement generally applies the look-through rules only to subpart F inclusions and to dividends, interest, rents, and royalties received from U.S.-controlled foreign corporations. No look-through rules generally are applied in characterizing, for separate limitation purposes, payments from foreign entities in which U.S. persons own a 50-percent or smaller interest. The conferees have restricted the scope of look-through treatment in recognition of the difficulty that some shareholders in minority U.S.-owned corporations might have encountered in obtaining the additional income and tax information necessary to apply the look-through rules to payments of such corporations. Further, the conferees note that a primary purpose of look-through treatment is to make the foreign tax credit limitation treatment of income earned through foreign branches and income earned through foreign subsidiaries more alike by, in effect, treating income earned by a foreign subsidiary as if it were earned directly by its U.S. parent. When the U.S. interest in a foreign entity falls below a majority interest, the conferees believe that such entity frequently no longer substantially resembles a branch operation of U.S. persons.

Following the House bill and the Senate amendment, the conference agreement generally treats foreign source dividends, interest, rents, and royalties from entities in which the recipient has less than a 10-percent ownership interest the same as if such payments were received from unrelated parties (that is, no look-through rules apply). Interest, rents, and royalties received from entities in which U.S. persons have no more than a 50-percent interest by 10-percent or greater U.S. owners of such entities generally are treated the same way under the conference agreement. Thus, interest, for example, paid by foreign corporations that are not controlled foreign corporations to their U.S. shareholders is treated under the conference agreement as separate limitation passive income, subject to the agreement's high-tax kick-out.

The conferees provide this treatment because of a concern that any other rule would permit abuse of the foreign tax credit system. For instance, assume that a U.S. corporation owns 45 percent of a manufacturing corporation organized and operating in a high-tax foreign country. The foreign corporation pays the U.S. corporation an overall limitation dividend that is fully sheltered from U.S. tax by deemed-paid foreign tax credits. In addition, $17 of excess foreign tax credits are associated with the dividend. Assume that the U.S. corporation lends $400 to the foreign corporation, which it reinvests in a bank account at a slight profit. The foreign corporation pays $40 of interest to the U.S. corporation. If the conference agreement allowed cross-crediting of the foreign taxes on the dividend against U.S. tax on the interest payment, the $17 of excess credits from the dividend would be credited against the $13.60 of pre-credit U.S. tax on the interest income, leaving no residual U.S. tax on the interest income and a $3.40 excess credit to carry over. The conferees do not believe that such cross-crediting is appropriate. In the case of a controlled foreign corporation, by contrast, a look-through rule treats interest payments from a controlled foreign corporation as first carrying out the payor's passive income (*see* discussion of "netting" rule below).

As explained at f. (see below), dividends paid by 10- to 50-percent U.S.-owned foreign corporations are subject to an entity-by-entity separate limitation under the agreement.

In the following limited situations, the look-through rules will apply to inclusions with respect to minority U.S.-owned entities. They apply to inclusions with respect to more-than-25-percent U.S.-owned insurance companies that are controlled foreign corporations under Code section 957(b), as amended by the conference agreement (discussed at C.1.a., below), and inclusions with respect to captive insurance companies with dispersed U.S. ownership that are controlled foreign corporations under new Code section 953(c) (discussed at C.1.a., below). Application of the look-through rules here preserves general conformity of the subpart F and look-through rules. The conferees believe that such application will not prove administratively burdensome; they are informed that most of the offshore insurance companies likely to be affected will not have income in more than one basket.

The conference agreement requires the Secretary to prescribe such regulations as may be necessary or appropriate providing that a look-through rule similar to that applicable to interest, rents, and royalties paid by controlled foreign corporations will apply to such amounts received or accrued from entities which would be controlled foreign corporations if they were foreign corporations. Thus, under regulations, the conferees anticipate that interest, rents, and royalties received by 10-percent U.S. interest holders in noncorporate entities more-than-50-percent controlled by U.S. persons will generally be subject to look-through treatment. This rule generally follows the House bill and the Senate amendment except for the U.S. control requirement, which parallels that adopted in the conference agreement for application of the look-through rule to foreign corporations. It is also expected that foreign source interest received from more-than-50-percent U.S.-owned 80/20 companies (*see* Code sec. 861(a)(1)(B), as amended by the conference agreement; discussion at B.4.a., below) by their 10-percent U.S. shareholders will be subject to look-through treatment under regulations. (Dividends paid by 80/20 companies to U.S. shareholders are U.S. source under the conference agreement; therefore, the separate limitations are irrelevant to such payments.) This rule generally follows the Senate amendment except, again, for the U.S. control requirement.

De minimis exception for controlled foreign corporations

If a controlled foreign corporation has no foreign base company income or subpart F insurance income in a taxable year because the corporation satisfies the subpart F de minimis rule (Code sec. 954(b)(3)(A), as amended by the bill; *see* C.1.c., below) for that year, then the look-through rules will treat interest, rents, or royalties paid by the corporation during that year and dividends, to the extent treated as paid from that

year's earnings and profits, as overall limitation income. Thus, under the conference agreement, the subpart F de minimis rule also functions as a de minimis rule for the separate limitations for passive, financial services, and shipping income, and the separate limitations for high withholding tax interest (discussed at 2., below) and dividends from 10- to 50-percent U.S.-owned foreign corporations (discussed at f., below).

The conferees have adopted this de minimis exception so that U.S. shareholders of controlled foreign corporations may avoid the recordkeeping burden of applying the look-through rules to limited amounts of separate limitation income earned by controlled foreign corporations. The purpose of the de minimis rule is to simplify the application of the separate limitations in cases involving controlled foreign corporations.

If a controlled foreign corporation has no separate limitation income in a year by reason of the de minimis rule, the conferees intend that the foreign loss allocation rule adopted in the conference agreement (*see* 4., below), like the look-through rules, have no application to the corporation's income for the year.

Following the House bill and the Senate amendment, the conference agreement provides that the 70-percent full inclusion rule for foreign base company and insurance income (Code sec. 954(b)(3)(b), as amended by the conference agreement; *see* C.1.c., below) will not result in overall limitation income of a controlled foreign corporation being treated as separate limitation income.

Exception for controlled foreign corporations not availed of to reduce tax

For purposes of applying the dividend look-through rule, income of a controlled foreign corporation that would otherwise be passive, financial services, or shipping income is treated as overall limitation income under the agreement if it is established by the taxpayer that the income was subject to an effective foreign tax rate of greater than 90 percent of the maximum U.S. tax rate and the income is excluded from subpart F as a result (*see* Code sec. 954(b)(4), as amended by the conference agreement; discussed at C.1.a., below). The Senate amendment applies this rule to income of a controlled foreign corporation that would otherwise be passive. The conference agreement expands the rule's application to harmonize the operation of the subpart F and separate limitation look-through rules. Applying this conformity rule to income that would otherwise be passive or shipping income, in particular, may eliminate the need to apply the dividend look-through rule in many cases since income of a controlled foreign corporation cannot be passive or shipping income unless it is income of a kind which is subpart F FPHC or foreign base company shipping income, respectively.

The conference agreement does not apply this conformity rule to high withholding tax interest or dividends from 10- to 50-percent U.S.-owned foreign corporations. The latter separate limitation category is not closely related to any subpart F income category. Applying the conformity rule to high withholding tax interest would allow taxpayers to circumvent the separate limitation for that income. That separate limitation generally places high withholding taxes on interest in a separate basket where they may not be used to shelter low-taxed income from U.S. tax. If the conformity rule applied to such interest, U.S. shareholders of controlled foreign corporations receiving such interest could generally place it, and the associated taxes, in the overall basket with potentially low-taxed income by making the section 954(b)(4) election, since such highly taxed interest generally would satisfy the 90-percent threshold of section 954(b)(4). A similar concern sometimes arises in the case of dividends from 10- to 50-percent U.S.-owned foreign corporations. If a controlled foreign corporation makes the section 954(b)(4) election with respect to high withholding tax interest or dividends from a 10- to 50-percent U.S.-owned foreign corporation and the controlled foreign corporation qualifies for the subpart F de minimis exception for the year, the income remains high withholding tax interest or separate limitation dividend income (as the case may be) for look-through purposes.

The conformity rule does not apply for purposes of the look-through rule for interest, rents, and royalties, since those amounts are typically not subject to net tax in the hands of the payor and the 90-percent test applies on a net income basis.

Examples

The following examples show how the look-through rules, as modified by the conference agreement, will apply in certain cases.

Example 1

Assume that a foreign corporation wholly owned by a U.S. corporation earns $100. Seventy-five dollars is foreign base company shipping income and $25 is nonsubpart F services income. (For simplicity, this example assumes that net income and gross income are equal.) The $75 of shipping income includes $10 of rental income that also meets the subpart F definition of FPHC income. That $10 is treated as shipping income, not passive income, under the conference agreement. Under the 70-percent full inclusion rule of subpart F, the entire $100 is foreign base company income currently taxable to the U.S. parent. Since $75 of the $100 subpart F inclusion is attributable to income of the foreign corporation subject to the separate limitation for shipping income, $75 of the subpart F inclusion is treated as separate limitation shipping income of the parent. The remaining $25 of the subpart F inclusion is treated as overall limitation income of the parent.

Example 2

Assume that a foreign corporation wholly owned by a U.S. corporation earns $100 of gross income. Four dollars is portfolio interest (which is subpart F FPHC-type income) and $96 is gross manufacturing income (which is nonsubpart F income). Among the foreign corporation's expenses is $10 of interest paid to its U.S. parent. Because the subpart F de minimis exception applies, the $4 of portfolio interest is not taxed currently to the parent. For the same reason, all of the foreign corporation's income is overall limitation income. Under the look-through rule for interest then, the full $10 interest payment is overall limitation income to the U.S. parent. Any future dividends attributable to this year's earnings and profits will be 100-percent overall limitation income to the extent so attributable, notwithstanding the $4 of portfolio interest.

Example 3

Assume that a foreign corporation wholly owned by a U.S. corporation earns $100. Fifty dollars is shipping income of a type that is normally foreign base company shipping income. The other $50 is dividends from a second foreign corporation in which the first foreign corporation holds 45 percent of the voting stock. Foreign persons hold the other 55 percent of the voting stock of the second foreign corporation. The second foreign corporation and the controlled foreign corporation are incorporated in different countries. The dividends received by the controlled foreign corporation are, therefore, of a type that would normally be subpart F FPHC income. However, these dividends are subject to the separate limitation for dividends from 10- to 50-percent U.S.-owned foreign corporations, rather than to that for passive income (see discussion of this priority rule at f., below); while all passive income is income of a kind which would be subpart F FPHC income, not all subpart F FPHC income is passive.

The dividends and the shipping income are taxed abroad by the controlled foreign corporation's country only, at an effective rate of 40 percent. (This example assumes, for simplicity, that net income and gross income are equal.) Pursuant to Code section 954(b)(4) (as amended by the conference agreement), the U.S. parent establishes to the satisfaction of the Secretary that that effective rate exceeds 90 percent of the maximum U.S. tax rate. Therefore, neither the shipping income nor the dividends are taxed currently to the U.S. parent under subpart F.

However, the controlled foreign corporation pays all its earnings and profits for the year out as a dividend. Half of that dividend is attributable to its shipping earnings and half to the dividends it received. The half of the dividend attributable to the dividends it received is subject to the separate limitation for dividends from 10- to 50-percent U.S.-owned foreign corporations in the U.S. parent's hands; the conference agreement provision conforming certain of the separate limitation rules with the section 954(b)(4) exception does not apply to that separate limitation. The other half of the dividend is overall limitation income in the parent's hands because the conforming provision just noted treats the shipping income as overall limitation for purposes of applying the look-through rule for dividends.

Amendments to subpart F deficit rules

As discussed in detail at C.1.a., below, the conference agreement repeals subpart F's chain deficit rule (Code sec. 952(d)), modifies subpart F's accumulated deficit rule (Code sec. 952(c)(1) and (2)), and provides for the recapture of subpart F income that is eliminated by current year deficits in nonsubpart F income categories. These subpart F amendments reflect, in part, the conferees' conclusion that separate limitation income received by controlled foreign corporations (which is frequently subpart F income also) should not be eliminated by deficits of other controlled foreign corporations, prior year deficits in different income catergories, or current year deficits in nonsubpart F income categories. The conferees felt that the integrity of the separate limitation for passive income, for example, would be compromised if taxpayers could shelter passive income from U.S. tax, notwithstanding the separate limitation, simply by placing passive investments in controlled foreign corporations with accumulated losses. Preserving separate limitation income (otherwise eliminated by deficits) for foreign tax credit limitation purposes absent the indicated subpart F changes would necessitate more frequent application of the look-through rule to dividends paid

by controlled foreign corporations with passive income.

Netting of interest payments

Except to the extent provided in regulations, interest payments or accruals by a controlled foreign corporation to a U.S. shareholder with respect to the corporation (or to another controlled foreign corporation related to such a U.S. shareholder) are allocated first to gross subpart F FPHC income of the corporation that is passive, to the extent of such income. The Secretary may, by regulations, extend this "netting" rule to payments and accruals to unrelated persons. In addition, it is anticipated that the rule will be extended to U.S.-controlled noncorporate payors and U.S.-controlled 80/20 company payors to the extent that look-through treatment of their interest payments is provided under regulations.

The netting rule applies for subpart F and foreign tax credit limitation purposes. The conferees' goal in adopting this rule is to avoid creating an incentive for taxpayers to keep, or move, passive income and investments offshore. The netting rule's effect with respect to the look-through rule for interest is similar to that of the "stacking" rule included in the Senate amendment: interest payments by a controlled foreign corporation to its U.S. shareholders are separate limitation passive income to those shareholders to the full extent of the foreign corporation's gross passive income. The netting rule replaces the stacking rule. The conferees believe that the netting rule has several technical advantages over the stacking rule, among them, that it will be simpler to apply and administer. On the other hand, the netting rule reduces subpart F FPHC income (compared to present law) to the extent that it allocates interest expense to gross FPHC income that, under current law, would be allocated to nonsubpart F income. Concern about this effect of the netting rule has led the conferees to provide regulatory flexibility so that the Secretary can apply different rules when the netting rule would allow a tax advantage for offshore passive investments over domestic passive investments, or other unintended tax advantages.

An example illustrates the application of the netting rule. Assume that a U.S. corporation wholly owns a foreign corporation and that the U.S. corporation also has $1,000 of cash. That controlled foreign corporation earns $100 of overall limitation manufacturing income, on which it pays $60 of foreign tax. The U.S. parent is free to invest its cash in the United States or abroad. Assuming equally safe investments, the parent will tend to seek the highest after-tax return.

If the U.S. parent earns $100 of bank deposit interest in the United States, it will generally pay $34 of U.S. tax on that interest income under the conference agreement. The goal of the agreement in a case such as this is to make sure that the parent does not pay less than that amount of tax if it earns an equivalent amount of passive income offshore.

Assume that the parent instead lends its $1000 of cash to its controlled foreign corporation. The foreign corporation deposits that cash in a foreign bank, and earns $100 of interest on the investment. The foreign subsidiary in turn pays $100 of interest to its U.S. parent. The conference agreement provides that any interest received or accrued from a controlled foreign corporation by a U.S. shareholder in that corporation is treated as income subject to a particular separate limitation to the extent that that interest is properly allocable (under regulations prescribed by the Secretary) to income of the controlled foreign corporation that itself is subject to that separate limitation. Under the netting rule, the $100 interest payment is properly allocable in full to the controlled foreign corporation's $100 of gross bank deposit interest, which is gross subpart F FPHC income subject to the separate limitation for passive income. Thus, the $100 of interest received by the U.S. parent is subject to the separate limitation for passive income. As a result, the U.S. parent cannot cross-credit foreign taxes paid on overall limitation income against the U.S. tax liability on that income. The $100 interest payment in effect removes all the passive income at the foreign subsidiary level. There is no subpart F inclusion for this taxable year. Any future dividend from the foreign subsidiary from its $100 of pre-foreign tax manufacturing earnings will consist solely of overall limitation income.

The conference agreement does not provide explicit regulatory authority to the Secretary to extend the netting rule to rents and royalties paid or accrued by controlled foreign corporations. The Senate amendment, by contrast, applies the stacking rule to all payments to which look-through rules apply, including rents and royalties. The conferees do not believe that back-to-back (or other) rent or royalty arrangements utilizing controlled foreign corporations should permit taxpayers to reduce the U.S. tax on foreign rent or royalty income. The conferees are informed that existing regulatory standards under Code section 861 should operate to prevent taxpayers from allocating rent or royalty expense of controlled foreign corporations in order to achieve such results. The conferees have not expressly extended the netting rule to rents and royalties on the understanding that, under the present regulations, netting effectively will be required in the problem cases just described (and others). The conferees intend that the Secretary make any clarifications in the present regulations that might be necessary to ensure that netting takes place in such problem cases.

The allocation of interest expense of a controlled foreign corporation for purposes of the interest look-through rule and the foreign tax credit limitation rule maintaining the source of U.S. source income (Code sec. 904(g)(3)) is to be consistent. Thus, the netting rule, where applicable for purposes of the interest look-through, applies for purposes of the U.S. source maintenance rule too.

For example, assume that a foreign corporation wholly owned by a U.S. corporation has $1,000 of gross foreign source manufacturing income and $150 of gross subpart F FPHC income. One hundred twenty-five dollars of this $150 is U.S. source income not effectively connected with a U.S. business. The other $25 is foreign source. The foreign corporation pays $150 of interest to its U.S. parent. Under the netting rule, the $150 of interest expense is allocated in full to the foreign corporation's $150 of subpart F FPHC income and is, therefore, passive in the parent's hands. Under the conference agreement, that allocation controls for purposes of determining the U.S. source portion of the $150. Thus (under Code sec. 904(g)(3)(C)), $125 of the $150 of interest expense is properly allocable to U.S. source income of the controlled foreign corporation and, consequently, is U.S. source to its parent.

The conferees believe that using the same interest allocation method, including the netting rule where applicable, in applying present law's provision maintaining the source of U.S. source income and the separate limitation look-through provision for interest achieves a desirable conformity in the operation of these two provisions. The conferees are informed that technical difficulties have arisen under present law in coordinating the provision maintaining the source of U.S. source income with the provision maintaining the character of interest income (Code sec. 904(d)(3), which the look-through rules of the conference agreement supplant) because the allocation approaches of these two provisions differ.

The general subpart F related person definition (Code sec. 954(d)(3)), as amended by the conference agreement (*see* C.1.a., below) applies to determine whether a controlled foreign corporation is related to a U.S. shareholder for purposes of the netting rule.

Other rules

The agreement contains a clarifying amendment to the present law provision that treats distributions of income previously taxed under subpart F as other than dividends (Code sec. 959(d)). This amendment is relevant to the application of the look-through rule for dividends. (It is also relevant to the calculation of the dividends received deduction for dividends from foreign corporations (Code sec. 245, as amended by the agreement; *see* C.3., below) and the application of the dividend look-through provision of the present law rules maintaining the source of U.S. source income (Code sec. 904(g)(4)).) Under the look-through rule for dividends, a proportionate amount of a dividend is treated as separate limitation income based on the ratio of the separate limitation earnings and profits out of which the dividend was paid to the total earnings and profits out of which the dividend was paid. The amendment makes clear that the numerator or the denominator (as the case may be) of this ratio is reduced by earnings and profits attributable to income that has been previously taxed under subpart F and distributed.

As an example, assume that a foreign corporation wholly owned by a U.S. corporation and engaged in a manufacturing business earns $20 of subpart F FPHC income, $20 of same-country dividend income from a 10- to 50-percent U.S.-owned foreign corporation, and $60 of manufacturing income. It thus has $100 of earnings and profits for the year. (For simplicity, this example assumes that net income, earnings and profits, and gross income are equal.) The $20 of subpart F FPHC income is currently taxed to the U.S. parent. The controlled foreign corporation distributes $40 in the year of the subpart F inclusion. Under the look-through rule for subpart F inclusions, the $20 of subpart F FPHC income is treated as passive income. Twenty dollars of the $40 distribution is not treated as a dividend because it is attributable to the $20 already taxed under subpart F (Code sec. 959(d)). Under the look-through rule for dividends, $5 of the $20 portion of the distribution that is a taxable dividend ($20/$80 x $20) should be treated as a separate limitation dividend from a 10- to 50-percent U.S.-owned foreign corporation (*see* discussion of this separate limitation below) and $15 of that $20 ($60/$80 x $20) should be treated as overall limitation income. The clarifying amendment excludes from the denominator of the ratios

just noted the portion of the year's $100 of earnings and profits attributable to the subpart F FPHC income ($20) and thus ensures that the described result technically is achieved.

If a controlled foreign corporation has earnings and profits for the current year but an accumulated deficit, and it pays a dividend, then the basis for application of the look-through rule for dividends is the current year's earnings and profits.

For purposes of the look-through rule for dividends, the agreement provides that a dividend includes any Code section 956 inclusion triggered by an increase in earnings invested in U.S. property (Code sec. 951(a)(1)(B)). Section 956 inclusions are subject to the look-through rule for dividends rather than that for subpart F inclusions generally under the conference agreement because section 956 inclusions, like dividends, are drawn pro rata from earnings and profits; they differ from foreign base company income inclusions in not being specifically identified with particular earnings of a controlled foreign corporation. Any gain on the sale of shares in a foreign investment company that is treated as ordinary income under Code section 1246 is not a dividend for look-through purposes under the conference agreement. Instead, it is treated as passive income. Consistent with present law, distributions of income previously taxed under subpart F are not dividends for look-through purposes (*see* Code sec. 959(d)). As under the Code generally, a dividend includes any amount treated as such under Code section 1248.

For purposes of applying the look-through rules, a U.S. corporation's income "gross-up" for deemed-paid foreign taxes (Code sec. 78) is treated as increasing the corporation's subpart F inclusion (under Code sec. 951(a)(1)(A)) to the extent that the gross-up is attributable to such a subpart F inclusion. To the extent that the gross-up is attributable to a dividend or a section 956 inclusion, the gross-up is treated as a dividend for look-through purposes. Under this approach, for example, a single $100 inclusion consisting of $80 of subpart F FPHC income and a $20 gross-up for the foreign taxes deemed paid on the $80 will be subject to one look-through rule (that for subpart F inclusions under Code section 951(a)(1)(A)) rather than two (the subpart F *and* dividend look-through rules).

The conference agreement requires the Secretary to prescribe such regulations as may be necessary or appropriate for the application of the look-through rules in the case of income paid, or loans made, through one or more entities or between two or more chains of entities. For example, a controlled foreign corporation may receive interest subject to a high foreign withholding tax from a related controlled foreign corporation. To the extent necessary to preserve the integrity of the separate limitations, such interest will be characterized as passive income, financial services income, shipping income, high withholding tax interest, or dividend income from a 10- to 50-percent U.S.-owned foreign corporation for separate limitation purposes by applying the look-through rule for interest to the income of the related controlled foreign corporation. That look-through rule requires a determination of the extent to which the interest is properly allocable to the related controlled foreign corporation's passive income, financial services income, shipping income, high withholding tax interest, or dividend income from a 10- to 50-percent U.S.-owned foreign corporation.

This regulatory requirement, as it relates to income payments, is contained in the House bill and the Senate amendment. The conference agreement extends the requirement to loans so that the Secretary may prevent taxpayers from avoiding the separate limitations through the use of related party loans. Assume, for example, that a controlled foreign corporation earns $100 of low-taxed, nonsubpart F income subject to the separate limitation for financial services income. Its U.S. parent wishes to bring the $100 home. The parent would like to characterize the $100 as overall limitation income because it has excess foreign tax credits in the overall basket that would shelter the $100, if so characterized, from U.S. tax. The parent controls another foreign corporation engaged solely in manufacturing, all of the income of which is overall limitation income. The first controlled foreign corporation lends the manufacturing subsidiary $100. The manufacturing subsidiary in turn pays the U.S. parent a $100 dividend. If the general look-through rule for dividends is applied without modification, that $100 is overall limitation income to the parent. If that result were allowed to stand, however, the parent would have effectively brought home, converted into overall limitation income, the first controlled foreign corporation's $100 of financial services income. Regulations are to prevent such avoidance of the separate limitations using related party loans.

f. Separate limitation for dividends from 10- to 50-percent U.S.-owned foreign corporations

Under the conference agreement, when a foreign corporation that is not a controlled foreign corporation pays dividends that are eligible for the deemed-paid foreign tax credit (which is available for dividends from foreign corporations in which the recipient owns at least 10 percent of the voting power), a separate foreign tax credit limitation applies to the dividends received. Under this separate limitation, foreign taxes associated with that dividend income may offset U.S. tax only on dividend income from that corporation. The taxes affected by this separate limitation are foreign withholding taxes imposed on these dividends and foreign taxes deemed paid with respect to these dividends. This separate limitation also applies to dividends eligible for the deemed-paid credit that are paid by a controlled foreign corporation out of earnings and profits generated while the payor was not a controlled foreign corporation. Income subject to this separate limitation is not subject to the separate limitations for passive, financial services, or shipping income.

The conferees conclude that this general treatment of dividends paid from foreign corporations more than 10- but not more than 50-percent U.S.-owned is appropriate for several reasons. First, and most importantly, application of a look-through rule to dividends from 10- to 50-percent U.S.-owned foreign corporations is not necessary under the view, generally adopted by both Houses of Congress in connection with this tax reform legislation, that it is frequently appropriate to allow cross-crediting of taxes paid by one unit of a worldwide business against income earned by another unit of that business. In the case of controlled foreign corporations, the conferees adhere to this general view, on the theory that in many cases, whether one unit or another of a multinational enterprise is considered to earn income in a business (and whether any particular unit is considered to earn income in one country rather than another) makes little economic difference, so long as the income from that business generally inures to the benefit of the same persons. In the case of foreign corporations that are not controlled foreign corporations, however, the conferees do not believe that there is sufficient identity of interest with U.S. shareholders to treat nonmajority ownership positions as units of a worldwide business. Accordingly, the conferees do not believe it is appropriate to allow cross-crediting of taxes from nonmajority interests against income derived from controlling interests or vice versa, or of taxes from one nonmajority interest against income of another nonmajority interest.

Second, application of a look-through rule to dividends from 10- to 50-percent U.S.-owned foreign corporations (required under the House bill and the Senate amendment) might be difficult for some shareholders; for example, they may not have ready access to the tax and income information of the foreign corporation which is needed in applying the look-through rule. The conferees believe that the administrative burdens associated with the corporation-by-corporation separate limitation are much less severe than those that would arise if Congress generally required look-through consideration of dividends from foreign corporations no more than 50-percent U.S.-owned. The conferees recognize that this corporation-by-corporation approach will require a computation not required under present law: allocation of expenses to dividends from between 10- and 50-percent U.S.-owned foreign corporations on a corporation-by-corporation basis. The conferees believe that this additional computation is much easier than the application of a look-through rule to these dividends would be.

Third, the conferees believe that the passive foreign investment company (PFIC) rules (added by the conference agreement; *see* discussion at D.7., below) will often prevent cross-crediting of taxes imposed on active income against passive income arising from a non-controlled foreign corporation a major portion of whose assets generate passive income. Inclusions with respect to PFIC stock will automatically be subject to the separate limitation for passive income. The conferees would not have agreed to eliminate look-through treatment in the case of dividends from nonmajority-U.S.-owned foreign corporations without the backstop of the PFIC rules to prevent excessive cross-crediting of taxes.

An example illustrates the operation of the separate limitation for dividends from 10- to 50-percent U.S.-owned foreign corporations. A U.S. corporation owns 40 percent of a foreign corporation that is not a passive foreign investment company. No other U.S. person owns any interest in the foreign corporation. The foreign corporation pays a dividend of $80 to the U.S. corporation. A $16 withholding tax is imposed on that dividend, so the U.S. corporation receives a net payment of $64. A $40 deemed-paid credit is associated with the dividend. The U.S. corporation includes $120 in income ($80 grossed up by the $40 deemed-paid foreign tax). That $120 carries with it foreign tax credits of $56. Those foreign tax credits exceed the $40.80 of pre-credit U.S. tax on the $120. The conference agreement's limitation provides that the $15.20 of excess credits cannot offset U.S. tax on income other than prior or later dividends from this foreign corporation.

If a controlled foreign corporation owns 10 percent or more of the stock in foreign corporations that are not themselves controlled foreign corporations, then dividends from those non-controlled foreign corporations to the controlled foreign corporation that are eligible for the deemed-paid credit will be subject to separate limitations for dividends from 10- to 50-percent U.S.-owned foreign corporations. Under the look-through rules, subpart F inclusions with respect to the controlled foreign corporation, and dividends, interest, rents, and royalties received from it by its U.S. shareholders will be subject to separate limitations to the extent attributable to the foreign corporation's dividend income subject to the separate limitations.

As discussed at 2., below, the conference agreement generally establishes a separate limitation for high withholding tax interest, following the Senate amendment. A special rule relating to that separate limitation restricts deemed-paid credits for high withholding taxes on interest received by 10- to 50-percent U.S.-owned foreign corporations.

The separate limitation for dividends from 10- to 50-percent U.S.-owned foreign corporations is not to limit the application of the special foreign tax credit rules for foreign oil and gas income (Code sec. 907). For example, the look-through rules for inclusions with respect to foreign corporations with foreign oil and gas income (sec. 907(c)(3)) remain fully in effect, and will operate in conjunction with the separate limitation for dividends paid by 10- to 50-percent U.S.-owned foreign corporations.

These look-through rules are preserved with respect to dividends from 10- to 50-percent U.S.-owned foreign corporations, and deemed-paid credits carried by such dividends are limited for taxes on high withholding tax interest because the separate limitation for dividends from 10- to 50-percent U.S.-owned foreign corporations is not alone sufficient to prevent the cross-crediting of high foreign taxes on interest and oil and gas income against the U.S. tax on low-taxed income. Without the above restrictions, cross-crediting could still be achieved with respect to dividends from 10- to 50-percent U.S.-owned foreign corporations that earn low-taxed income as well as high-taxed interest or oil and gas income.

Effective date

Following the Senate amendment, the conference agreement provides that the new foreign tax credit rules described above generally apply to taxable years beginning after 1986.

The conference agreement adopts the transitional rule contained in the Senate amendment for foreign tax credit carryforwards, with one modification. Under the agreement, pre-effective date excess credits for taxes on overall limitation income can be carried to post-effective date years to reduce the U.S. tax on financial services income or shipping income, subject to a limitation.

The conference agreement also adopts the transitional rules contained in the Senate amendment for foreign tax credit carrybacks, with two technical modifications. First, the conference agreement provides that, under regulations prescribed by the Secretary, proper adjustments are to be made in the application of the rule limiting carrybacks attributable to the agreement's rate reductions to take into account the repeal of the zero bracket amount and the changes in the treatment of capital gains. Second, the conference agreement provides that post-effective date excess credits for high withholding taxes on interest may not be carried back to pre-effective date years. The latter modification is necessary because the carryback of such credits to offset the U.S. tax on pre-effective date overall limitation income would defeat the purpose of the separate limitation for high withholding tax interest.

The conference agreement adopts the Senate amendment's targeted transitional rule with respect to the separate limitation for passive income.

2. Credit for High Withholding Taxes on Interest

Present Law

The foreign tax credit is available for income, war profits, and excess profits taxes paid to a foreign country or a U.S. possession. In certain cases, a tax other than an income tax is creditable if it serves as a substitute for an income tax. Under the overall limitation, U.S. lenders can use foreign tax credits for high gross withholding taxes on a loan—the economic burden of which may be borne primarily by the borrower—to reduce the lenders' U.S. tax liability on other loan proceeds and other income.

House Bill

A foreign tax credit is allowed for gross-basis taxes on interest paid to a bank, insurance company, or other financial institution (or any related person) only to the extent of the U.S. tax on the associated interest income.

In general, the provision applies to taxable years beginning after 1985.

The provision does not apply until 1989 in the case of foreign taxes imposed on interest paid on pre-November 17, 1985 loans and restructurings thereof (adjusted upward by 3 percent per year) to borrowers in 15 less developed countries. These countries are Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, the Ivory Coast, Mexico, Morocco, Nigeria, Peru, the Philippines, Uruguay, Venezuela and Yugoslavia.

Senate Amendment

The Senate amendment creates a separate foreign tax credit limitation for foreign interest earned by a bank, other financial institution, or insurance company (or a related person) in the case of interest that is subject to a foreign gross-basis tax of 5 percent or more.

The Senate amendment provides exceptions to this separate limitation for interest earned by a related person if the interest is directly related to that person's active business, and interest earned by a finance company in connection with export financing of products manufactured in the United States by a related person.

In applying the new separate limitation, certain payments from, and inclusions with respect to, related persons are subject to look-through rules that take into account the income of the payor.

In general, the provision applies to taxable years beginning after 1986.

The separate limitation does not apply (without time limit) in the case of foreign taxes imposed on interest received or accrued on pre-November 17, 1985 loans to borrowers in the same 15 less developed countries covered by the House bill's transitional rule. In general, the amount of a lender's foreign tax credits protected by this exemption is increased by 3 percent annually through 1989 with an interest rate adjustment, and the less developed country loans can be restructured until that date without any loss of the exemption.

The separate limitation also does not apply to interest received or accrued in taxable years before 1997 on other loans held by the taxpayer on November 16, 1985.

Conference Agreement

The conference agreement generally follows the Senate amendment, with the modifications described below.

The conference agreement does not limit the application of the separate limitation for high withholding tax interest to interest earned by banks, financial institutions, insurance companies, and related persons. The agreement extends the provision's application to all interest recipients (subject to the export exception) because entities other than financial institutions making high withholding tax loans may receive the same tax advantages under present law as financial institutions making such loans. The extension also permits the elimination of the related party rule.

Consistent with its extension of the provision to all interest recipients, the conference agreement extends eligibility for the export finance exception from finance companies to all interest recipients. It also clarifies generally the scope of the export finance exception. Under the conference agreement, the separate limitation for high withholding tax interest generally does not apply to interest derived from financing the sale (or other disposition) for use or consumption outside the United States of any property which is manufactured, produced, grown, or extracted in the United States by the interest recipient or a related person, and not more than 50 percent of the fair market value of which is attributable to products imported into the United States. For this purpose, the fair market value of any property imported into the United States is its appraised value, as determined by the Secretary under section 402 of the Tariff Act of 1930 (19 U.S.C. 1401a) in connection with its importation. A related person for this purpose is defined as it is generally for subpart F purposes (Code sec. 954(d)(3), as amended by the conference agreement; *see* C.1.a., below). Interest excluded from the separate limitation for high withholding tax interest under the export finance exception is treated as overall limitation income unless the interest is received by an entity predominantly engaged in the active conduct of a banking, insurance, financing, or similar business. In the latter case, such interest is treated as financial services income.

As discussed at A.1.e., above, under the look-through rules, the separate limitation for high withholding tax interest applies if a controlled foreign corporation makes a high withholding tax loan; the separate limitation's applicability is not limited to high withholding tax loans by U.S. persons. This look-through treatment generally follows that provided in the Senate amendment. Without such look-through treatment, U.S. persons might avoid the separate limitation by originating high withholding tax loans in, or moving such loans to, controlled foreign corporations.

A similar potential for avoidance exists with respect to 10- to 50-percent U.S.-owned foreign corporations: Under current law, high withholding taxes imposed on interest income earned by a 10- to 50-percent U.S.-owned foreign corporation are eligible for the deemed-paid credit. In lieu of look-through treatment for dividends from 10- to 50-percent U.S.-owned foreign corporations, the conferees have adopted a special mecha-

nism for limiting deemed-paid credits in the case of high withholding tax loans.

Under the conference agreement, taxes on high withholding tax interest, to the extent imposed at a rate exceeding 5 percent, are not to be treated as foreign taxes for purposes of determining the amount of foreign taxes deemed paid by a taxpayer with respect to dividends received from a 10- to 50-percent U.S.-owned foreign corporation.

An example illustrates the operation of this provision. Assume that an offshore bank has a 40-percent U.S. owner and a 60-percent foreign owner. It earns $2,000 of gross interest income and incurs $1,700 of interest expense. One thousand dollars of the interest income is subject to a 10-percent gross withholding tax and is, therefore, high withholding tax interest.

The foreign corporation incurs no other expenses and earns no other income. Its earnings and profits are $200 ($2,000 gross interest income less $1,700 interest expense less $100 withholding tax). It pays the full $200 out as dividends. Its U.S. shareholder receives $80 (40 percent) of the $200. The provision treats as noncreditable that portion of the 10-percent withholding tax exceeding 5 percent. Therefore, $50 (5 percent of $1,000) of the $100 withholding tax is noncreditable. The U.S. shareholder's deemed-paid credit with respect to the $80 dividend it receives is therefore reduced from $40 (40 percent of $100) to $20 (40 percent of $50).

Following the Senate amendment, the conference agreement generally makes the separate limitation for high withholding tax interest effective for taxable years beginning after 1986.

The conference agreement does not contain the general 10-year transitional rule included in the Senate amendment.

The conference agreement adopts the Senate amendment's transitional rule for foreign taxes on interest paid by borrowers in less developed countries, with the following modifications. First, the transitional rule is phased out over the five-taxable year period commencing with the taxpayer's first taxable year beginning after 1989. Eighty percent of interest received in that taxable year on a post-1989 qualified loan is not high withholding tax interest. The percentage of interest on a post-1989 qualified loan that is not high withholding tax interest in the second taxable year beginning after 1989 is 60; in the third taxable year is 40; in the fourth taxable year is 20; and in the fifth and succeeding taxable years is zero. Interest on a new loan entered into after 1989 will not be entitled to transition relief. For purposes of determining what constitutes a new loan, the conferees intend the standard of Code section 1001 to apply.

Second, interest paid by borrowers in 18 additional less developed countries is eligible for transitional relief. These countries are Costa Rica, the Dominican Republic, Guyana, Honduras, Jamaica, Liberia, Madagascar, Malawi, Mozambique, Niger, Panama, Romania, Senegal, Sierra Leone, the Sudan, Togo, Zaire, and Zambia.

Third, the amount of the lender's foreign tax credits generally protected by the transitional rule is 110 percent of the product of the base credit amount [1] and the applicable interest rate adjustment in the case of pre-1990 qualified loans, rather than, as under the Senate amendment, such product increased by 3 percent annually through 1989. The agreement clarifies that the applicable interest rate adjustment generally equals the ratio of the weighted 6-month London Interbank Offered Rate (LIBOR) for the taxable year in question to LIBOR on November 15, 1985. The conferees understand that the 11 a.m. 6-month LIBOR quoted by a major bank on November 15, 1985, was 8¼ percent and intend that this rate apply for purposes of the transitional rule.

Fourth, no relief is allowed by reason of the transitional rule for any foreign tax imposed on interest payable with respect to any qualified loan to the extent that the rate of such tax exceeds the foreign withholding tax rate applicable to interest payable with respect to such loan on November 16, 1985. This rule is intended to prevent taxpayers from deriving benefits under the transitional rule from foreign withholding tax rates that have increased since November 16, 1985. For example, if a foreign country doubles its withholding tax rate applicable to a qualified loan over the rate applicable on November 16, 1985, then 50 percent of the interest earned with respect to such loan will not be eligible for transitional relief.

Interest to which the transitional rule applies is passive income (subject to the high-tax kick-out, and the other exceptions to the separate limitation for passive income) unless received by an entity predominantly engaged in the active conduct of a banking, insurance, financing, or similar business. In the latter case, under the predominantly engaged test, such interest is subject to the separate limitation for financial services income.

3. Deemed-Paid Credit

Present Law

A U.S. corporation that owns at least 10 percent of a foreign corporation's voting stock and that has dividend income from the foreign corporation may generally take a deemed-paid credit for a share of the foreign taxes that the foreign corporation paid on the earnings out of which the dividend is paid. A similar credit applies when a 10-percent U.S. corporate shareholder includes in income a portion of a controlled foreign corporation's undistributed earnings under subpart F.

A dividend or subpart F inclusion is considered paid first from earnings and profits of the current year and then from accumulated profits of each preceding year. Actual distributions made in the first 60 days of a taxable year are generally treated as made from the prior year's earnings and profits.

Earnings and profits may be computed in a different manner for actual dividend distributions than for subpart F inclusions.

House Bill

A U.S. corporation's share of foreign taxes paid by a foreign corporation depends on the percentage of the foreign corporation's multi-year pool of accumulated earnings and profits represented by the dividend, including current year earnings and profits. The 60-day rule is repealed.

Earnings and profits are computed in the same manner for actual distributions and for subpart F inclusions, generally following the subpart F rules. However, the rules for translating foreign currency are modified.

The amendments apply to taxable years beginning after 1985. All future dividends (including those paid during the first 60 days of a taxpayer's first taxable year beginning after 1985) are to be treated as paid first out of accumulated profits of the payor derived after the effective date. Dividends in excess of that amount are to be treated as paid out of pre-effective date accumulated profits under present-law ordering rules.

Senate Amendment

The Senate amendment generally follows the House bill except that the Senate amendment draws taxes and earnings and profits from a moving 10-year pool and is effective for taxable years beginning after 1986.

Conference Agreement

The conference agreement generally follows the House bill, with the modifications described below.

First, the agreement is effective for taxable years beginning after 1986.

Second, the agreement grants the Secretary limited regulatory authority, in the case of subpart F inclusions, to modify the pooling method for computing the deemed-paid credit that the legislation otherwise prescribes. This additional grant of regulatory authority is provided primarily to permit the IRS to address certain technical difficulties which it believes may arise in implementing the pooling rules with respect to subpart F inclusions *other than* those for increases in earnings invested in U.S. property. As the Reports of the Committee on Ways and Means and the Committee on Finance on this tax reform legislation indicate, taxpayers should not be able to avoid the effect of pooling by creating subpart F inclusions.

Third, the agreement requires the Secretary to provide such regulations as may be necessary or appropriate to carry out the purposes of the subpart F deemed-paid credit provision (Code sec. 960), including rules which provide for the separate application of that provision to reflect the separate application of the foreign tax credit limitation to separate types of income and loss. The conferees anticipate that the Secretary will exercise this regulatory authority to ensure that, if subpart F income is in fact subject to little or no foreign tax, then the amount of the foreign tax credit determined under section 960 with regard to such income will properly reflect that fact.

4. Effect of Foreign and U.S. Losses on Foreign Tax Credit

Present Law

Under the overall foreign tax credit limitation, a taxpayer first uses a net loss incurred in any foreign country to reduce its income from other foreign countries. If a taxpayer's net foreign losses subject to one separate limitation exceed its foreign income subject to that limitation, the excess arguably reduces the taxpayer's U.S. source taxable income.

An overall U.S. loss first reduces foreign income earned in the loss year and hence pre-credit U.S. tax in that year.

House Bill

The House bill provides that foreign losses first reduce income in the other separate foreign tax credit limitation "baskets" before they reduce U.S. income. A recapture rule applies to foreign income earned in the loss basket after the loss year. The provision is effective with respect to losses incurred in taxable years beginning after 1985.

[1] Following the Senate amendment, the conference agreement defines the base credit amount as the principal amount of loans held by the taxpayer on November 16, 1985, multiplied by the product of the interest rate applicable to such loan on November 16, 1985, and the foreign withholding tax rate applicable to interest payable with respect to such loan on November 16, 1985.

Senate Amendment

The Senate amendment is the same as the House bill except that the Senate amendment adds a U.S. loss allocation rule requiring that U.S. losses reduce categories of foreign income pro rata, and the Senate amendment is effective with respect to losses incurred in taxable years beginning after 1986.

Conference Agreement

The conference agreement follows the Senate amendment, with several technical clarifications.

The first clarification is that the conferees intend that, where a loss is incurred in more than one foreign income basket in a particular year, each such loss be allocated proportionately to foreign income, and then to U.S. income. For example, assume that a U.S. corporation earns $200 of U.S. income and $20 of foreign income subject to the separate limitation for certain distributions from a FSC. The corporation also incurs a $20 overall limitation loss and a $5 shipping basket loss. Under the foreign loss allocation rule, the $20 and $5 separate limitation losses are to be allocated first to the $20 of FSC distributions; only after that allocation is any portion of either separate limitation loss allocated to U.S. income. Each separate limitation loss must be allocated to foreign income in proportion to the ratio of total foreign income to total foreign loss. Thus, $16 of the $20 overall limitation loss ($20 x $20/$25) reduces the $20 of FSC distributions and $4 of the $5 shipping basket loss ($5 x $20/$25) reduces the $20 of FSC distributions. The remaining $4 of overall limitation loss and $1 of shipping basket loss reduce the $200 of U.S. income. For the year, then, the corporation has $195 of U.S. income and no foreign income for foreign tax credit limitation purposes. If the corporation earns sufficient overall limitation income in a later year, then, after application of the foreign loss recapture rule of present law (Code sec. 904(f)), $16 of such income will be subject to recharacterization as FSC distribution income. If the corporation earns shipping income in a later year, then, after application of the foreign loss recapture rule, $4 of such income will be subject to recharacterization as FSC distribution income.

The second clarification relates to the overall foreign loss recapture rule of present law. In light of the new foreign loss allocation and recharacterization rules, the conferees believe that one aspect of that present-law rule's application should be clarified. The conferees intend that foreign income earned in a year following an overall foreign loss year be recharacterized as U.S. income under the overall foreign loss recapture rule only to the extent that that foreign income is of the same limitation type as the previous loss. For example, assume that a U.S. corporation incurs a $100 overall limitation loss and earns $300 of U.S. income in a taxable year. The full $100 loss is an overall foreign loss subject to recapture in a later year because U.S. income is offset by the full amount of the loss. In the following taxable year, the taxpayer earns $50 of overall limitation income, $150 of passive limitation income, and $250 of U.S. income. The conferees intend that the present-law 50-percent limitation (sec. 904(f)(1)(B)) on the amount of foreign income that must be recharacterized as U.S. income in a taxable year be applied to the full amount of the corporation's foreign income, $200, as it would be under present law. Thus, up to $100 of foreign income can be recharacterized as U.S. income under the 50-percent limitation. However, the corporation has only $50 of income of the same limitation type (overall) as the prior year foreign loss. Only that $50 then is to be recharacterized as U.S. income under the overall foreign loss recapture rule. Thus, for foreign tax credit limitation purposes, the corporation has $150 of passive limitation income, $300 of U.S. income, and no overall limitation income for the taxable year. Up to $50 of overall limitation income earned in a subsequent year will be subject to recapture because only $50 of the $100 overall foreign loss incurred in the first taxable year has been recaptured.

The third technical clarification is of the interaction of the new U.S. loss allocation rule, on the one hand, and the foreign loss allocation and recharacterization rules, on the other. The following example illustrates how these rules will operate in relation to one another.

Assume that a U.S. corporation incurs a $50 overall limitation loss abroad and a $100 U.S. loss. It also earns $600 of foreign income subject to the separate limitation for shipping income and $400 of foreign income subject to the separate limitation for passive income. The foreign loss allocation rule applies before the U.S. loss allocation rule. Under the former rule, $30 of the overall limitation loss reduces the $600 of shipping income and the remaining $20 of such loss reduces the $400 of passive income.

Before allocation of the U.S. loss then, the U.S. corporation has $570 of shipping income and $380 of passive income. Under the conference agreement, $60 of the U.S. loss reduces the $570 of shipping income and the remaining $40 of such loss reduces the $380 of passive income. Thus, for foreign tax credit limitation purposes, the corporation has no U.S. income, $510 of shipping income, and $340 of passive income for the year.

In the following year, the corporation incurs a $780 U.S. loss. It also earns $200 of overall limitation income and $600 of shipping income. The U.S. loss allocation rule applies before the foreign loss recharacterization rule. Under the former rule, $195 of the U.S. loss reduces the $200 of overall limitation income and the remaining $585 of such loss reduces the $600 of shipping income.

The corporation thus has no U.S. income, $5 of overall limitation income, and $15 of shipping income for the year before the application of the foreign loss recharacterization rule. Under that rule, $3 of the overall limitation income is recharacterized as shipping income and the remaining $2 of the overall limitation income is recharacterized as passive income. This recharacterization occurs because, in the prior year, $30 of shipping income and $20 of passive income was eliminated by a $50 overall limitation loss.

In the current year then, the corporation has no U.S. income, $18 of shipping income, and $2 of passive income for foreign tax credit limitation purposes. If the corporation earns overall limitation income in later years, up to $45 ($50−$5) of such income will be subject to the foreign loss recharacterization rule.

The fourth clarification is that the new foreign loss allocation and recharacterization rules are to apply on an affiliated group basis in the case of an affiliated group filing a consolidated tax return.

Fifth, the conferees intend that the foreign loss allocation and recharacterization rules apply to net operating loss ("NOL") carryovers. The conferees expect the Secretary to issue regulations adapting the new rules as necessary for this purpose.

The following example illustrates how the foreign loss allocation and recharacterization rules will apply in cases involving NOL carryovers: Assume that a U.S. corporation which operates primarily abroad incurs a $200 NOL. The loss is attributable to foreign activities that would generate overall limitation income. In the following year, the corporation earns $180 of overall limitation income and $30 of income subject to the separate limitation for passive income. The corporation carries the prior year's $200 NOL forward. Under the foreign loss allocation rule, the NOL offsets the $180 of overall limitation first, since the NOL arose in the overall limitation category. The remaining $20 of the loss reduces (to $10) the corporation's passive income.

In the next year, the corporation earns $220 of overall limitation income. Under the foreign loss recharacterization rule, $20 of this overall limitation income is recharacterized as passive income because $20 of passive income was offset by the overall limitation NOL in the preceding year. Thus, for foreign tax credit limitation purposes, the corporation has $200 of overall limitation income and $20 of passive income for the year.

Sixth, the conferees expect that the regulations implementing the foreign loss allocation and recharacterization rules will apply the latter rule to an entity that is a successor entity to one that benefitted from the former rule.

As under the House bill and the Senate amendment, foreign taxes on income recharacterized under the foreign loss recharacterization rule are not themselves to be recharacterized. For example, foreign taxes on overall limitation income that is recharacterized as separate limitation income in a year following an overall limitation loss year may only be credited against U.S. tax on other overall limitation income.

5. Subsidies

Present Law

Under Treasury regulation sec. 1.901-2(e)(3), a tax is not creditable if it is used directly or indirectly as a subsidy to the taxpayer or certain related persons.

House Bill

The House bill codifies the Treasury regulation that denies a foreign tax credit for taxes used as a subsidy to the taxpayer or certain related persons. The provision is applicable to foreign taxes paid or accrued in taxable years beginning after 1985.

Senate Amendment

The Senate amendment is the same as the House bill except that the Senate amendment clarifies that a direct or indirect subsidy to a party to a related transaction is subject to the credit denial rule and the Senate amendment applies to foreign taxes paid or accrued in taxable years beginning after 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

This codification of Treas. reg. sec. 1.901-2(e)(3) is not intended to modify the application of existing Treas. reg. sec. 1.901-2(f)(2)(i), which generally treats a tax as paid by the taxpayer even if another party to a transaction with the taxpayer agrees, as part of the transaction, to assume liability

for the tax. The latter regulation by its terms applies notwithstanding anything to the contrary in Treas. reg. sec. 1.901-2(e)(3).

The conferees intend that the amount of any withholding tax paid be positively established through documentation provided in accordance with the requirements of Code section 905(b) and Treas. reg. sec. 1.905-2. In this regard, the conferees emphasize that the mere fact that withholding took place does not necessarily constitute adequate proof of the amount of tax paid.

The conferees believe that the rule set forth in *Lederman v. Commissioner*, 6 T.C. 991 (1946), which suggests that payment is proved ipso facto by the act of withholding, is subject to abuse. Application of the *Lederman* rule is of particular concern in the context of a "net loan," under which the net amount paid to the U.S. payee is unaffected by the amount of tax withheld. In such a case, it is impossible to determine prima facie whether a claimed amount withheld has actually been withheld, since the amount received by the payee remains unchanged. The logic of the *Lederman* rule simply does not apply in such circumstances, and external proof of withholding and payment over should be required.

The conferees' concerns with respect to documentation of foreign taxes are heightened by the problem of subsidized foreign tax payments. The conferees are informed that in some cases amounts withheld are retained by the withholding agent, in whole or in part, with the explicit or implicit approval of the foreign sovereign. Particularly in the case of a net loan, both payee and payor stand to benefit from a high withholding "tax" that is never paid over to the government; the payor receives cash in hand (equivalent to a lower interest rate) while the payee receives a foreign tax credit for a fictional tax, without any reduction in net proceeds. Although this provision of the agreement, which codifies the prohibition of direct and indirect subsidies of foreign taxes, confirms that a foreign tax credit is disallowed in such cases, the conferees are concerned that without a strict documentation requirement the Service would find it difficult to determine when such a subsidy had been given. Therefore, the conferees expect that a receipt or other positive proof of payment will generally be required to establish the amount of foreign withholding tax paid with respect to foreign source interest income received by U.S. taxpayers.

B. Source Rules

1. Sales of Personal Property

Present Law

Income derived from the purchase and resale of tangible and intangible personal property generally is sourced where title to the property passes to the purchaser (the "title passage" rule). To the extent personal property is depreciable or subject to other basis adjustments (e.g., amortization), gain attributable to the recapture of such adjustments is also sourced where title passes.

Income derived from the manufacture and sale of personal property is treated as having a divided source. Under Treasury regulations, half of such income generally is sourced in the country of manufacture, and half of the income is sourced where title passes. The division of the income between manufacturing and selling activities must be made on the basis of an independent factory price rather than on a 50/50 basis, if such a price exists.

House Bill

The House bill provides generally that income derived from the sale of personal property is sourced in the country of the seller's residence. The bill generally treats U.S. persons as U.S. residents and other persons as nonresidents, except that individuals are considered residents in the country of their tax homes. In defining residence, however, the bill contains an anti-abuse rule that prevents U.S. citizens and resident aliens from claiming nonresidence for sales of personal property if the income derived therefrom is not subject to tax in any foreign country. In the case of inventory property, the bill provides that if a seller has a fixed place of business outside its country of residence that materially participates in the sale, the sales income is sourced in the location of the fixed place of business except in the case of sales to related parties and sales income derived in a country barred by treaty from taxing such income. In the case of sales of property used by a seller in his trade or business, recapture income is sourced where the deductions with respect to the property sold previously offset income, and income in excess of recapture income is sourced under the general residence-of-the-seller rule. The bill sources income attributable to the sale of goodwill where the goodwill was developed.

With respect to inventory property manufactured by a seller, the bill requires that at least 50 percent of the total income derived from the sale be allocated to the manufacturing activity and sourced in the country of manufacture. For property manufactured or produced by a U.S. resident in a foreign trade or business, the bill provides a special rule to ensure foreign source for income derived from these sales.

The House bill is generally effective in taxable years beginning after December 31, 1985, but contains transitional relief for sales made during 1986 under unrelated party contracts entered into before 1986.

Senate Amendment

The Senate amendment generally follows the House bill for sales of noninventory personal property by U.S. residents and for sales of all personal property by foreign residents. For sales of inventory property by U.S. residents, the amendment retains present law for sales income and for the amount of income allocated to manufacturing activity. For sales of personal property used in a seller's trade or business, the Senate amendment follows the House bill for recapture income but retains the title passage rule of present law for income in excess of recapture income. The Senate amendment modifies the House bill's rule for sourcing the income from sales by U.S. residents of noninventory, non-trade or business property (such as stocks, bonds, or other financial assets) through a fixed place of business outside the United States to require that the income be subject to at least a 10-percent foreign tax in order to be treated as foreign source income. The amendment also provides that income derived by U.S. persons from sales of stock in an 80-percent U.S.-owned foreign corporation is treated as foreign source if the corporation derives a substantial amount of its business income in the country where the sale occurs.

The Senate amendment is effective for taxable years beginning after 1986 for sales by U.S. persons and controlled foreign corporations, and for transactions entered into after March 18, 1986 for other persons.

Conference Agreement

The conference agreement follows the Senate amendment with technical clarifications and with a requirement that the Treasury Department study the effect of current law's title passage rule in light of the agreement's lower tax rates and in light of Congressional trade concerns, and report back to the House Committee on Ways and Means and the Senate Committee on Finance not later than September 30, 1987.

The managers also wish to clarify one aspect of the Senate amendment. It is intended that the 10-percent foreign tax payment requirement for foreign sourcing of income from sales of certain property through a fixed place of business be satisfied only if the income is taxed abroad at an effective rate of at least 10 percent.

2. Transportation Income

Present Law

Source of income

Treasury regulations generally allocate transportation services income between U.S. and foreign sources in proportion to the expenses incurred in providing the services. Expenses incurred outside the three-mile limit of U.S. territorial waters are treated as foreign for this calculation. Income and losses from transportation that begins and ends in the United States are sourced in the United States. Income and losses from transportation that begins in the United States and ends in a U.S. possession (or vice versa) generally are treated as 50-percent U.S. source and 50-percent possessions source. Under a special rule, income and expenses associated with the lease or disposition of a vessel or aircraft that is constructed in the United States and leased to U.S. persons are sourced in the United States, regardless of where the vessel or aircraft may be used. A similar special sourcing rule applies to transportation income and expenses associated with the lease of an aircraft (wherever constructed) to a regularly scheduled U.S. air carrier, to the extent the aircraft is used on U.S.-U.S. possessions routes.

Reciprocal exemption

The United States does not tax foreign persons' earnings from the operation of ships and aircraft registered in foreign countries that grant equivalent tax exemptions to U.S. citizens and U.S. corporations.

Gross-basis tax

The United States (in contrast with a number of countries) does not impose a gross basis tax on domestic source shipping income of foreign persons.

House Bill

Source of income

The House bill sources transportation income and loss attributable to U.S.-foreign and foreign-U.S. routes as 50-percent U.S. source and 50-percent foreign source and repeals the two special sourcing rules of present law.

Reciprocal exemption

The bill modifies the reciprocal exemption for foreign persons' shipping and aircraft income so that its availability turns on whether a foreign person's residence country gives U.S. citizens and U.S. corporations an equivalent foreign tax exemption, not on whether the country where the ship or aircraft is registered gives such an exemption. The bill does not treat corporations as residents of a country that exempts U.S. carriers unless 75 percent or more of the ultimate owners are U.S. shareholders of con-

trolled foreign corporations or are residents of countries that exempt U.S. carriers from tax.

Gross basis tax

The bill imposes a four-percent gross basis income tax on U.S. source transportation income of foreign persons, unless prohibited by treaty or reciprocal exemption (with anti-conduit rules to prevent flag shopping), or unless the income is effectively connected with a U.S. trade or business. Transportation income is not effectively connected with a U.S. trade or business under the bill unless attributable to a U.S. fixed place of business where the carrier has regularly scheduled transportation into the United States to which substantially all of the carrier's U.S. source transportation income is attributable. The bill provides for collection of the gross basis tax through a withholding requirement imposed on the last person having control over the income.

The bill is generally effective for taxable years beginning after 1985, but retains present law for certain leasing income attributable to an asset owned on January 1, 1986, if the asset was first leased before that date.

Senate Amendment

Source of income

The Senate amendment follows the House bill in determining the source of transportation income but excludes from the definition of transportation income any income derived by an employee from the performance of personal services (except on routes to and from U.S. possessions).

Reciprocal exemption

The Senate amendment generally follows the House bill in determining foreign persons' eligibility for reciprocal exemption. It modifies the House bill's rule to provide that (1) rental income on a full or bareboat basis is eligible for the reciprocal exemption; (2) the Secretary may apply the reciprocal exemption separately to different types of transportation income (such as income from regularly scheduled air transportation or bareboat charter income); and (3) corporations are not considered residents of countries that exempt U.S. persons unless 50 percent or more of the ultimate individual owners are U.S. shareholders of controlled foreign corporations or are residents of countries that exempt U.S. carriers from tax.

Gross basis tax

The amendment generally follows the House bill in imposing a four-percent gross basis tax on U.S. source transportation income of foreign persons, but limits the tax's application to residents of countries that impose gross tax on transportation income of U.S. persons (with anti-conduit rules to prevent flag shopping). The amendment does not contain the House bill rules modifying the determination of effectively connected transportation income and collecting the gross basis tax by withholding. Instead, the amendment retains present law's determination of effectively connected income and requires foreign persons to file U.S. income tax returns. The amendment allows foreign persons not resident in countries that impose gross basis tax on U.S. persons to elect to be taxed on a net basis on transportation income not effectively connected with a U.S. trade or business.

The amendment is generally effective for taxable years beginning after 1986 but adopts the House bill's grandfather rule and contains a targeted transitional rule.

Conference Agreement

Source of income

The conference agreement follows the Senate amendment. The conferees wish to clarify that income derived from personal services performed as an employee that is excluded from U.S. source gross transportation income continues to be taxed as under present law. Thus, the sourcing of such income is unchanged: income attributable to services performed in the United States or in U.S. territorial waters is U.S. source.

Reciprocal exemption

The conference agreement generally follows the Senate amendment, with the following clarifications. The agreement provides that a foreign corporation organized in a country that exempts U.S. citizens and domestic corporations from tax on shipping income will be exempt from U.S. tax on shipping income, notwithstanding that third country residents have interests in the corporation, provided at least 50 percent of its value is benefically owned by individuals that reside in countries which have reciprocal tax exemptions with the United States. Individuals that reside in countries which have reciprocal exemptions with the United States qualify for this purpose even if they are citizens or subjects of third countries that do not have such exemptions in place. Residence, for this purpose, is intended to mean the country of an individual's tax home. The conferees wish to clarify that the agreement's provisions do not deny any benefits available under present law in an income tax treaty between the United States and a foreign country.

Gross basis tax

The conference agreement follows the House bill in applying the gross basis tax and in determining a foreign person's effectively connected transportation income, but adopts the Senate amendment's method of collecting any tax due. The agreement modifies, however, the determination of effectively connected transportation income in one respect: a foreign person engaged in the leasing of ships or aircraft will derive transportation income effectively connected with a U.S. trade or business only if substantially all of the person's U.S. source gross transportation income is earned through a fixed place of business in the United States.

The agreement is generally effective for taxable years beginning after 1986 but retains present law for certain leasing income attributable to an asset owned on January 1, 1986 if the asset was first leased before that date and contains a targeted transitional rule.

3. Other Offshore Income and Income Earned in Space

Present Law

Income derived by U.S. residents from activities conducted in space or outside the territorial waters of any country is generally treated as foreign source.

House Bill

The House bill sources offshore income and income earned in space in the recipient's country of residence. The bill defines this income to include any activity for the use, or hiring or leasing for use, of a spacecraft, any activity conducted on or beneath water not within the jurisdiction (as recognized by the United States) of any country, and any activities performed in Antarctica. The bill excludes from this definition any activity giving rise to transportation income and any activity with respect to mines, oil and gas wells, or other natural deposits located within a country's jurisdiction (as recognized by the United States). The bill treats foreign corporations controlled by U.S. persons as U.S. residents. The bill is effective for taxable years beginning after 1985.

Senate Amendment

The Senate amendment generally follows the House bill but sources income from the transmission of communications from the United States to any foreign country (or vice-versa) as 50 percent U.S. source and 50 percent foreign source. The amendment is effective for taxable years beginning after 1986.

Conference Agreement

The conference agreement follows the Senate amendment, with modifications.

The agreement does not adopt the provision that treats a foreign corporation controlled by U.S. persons as a U.S. person for purposes of the source rule. The application of the separate foreign tax credit limitation for shipping income to any space or ocean income derived by a controlled foreign corporation provides adequate assurance, in the conferee's view, that high foreign taxes on unrelated income will not inappropriately offset U.S. taxes on this generally low-taxed income.

The conference agreement modifies the Senate amendment's provision that treats international communication income as 50-percent U.S. source and 50-percent foreign source by applying this source rule to U.S. persons only. However, the conference agreement treats international communication income derived by foreign persons as U.S. source if the income is attributable to a U.S. office or other U.S. fixed place of business, and provides regulatory authority to treat other international communication income derived by a foreign person (e.,g., a controlled foreign corporation) as other than foreign source. In particular, the conferees anticipate that treatment of such income in the hands of controlled foreign corporations like similar income in the hands of U.S. persons may be necessary to preserve the integrity of the provision.

4. Dividend and Interest Income

Present Law

Dividend and interest income generally is sourced in the country of residence of the payor. However, if a U.S. corporation derives more than 80 percent of its income from foreign sources (such a corporation is referred to as an "80/20 company"), all dividends and interest paid by that corporation are treated as foreign source income. A similar exception applies to interest paid by a resident alien individual who derives more than 80 percent of his or her income from foreign sources (an "80/20 individual"). Treating this income as foreign source increases the foreign tax credit limitation of U.S. recipients and precludes imposition of U.S. withholding tax for foreign recipients.

Another exception to the residence-of-the-payor rule applies to dividends paid by U.S. corporations that have elections in effect under Code section 936 (possessions corporations). Dividends paid by possessions corporations are treated as foreign source.

Other exceptions to the general sourcing rule for interest income function as exemptions from U.S. tax for limited classes of income earned by foreign persons. For example, interest on foreign persons' U.S. bank accounts and deposits is treated as for-

eign source and, consequently, is not subject to U.S. withholding tax.

House Bill

The House bill generally repeals the special source rule for dividends and interest paid by 80/20 companies and interest paid by 80/20 individuals. Thus, the bill generally treats this income as U.S. source. The bill preserves two exceptions to U.S. sourcing, however: (1) it exempts from U.S. withholding tax interest paid to unrelated foreign persons by an 80/20 company engaged in an active trade or business in a foreign country so long as the interest is attributable to the active business, and (2) it allows unrelated U.S. financial institutions to continue to treat as foreign source interest received from 80/20 companies engaged in the active conduct of a foreign trade or business so long as the interest is attributable to the active business. The bill also retains present law for dividends paid by possessions corporations.

The House bill repeals for certain classes of income other special source rules of present law but retains a U.S. tax exemption for this income (i.e., the bill treats this income as U.S. source but excludes the income from U.S. withholding tax).

The provisions are generally effective for dividends and interest paid in taxable years beginning after 1985. Present law is retained for interest paid on debt obligations outstanding on December 31, 1985, and a targeted transitional rule for dividends is provided.

Senate Amendment

The Senate amendment provides that dividends and interest paid by an 80/20 company and interest paid by an 80/20 individual are sourced under a look-through rule that bases sourcing on the source of the income derived by the payor. The amendment follows the House bill in retaining present law for dividends paid by possessions corporations.

The amendment follows the House bill in repealing foreign sourcing, but retaining U.S. tax exemption, for certain classes of income paid by U.S. corporations.

The Senate amendment applies to interest and dividends paid in taxable years beginning after 1986.

Conference Agreement

The conference agreement generally follows the House bill in repealing the special sourcing rule of present law for dividends and interest paid by 80/20 companies, with modifications that incorporate the Senate amendment's look-through rules in certain cases (including application to 80/20 individuals). The conferees are of the view that the United States should generally retain primary tax jurisdiction over dividends and interest paid by its residents. Particularly with respect to dividends paid to U.S. persons, the conferees do not believe that dividends should be foreign source since the payor computes its foreign tax credit limitation, accounts for its foreign source income, and credits any foreign taxes imposed on that income at the payor level. The conferees believe that it is appropriate to treat interest that an 80/20 company pays its U.S. shareholders more favorably than dividends it pays them (by allowing flow-through of source for interest but not for dividends) because that interest, unlike the dividends, is likely to reduce foreign taxes that the United States may have to credit.

The conferees believe, however, that, in certain cases, U.S. sourcing of dividends and interest is not appropriate in the context of a U.S. corporation primarily engaged in an active trade or business in foreign jurisdictions (including U.S. possessions). The conference agreement provides that foreign shareholders of a U.S. corporation engaged in an active trade or business in foreign jurisdictions to which at least 80 percent of the corporation's gross income is attributable are subject to U.S. withholding tax on the percentage of the dividends paid by that corporation that the corporation's U.S. source gross income bears to the corporation's total gross income measured over the 3-year period preceding the year of payment. Interest received from a U.S. corporation that meets the above-described 80-percent active business requirement also retains foreign sourcing, as follows: unrelated U.S. and foreign recipients are to treat the entire interest payment as foreign source; related recipients must treat as U.S. source a percentage of the interest equal to the ratio of the corporation's U.S. source gross income to the corporation's total gross income (measured over the 3-year period preceding the year of payment). The agreement provides similar rules for interest paid by resident alien individuals engaged in active foreign businesses in foreign jurisdictions.

The conference agreement provides that the 80-percent active business requirement may be met by the U.S. corporation alone or, instead, may be met by a group including domestic or foreign subsidiaries in which the U.S. corporation owns a controlling interest (at least a 50-percent interest). In allowing attribution of a subsidiary's active foreign business to a controlling corporate shareholder, the conferees also intend that the character (i.e., foreign active business income) of the subsidiary's gross income be attributed to the corporate shareholder on the receipt of dividends for purposes of determining the percentage of dividends paid by the shareholder that are U.S. source. Thus, dividends received by a corporate shareholder from controlled subsidiaries, though treated as U.S. source, are to be characterized as foreign active business income in the same proportion that the controlled subsidiaries' foreign active business income bears to their total gross income for this purpose.

The agreement defines a related person as any individual, corporation, partnership, trust, or estate which owns a 10-percent interest in the payor, or in which the payor owns a 10-percent interest, as well as any 10-percent interest in a corporation, partnership, trust, or estate owned by the same persons that own a 10-percent interest in the payor.

The agreement's provisions are illustrated in the following example. Assume that a U.S. corporation and an unrelated foreign corporation jointly incorporate a second U.S. corporation to operate a mining business in a foreign country. The second U.S. corporation earns $450 of income, all of which is foreign source, from the mining operation in its first year and $50 of U.S. source income from investments in the United States. At the end of the year, the second corporation distributes a $100 dividend to each of its two shareholders. The first U.S. corporation in turn distributes $50 to its shareholders, all of whom are foreign residents. The agreement treats the $100 dividend to the first U.S. corporation as entirely U.S. source; the $100 dividend to the foreign shareholder is treated as 90 percent foreign source and as 10 percent U.S. source. Since the first U.S. corporation owns a controlling interest in the second U.S. corporation, the second corporation's active foreign business is attributed to the first corporation; therefore, assuming that the first corporation has no other income, the first corporation satisfies the agreement's 80-percent active foreign business requirement. Even though it is treated as U.S. source, the dividend from the second corporation retains the same character as the second corporation's income in determining the source of dividends paid by the first corporation. Accordingly, under the agreement, since the first corporation has no other income, 90 percent of the first corporation's dividends paid to its shareholders are foreign source and 10 percent are U.S. source. If, however, for example, the first U.S. corporation had $13 or more of non-foreign active business income in that year, the first corporation would not satisfy the 80-percent foreign active business requirement and would, therefore, pay all U.S. source dividends.

In adopting the new 80/20 standards, the conferees decided against requiring a minimum amount of dividends and interest paid to foreign persons to be subject to U.S. tax because of the agreement's minimum tax provision which ensures that profitable U.S. 80/20 corporations pay some U.S. tax (the provision that only allows 90 percent of creditable foreign taxes to offset the alternative minimum tax). The conferees are of the view that that provision achieves their policy objective: that profits flowing through U.S. corporations not escape all U.S. tax at the corporate and shareholder levels.

The conference agreement follows the House bill and the Senate amendment in (1) repealing foreign sourcing, but preserving U.S. tax exemption, for certain limited classes of income (e.g., interest on bank deposits), and (2) in retaining foreign sourcing for dividends paid by possessions corporations.

The agreement adopts the Senate amendment's general effective date but contains the House bill's grandfather rule for indebtedness outstanding on December 31, 1985 and contains a targeted transitional rule. In addition, the agreement provides that, in determining the amount of dividends paid to foreign shareholders and interest paid to related persons in 1987 that are U.S. source, a calendar year 80/20 company under present law is to use the base period 1984, 1985, and 1986 in computing its U.S. source portion. Interest paid to unrelated persons in 1987 is foreign source if paid by a corporation that is an 80/20 company under present law. The agreement provides that, for 1988 and subsequent years, the amount of dividends and interest that are treated as U.S. source under the agreement is to be determined by the payor's income measured over a base period beginning in 1987. Similar rules apply to 80/20 individuals (as defined under present law).

5. Allocation of Interest and Other Expenses (Other Than Research and Development)

Present Law

Under Treasury regulations, taxpayers generally allocate interest and other expenses between gross U.S. and gross foreign income on a separate, company-by-company basis, even if they are members of an affiliated group. The separate company allocation rule conflicts with a Court of Claims case, *International Telephone & Telegraph Corp.* v. *United States*, 79-2 USTC para. 9649, decided under the law in effect prior

to the effective date of the regulations, which indicates that expenses that are not definitely allocable against U.S. or foreign gross income should be deducted from gross income on a consolidated group basis.

Generally, under Treasury regulations, interest expense is allocated between U.S. and foreign income on the basis of the value of the taxpayer's assets that generate U.S. and foreign income. For affiliates, only stock basis is taken into account. In limited cases, interest on nonrecourse debt is directly allocated against the income from the asset financed by that debt.

Optional gross income methods for apportioning interest expense are also available under the regulations.

Taxpayers generally may take into account tax-exempt income and assets in allocating deductible interest and other expenses. Since tax-exempt income and assets are generally U.S.-based, taxpayers can derive a second tax benefit (higher foreign income and, hence a higher foreign tax credit limitation) from ownership of tax-exempt assets.

House Bill

The House bill generally requires allocation of interest expense as if an affiliated group consisted of one taxpayer. Except to the extent provided in regulations, the bill provides that a similar rule applies to other expenses not directly allocable to a class of income.

The House bill generally requires all corporate members of U.S. affiliated groups to allocate interest on a consolidated group basis but it permits some corporations that cannot join in filing consolidated returns to continue allocating expenses on a separate company basis. It permits financial institutions to allocate interest expense separately if their activities are independent of other members. The House bill modifies the asset method of allocating interest expense by looking to earnings and profits of foreign corporations as well as stock basis, and it eliminates the optional gross income methods for apportioning interest expense. Tax-exempt income and assets generating tax-exempt income are not taken into account for purposes of allocating interest expense. The House bill does not use the one-taxpayer method to allocate interest that is directly allocable under present law.

The House bill is generally effective for taxable years beginning after 1985. The allocation of interest on pre-existing loans is phased in over a three-year period. An alternative transitional rule permits up to a five-year phase-in of the consolidated group rule for recent loans, and a targeted transitional rule is provided.

Senate Amendment

The Senate amendment generally follows the House bill, with substantial modifications. Instead of basing interest expense allocation on expenses of a U.S. affiliated group only, as the House bill does, the Senate amendment provides that corporate members of affiliated groups must allocate interest between U.S. and foreign income on the basis of an expanded affiliated group, which includes foreign and possessions corporations. The Senate amendment follows the House bill with respect to the allocation of expenses other than interest.

In addition, the Senate amendment provides an exception for "qualified" debt (in general, unguaranteed debt) of lower-tier U.S. members. Upon a group-wide election, such debt of any U.S. member is treated as supporting only that member's assets. Under an equalization rule, other members' unqualified debt is allocated to foreign income to the extent necessary to reach the result under the general rule, if possible.

The Senate amendment (unlike the House bill) makes no exceptions to the interest allocation rules for financial institutions.

In connection with the consideration of interest expense of foreign affiliates, all assets of U.S., foreign, and possessions affiliates (including debt-financed assets) are taken into account for purposes of the asset method of allocating interest expense.

The Senate amendment requires the Secretary to prescribe regulations to apportion the expenses that are allocated to foreign source income among the various categories of foreign source income that are subject to separate foreign tax credit limitations.

The Senate amendment is generally effective for taxable years beginning after 1986, but the allocation of interest on existing loans is phased in over 4 years. Targeted transitional rules are provided.

Conference Agreement

In general

The conference agreement generally follows the House bill. Except to the extent provided in regulations, expenses other than interest that are not directly allocable or apportioned are to be allocated and apportioned as if all members of the affiliated group were one taxpayer. The agreement, like the Senate amendment, includes possessions corporations (sec. 936) in the group treated as one taxpayer. In addition, the agreement contains the Senate provision requiring regulations to allocate interest to income subject to the separate foreign tax credit limitations.

The conference agreement modifies the provision applying the one-taxpayer rule to banks for the purpose of interest expense allocation. The agreement makes it clear that all banks in a group are to be treated as one taxpayer (rather than each bank being treated as a separate taxpayer for this purpose).

The conference agreement extends, under regulations, the application of the one-taxpayer rule for expense allocation beyond the foreign tax credit limitations of Code section 904 to other provisions governing international taxation.

In the case of an integrated financial transaction such as a debt-financed acquisition of foreign currency debt obligations or similar arbitrage transactions, the agreement authorizes the Secretary to provide for the direct allocation of interest expense incurred on funds borrowed to acquire these assets against income from the assets involved in the integrated transaction, if appropriate. In addition, the conferees intend that the Secretary use the regulatory authority provided in the agreement to allocate interest expenses directly to interest or other passive income where such a direct allocation is necessary to prevent taxpayers from defeating the purposes of this provision.

When a taxpayer owns at least a 10-percent interest in a U.S. corporation but that corporation is not part of the group treated as one taxpayer, the taxpayer's basis in that stock is to be increased by the taxpayer's share of the earnings and profits of the U.S. corporation. This basis step-up conforms to that required for stock of foreign corporations whose dividends are eligible for the deemed-paid foreign tax credit.

Effective date and transitional rules

The conference agreement is generally effective for taxable years beginning after 1986. The conference agreement adopts the targeted transitional rules of the Senate amendment, one additional targeted transitional rule and one special rule. It adopts the general transition rules of the House bill, applying the three-, four-, and five-year transition rules for taxable years beginning after 1986 with respect to the amount of debt outstanding on November 16, 1985. For the purpose of this provision's phase-in rules for interest expense, only interest-bearing indebtedness is to be considered as debt outstanding on November 16, 1985. If a portion of a taxpayer's debt is not eligible for the benefits of a phase-in rule, the benefits of the rule are to apply to interest incurred with respect to each of the taxpayer's outstanding debt obligations on a pro rata basis.

The general three-year "phase-in" rule of the House bill applies to all the elements of the interest expense allocation (including the change to consider an affiliated group as one taxpayer, the elimination of the gross income method, and the modification of the asset method). This "phase-in" rule provides that for the first three taxable years of the taxpayer beginning after December 31, 1986, the bill's interest expense allocation rules apply only to an applicable percentage of interest expense paid or accrued by the taxpayer during the taxable year. That applicable percentage is determined with respect to an amount of indebtedness that does not exceed the amount outstanding on November 16, 1985. In the case of the first taxable year, the applicable percentage is 25 percent; in the case of the second taxable year, the applicable percentage is 50 percent; in the case of the third taxable year, the applicable percentage is 75 percent.

A separate transitional rule, adopted from the House bill, applies only to the rule requiring consideration of the consolidated group for determination of interest expense (new sec. 864(e)(1)). That rule considers only recently incurred indebtedness. In the case of an increase in the amount of a taxpayer's outstanding debt on May 29, 1985, over the amount of the taxpayer's outstanding debt on December 31, 1983, the interest expense rule that requires consideration of the consolidated group is phased in over five years. In the case of the first taxable year beginning after 1986, the rule applies only to 16-2/3 percent of the interest expenses paid or accrued by the taxpayer on the increased indebtedness. In the case of the second taxable year beginning after 1986, the rule applies to only 33-1/3 percent of the interest expenses paid or accrued by the taxpayer on the increased indebtedness, and so on, until the rule applies to 83-1/3 percent of interest expenses on the increased indebtedness in the fifth year beginning after 1986, and to all interest expense.

A similar separate four-year transitional "phase-in" rule (also adopted from the House bill) applies to certain increases in indebtedness incurred during 1983. The one-taxpayer rule will apply only to the applicable percentage of interest expenses paid or accrued on the increased indebtedness by the taxpayer during the taxable year. In the case of the first taxable year, the applicable percentage is 20; in the second year, 40; in the third year, 60; and in the fourth year, 80.

The three-, four-, and five-year phase-in rules apply to interest expenses paid or accrued with respect to an applicable amount of indebtedness. These rules allow present law to apply to a certain percentage of interest expenses on such indebtedness. The phase-in rules are not to apply indebtedness increases future years after decreasing to equal again the indebtedness outstanding on November 16, 1985. However, if, for example, a taxpayer refinances debt outstanding on November 16, 1985 by incurring new debt as it pays off old debt, and the documentation for the new debt specifically identifies the old debt being refinanced, the phase-in rules are intended to apply to the new debt.

In the case of a company that acquires another company after November 16, 1985, the debt of the target and the acquirer are to be aggregated in determining the amount of debt qualifying for transition relief. For example, if a corporation with $50 of debt outstanding on that date acquires on June 1, 1986, another corporation that had $20 of debt outstanding on November 16, 1985, the amount of debt of the group qualifying for transitional relief is $70.

6. Allocation of Research Expenses to Foreign Source Income

Present Law

A suspended Treasury Regulation (sec. 1.861-8) rule requires taxpayers with foreign source income from products in a product area in which the taxpayers do U.S. research to allocate part of their U.S. research expense against the foreign source income. In 1981, the Congress suspended this rule for two years, so that all U.S. research expenditures generally offset U.S. source income. In 1984, the Congress extended the moratorium for two additional years.

House Bill

The House bill provides that taxpayers are to apportion 50 percent of their U.S.-incurred research expense to domestic income and apportion the remainder on the basis of gross sales or gross income. The bill is generally effective for taxable years beginning after August 1, 1985 and on or before August 1, 1987.

Senate Amendment

The Senate amendment follows the House bill except that it requires taxpayers to apportion 75 percent of their U.S.-incurred research expense to domestic income and apportion the remainder on the basis of gross sales or gross income. Since the Consolidated Omnibus Budget Reconciliation Act of 1985 extended the regulation moratorium one additional year, the Senate amendment is effective for taxable years beginning after August 1, 1986 and on or before August 1, 1987.

Conference Agreement

The conference agreement follows the House bill but is effective for taxable years beginning after August 1, 1986 and on or before August 1, 1987.

Because of the importance of U.S.-based research activity, the conferees encourage the tax-writing committees to continue to study whether any additional permanent tax incentives for U.S. research might be appropriate. The conferees consider it important that the relative equity and efficiency of alternative tax incentives be fully analyzed before any decision is made to adopt a permanent tax incentive. The conference agreement does not reflect a judgment by the conferees that any provision of the existing regulation is necessarily correct or incorrect. It is anticipated that the Treasury Department will expeditiously pursue a permanent resolution of the allocation issue. The conferees do, however, consider it important that the Treasury Department reexamine its regulations in light of concerns expressed by the tax-writing committees of both Houses. Moreover, the conferees expect that the Treasury Department, in connection with the U.S. treaty process, will resolve any incompatibility with foreign tax systems that may arise if the regulations were to go into effect.

C. U.S. Taxation of Income Earned Through Foreign Corporations

1. Tax Haven Income Subject to Current Tax

Present Law

a. Tax haven income generally

In general, no current U.S. tax is imposed on the foreign income of a foreign corporation, and a U.S. investor in a foreign corporation is taxed only when income is distributed to him. However, the deferral of U.S. tax on the income of U.S.-owned foreign corporations does not apply to certain kinds of income that are suited to tax haven operations. Under the Code's subpart F rules (secs. 951-964), when a U.S.-controlled foreign corporation earns this tax haven income, the United States will generally tax the corporation's 10-percent U.S. shareholders currently.

Foreign personal holding company income

Subpart F income includes foreign base company income. One type of base company income is foreign personal holding company (FPHC) income, consisting generally of several types of passive income. Some passive income is not included in FPHC income, however.

Foreign base company shipping income

Subpart F income also includes foreign base company shipping income (which excludes shipping income reinvested in shipping operations).

Banking exceptions

Subpart F income does not generally include interest, dividends, or securities gains derived from unrelated persons by banking, financing or similar businesses, or certain interest derived by such businesses from related persons engaged in the conduct of a banking, financing, or similar business.

Insurance income

Other categories of subpart F income include certain income from the insurance of U.S. risks and foreign base company income from certain sales and services (including insuring related persons' third-country risks). Foreign corporations' earnings from insuring foreign risks of unrelated persons are not subject to current U.S. tax under subpart F. Interest, dividends, and securities gains received by foreign insurance companies from the investment of unearned premiums and reserves are not subject to current tax under subpart F either.

Formed or availed of to avoid tax

Current U.S. tax is generally not imposed under subpart F if the taxpayer establishes that a U.S.-controlled foreign corporation was not formed or availed of to avoid tax.

Controlled partnerships

Controlled partnerships are not treated as related persons for purposes of the subpart F rules that tax certain transactions with related persons.

Deficits

Under the "chain deficit" rule, if a controlled foreign corporation has a current deficit in earnings and profits, then another commonly controlled foreign corporation in the same chain of ownership may have its current earnings and profits reduced for subpart F purposes to take into account that deficit.

A controlled foreign corporation's subpart F income cannot exceed its earnings and profits for the year. Under this rule, current deficits in earnings and profits in any income category, including nonsubpart F income categories, reduce subpart F earnings and profits and, thus, subpart F income. Under the same provision, a controlled foreign corporation's deficits in earnings and profits from prior years reduce its subpart F income in the current year.

b. Determination of U.S. control of foreign corporations

The rules that impose U.S. tax currently on tax haven income of a foreign corporation apply only if a U.S. ownership requirement is satisfied: more than 50 percent of the voting power of the corporation (more than 25 percent in the case of certain insurance companies) must belong to U.S. persons each of which owns at least 10 percent of the voting power. Older, similar, but less extensive rules requiring current U.S. taxation—the foreign personal holding company rules (Code secs. 551-558)—apply only if more than 50 percent of the value of the corporation belongs to five or fewer U.S. individuals.

c. De minimis and full inclusion rules

The rules that impose current U.S. tax on foreign base company income of a foreign corporation apply only if certain threshold requirements are met. One such requirement is that 10 percent or more of the foreign corporation's gross income must be foreign base company income. If more than 70 percent of the foreign corporation's gross income is foreign base company income, all of its gross income is treated as foreign base company income.

d. Possession-chartered corporations

A corporation chartered in a U.S. possession is not treated as a controlled foreign corporation if at least 80 percent of its income is derived in the possessions and at least 50 percent of its gross income is from certain active businesses; thus, U.S. tax on its tax haven income is deferred.

House Bill

a. Tax haven income generally

Foreign personal holding company income

The House bill adds several passive types of income to foreign personal holding company (FPHC) income for subpart F purposes.

Sales of property which does not generate active income

The House bill treats as FPHC income for subpart F purposes gains from the sale of any property that gives rise to passive types of income.

Commodities transactions

The House bill treats as FPHC income, income from commodities transactions generally (subject to exceptions for hedging transactions and for active producers, processors, merchants, or handlers of commodities).

Foreign currency gains

Foreign currency gains generally (with a business needs exception) are subpart F FPHC income under the House bill.

Income equivalent to interest

No provision.

Passive leasing income

The House bill clarifies that passive leasing income generally is subpart F FPHC income.

Related person exceptions for interest, rents, and royalties

The House bill treats as subpart F FPHC income payments from related corporations in the same foreign country that reduce the subpart F income of the payors.

Same country dividend exception

No provision.

Base company rents and royalties

The House bill treats as subpart F FPHC income rents and royalties routed through a related party in a country that is neither the country of creation nor of use of the rented or licensed property.

Foreign base company shipping income

The House bill repeals the reinvestment exception so as to tax shipping income currently.

Banking exceptions

The subpart F banking exceptions are repealed.

Insurance income

The House bill amends the definition of tax haven insurance income to include income from the insurance of unrelated persons' risks outside of the insuring company's country of incorporation. In addition, it repeals the 5-percent de minimis exception for income from the insurance of U.S. risks, and repeals the exceptions for investment income from unearned premiums and reserves.

Formed or availed of to avoid tax

The House bill replaces the subjective tax-avoidance test with an objective test that looks to the rate of foreign tax paid by a U.S.-controlled foreign corporation, allowing the IRS to determine whether income (otherwise subject to subpart F) should not be treated as tax haven income.

Controlled partnerships

The House bill treats a partnership that is controlled by a controlled foreign corporation or by the person controlling the foreign corporation as a related person for purposes of subpart F.

Effective date

The foregoing subpart F amendments apply to taxable years of foreign corporations beginning after 1985.

b. Determination of U.S. control of foreign corporations

The House bill amends the U.S. ownership requirements for imposition of the anti-tax haven and foreign personal holding company rules. For the anti-tax haven rules to apply, 50 percent or more (rather than more than 50 percent) of the vote or value (not merely vote) of a foreign corporation must belong to 10-percent U.S. shareholders. Similarly, for the foreign personal holding company rules to apply, 50 percent or more (rather than more than 50 percent) of the vote or value (not merely value) of a foreign corporation must be owned by five or fewer U.S individuals.

The provision generally applies to taxable years beginning after 1985. The change to the 50-percent-or-more test does not apply to taxable years of foreign corporations beginning during 1986.

c. De minimis and full inclusion rules

The House bill applies the de minimis and 70-percent tests for foreign base company income on the basis of net income instead of gross income. The change is effective for taxable years of foreign corporations beginning after 1985.

d. Possession-chartered corporations

The exception to the anti-tax haven rules for corporations chartered in the possessions is repealed. The repeal applies to taxable years beginning after 1985. Under a transition rule, deficits in earnings and profits accrued, and property acquired, in taxable years beginning before 1986 are exempt from the application of the anti-tax haven rules that would otherwise result from the repeal of the exception.

Senate Amendment

a. Tax haven income generally

Foreign personal holding company income

Like the House bill, the Senate amendment adds several passive types of income to FPHC income for subpart F purposes. However, the Senate amendment's additions differ from the House bill's in some respects. Also, the Senate amendment exempts from subpart F FPHC treatment certain mining-related dividends that are subpart F income under present law.

Sales of property which does not generate active income

The Senate amendment provides that FPHC income includes gain from the sale of any noninventory property that gives rise to passive types of income or does not give rise to any income, with an allowance for offsetting losses from such sales.

Commodities transactions

The Senate amendment generally follows the House bill but provides an allowance for offsetting losses from commodities transactions.

Foreign currency gains

Foreign currency gains from transactions in financial assets and liabilities (with a business needs exception and an allowance for offsetting foreign currency losses) are subpart F FPHC income under the Senate amendment.

Income equivalent to interest

The Senate amendment provides that income equivalent to interest is subpart F FPHC income.

Passive leasing income

The Senate amendment is the same as the House bill.

Related person exceptions for interest, rents, and royalties

The Senate amendment is the same as the House bill.

Same country dividend exception

The same country exclusion of present law is extended to dividends attributable to specified mining-related income from a less than 50-percent owned corporation.

Base company rents and royalties

No provision.

Foreign base company shipping income

No provision.

Banking exceptions

The Senate amendment provides that the banking exceptions from subpart F apply only to bona fide, active banking operations.

Insurance income

No provision.

Formed or availed of to avoid tax

No provision.

Controlled partnerships

The Senate amendment is the same as the House bill.

Effective date

The foregoing subpart F amendments apply to taxable years of foreign corporations beginning after 1986.

b. Determination of U.S. control of foreign corporations

The Senate amendment retains the more-than-50-percent tests of present law and adopts the vote-or-value rules of the House bill.

The provision applies to taxable years beginning after 1986. Under a transition rule, deficits in earnings and profits accrued, and U.S. property acquired, in taxable years beginning before 1987 are not taken into account in applying the anti-tax haven rules. A special rule is provided for determining the portion of certain trust distributions that has been previously taxed under subpart F.

c. De minimis and full inclusion rules

The Senate amendment reduces the de minimis test for foreign base company income from 10 percent or more of gross income to 5 percent or more of gross income. It does not amend the full inclusion rule. This provision is effective for taxable years of foreign corporations beginning after 1986.

d. Possession-chartered corporations

The Senate amendment is the same as the House bill, except that it is effective for taxable years beginning after 1986 and, under a transition rule, deficits in earnings and profits accrued, and property acquired, in taxable years beginning before 1987 are not taken into account in applying the anti-tax haven rules.

Conference Agreement

a. Tax haven income generally

Foreign personal holding company income

Sales of property which does not generate active income

The conference agreement generally follows the Senate amendment. As under the House bill, however, stock and securities gains of banking, financing, insurance, and similar businesses are subpart F FPHC income under the agreement. The conferees intend that income from commodity and currency transactions that are within the scope of the special subpart F provisions for such transactions (discussed immediately below) will not be subject to tax under this provision. Thus, for example, a transaction that would be subject to tax under the special rule for commodities transactions but for the active producers' exception to that rule is not subject to tax under this provision. The provision is also not intended to apply to gain on the sale of land used by the seller in an active trade or business of the seller at the time of the sale.

Commodities transactions

The conference agreement generally follows the Senate amendment. The agreement clarifies that income from forward and similar transactions in commodities is subject to the new subpart F provision. Income from foreign currency transactions that are not Code section 988 transactions (for example, a position marked to market under Code section 1256) may be subject to current taxation under this provision. For-

eign currency gains attributable to section 988 transactions, however, are to be treated exclusively under the special subpart F provision dealing with foreign currency gains. Accordingly, the business needs exception applicable to foreign currency gains attributable to section 988 transactions will not be limited by the subpart F rules on commodities transactions.

Following the Senate amendment, the agreement excludes from subpart F FPHC income active business gains and losses from the sale of commodities by a controlled foreign corporation substantially all of the business of which is as an active producer, processor, merchant, or handler of commodities. For this purpose, active business gains and losses from commodity sales include gains and losses from financial transactions which constitute bona fide hedging transactions integrally related to a principal business of trading in physical commodities.

No inference is intended as to the types of commodity transactions that, under present law, may be considered futures transactions in a commodity on or subject to the rules of a board of trade or commodity exchange.

Foreign currency gains

The conference agreement follows the Senate amendment.

Active foreign currency gains and losses arising from a controlled foreign corporation's business as an active foreign currency dealer are excluded from subpart F FPHC income under the business needs exception to this provision.

Income equivalent to interest

Following the Senate amendment, the conference agreement treats income equivalent to interest as FPHC income for subpart F purposes. For this purpose, income equivalent to interest includes commitment fees for the actual lending of money.

Income equivalent to interest is treated as subpart F FPHC income (and passive income, for separate limitation purposes) to prevent taxpayers from continuing (notwithstanding the agreement's separate limitation for passive income and other amendments to the definition of subpart F FPHC income) to shelter passive interest-type income from current U.S. tax by rearranging the form of offshore passive investments so that the income they generate is not traditional interest income. Since the agreement repeals present law's subpart F exceptions for banking and insurance income, the conferees can see no sound policy reason for favoring activities which generate income equivalent to interest over activities of banks and insurance companies.

Passive leasing income

The conference agreement follows the House bill and the Senate amendment.

Related person exception for interest, rents, and royalties

The conference agreement follows the House bill and the Senate amendment.

Same country dividend exception

The conference agreement follows the Senate amendment except that the agreement applies only to the first five taxable years of the specified foreign corporation beginning after 1986.

Base company rents and royalties

The conference agreement does not include the House bill provision.

Foreign base company shipping income

The conference agreement follows the House bill.

Banking exceptions

The conference agreement follows the House bill except that tax deferral is preserved, to the extent otherwise available under present law, for interest derived in connection with certain export sales. Such interest must be derived in the conduct of a banking business from financing the sale (or other disposition) for use or consumption outside the United States of any property which is manufactured, produced, grown, or extracted in the United States by the interest recipient or a related person, and not more than 50 percent of the fair market value of which is attributable to products imported into the United States. For this purpose, the fair market value of any property imported into the United States is its appraised value, as determined by the Secretary under section 402 of the Tariff Act of 1930 (19 U.S.C. 1401a) in connection with its importation. A related person is defined for this purpose in the same manner as it is defined generally for subpart F purposes (Code sec. 954(d)(3) as amended by the conference agreement; *see* discussion of controlled partnerships below).

Insurance income

The conference agreement incorporates, with modifications, the House bill provisions amending the definition of tax haven insurance income, repealing the 5-percent de minimis exception for income from U.S. risk insurance, and repealing the exceptions for investment income from unearned premiums and reserves. The conference agreement makes all tax haven insurance income eligible for the general subpart F de minimis exception and 70-percent full inclusion rule (Code sec. 954(b)(3), as amended by the conference agreement; discussed at c., below). It also contains a special rule, discussed more fully below, which reduces subpart F's U.S. ownership requirements for current taxation of a foreign corporation's income, in the case of certain related person insurance income. The purpose of this rule is to subject to current U.S. tax the related person insurance income of offshore "captive" insurance companies that avoid such tax under present law because, for example, their U.S. ownership is relatively dispersed, that is, no more than 25 percent of their voting stock is held by 10-percent U.S. shareholders.

Generally, a captive insurance company is considered to be a company organized by one or more persons primarily to provide insurance protection to its owners or persons related to its owners. The new rule will limit the unintended tax advantages presently received by U.S. taxpayers that jointly own, with a number of other persons, offshore captive insurers.

One of the major U.S. tax benefits presently claimed by certain offshore captives is exemption from current taxation under subpart F. In addition, premiums received from U.S. persons by foreign captives are often exempt from the U.S. excise tax on insurance premiums paid to foreign insurers and reinsurers under U.S. income tax treaties, such as that with Barbados. The Barbados treaty, which generally became effective in 1984, waives the insurance excise tax, notwithstanding that Barbados itself does not tax insurance companies licensed under its 1983 Exempt Insurance Act. Thus, income earned by Barbados-based captives with relatively dispersed U.S. ownership may escape current tax anywhere in the world.[1]

Another tax advantage of offshore captive insurance arrangements is that premiums paid by U.S. taxpayers to offshore captives with a relatively large number of owners have been ruled currently deductible in some instances, while no current tax is imposed on that premium income in the hands of the captive. While captive insurance arrangements are self-insurance arrangements, contributions to which are not deductible,[2] in Rev. Rul. 78-338 (1978-2 C.B. 107), the IRS ruled that amounts paid by a domestic petroleum corporation to a foreign insurance company that provided insurance against certain petroleum industry risks only for its 31 unrelated shareholders and their subsidiaries and affiliates were deductible as insurance premiums. In addition to the fact that the 31 shareholders/insureds of the insurance company were unrelated, the ruling indicated that no one owned a controlling interest and no one's risk coverage could exceed 5 percent of the total risks insured. The ruling concluded that such an arrangement allowed the economic risk of loss to be shifted and distributed among the shareholders who comprised the insured group so that it constitutes insurance. Similarly, in *Crawford Fitting Co.* v. *United States*, 606 F. Supp. 136 (N.D. Ohio 1985), sufficient risk-shifting was found for a deduction to be allowed where a risk was shifted to an insurance company which was only

[1] The unratified U.S. income tax treaty with Bermuda (signed on July 11, 1986) also waives the insurance excise tax, notwithstanding the absence of any Bermuda income tax. Were the Bermuda treaty to be ratified, captives in Bermuda with relatively dispersed U.S. ownership could escape all current tax also. In a letter to the Secretary of the Treasury, dated July 15, 1986, the Chairman of the Ways and Means Committee expressed "serious concerns about both the substance and the procedures followed by the Treasury Department in negotiating this proposed tax treaty." The letter states that the "proposed treaty, rather than preventing double taxation of income, seems to guarantee that significant sums of income will escape any taxation in either jurisdiction . . . The proposal would bless U.S.-owned Bermuda insurance companies, which, in some cases, through the use of spread captive devices, now may be avoiding all tax other than the excise tax on income earned by insuring U.S. risks. In addition, the U.S. premium payors may be deducting the premiums from U.S. taxable income. Thus, the proposed treaty, by exempting these insurance premiums from U.S. tax, would eliminate not double taxation but any taxation."

[2] In Rev. Rul. 77-316 (1977-2 C.B. 53), the IRS ruled that the amounts described as premiums paid by a domestic corporation and its domestic subsidiaries to the parent's wholly owned foreign subsidiary are not deductible premiums if the subsidiary does not also insure risks of insureds outside its own corporate family. The IRS concluded that because the insured and the "insurance" subsidiary (though separate corporate entities) represent one economic family, those who bear the ultimate economic burden of the loss are the same persons who suffer the loss. Thus, the required risk-shifting and risk-distribution of a valid insurance transaction are missing. This position of the Service was favorably cited by the Ninth Circuit in *Carnation Co.* v. *United States*, 640 F.2d 1010 (9th Cir. 1981), *cert. denied*, 454 U.S. 965. In the recent cases of *Humana, Inc. and Subsidiaries* v. *Commissioner*, 50 T.C.M. 784 (1985) and *Mobil Oil Corp.* v. *United States*, 8 Ct. Cl. 555 (1985), the courts have advanced a more developed theory and indicated that the primary criterion in distinguishing a captive from a true insurance arrangement is the absence of risk-shifting. So long as a wholly owned subsidiary of the taxpayer bears the taxpayer's risk of loss, there has not been sufficient risk-shifting to constitute true insurance, premium payments for which could be deductible.

partially commonly controlled (that is, the insurer was 80-percent owned by four separate corporations, in each of which the individual 100-percent owner of the insured corporate taxpayer had an interest).

The conferees do not believe that U.S. persons utilizing offshore captive insurance companies should be able to avoid current U.S. tax on the related person insurance income of these companies simply by spreading the ownership among a number of persons. Accordingly, the conference agreement provides that tax haven insurance income (as that category of income is expanded by the conference agreement) that is related person insurance income generally will be taxable currently under subpart F to an expanded category of U.S. persons. For purposes of taking into account such income under subpart F, the U.S. ownership threshold for controlled foreign corporation status is reduced to 25 percent or more. Any U.S. person (as defined for subpart F purposes by existing Code section 957(d)) who owns or is considered to own (under the rules of existing Code section 958(a)) any stock in a controlled foreign corporation, whatever the degree of ownership, is treated as a U.S. shareholder of such corporation for purposes of this 25-percent U.S. ownership threshold and exposure to current tax on the corporation's related person insurance income.

Related person insurance income is defined for this purpose to mean any insurance income attributable to a policy of insurance or reinsurance with respect to which the primary insured is either a U.S. shareholder (as defined above) in the foreign corporation receiving the income or a person related to such a shareholder. A related person is defined for this purpose in the same manner as it is for subpart F purposes generally (Code sec. 954(d)(3), as amended by the conference agreement). As indicated above, the definition of tax haven insurance income under the conference agreement follows the House bill. Thus, the new rule for captive insurers applies to investment income as well as to premium income attributable to related person insurance. Related person insurance income includes income attributable to policies of reinsurance issued by a foreign corporation to U.S. shareholders (as defined above) or persons related to such shareholders that previously insured the risks covered by such policies. It also includes income attributable to officers' or directors' insurance where the U.S. shareholders of the foreign corporation receiving such income (or persons related to such shareholders) directly or indirectly pay the premiums and the insureds are officers or directors of the U.S. shareholders (or persons related to such shareholders).

The agreement provides three exceptions to the new subpart F rule. First, related person insurance income of a foreign corporation will not be currently taxable by reason of the new rule if the corporation's gross related person insurance income for the taxable year is less than 20 percent of its gross insurance income for the year. Insurance income is defined for this purpose as it is generally for subpart F purposes under the agreement, except that the exclusion of income attributable to same-country risks does not apply. This rule excepts from the operation of the provision foreign insurance companies with 25-percent or more U.S. ownership that do not earn a significant proportion of related person insurance income.

Second, related person insurance income of a foreign corporation will not be currently taxable under the new provision if less than 20 percent of the total combined voting power of all classes of stock of the corporation entitled to vote and less than 20 percent of the total value (both stock and policies) of the corporation during the taxable year are owned (directly or indirectly) by persons who are the primary insureds under any policies of insurance or reinsurance issued by the corporation, or by persons related to such persons. A related person is defined for this purpose in the same manner as it is for subpart F purposes generally (Code sec. 954(d)(3), as amended by the conference agreement). This exception serves a purpose similar to that served by the exception for companies with de minimis amounts of related person insurance income.

Third, the agreement provides that a foreign corporation, the related person insurance income of which would otherwise be subject to tax under subpart F under the new rules, may elect instead to treat such income as effectively connected with the conduct of a U.S. trade or business, taxable under Code section 882. The election is to be made at such time and in such manner as the Secretary may prescribe. The election is effective in the year made and in all future years. It is revocable only with the Secretary's consent. To make such an election, the foreign corporation must waive any U.S. income tax treaty benefits with respect to its related person insurance income. The election is not effective if the electing corporation fails to meet such requirements as the Secretary shall prescribe to ensure that the tax imposed on its related person insurance income is paid. Any tax imposed on an electing corporation's related person insurance income may, if not paid by that corporation, be collected from the corporation's U.S. shareholders.

Electing offshore captives will continue to be taxed currently on their related person insurance income, since effectively connected income is taxed currently. However, the election generally will allow them to receive the same tax benefits as similarly situated U.S. insurers with respect to related person insurance activity. Thus, electing offshore captives that incur net operating losses from meeting large claims will be able to carry those losses back 3 years and forward 15 years under the net operating loss carryover rules (Code sec. 172). The availability of loss carryovers may be of particular benefit to insurers of those risks with respect to which the tax law may not permit deductions for reserves. The conferees have adopted the election primarily with such foreign insurers in mind.

The new subpart F rules for captive insurers apply to both stock and mutual insurance companies. For this purpose, the policyholders of a mutual insurance company are to be treated as its shareholders. The rules are to be adapted in appropriate respects for application to mutual companies, under regulations.

The conferees recognize that foreign mutual insurance companies that insure a significant number of U.S. persons may technically have significant amounts of related person insurance income (as defined for purposes of the agreement) solely because such companies are formally owned by their policyholders. However, the conferees understand that, in the typical non-captive case, such income derived by the insurance company is effectively connected with the conduct of a U.S. trade or business and, consequently, under present law, is taxed by the United States; the reason is that most foreign mutuals with a significant number of U.S. policyholders have permanent establishments in the United States. Under existing Code rules, subpart F income generally does not include U.S. source income that is effectively connected with the conduct of a U.S. trade or business (Code sec. 952(b)). Therefore, so long as they continue to do business in the United States through permanent establishments, it is anticipated that the income of these foreign mutual companies attributable to U.S. insureds generally will not be taxed under the new subpart F provision for captive insurers.

Premiums received by a captive insurer that is subject to the new subpart F rules, like premiums received by an offshore insurer that is subject to present law subpart F, generally remain subject to the excise tax on insurance premiums paid to foreign insurers, absent a treaty exemption. However, the excise tax does not apply to income treated as effectively connected with the conduct of a U.S. business under the "effectively connected" election. This is consistent with the present law exemption from the excise tax generally accorded to premiums that are effectively connected with the conduct of a U.S. business.

The agreement requires the Secretary to prescribe such regulations as may be necessary to carry out the purposes of the new subpart F rules for captive insurers, including regulations preventing the avoidance of the new rules through cross-insurance arrangements or otherwise. Assume, for example, that a foreign company is owned by 35 U.S. persons unrelated to one another but engaged in similar businesses. The company's primary business is insuring against certain risks of those U.S. persons. Under the agreement, it generally will have related person insurance income in profitable years, taxable currently to its U.S. owners.

Assume, however, that the captive insurance arrangement is modified as follows: The foreign company is liquidated and two new foreign companies are organized. One of the companies is owned by 18 of the U.S. persons that formerly owned the liquidated company. The other new company is owned by the other 17 persons that formerly owned the liquidated company. The primary business of the first company is insuring against certain risks of the 17 owners of the second company. The primary business of the second company is insuring against certain risks of the 18 owners of the first company.

The conferees believe that such an arrangement is essentially equivalent to a captive insurance arrangement. It can be used to achieve a similar degree of cooperative risk-sharing among similarly situated members of an industry. The conferees do not believe that U.S. shareholders should be able to obtain the deferral of U.S. tax on income attributable to insurance of risks of U.S. persons who are in turn insuring the risks of those shareholders. Accordingly, under the regulations, the income of the two companies in the example attributable to the insurance business described is to be treated as related person insurance income. The existence of a single foreign entity subject to the general subpart F rules for captives prior to the creation of such a cross-insurance arrangement is not necessary to support a finding that such an arrangement was made or availed of to avoid the captive insurer rules.

Formed or availed of to avoid tax

The conference agreement follows the House bill.

Controlled partnerships

The conference agreement follows the House bill and the Senate amendment.

Deficits

The conference agreement repeals the chain deficit rule (Code sec. 952(d)).

It also limits the present law rule (the "accumulated deficit rule") permitting a controlled foreign corporation to reduce subpart F income by the sum of its prior year deficits in earnings and profits (Code sec. 952(c)(1) & (2)). Subject to the conditions described below, the agreement provides that foreign base company shipping income, foreign base company oil related income, subpart F insurance income, or foreign personal holding company income may be reduced by accumulated deficits in earnings and profits attributable to activities that give rise to foreign base company shipping income, foreign base company oil related income, subpart F insurance income, or foreign personal holding company income, respectively. Other categories of subpart F income may not be reduced by accumulated deficits under the agreement. Subpart F insurance income may be reduced under the rule just described only if the controlled foreign corporation receiving such income was predominantly engaged in the active conduct of an insurance business (within the meaning of new Code sec. 904(d)(2)(C)(ii), discussed at A.1.b., above) in both the year in which the income was earned and the year in which the deficit arose. Foreign personal holding company income may be reduced under this new rule only if the controlled foreign corporation receiving such income was predominantly engaged in the active conduct of a banking, financing, or similar business (within the meaning of new Code sec. 904(d)(2)(C)(ii), discussed at A.1.b., above) in both the year in which the income was earned and the year in which the deficit arose. Accumulated deficits may be used only once. To be eligible for use under the rule, an accumulated deficit must arise in a year for which the foreign corporation incurring such deficit is a controlled foreign corporation. As under present law, accumulated deficits that cannot be utilized in one year may be carried over indefinitely for possible use in later years. Under the accumulated deficit rule, as modified, accumulated deficits for taxable years beginning before 1987 may not be carried forward to reduce subpart F income.

A U.S. shareholder in a controlled foreign corporation may reduce its subpart F inclusion with respect to that corporation only by the shareholder's pro rata share of accumulated deficits. A U.S. shareholder's pro rata share of any accumulated deficit is to be determined under rules similar to the rules which limit subpart F inclusions to a shareholder's pro rata share of subpart F income (Code sec. 951(a)(2)), for whichever of the following yields the smaller share: the close of the current taxable year or the close of the year in which the deficit arose. Under this rule, then, accumulated deficit use will be limited by the size of a U.S. shareholder's interest in a controlled foreign corporation in the current year and in the year in which the deficit was incurred. Under present law, subpart F and section 1248 inclusions are similarly limited by the size of a shareholder's interest in the controlled foreign corporation when the relevant earnings and profits arose.

Under the agreement, then, pre-acquisition deficits of an acquired corporation to which a controlled foreign corporation in the acquiring group succeeds will not reduce post-acquisition subpart F income of the controlled foreign corporation's shareholders (except to the extent that such shareholders had ownership interests in the acquired corporation when the deficits arose). Similarly, pre-merger deficits of a foreign corporation merged into a controlled foreign corporation will not reduce post-merger subpart F income of the controlled foreign corporation's shareholders (except to the extent that such shareholders had ownership interests in the merged corporation when the deficits arose). The conferees expect the Secretary to issue regulations implementing the above rules, including regulations limiting the use of deficits in connection with other reorganizations.

The agreement retains the present law rule permitting current deficits in earnings and profits in any income category, including nonsubpart F income categories, to reduce subpart F income for the year (Code sec. 952(c)). However, if subpart F income of a foreign corporation is reduced by reason of this rule, the agreement provides that any excess of the earnings and profits of that corporation over its subpart F income in any subsequent taxable year is to be recharacterized as subpart F income under rules similar to the agreement's separate limitation loss recharacterization rule (*see* A.4., above) and, thus, is to be currently included in the income of the corporation's U.S. shareholders in the year of recharacterization.

Under this recharacterization provision, subpart F-type income that is recaptured for foreign tax credit limitation purposes under the separate limitation loss recharacterization provision is effectively recaptured for subpart F purposes as well. For example, income of a controlled foreign corporation that is passive after application of the separate limitation loss recharacterization provision is also subpart F FPHC income currently taxable to the corporation's U.S. shareholders. The subpart F recharacterization provision thus helps to integrate subpart F and the separate foreign tax credit limitation rules.

The conference agreement restricts the use of deficits to reduce subpart F income for several reasons. First, as discussed in greater detail at A.1.e., above, the conferees have sought to simplify the operation of the separate limitation look-through rules for controlled foreign corporations by conforming them and the subpart F rules more closely. The conferees do not believe that separate limitation income received by controlled foreign corporations should be eliminated for foreign tax credit limitation purposes by deficits of other controlled foreign corporations, prior year deficits in other income categories, or current year deficits in other income categories. Preserving such separate limitation income for foreign tax credit limitation purposes without a corresponding preservation of such income for subpart F purposes would substantially complicate the application and administration of the look-through rules. This is particularly the case with respect to the separate limitations for passive income and shipping income since passive income and shipping income are defined for separate limitation purposes by reference to the subpart F categories of FPHC income and foreign base company shipping income, respectively.

Second, the conferees believe that the present law deficit rules allow U.S. taxpayers operating abroad through controlled foreign corporations to shelter too much tax haven income from current U.S. tax. Under the chain deficit rule of Code section 952(d) (as interpreted under regulations), a loss incurred anywhere in a chain of controlled foreign corporations eliminates U.S. tax on an equal amount of income earned elsewhere in the chain even though the loss may be in a nonsubpart F income category or bear little or no relation to the income it offsets. This rule is inconsistent with the "hopscotch" rule, which requires that subpart F income of a controlled foreign corporation be included currently in the gross income of the corporation's ultimate U.S. owners without regard to the income of any intermediate foreign corporation interposed between those owners and the controlled foreign corporation.

Similarly, the accumulated deficit rule of section 952(c) presently allows a controlled foreign corporation to avoid tax on subpart F income by offsetting that income with prior year deficits it incurred in nonsubpart F or unrelated income categories. Were this rule not modified, taxpayers could in many cases shelter from U.S. tax income from passive investments by moving those investments into controlled foreign corporations with prior year deficits.

The conferees note that deficits in earnings and profits incurred by foreign corporations before their acquisition by a U.S. corporation may be used to shelter post-acquisition subpart F income of the U.S. corporation from tax under present law, unless the IRS can show (under Code sec. 269) that the acquisition was made to evade or avoid income tax. Loss trafficking with respect to foreign corporations is not restricted by any rule corresponding to the special anti-loss trafficking rule (Code sec. 382) applicable to U.S. corporations. The agreement's repeal of the chain deficit rule and modifications to the accumulated deficit rule limit the use of acquired deficits.

A third factor in the conferees' decision to repeal the chain deficit rule is its inconsistency with the present law rule requiring recognition of gain upon the incorporation of a foreign loss branch (Code sec. 367(a)(3)(C)). That rule effectively prevents taxpayers that reduce their worldwide income by using losses incurred by a foreign branch from deferring U.S. tax on the foreign enterprise's subsequent profits while incorporating it tax-free when it turns profitable. Similar current utilization of losses, followed by deferral of tax on income, can be achieved, however, using controlled foreign corporations, as a result of the chain deficit rule.

Another problem with the chain deficit rule that has been brought to the conferees' attention is the ability that the provision confers upon some taxpayers effectively to utilize the same deficits twice. Assume, for example, that a U.S. corporation controls two foreign corporations. One of these foreign corporations owns the other. One of the foreign corporations (the "loss corporation") has a current deficit in earnings and profits of $100. To fund that deficit, the U.S. corporation makes an additional $100 contribution to the loss corporation's capital. That capital contribution increases by $100 the U.S. corporation's basis in its stock in the loss corporation. Under the chain deficit rule, the $100 deficit reduces the second controlled foreign corporation's currently taxable subpart F income in the year in which the deficit arises. In the following

year, the U.S. corporation's stock in the loss corporation becomes worthless. Under the rules governing the deduction of losses for worthless securities (Code sec. 165(g)), that stock is a capital asset and the U.S. corporation may therefore deduct in full its basis in the stock, including the $100 component of that basis corresponding to the prior year's additional capital contribution. The loss corporation's $100 deficit in earnings and profits thus reduces the U.S. corporation's taxable income twice, once in the first year under the chain deficit rule, and then again in the following year under the rule allowing a loss deduction for worthless securities. A similar result may be achieved when debt is used to fund a controlled foreign corporation's loss and is later written off.

The application of the accumulated deficit rule, as modified by the agreement, is illustrated in the following three examples: Assume that a controlled foreign corporation wholly owned by a U.S. corporation incurs a $100 deficit in earnings and profits in a taxable year. (For simplicity, this example and the two following assume that gross income, net taxable income, and earnings and profits are the same.) Sixty dollars of the deficit is attributable to activities that, when profitable, generate foreign base company shipping income. The other $40 of the deficit is attributable to activities that, when profitable, generate foreign base company oil related income. In the following year, the controlled foreign corporation earns $90 of foreign base company shipping income, $20 of foreign oil related income, and $10 of foreign base company services income. Under the agreement, the full $60 portion of the accumulated deficit attributable to base company shipping activity can be used to reduce (to $30) the U.S. parent's base company shipping income inclusion with respect to the foreign corporation. Twenty dollars of the $40 portion of the accumulated deficit attributable to base company oil related activity can be used to eliminate the $20 of base company oil related income. The remaining $20 of the accumulated deficit cannot be utilized to reduce the U.S. parent's base company services income or remaining base company shipping income since this deficit amount did not arise from base company services or shipping activity. For the year then, the U.S. parent's subpart F income with respect to the foreign corporation after the accumulated deficit is applied consists of $30 of base company shipping income, $10 of base company services income, and no base company oil related income. The $20 portion of the accumulated deficit attributable to foreign oil related activity which is not utilized may be carried over for possible use in characterizing distributions from the foreign corporation in later years.

Assume, as another example, that a foreign manufacturer wholly owned by a U.S. corporation incurs a $100 deficit in earnings and profits in a taxable year. The manufacturing operations of the controlled foreign corporation, when profitable, generate nonsubpart F income. In the following year, the U.S. parent sells through the foreign manufacturer to third-country buyers goods that a U.S. subsidiary of the U.S. parent produces. With respect to these sales, the foreign corporation receives $30 of foreign base company sales income, currently taxable to its U.S. parent under subpart F. The foreign corporation also earns $80 of nonsubpart F manufacturing income. The amendment to the accumulated deficit rule limits to $80 the amount of the $100 accumulated deficit which may be utilized in this year; since the accumulated deficit arose in a nonsubpart F income category, it may offset only the $80 of nonsubpart F income. For the year then, the subpart F income after the accumulated deficit is applied consists of the $30 of foreign base company sales income. The $20 portion of the accumulated deficit not utilized may be carried over by the foreign corporation to reduce nonsubpart F earnings and profits in later years.

The application of the accumulated deficit rule, as modified, is further illustrated in the following example: Assume that a foreign corporation, wholly owned by a U.S. corporation, incurs a $100 deficit in earnings and profits in a taxable year. The controlled foreign corporation is predominantly engaged in the active conduct of a banking business during that year. When profitable, the foreign corporation earns primarily foreign personal holding company income, as that category of subpart F income is expanded by the agreement. The deficit arises from activities that generate foreign personal holding company income. On the first day of the following year, 40 percent of the stock of the controlled foreign corporation is sold to a second U.S. corporation. The foreign corporation earns $300 of foreign personal holding company income and no other income during that taxable year. It is predominantly engaged in the active conduct of a banking business during that year. The second U.S. corporation's share of the subpart F income is $120 (40 percent of $300). The second U.S. corporation cannot reduce its subpart F inclusion by any portion of the $100 accumulated deficit because it owned no stock in the foreign corporation in the preceding year, when the deficit was incurred. The first U.S. corporation can reduce its $180 (60 percent of $300) share of the subpart F income by $60 (60 percent of $100) of the accumulated deficit; under the accumulated deficit rule, as modified, its pro rata share of the deficit is determined for the close of the current year because such determination yields a smaller pro rata share than a determination of such share for the close of the deficit year. The $40 portion of the accumulated deficit not utilized may be carried over for possible use by the first U.S. corporation in later years.

The interaction of the new subpart F recharacterization rule, the subpart F earnings and profits limitation retained by the agreement, and the agreement's foreign loss allocation and separate limitation loss recharacterization rules is illustrated in the following example: Assume that a foreign corporation wholly owned by a U.S. corporation has a $100 overall limitation loss. It also has $200 of passive (subpart F FPHC) income before allocation of the loss. Assume, for simplicity, that earnings and profits equal income. Under the foreign loss allocation rule (which parallels the subpart F earnings and profits limitation), the $100 loss reduces the corporation's passive income for the year from $200 to $100. The subpart F earnings and profits limitation correspondingly reduces the income currently taxable to the corporation's U.S. shareholders from $200 to $100.

The following year, the corporation earns $250 of passive (subpart F FPHC) income and $1,500 of overall limitation (nonsubpart F) income. Under the separate limitation loss recharacterization rule, an amount of this overall limitation income equal to the prior year overall limitation loss that reduced passive income, $100, is recharacterized as passive income. Thus, for foreign tax credit limitation purposes, the corporation has $1,400 ($1,500 - $100) of overall limitation income and $350 ($250 + $100) of passive income in the second year. Under the subpart F recharacterization rule, the recaptured $100 of passive income is also subpart F FPHC income since subpart F FPHC income the year before was reduced by $100 under the earnings and profits limitation and, in the current year, earnings and profits exceed tentative subpart F income by at least that amount. Thus, the subpart F inclusion of the corporation's shareholders is $350 ($250 + $100) in the second year.

Effective date

The conference agreement generally adopts the Senate amendment's effective date provisions for the subpart F amendments discussed above, except where noted otherwise. In addition, targeted transitional rules are provided.

b. Determination of U.S. control of foreign corporations

The conference agreement generally follows the Senate amendment (including its special rule for certain trust distributions), with a conforming amendment clarifying that the new vote-or-value rule applies in determining whether an insurance company is a controlled foreign corporation under the special more-than-25-percent U.S. ownership test of Code section 957(b). With respect to investments in U.S. property, the provision is effective on August 16, 1986 (rather than on January 1, 1987).

The conferees' decision not to include the House bill provision decreasing the U.S. ownership requirement for controlled foreign corporation status from more-than-50-percent to 50-percent-or-more of total ownership rests, in part, on the conferees' understanding that, under an existing Treasury regulation, the IRS can, in specified circumstances, deem foreign corporations effectively controlled by 10-percent U.S. shareholders to meet the more-than-50-percent ownership test even though that requirement would otherwise not technically be met (Treas. Reg. sec. 1.957-1(b)).

c. De minimis and full inclusion rules

Under the conference agreement, none of a controlled foreign corporation's gross income for a taxable year is treated as foreign base company income or tax haven insurance income if the sum of the corporation's gross foreign base company and gross tax haven insurance income for the year is less than the lesser of 5 percent of its gross income, or $1 million.

The conferees do not believe that U.S. shareholders of controlled foreign corporations should avoid current U.S. tax on an amount of tax haven income equal to a fixed percentage of the gross income of the controlled foreign corporation without regard to how large, in absolute dollar terms, that amount of tax haven income is. Permitting $1 million or more of tax haven income to avoid current U.S. tax, as the present law de minimis rule does in the case of a controlled foreign corporation with $10 million or more of gross income, is inconsistent with the de minimis concept in the conferees' view.

As discussed in more detail at A.1.a. and e., above, the new subpart F de minimis rule applies for separate foreign tax credit limitation purposes also. The House bill provided no de minimis exception to the application of the separate foreign tax credit limitations. The conferees have accepted a de minimis exception to the separate limita-

tions in the case of controlled foreign corporations to simplify the operation of the foreign tax credit limitation look-through rules. However, the conferees concluded that any de minimis exception applicable to the separate limitations should be a limited one, incorporating a reasonable dollar ceiling.

As discussed above at C.1.a., the conference agreement expands the definition of tax haven insurance income. The general de minimis exception is amended to apply to tax haven insurance income generally in order to preserve de minimis relief for insurance income subject to tax under subpart F under present law, and to provide such relief to the new types of insurance income (including certain captive insurance income) subjected to tax under subpart F by the conference agreement. Income from insuring U.S. risks is eligible for a special 5-percent de minimis exception under present law. However, the conference agreement repeals that exception in connection with its expansion of the definition of tax haven insurance income to include income from insuring certain unrelated party foreign risks. Income from the insurance of certain foreign risks of related parties that is subpart F income under present law is presently eligible for the general de minimis exception.

The conference agreement also extends the 70-percent full inclusion rule to tax haven insurance income generally. The conferees do not believe that a sound policy basis exists for distinguishing tax haven insurance income from foreign base company income for purposes of either the de minimis rule or the full inclusion rule.

The Tax Reform Act of 1984 generally subjects related party factoring income and similar income to taxation under subpart F without regard to the general de minimis rule. The conference agreement does not alter present law in this regard.

The amendments to the de minimis and full inclusion rules apply to taxable years of foreign corporations beginning after 1986.

d. Possession-chartered corporations

The conference agreement follows the Senate amendment except that the effective date for investments in U.S. property is August 16, 1986.

2. Application of accumulated earnings tax and personal holding company tax to foreign corporations

Present Law

The accumulated earnings tax (AET) and personal holding company (PHC) tax are imposed on corporations that accumulate earnings rather than distributing them to their shareholders. The taxes are imposed on "accumulated taxable income" and "undistributed personal holding company income," respectively. Those amounts are calculated by making several adjustments to the regular taxable income of a corporation including deductions for capital gains (and certain capital losses).

House Bill

For purposes of calculating the AET or PHC tax applicable to a foreign corporation, an adjustment is allowed for net capital gains only if they are effectively connected with the conduct of a U.S. trade or business. These amendments apply to gains and losses realized on or after November 16, 1985.

Senate Amendment

The Senate amendment is the same as the House bill except that it applies to gains and losses realized on or after March 1, 1986.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment except that it is effective for gains and losses realized on or after January 1, 1986.

3. Deduction for Dividends Received From Foreign Corporations

Present Law

A U.S. corporation may deduct 85 percent of a fraction of dividends received from a foreign corporation that has at least 50 percent of its business in the United States. The deductible fraction is the ratio, for a 3-year period, of gross income that is effectively connected with a U.S. trade or business to total gross income. A U.S. corporation may deduct 100 percent of certain dividends from a foreign corporation all of whose gross income is effectively connected with a U.S. trade or business and all of whose stock is owned by the U.S. corporation.

House Bill

As described in VI.C., above, the House bill reduces the 85-percent dividends received deduction to 80 percent, and further reduces it to 70 percent (and the present law 100 percent deduction is reduced to 90 percent) in connection with the dividends paid deduction.

Senate Amendment

Following the House bill, the Senate amendment reduces the 85-percent dividends received deduction to 80 percent.

In addition, the Senate amendment allows the deduction for dividends received from foreign corporations only to 10-percent or greater corporate shareholders. It extends the deduction to dividends from foreign corporations that are in turn attributable to dividends from U.S. corporations 80 percent or more of whose voting stock (or value) the foreign corporation (or a wholly owned foreign subsidiary) owns, and eliminates the 50-percent business income threshold of present law. The Senate amendment bases eligibility for the deduction on net earnings of foreign corporations attributable to U.S. sources. All dividends eligible for the deduction are treated as U.S. source.

The changes to the dividends received deduction rules for dividends from foreign corporations apply to dividends received in taxable years beginning after 1986 from earnings derived after 1986.

Conference Agreement

The conference agreement generally follows the Senate amendment with technical modifications and an amendment preventing double benefits for amounts eligible for the agreement's deduction.

The agreement provides that deemed-paid foreign tax credits are disallowed to the extent the taxes are attributable to income eligible for the dividends received deduction.

The conference agreement provides that dividends eligible for the deduction are based on the proportion of the foreign corporation's post-1986 earnings that have been subject to U.S. corporate income tax and that have not been distributed, rather than (as in the Senate amendment) the pool of earnings accumulated during the previous 10 years. The committee intends that distributions from a foreign corporation be deemed to be pro rata from the corporation's earnings that have been subject to U.S. corporate income tax and those that have not been so subject.

In a technical amendment (to Code sec. 959(d)), the agreement clarifies that any amounts of subpart F income previously taxed that are distributed to U.S. shareholders are to reduce U.S. source earnings and profits and total earnings and profits (as the case may be) in arriving at the proportionate amount of the taxable dividend eligible for the deduction.

The conference agreement also clarifies that the new provision applies to distributions out of earnings and profits for taxable years beginning after 1986.

For dividends paid from earnings and profits accumulated prior to January 1, 1987, the agreement's provisions do not apply.

D. Special Tax Provisions for U.S. Persons

1. Possessions Tax Credit

Present Law

Under present law, income from intangibles is not eligible for the possessions tax credit unless the taxpayer elects one of two optional methods of computing possessions source income: (1) cost sharing or (2) 50/50 profit split. The cost sharing payment need not be as large as an arm's-length royalty.

To be eligible for the possessions tax credit, a possessions corporation must derive at least 80 percent of its income from a possession, and at least 65 percent of its income from the conduct of an active trade or business within a possession.

Income received within the United States (excluding possessions thereof) is not eligible for the possessions tax credit.

The possessions tax credit is allowed for qualified possessions source investment income (QPSII). QPSII is limited to income derived from investments within a possession in which the taxpayer conducts an active trade or business. The Government of Puerto Rico has established rules (reg. 3087) which specify the financial institutions that may accept deposits from possessions corporations and the assets in which these funds may be invested.

U.S. corporations doing business in the Virgin Islands are eligible for tax benefits equivalent to the possessions tax credit under the Revised Organic Act of the Virgin Islands and section 934 of the Code.

House Bill

The House bill retains present law with five principal modifications.

First, the cost sharing payment required for companies that elect the cost sharing option is set equal to the greater of: (1) 110 percent of the payment required under present law or (2) the royalty payment or inclusion that would be required (under sections 482 and 367 as modified by the House bill), with respect to intangibles the possessions corporation is treated as owning under the cost-sharing option, if the possessions corporation were treated as a foreign company (whether or not intangibles actually are transferred to the possessions corporation).

For companies that elect the 50/50 profit split method, the amount of product area research expenditures (as determined under the cost sharing rules, without regard to the royalty amount) is increased by 20 percent for purposes of computing combined taxable income.

Second, the House bill deletes the rule in present law (sec. 936(b)) which denies the credit with respect to income received in the United States. As a result, the credit is not denied for tax on otherwise eligible income

solely by reason of receipt in the United States.

Third, the House bill modifies the definition of qualified possession source investment income ("QPSII") to allow the Government of Puerto Rico fully to implement its initiative to increase investment and employment in qualified Caribbean Basin ("CBI") countries. The definition of QPSII is expanded to include interest attributable to loans made by the Government Development Bank of Puerto Rico ("GDB") for investments in active business assets located in qualified CBI countries. A qualified CBI country means any "beneficiary country" (within the meaning of section 212(a)(1)(A) of the Caribbean Basin Economic Recovery Act) which meets the requirements of clauses (i) and (ii) of Code section 274(h)(6)(A). To qualify as QPSII, the borrower must certify to the Secretary of the Treasury that the proceeds of the loan will be invested promptly in active business assets located in a qualified CBI country. In addition, the GDB must agree to permit the Secretary to examine such of its books and records as may be necessary to ensure compliance with the conditions of certification.

The committee report states that it is anticipated that the Government of Puerto Rico will pursue vigorously the twin plant initiative outlined in the "Memorandum of Agreement." [1] The Memorandum of Agreement provides, *inter alia*, that the Government of Puerto Rico will guarantee $100 million annually of new funds for private direct investment in qualified CBI countries. These funds are anticipated to be derived, without additional cost to the United States Treasury, from a variety of sources including: possessions corporations (in exchange for future Puerto Rican tax concessions); GDB funds; and grants by the Government of Puerto Rico.

Fourth, the House bill changes the active trade or business test that a U.S. corporation must meet to qualify for the possession tax credit. The active income percentage is increased from 65 percent to 75 percent. The House bill does not alter the present law requirement that 80 percent or more of gross income for a three-year period be derived from sources within a possession. As under present law, a possessions corporation must meet both the 80-percent possession source income test and the active income percentage test.

Fifth, the committee report states that the Commissioner is authorized to require the submission, with the tax return, of information relevant to section 936 tax computations. Such information may include: (1) all standard industrial classification ("SIC") codes to which research expenses relate; (2) the intangibles involved in producing and marketing the products made by the possessions corporation; (3) the method of pricing components purchased by the possessions corporation; and (4) a combined net income statement for the products manufactured by the possessions corporation.

The bill also amends section 936(d)(1) to include the U.S. Virgin Islands within the definition of "possession of the United States". This change has the effect of bringing U.S. corporations doing business in the Virgin Islands within the ambit of section 936, rather than the separate but comparable provisions of the Revised Organic Act of the Virgin Islands and section 934 of the Code.

The provision is effective for taxable years beginning after December 31, 1985. Under a transition rule, the active income percentage increases from 65 to 70 percent for taxable years beginning in 1986, and to 75 percent for taxable years beginning after 1986. The royalty provision of the cost sharing rule applies to taxable years beginning after 1985 without regard to when the transfer of intangibles (if any) was made.

Senate Amendment

The Senate amendment generally follows the House bill with certain modifications.

First, the cost sharing payment is not required to be as large as an arm's-length royalty.

Second, the Senate amendment retains the rule in present law which denies the credit with respect to income received in the United States; however, an exception is provided for otherwise eligible income (excluding QPSII) where such income is received from a person unrelated to the possessions corporation.

Third, the Senate amendment expands the definition of QPSII beyond the House bill to include income attributable to funds invested in financial institutions (including the GDB and the Puerto Rico Economic Development Bank) to the extent such funds are invested by the financial institution consistent with the goals and purposes of the Carribean Basin Economic Recovery Act in active business assets or development projects located in qualified CBI countries. Such CBI investments must be authorized specifically by the GDB. In addition, the borrower and the financial institution must certify to the Secretary and the Secretary of the Treasury of Puerto Rico that the proceeds of the loan will be used promptly for authorized purposes. Also, the borrower and the financial institution must agree to permit the Secretary and the Secretary of the Treasury of Puerto Rico to examine such of their books and records as may be necessary to ensure compliance with these provisions. The committee report does not refer to the terms of the Memorandum of Agreement.

Fourth, the Senate amendment is effective for taxable years beginning after 1986, without a transition rule for the active income percentage requirement.

Conference Agreement

The conference agreement generally follows the Senate amendment with certain modifications.

The conference agreement follows the House bill with respect to the cost sharing payment, i.e., the cost sharing payment is determined as the greater of (1) 110 percent of the payment determined under present law or (2) an arm's-length royalty (determined according to the principles of sections 482 and 367, as modified by the conference agreement).

The conference agreement follows the House bill and Senate amendment with respect to the profit split method, and makes a technical correction to the computation of combined taxable income under this method.

The conferees expect that the Secretary will take into account the significant nature of the modifications made by the conference agreement to the computation of possessions source income in cases where an electing corporation seeks to change its method of computation.

The conference agreement follows the Senate amendment with respect to income received within the United States.

The conference agreement generally follows the Senate amendment with respect to the expansion of the definition of QPSII. The conferees are of the view that for the purposes of QPSII, financial institutions may include banks, investment banks, or similar institutions. The conferees expect that the Government of Puerto Rico will make a good faith effort to carry out the twin plant initiative outlined in the Memorandum of Agreement.

The conferees authorize Treasury to issue regulations providing additional compliance measures including (1) the submission with the tax return of information relevant to computing income from intangibles, and (2) annual certification by the borrower and lender that CBI loans have been used for investments that are permitted under the QPSII rules.

The conferees agree that regulations issued under section 936(h)(7) can permit the use of the cost sharing and profit split methods in cases where the possession product is leased, rather than sold (or is used in the trade or business of a member of the affiliated group), but only if (1) an independent sales price can be determined for the product from comparable uncontrolled transactions, and (2) the appropriate member of the group agrees to be treated as having sold the possession product at such price. The conferees intend that an exception to the former requirement will be provided under conditions deemed appropriate by the Secretary. Such conditions may restrict relief to situations where (1) the cost sharing payment is no less than 100 percent of the product area research cost incurred by the affiliated group, and (2) the deemed sale of the possession product units is treated as made at a price which produced a profit to the appropriate member of the group equal to the possessions corporation's tax-exempt profit with respect to the same units (computed without regard to the cost sharing payment), reduced by one-half of the cost sharing payment allocable to such units.

The possessions tax credit provisions are effective for tax years beginning after 1986. The royalty provision of the cost sharing rule applies to tax years beginning after 1986 without regard to when the transfer of intangibles (if any) was made.

2. Taxation of U.S. Persons in Panama

a. Agreement implementing Panama Canal Treaty

Present Law

Agreements between the United States and Panama entered into in conjunction with the Panama Canal Treaty specify the rights and legal status of agencies and employees of the U.S. Government operating in Panama. One of the agreements on implementation provides an exemption from tax for U.S. employees of the Panama Canal Commission. In a diplomatic note, Panama has confirmed the United States' explanation that the exemption was intended to apply solely to Panamanian taxes. Courts have split on the question whether the exemption applies to U.S. taxes.

House Bill

The House bill clarifies that the Agreement in Implementation of the Panama Canal Treaty does not exempt U.S. taxpayers from U.S. tax on income. The clarification is effective for all open taxable years.

[1] "Memorandum of agreement between the Government of the United States and the Government of Puerto Rico (draft)," November 14, 1985.

Senate Amendment

The Senate amendment is the same as the House bill except that it applies only to taxable years beginning on or after January 1, 1987.

Conference Agreement

The conference agreement follows the House bill with one clarification. The clarification is that the Agreement in Implementation of the Panama Canal Treaty does not exempt U.S. taxpayers from any U.S. tax (not limited to the income tax). With respect to U.S. taxes not imposed with respect to a taxable year (such as the gift and estate taxes), the provision is effective for taxable events after the date of enactment (rather than for all open taxable years).

b. Tax-free allowances

Present Law

Overseas employees of the U.S. Government generally are permitted to exclude certain allowances from gross income for U.S. tax purposes. Allowances paid to U.S. employees of the Panama Canal Commission and civilian employees of the Defense Department in Panama are not presently excludable under this rule.

House Bill

The House bill provides that U.S. Government employees of the Panama Canal Commission may exclude allowances equivalent to those permitted to be excluded by State Department employees in Panama. This provision is effective for taxable years beginning after 1985.

Senate Amendment

The Senate amendment generally is the same as the House bill except that it extends tax-free allowance treatment to Defense Department employees in Panama and is effective for taxable years beginning after 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

3. Foreign Sales Corporation (FSCs)

Present Law

The United States limits its tax on qualified income from exports when the exporter uses a "FSC"—a Foreign Sales Corporation. The FSC rules reduce taxable income by 16 percent of export income (15 percent for corporate shareholders). The Domestic International Sales Corporation (DISC) rules provide a similar benefit but only on the income from $10 million in export sales.

House Bill

The House bill changes the FSC rules to exempt 14 percent of export income (13 percent for corporate shareholders). It makes corresponding changes to the DISC rules. The changes are effective for taxable years beginning after 1985.

Senate Amendment

No provision.

Conference Agreement

The conference agreement does not include the House bill provision.

4. Exclusion for Private Sector Earnings of Americans Abroad

Present Law

U.S. citizens (other than U.S. Government employees) who live and work abroad and who satisfy certain physical presence or bona fide foreign residence tests may exclude from gross income up to $80,000 of foreign earned income per year, and may also exclude foreign housing costs that exceed a base amount. The $80,000 ceiling on excludable foreign earned income is scheduled to increase $5,000 each year beginning in 1988, up to $95,000 for taxable years beginning in or after 1990. This schedule reflects a Tax Reform Act of 1984 delay of the increases, which the Economic Recovery Tax Act of 1981 had scheduled to begin in 1984.

House Bill

The House bill reduces the foreign earned income exclusion ceiling to $75,000, effective for taxable years beginning after 1985.

Senate Amendment

The Senate amendment reduces the foreign earned income exclusion ceiling to $70,000 and denies benefits to individuals violating Federal travel restrictions. These changes are effective for taxable years beginning after 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

5. Transfers of Intangibles to Related Parties Outside of the United States

Present Law

Transfers to related foreign corporations as licenses or sales are subject to an "arm's-length" price standard. Uncertainty exists regarding what transfers are appropriate to treat as "arm's-length" comparables and regarding the significance of profitability, including major changes in profitability of the intangible after the transfer.

Transfers to related foreign corporations as contributions to capital require the transferor to recognize annually, as U.S. source income, amounts that would have been received under an agreement providing for payments contingent on productivity, use, or disposition of the property.

Special rules apply for intangibles treated as owned by U.S. possessions corporations (see XII. D.1., above).

House Bill

Payments with respect to intangibles transferred to a foreign related party must be commensurate with the income attributable to the intangible. This standard also applies to determine the minimum cost-sharing payment with respect to intangibles treated as owned by a U.S. possessions corporation that elects the cost-sharing option. (See XII. D.1., above.)

For transfers from U.S. persons to foreign related parties, the bill applies to transfers after November 16, 1985 in taxable years ending after that date. For U.S. possessions corporations that elect the cost-sharing option, the bill applies for taxable years beginning after December 31, 1985, without regard to the date of the transfer (if any).

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill. The concerns addressed in the House bill originated in connection with transfers of intangibles from U.S. parties to foreign affiliates, particularly those operating in low-tax foreign countries. Consequently, the provisions of the House bill only were applied to transfers of intangibles from U.S. persons to their foreign affiliates. In view of the fact that the objective of these provisions—that the division of income between related parties reasonably reflect the relative economic activity undertaken by each—applies equally to inbound transfers, the conferees concluded that it would be appropriate for these principles to apply to transfers between related parties generally if income must otherwise be taken into account.

The conferees do not intend to affect present law concepts of what constitutes a single "license", to the extent those concepts are not inconsistent with the purposes of the new provision. Thus, for example, in the case of continuous transfers of technology under a continuing license agreement, the adequacy of the royalty may, in appropriate cases, be determined by applying the appropriate standards under the conference agreement on an aggregate basis with respect to the profitability and other relevant features of the transferred intangibles as a whole.

Similarly, the conferees do not intend to change principles that would permit offsets or other adjustments to reflect the tax impact of the taxpayer's transactions as a whole.

The conferees are also aware that many important and difficult issues under section 482 are left unresolved by this legislation. The conferees believe that a comprehensive study of intercompany pricing rules by the Internal Revenue Service should be conducted and that careful consideration should be given to whether the existing regulations could be modified in any respect.

In revising section 482, the conferees do not intend to preclude the use of certain bona fide research and development cost-sharing arrangements as an appropriate method of allocating income attributable to intangibles among related parties, if and to the extent such agreements are consistent with the purposes of this provision that the income allocated among the parties reasonably reflect the actual economic activity undertaken by each. Under such a bona fide cost-sharing arrangement, the cost-sharer would be expected to bear its portion of all research and development costs, on unsuccessful as well as successful products within an appropriate product area, and the costs of research and development at all relevant development stages would be included. In order for cost-sharing arrangements to produce results consistent with the changes made by the Act to royalty arrangements, it is envisioned that the allocation of R&D cost-sharing arrangements generally should be proportionate to profit as determined before deduction for research and development. In addition, to the extent, if any, that one party is actually contributing funds toward research and development at a significantly earlier point in time than the other, or is otherwise effectively putting its funds at risk to a greater extent than the other, it would be expected that an appropriate return would be required to such party to reflect its investment.

Effective date.—Under the conference agreement, the new provisions generally apply to taxable years beginning after December 31, 1986, but only with respect to transfers after November 16, 1985, or licenses granted after such date (or before such date with respect to property not in existence or owned by the taxpayer on such date). However, for purposes of section 936 payments, the new provisions apply to taxable years beginning after December 31, 1986, without regard to when any transfer (or license) was made.

6. Compliance Provisions Applicable to U.S. Persons Resident Abroad

Present Law

U.S. persons resident abroad are required to file U.S. tax returns, but a substantial

percentage of foreign residents fails to do so.

a. IRS information returns

The IRS formerly obtained some information about U.S. persons resident abroad from voluntary information returns filed with passport applications, but the return was discontinued because many taxpayers refused to file a voluntary return.

b. Withholding on pension payments

U.S. pension payments to foreign residents, like all U.S. pension payments, are not subject to mandatory withholding such as that which applies to wage and salary payments.

House Bill

No provisions.

Senate Amendment

a. IRS information returns

The Senate amendment requires that passport applicants and green card applicants complete an IRS information return reporting foreign residence and certain other information. Penalties for failure to file apply. The provision applies to taxable years beginning after December 31, 1986.

b. Withholding on pension payments

The Senate amendment requires withholding with respect to pension payments on U.S. persons living outside the United States. The provision applies to payments after December 31, 1986.

Conference Agreement

a. IRS information returns

The conference agreement generally follows the Senate amendment, except that the agreement applies to passport and green card applications submitted after December 31, 1987 (or, if earlier, the effective date of the initial regulations under the new information return provisions, but not before January 1, 1987). The agreement also makes the following technical amendments: First, to deter noncompliance effectively, the penalty for each failure to file the required information returns is increased from $50 to $500. Second, the agreement clarifies that no other provision of law will exempt individuals from the new return-making requirements or bar agencies collecting the returns from providing them to the Secretary, as required. Third, notwithstanding any other provision of law, agencies which collect (or are required to collect) the new information returns must provide to the Secretary the names (and any other identifying information) of any individuals who refuse to provide them as required. Fourth, the agreement authorizes the Secretary to exempt any class of individuals from the return requirements by regulations if he determines that applying the return requirements to those individuals is not necessary to carry out the provision's purposes.

b. Withholding on pension payments

The conference agreement is the same as the Senate amendment.

7. Foreign Investment Companies

Present Law

Generally, no current U.S. tax applies to the foreign income of a foreign corporation that is not a controlled foreign corporation (under subpart F) or a foreign personal holding company (under the FPHC rules) even if all its income is passive income or other tax haven income, and even if all its shareholders are U.S. persons.

When a U.S. person disposes of stock in a foreign investment company (FIC), however, the gain is not automatically subject to a favorable capital gains tax rate, even if the company is widely held. The gain is subject to ordinary income treatment to the extent of the shareholder's share of the FIC's earnings and profits. This special ordinary income rule generally applies to a foreign corporation that is primarily in the business of investing in securities or commodities, if 50 percent or more of the corporation's stock (by vote or value) is held by U.S. persons.

House Bill

The House bill modifies present law to apply the FIC rules to U.S. investors in foreign funds without regard to the degree of U.S. ownership in such funds and to allow 10-percent shareholders of FICs to claim a deemed paid foreign tax credit when the FIC is also a controlled foreign corporation.

The House bill also requires current recognition of income by U.S. investors in FICs that are passive investment vehicles by looking through to the earnings and profits of the passive foreign investment company (PFIC). The bill provides that U.S. investors in PFICs that do not currently distribute their earnings may elect to defer U.S. tax upon agreement to pay tax plus interest on receipt of distributions or on disposition of the investment. The bill requires a U.S. investor to pay tax on the investor's entire share of a PFIC's earnings and profits and to treat this income as ordinary income.

The bill defines a PFIC as any foreign investment company that derives at least 75 percent of its income from passive investments or any foreign investment company at least half of whose assets are passive assets.

The provisions are effective for taxable years of foreign corporations beginning after 1985.

Senate Amendment

The Senate amendment does not modify present law's 50-percent threshold for purposes of characterizing gain on disposition of stock in a foreign corporation, but adopts the House bill's provision that allows a deemed-paid foreign tax credit to a 10-percent shareholder of a FIC that is also a controlled foreign corporation.

Instead of the House bill provision requiring U.S. investors in passive foreign investment companies (PFICs) to pay tax currently on their share of the PFIC's earnings and profits, the Senate amendment requires an investor to pay tax plus an interest charge based on the value of deferral on receipt of distributions from a PFIC or on disposition of his or her investment in a PFIC. The Senate amendment does, however, allow an individual to elect to pay tax currently on his or her share of a PFIC's earnings. The amendment further provides that the amount subject to tax is limited to the amount of an investor's gain on disposition and provides that characterization of income at the PFIC level as ordinary or capital gain may be passed through to a U.S. investor.

The amendment defines a PFIC as any foreign corporation that derives 75 percent or more of its income from passive investments or any foreign corporation at least half of whose assets are passive assets. The amendment excludes from the definition of a PFIC any FIC that has an election in effect under section 1247.

The provisions are effective for earnings derived in taxable years of foreign corporations after 1986.

Conference Agreement

The conference agreement generally follows the Senate amendment with respect to PFICs, but contains substantial modifications. The agreement follows the Senate amendment in not modifying present law's U.S. ownership threshold for FICs and in adopting the provision allowing a 10-percent shareholder of a FIC a deemed-paid foreign tax credit when the FIC is also a controlled foreign corporation. The agreement is effective for earnings derived by foreign corporations in taxable years after 1986.

General rule

The conference agreement provides generally that U.S. shareholders in PFICs pay U.S. tax plus an interest charge based on the value of tax deferral at the time that the shareholder disposes of his or her PFIC investment or on receipt of an "excess" distribution. This general rule applies to U.S. investors in PFICs that are not "qualified electing funds", as described below. The conferees believe that eliminating the economic benefit of deferral is necessary to eliminate the tax advantages that U.S. shareholders in foreign investment funds have heretofore had over U.S. persons investing in domestic investment funds. As does the Senate amendment, this rule provides that gain recognized on disposition of stock in a PFIC or on receipt of an "excess" distribution from a PFIC is considered to be earned pro rata over the shareholder's holding period of his investment. Under this rule, U.S. tax due in the year of disposition (or year of receipt of an "excess" distribution) is the sum of (1) U.S. tax computed using the highest rate of U.S. tax for the investor (without regard to other income or expenses the investor may have) on income attributed to prior years, plus (2) interest imposed on the deferred tax, plus (3) U.S. tax on the gain attributed to the year of disposition (or year of receipt) and to years in which the foreign corporation was not a PFIC (for which no interest is due). This rule provides that all gain recognized (and all distributions) are treated as ordinary income. The portions of distributions that are not characterized as "excess" distributions are, of course, subject to tax in the current year under normal Code rules. The agreement provides, however, that distributions from a PFIC are not eligible for the deemed paid foreign tax credit under section 902 under this rule. For purposes of claiming any withholding tax as a foreign tax credit, however, the total amount of the distribution, including any "excess" distribution amount, is included in gross income in the year of receipt.

The conference agreement defines an "excess" distribution as any current year distribution in respect of stock to the extent that it represents a ratable portion of the total distributions in respect of the stock during the year that are in excess of 125 percent of the average amount of distributions in respect of the stock during the three preceding years. This rule is necessary since an excess distribution is allocated to each day in an investor's holding period with respect to each share of stock (for purposes of tax and interest determinations), an investor may have different holding periods with respect to his or her investment, and a fund may distribute earnings more than once during a taxable year. This rule is illustrated in the following example: assume an investor's average distributions for the 3 prior years are $100 and the investor receives a $100 distribution in the first month

of the year and a $50 distribution in the eleventh month of the year. The total excess distribution of $25 is to be allocated two-thirds to the first month and one-third to the eleventh month for purposes of attributing the excess distribution to the current and prior years for computing the investor's deferred tax and interest. In cases where a fund distributes earnings only once a year (and an investor's stock holdings do not change over the 3-year period), the excess distribution will equal that portion of the year's distributions in respect of stock in excess of 125 percent of the average amount of distributions in respect of the stock during the three prior taxable years.

The excess distribution provision liberalizes the Senate amendment provision which treated all distributions as representing prior and current year earnings. This provision gives relief to investment funds which currently distribute all their ordinary earnings, for which there is no U.S. tax deferral. The agreement provides that regulations are to be prescribed making proper adjustments for stock splits and stock dividends, determining the amount of excess distributions in cases where investments are disposed of at varying times in a taxable year, determining the excess distribution amount when distributions are received in currencies other than the U.S. dollar, and aggregating stock ownership for shares with the same holding period.

The conference agreement provides that gain recognized on disposition of stock in a PFIC (or income in the form of a distribution from a PFIC) is not to be attributed to prior years and U.S. tax is not to be increased by an interest charge if the PFIC is a "qualified electing fund" (as described below) for each of the fund's taxable years that begin after December 31, 1986 and that include any portion of the investor's holding period. Any U.S. shareholder who owns stock in a PFIC which becomes a qualified electing fund may elect to mark his or her investment in the PFIC to market, pay all prior deferred tax and interest, acquire a new basis and holding period in his or her PFIC investment, and thereafter be taxed under the special rules applicable to such funds.

The conference agreement incorporates the rules in present law section 1246 relating to FICs, for stock with a substituted basis that inherits the attributes of PFIC stock, for certain entities through which PFIC stock is held interests in which are treated as PFIC stock, for stock acquired from a decedent (other than from a foreign decedent) to deny a basis step-up at date of death, and for information reporting purposes wherein 5 percent owners of PFICs must report certain information required by the Secretary. The agreement also provides the Secretary the authority to disregard any nonrecognition provision of present law on disposition of PFIC stock.

Qualified electing funds

For any U.S. investor whose PFIC agrees to supply adequate information to the IRS, the agreement provides a taxing system similar to the House bill: every U.S. person who owns stock in a "qualified electing fund" must currently include in gross income his share of the PFIC's earnings and profits (with appropriate basis adjustments for amounts not distributed and for distributions previously included in income). This inclusion rule requires current payment of tax, absent a shareholder-level election to defer tax, as described below.

The conference agreement defines a "qualified electing fund" as any PFIC which properly elects with the Secretary and which complies with the Secretary's requirements for determining earnings and profits, and ascertaining stock ownership. United States shareholders of qualified electing funds may also retain the long-term capital gain character of income derived at the PFIC level. The conferees felt that it was essential to allow the Internal Revenue Service adequate access to information about U.S. investments in foreign investment funds before U.S. shareholders of those funds receive flow-through of capital gain income and attribution of ordinary income to a particular taxable year.

The election to be a qualified electing fund for any taxable year must be made before the 15th day of the third month of the taxable year following the year for which the election is being made. If a qualified electing fund fails to meet its compliance obligations, it is intended that all U.S. investors be treated as having disposed of their stock, and that the corporation's election to be a qualified electing fund be revoked. Once an election is made, it is revocable only with the consent of the Secretary. The conferees intend that revocation be granted only in circumstances where compliance with the agreement's provisions is ensured.

The conferees are of the view that, even though U.S. investors may receive adequate income information from a PFIC, the U.S. investors may not have sufficient ownership in the PFIC to compel distributions. The agreement provides, therefore, that U.S. investors in qualified electing funds can, subject to an interest charge, elect to defer U.S. tax on amounts included in income for which no current distributions are received. An election to defer tax is not available, however, for any amounts required to be currently included in income under the foreign personal holding company (FPHC) rules (sec. 551) or the subpart F rules (sec. 951).

The conference agreement provides that an election to defer tax is treated as an extension of time to pay tax for which a U.S. shareholder is liable for interest. The agreement provides that any distribution that represents earnings previously included in a shareholder's income or any disposition of stock will terminate any extension deferring tax. A shareholder may, of course, pay any deferred tax and interest prior to a distribution or disposition.

Definition of passive foreign investment company

The conference agreement follows the Senate amendment in defining a PFIC by reference to certain passive income requirements or passive asset ownership requirements. Consistent with the Senate amendment, passive income is defined as any income of a type that would be subpart F FPHC income (income described in sec. 954(c), as modified by the agreement).

An exception to the definition of passive income is provided under the agreement for income derived by bona fide banks and insurance companies, subject to regulatory exceptions. Any foreign bank licensed to conduct a banking business under the laws of the United States or of any State will be generally presumed to be a bona fide bank for this purpose. However, the Secretary has regulatory authority to apply the PFIC provisions to any "bank" where necessary to prevent U.S. individuals from earning what is essentially portfolio investment income in a tax deferred entity. A bona fide insurance company is any foreign insurance company that would be subject to taxation under subchapter L if the company were a domestic insurance company. It is expected that bona fide underwriters of securities will be excluded from classification as a PFIC both under the asset test (because the majority of their assets, particularly securities held for sale to the public, are assets that do not give rise to subpart F FPHC income by virtue of the dealer exception in sec. 954(c)) and under the income test (because a substantial amount of their income is commission income, which is not subpart F FPHC income). Passive income derived by foreign banks and other financial businesses that are basically widely held incorporated investment vehicles will be treated as such for purposes of the PFIC definition.

The conferees do not intend that foreign corporations owning the stock of subsidiaries engaged in active businesses be classified as PFICs. To this end, the agreement attributes a proportionate part of assets and income of a 25-percent owned corporation to the corporate shareholder in determining whether the corporate shareholder is a PFIC under either the asset test or income test.

The conference agreement follows the Senate amendment by excluding from PFIC classification corporations for which an election under section 1247 is in effect and corporations in a start-up phase of an active business. The agreement expands this latter exception by excluding from PFIC classification corporations in transition from one active business to another active business. This special rule provides that if a corporation (or any predecessor) which was not a PFIC for any prior taxable year establishes to the Secretary's satisfaction that (1) its passive income is attributable to proceeds from the disposition of one or more active businesses, (2) it will not be a PFIC in any of the two taxable years after the current year, and it is, in fact, not a PFIC for either of the two taxable years after the current taxable year, then the corporation will not be classified as a PFIC for the current taxable year.

The agreement modifies the Senate amendment rule that treated a foreign corporation which once was a PFIC as forever a PFIC. It allows a shareholder to mark his or her investment to market in a corporation which does not any longer possess PFIC characteristics, to pay prior deferred tax and interest, and thereby to purge the stock of its classification as PFIC stock. For qualified electing funds, the agreement provides that stock in a PFIC will automatically cease to be classified as PFIC stock when the foreign corporation ceases to be a PFIC so long as any election to defer payment of tax and interest by a U.S. investor in any such fund terminates then and the investor pays all prior deferred tax and interest.

Other rules

The conference agreement adopts the Senate amendment's rules for attributing ownership of PFIC stock to U.S. persons, its anti-avoidance rules to prevent circumvention of the agreement's provisions, and its rule treating a pledge of PFIC stock as security for a loan as a disposition of the stock at fair market value (with a concurrent basis step-up and new holding period). The agreement adopts rules to coordinate these provisions with the subpart F and FPHC current inclusion rules and to resource PFIC inclusions as U.S. source if the PFIC

is a United States-owned foreign corporation (under sec. 904(g)) and the PFIC receives U.S. source income. The agreement further provides that PFICs are not to be treated as personal holding companies or to be subject to the accumulated earnings tax.

E. Treatment of Foreign Taxpayers

1. Branch-Level Tax

Present Law

Dividends and interest paid by foreign corporations engaged in a U.S. trade or business are not U.S. source and are not, consequently, subject to U.S. withholding tax unless 50 percent or more of their gross income for a 3-year period is effectively connected with a U.S. trade or business. If the 50-percent threshold is crossed, the United States imposes its withholding tax at a 30-percent rate (or lower rate pursuant to a treaty) on the allocable portion of the payment attributable to the payor's effectively connected income.

House Bill

The House bill generally eliminates the second-level withholding taxes of current law and replaces them with a tax on the profits considered remitted by a U.S. branch of a foreign corporation to its head office and on interest payments attributable to a branch's U.S. trade or business. The tax rate in both instances is 30 percent unless reduced by treaty. The bill is effective for taxable years beginning after December 31, 1985.

The House bill retains present law's withholding taxes in circumstances where the branch tax is not permitted by an income tax treaty but denies benefits of any U.S. treaty to shareholders of a foreign corporation that are not residents of the country in which the corporation is a resident.

The House bill eliminates the effect of the branch tax when a foreign corporation is owned by a 10-percent U.S. corporate shareholder by allowing a credit to the shareholder for a pro rata portion of the branch tax paid by the foreign corporation.

Senate Amendment

The Senate amendment generally follows the House bill with respect to the branch tax on profits but does not adopt the branch tax on interest. Instead, the Senate amendment retains present law's second-level withholding tax on interest but reduces the U.S. business income threshold to 10 percent before the tax can be imposed. When the threshold is met, interest paid by a foreign corporation is treated as U.S. source in the same proportion that the interest claimed as a deduction in the United States bears to the total interest of the corporation. In cases where the branch profits tax is prohibited by treaty, the Senate amendment generally follows the House bill by retaining the second-level withholding tax on dividends but reduces the U.S. business income threshold for imposition of the tax to 10 percent.

The Senate amendment follows the House bill in allowing U.S. income tax treaties to preclude imposition of the branch profits tax except in cases of treaty shopping. The Senate amendment denies treaty benefits with respect to the second-level withholding taxes in treaty shopping cases.

The Senate amendment does not adopt the branch tax credit, but achieves a similar result in expanding the availability of the dividends received deduction (sec. 987 of the Senate amendment).

The amendment is effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement generally follows the Senate amendment with respect to the branch tax on profits, with substantive and technical modifications. With respect to interest, the conference agreement treats as U.S. source the greater of the interest paid or deducted by a U.S. branch of a foreign corporation. The conference agreement adopts the Senate amendment's effective date.

Branch profits tax

To achieve greater parity between the remittance of branch profits and the distribution of subsidiary earnings, the conference agreement provides that the taxable base on which the branch profits tax is imposed is the earnings and profits of a U.S. branch of a foreign corporation attributable to its income effectively connected (or treated as effectively connected) with a U.S. trade or business. Thus, for example, the branch profits tax applies to a foreign corporation engaged in a U.S. trade or business even though, for purposes of sections 897 and 6039C, the corporation has made an election under section 897(i) to be treated as a U.S. corporation. Consistent with the determination of a subsidiary's earnings and profits, the conferees intend that a branch's earnings and profits include income that would be effectively connected with a U.S. trade or business if such income were taxable, such as tax-exempt municipal bond interest. Moreover, the agreement provides that current earnings that are not reinvested in a branch's trade or business assets are subject to tax though the branch may have incurred prior year deficits. Consistent with the taxation of a subsidiary's distributions, the agreement provides that dividend distributions by a foreign corporation during a year do not reduce a branch's earnings and profits for purposes of computing the branch tax base. The conferees wish to clarify that, under regulations, the rules for determining assets and liabilities treated as connected with the conduct of a U.S. trade or business for branch tax purposes are to be consistent with the rules used in allocating deductions for purposes of computing taxable income.

The agreement excludes from the imposition of branch profits tax the following earnings and profits attributable to income effectively connected with a U.S. trade or business: (1) certain earnings derived by foreign sales corporations (income described in Code secs. 921(d) and 926(b)); (2) earnings derived by foreign transportation carriers that are exempt from U.S. tax pursuant to treaty or reciprocal exemption; (3) earnings derived from the sale of any interest in U.S. real property holding corporations; (4) earnings derived by corporations satisfying certain ownership and income requirements that are organized in certain U.S. possessions (corporations described in sec. 881(b)); and (5) earnings derived by certain captive insurance companies that elect to treat their income as effectively connected with a U.S. trade or business (*see* sec. 1221(b)(2) of the agreement, disussed at C.1.a., above). The exclusion for earnings derived by certain possessions corporations is intended to be "mirrored" so as not to apply the branch tax to U.S. corporations operating in possessions of the United States.

Since the taxable base is computed with reference to effectively connected earnings and profits, the computation of net equity, the base used to determine constructive profit remittances, is likewise based on the earnings and profits value of the branch's assets and liabilities connected with its U.S. trade or business (if these values are different from the assets' and liabilities' adjusted tax bases). For example, in computing an increase or decrease in net equity, a branch that claims accelerated depreciation on its assets for the purpose of calculating taxable income will be required to make this branch-level tax computation using the assets' basis for earnings and profits purposes.

Following the Senate amendment, the agreement provides that the branch tax base is decreased when a branch's profits are reinvested in assets connected with a U.S. trade or business. The Secretary may prescribe regulations that carry out the purpose of this provision. The conferees generally believe that the base should be decreased in stock acquisition cases if branch tax would not have been imposed had assets, rather than stock, been acquired. For example, the regulations may provide that where control of a U.S. corporation is acquired with a branch's profits it may be inappropriate to impose the branch tax.

Branch-level interest tax

Although the conference agreement generally follows the Senate amendment's approach of treating interest as U.S. source to the extent it is deducted in the United States, the agreement modifies the amendment's interest provisions to treat a branch, in effect, more like a subsidiary, as the branch tax does. The agreement provides that any interest paid by a branch's U.S. trade or business is U.S. source and subject to U.S. withholding tax of 30 percent, unless the tax is reduced or eliminated by a specific Code or treaty provision. To the extent a branch has allocated to it under Reg. section 1.882-5 an interest deduction in excess of the interest actually paid by it, the excess is treated under the agreement as interest paid by a U.S. subsidiary to the foreign corporate taxpayer on a notional loan from the taxpayer. This excess is also subject to a 30-percent tax absent a specific Code exemption or treaty reduction. The agreement treats the excess interest as paid on the last day of a corporation's taxable year and provides that any U.S. tax due is payable within the time prescribed for filing the corporation's U.S. income tax return (not including extensions).

The conference agreement provides regulatory authority to determine, for purposes of any special Code treatment, how the excess interest is to be treated. For example, the regulations may provide that where indebtedness of the home office is attributed to the branch, the excess interest is to be treated as incurred on each type of external borrowing by the corporation (*e.g.*, a bank deposit) and determined by reference to the relative principal amounts of, and the average interest rate on, each type of external borrowing. Thus, for example, in the case of a bank, the excess interest will not necessarily be treated as paid on a bank deposit. The conferees are aware that some corporations attempt to establish actual debtor-creditor relationships for funds between a branch and a home office or between one branch and another. The conferees question the legitimacy of such arrangements from a tax perspective since only one legal entity is involved. Nonetheless, if companies are able to legally establish such relationships, it is intended that the regulations address these relationships and possibly treat the excess interest as incurred on each type of inter-branch "loan". The conferees are concerned

71-059 O-87-32 (Pt. 17)

that taxpayers may artificially structure interbranch loans in a manner different from their external liabilities in an attempt to reduce or eliminate the tax on excess interest. The conferees, therefore, expect the regulations to address this concern.

For purposes of determining whether the tax on the excess interest is to be reduced or eliminated by treaty, the applicable treaty generally is any income tax treaty between the United States and the country of the corporation's home office. However, any treaty benefits available in this case are subject to the agreement's prohibition against treaty shopping. In the case of U.S. withholding tax on interest actually paid by a branch, since the agreement effectively treats the branch as a U.S. corporation for purposes of the tax, the appropriate treaty will be any treaty between the United States and the country of a foreign recipient, subject to the agreement's treaty shopping rules.

Interaction with income tax treaties

The conference agreement generally follows the Senate amendment in providing that existing U.S. income tax treaties may modify, reduce, or eliminate the branch profits tax, the second-level withholding tax on dividends, or the branch-level tax on interest except in cases of treaty shopping. The agreement modifies, however, the definition of treaty shopping adopted by the Senate amendment in two respects. First, the Senate amendment's ownership requirement is modified to look through all entities, not only foreign entities, in determining whether 50 percent or more of the corporation's stock is owned by local residents. Second, the agreement provides that where 50 percent or more of a foreign corporation's income is used to satisfy liabilities outside the corporation's country of residence, the corporation may not avail itself of any treaty benefits provided by an income tax treaty between its country of residence and the United States (a "base erosion" rule). This latter rule is frequently used in recent U.S. income tax treaties and the conferees feel its addition is necessary to prevent nonresidents of a treaty country from gaining benefits the treaty accords. As does the Senate amendment, the conference agreement authorizes the Secretary to prescribe regulations regarding other circumstances in which the shareholders of a foreign corporation are not treaty shopping.

The conferees understand that the Treasury Department interprets Article 24(3) of the United States 1981 Model Income Tax Treaty to preclude the imposition of the agreement's branch profits tax. The conferees also do not intend that the branch tax be imposed on income not attributable to a permanent establishment (even though the income is effectively connected with a U.S. trade or business under Code rules) if the treaty in question in fact precludes the United States from imposing its regular corporate income tax on income not attributable to a permanent establishment, so long as the shareholders of a foreign corporation are not treaty shopping.

Other rules

The conference agreement reduces present law's business income threshold for imposition of the second-level withholding tax to 25 percent. The agreement also clarifies that the second-level withholding tax on dividends is not applicable in those cases where the branch profits tax may be imposed, even though no branch tax may be due in a particular taxable year. For example, if a branch reinvests its after-tax earnings in its trade or business during a particular taxable year so that no branch tax is due that year, but the branch's business income exceeds 25 percent of the foreign corporation's total income and the corporation distributes dividends during that year, the second-level dividend withholding tax is imposed only if the treaty of the country where the foreign corporation resides precludes the United States from imposing its branch tax and permits the second-level withholding tax.

Consistent with the branch tax's application to income from the disposition of real property, the agreement also conforms present law's second-level withholding tax on dividends so that the United States collects two levels of tax on this income. No inference is intended by the modification of this provision about the interpretation of present law.

The conferees are concerned that the branch-level interest provision may lead to increased use of back-to-back loans by nontreaty residents and improper characterization of interbranch funds by both treaty and nontreaty residents to avoid U.S. tax. The conferees wish to emphasize that back-to-back loans, as generally provided under present law, will be collapsed by the IRS, and the ultimate recipient, if not treaty protected, will be subject to U.S. tax. Similarly, the conferees expect the Internal Revenue Service to closely scrutinize the characterization of interbranch transactions. The conferees recognize the difficulty that the Internal Revenue Service has in identifying these arrangements that erode the U.S. tax base and believe the tax-writing committees of the Congress should monitor collections and compliance with the interest provision adopted under the agreement to ensure its continued viability, and, if necessary, propose legislation to obviate any abuses.

2. Retain Character of Effectively Connected Income

Present Law

The United States taxes foreign persons' income that is effectively connected with a U.S. trade or business on a net basis at graduated rates, in the same manner that it taxes the income of U.S. persons. Foreign persons may not be subject to U.S. tax if they receive income that was earned by a U.S. trade or business in a year after the trade or business has ceased to exist (*e.g.*, by selling property and recognizing the gain on the installment basis) or dispose of U.S. business property at a gain in a year after the business has ceased to exist.

House Bill

The House bill provides that income or gain is treated as effectively connected with a U.S. trade or business if it is attributable to another taxable year and would have been so treated if it had been taken into account in that other year. This provision applies to taxable years beginning after 1985.

Senate Amendment

The Senate amendment generally follows the House bill, but amends present law in two additional respects. First, under the Senate amendment, a foreign person's sale of U.S. assets that formerly were used in a U.S. business is taxable. Second, the Senate amendment treats the removal of business assets from U.S. jurisdiction as a disposition, with a basis step-up for this purpose for business assets brought into the United States. The Senate amendment applies to taxable years beginning after 1986.

Conference Agreement

The conference agreement generally follows the Senate amendment except that it does not include the provision treating the removal of business assets as a disposition, and it only treats income as being effectively connected if the assets are sold within 10 years after being used in a U.S. business.

3. Tax-Free Exchanges by Expatriates

Present Law

A U.S. citizen who gives up citizenship for a principal purpose of avoiding U.S. tax will generally continue for a period of ten years to be taxed as a citizen on U.S. source income, but not on foreign source income. U.S. source income for this purpose includes gains from sales of U.S. property. Tax-avoidance expatriates may be able to avoid tax by making a tax-free exchange of U.S. property.

House Bill

The House bill applies the tax-avoidance expatriate rules to gains on the sale of property the basis of which was determined by reference to property located in the United States, stock of a U.S. corporation, or a debt obligation of any U.S. person. This provision applies to dispositions of property acquired in tax-free exchanges after September 25, 1985.

Senate Amendment

The Senate amendment is the same as the House bill except that it applies to dispositions of property acquired in tax-free exchanges after March 1, 1986.

Conference Agreement

The conference agreement follows the House bill.

4. Excise Tax on Insurance Premiums Paid to Foreign Insurers and Reinsurers

Present Law

Foreign insurers and reinsurers frequently are not subject to U.S. income tax, but rather to an excise tax on premiums paid to them for the direct insurance or reinsurance of U.S. risks. The excise tax rates are (per dollar of premium): four cents for casualty contracts, one cent for life contracts, and one cent for all reinsurance. The tax is collected by return. Payments to some insurers and reinsurers are exempt by treaty, but reinsurance premiums paid by treaty-protected insurers and reinsurers are subject to the tax (unless the recipient is exempt by treaty).

House Bill

The House bill makes the excise tax on casualty reinsurance premiums paid to foreign insurers for U.S. risk coverage equal to that on similar casualty insurance premiums (four percent). It imposes an excise tax only once—on retained premiums received by foreign insurers or reinsurers. It makes the foreign insurer (or his agent) liable for the tax and requires the U.S. insured or broker obligated to transmit the premiums to withhold the tax.

The provision applies to premiums paid after December 31, 1985.

Senate Amendment

The Senate amendment requires the Treasury Department to study whether U.S. reinsurance corporations are at a significant competitive disadvantage vis-a-vis foreign reinsurance corporations by reason of U.S. treaties, and report before January 1, 1988. If U.S. reinsurance corporations are at such a competitive disadvantage, the Senate believes that the Treasury Department should

renegotiate the relevant treaties to eliminate that disadvantage.

Conference Agreement

The conference agreement follows the Senate amendment with an amendment treating certain captive insurance companies as controlled foreign corporations for subpart F purposes (this amendment is discussed at XII.C.1.a., above).

5. Reporting by Foreign-Controlled Corporations

Present Law

Foreign-controlled foreign corporations doing business in the United States and foreign-controlled U.S. corporations are required to report transactions with related foreign corporations.

House Bill

No provision.

Senate Amendment

The Senate amendment requires foreign-controlled foreign corporations doing business in the United States and foreign-controlled U.S. corporations to report transactions with all related foreign parties, whether or not a corporation. This provision applies to taxable years beginning after 1986.

Conference Agreement

The conference agreement follows the Senate amendment with the technical corrections and modifications described below. First, the agreement defines a related party as any person who is related to the reporting corporation under sections 482, 267(b), or 707(b)(1). The latter two Code sections provide objective related party tests, in contrast with section 482, the sole provision used in the Senate amendment for determining related party status.

Second, the agreement adds a requirement that U.S.-controlled foreign corporations, foreign-controlled U.S. corporations, and foreign-controlled foreign corporations doing business in the United States report such information as the Secretary may require for purposes of carrying out the installment sales rules described in VIII. C., above. The conferees note that the limitations imposed by section 6103, relating to confidentiality of information, are to apply to the disclosure of any information provided to the Internal Revenue Service pursuant to this latter provision.

6. Foreign Investors in U.S. Partnerships

Present Law

Foreign persons who earn wages or investment income in the United States are generally subject to withholding requirements designed to ensure collection of applicable U.S. taxes. Foreign persons with investments in U.S. partnerships, however, are not subject to U.S. withholding tax on their share of the income attributable to the partnership's trade or business.

House Bill

No provision.

Senate Amendment

The Senate amendment requires domestic partnerships that have income effectively connected with a U.S. trade or business to withhold U.S. tax at a 20-percent rate on all distributions to foreign partners. The requirement is effective for taxable years beginning after 1986.

Conference Agreement

The conference agreement generally follows the Senate amendment, with modifications. The conference agreement applies the new withholding rule to foreign partnerships as well as to domestic partnerships. The agreement clarifies that the new withholding rule does not apply to payments that are subject to withholding under Code section 1441 or 1442, or would be so subject if a treaty did not reduce or eliminate the tax required to be withheld. In addition, the agreement provides that withheld amounts in excess of a foreign person's tax liability are to be treated as an overpayment of tax. The agreement also provides regulatory authority to coordinate the new withholding rule with the FIRPTA withholding requirements to prevent duplicative withholding.

Under the conference agreement, if a partnership's gross income effectively connected with a U.S. trade or business over a three-year period is less than 80 percent of the total gross income of the partnership over that period, then withholding is required only on the proportion of current distributions that the partnership's gross income effectively connected with its U.S. trade or business bears to the partnership's total gross income over its previous three taxable years.

Finally, the conference agreement contains general regulatory authority for the Secretary to carry out the agreement's provisions. For example, the regulations are to specify the proper withholding agent in the case of tiers of partnerships, and the appropriate withholding requirement in the case of a partnership that has effectively connected income for the first time.

The provisions apply to distributions after the date prescribed in regulations, or if earlier, December 31, 1987, but not before January 1, 1987.

7. Income of Foreign Governments

Present Law

Foreign governments are not subject to U.S. tax on income from their investments in the United States. Treasury regulations specify that income from commercial activities is not investment income and therefore is not exempt from U.S. tax. Certain international organizations (those described in Code sec. 7701(a)(18)) are completely exempt from tax.

House Bill

No provision.

Senate Amendment

The Senate amendment codifies the rule taxing the commercial activities of foreign governments, and defines commercial activity to include ownership of a controlling interest in a corporation engaged in a trade or business anywhere. It clarifies that the determination of whether a governmental entity is engaged in commercial activities is to be made by reference to its activities worldwide. The foreign government exception does not apply to income received by or from controlled entities if they or related entities engage in commercial activities anywhere. A controlled entity is defined as any entity in which the foreign government owns (by value or voting power) at least a 50-percent interest or an interest that provides effective control over the entity. Where it has a tax treaty with the United States, a foreign government will be treated as a resident of its country for purposes of the treaty. The Senate amendment is effective on July 1, 1986.

Conference Agreement

The conference agreement generally follows the Senate amendment, with the modifications described below.

First, the conference agreement removes international organizations described in Code section 7701(a)(18) from the scope of the provision. For these international organizations, the conference agreement makes no change to present law.

Second, the conference agreement exempts from U.S. tax income derived from financial instruments in the conduct of governmental financial or monetary policy.

Third, the conference agreement deletes the provision of the Senate amendment that denied governmental treatment to any entity controlled by a foreign government if any other entity controlled by that government engaged in commercial activity. Under the conference agreement, as under the Senate amendment, if a controlled entity is itself engaged in commercial activity anywhere in the world, its income is treated like income of a privately owned entity. Income it receives is fully taxable and payments it makes are not eligible for the exemption. However, if a controlled entity is not itself engaged in any commercial activity, the agreement provides tax exemption for certain investment income earned by that controlled entity, whether or not any entity related to that controlled entity is engaged in commercial activity, and the agreement provides exemption for interest and dividend payments from the entity to the government. Thus, the conference agreement ensures taxation of income derived directly or indirectly by foreign governments from commercial activities. For this purpose, however, the conference agreement treats a foreign central bank of issue as a controlled commercial foreign entity only if engaged in commercial activities within the United States. The conferees anticipate that regulations will appropriately address shifting of income from commercial arms of foreign governments to other related entities. These regulations are to replace the rule of the Senate amendment that attributed commercial activity of one controlled entity to other controlled entities.

The conference agreement makes it clear that this provision is effective for amounts received or accrued on or after July 1, 1986, although no withholding obligation is imposed for amounts paid prior to the date of enactment.

8. Transfer Prices for Imports

Present Law

Importers may claim a transfer price for customs purposes that is too low to be consistent with the transfer price they claim for income tax purposes. (See *Brittingham*, 66 T.C. 373; 79-2 USTC 9494.)

House Bill

No provision.

Senate Amendment

Under the Senate amendment, importers cannot claim a transfer price for income tax purposes that is higher than would be consistent with the value they claim for customs purposes. This provision is effective for transactions entered into after March 18, 1986.

Conference Agreement

The conference agreement follows the Senate amendment. The conferees expect that the Secretary will provide rules for coordinating customs and tax valuation principles, including provision for proper adjustments for amounts such as freight charges, items of American content returned, and sales commissions where customs pricing rules may differ from appropriate tax valuation rules.

9. Dual Resident Companies

Present Law

U.S. corporations that are "residents" of foreign countries may consolidate with profitable companies both here and abroad and obtain for related parties two deductions for one item of expense.

House Bill

No provision.

Senate Amendment

The Senate amendment does not allow a U.S. corporation to consolidate with other U.S. corporations if foreign parties may benefit from its losses through foreign consolidation or group relief rules, unless the income of those foreign parties is or will be subject to U.S. tax. The amendment is effective for taxable years beginning after 1986.

Conference Agreement

The conference agreement follows the approach of the Senate amendment, with substantial modifications. The agreement provides that if a U.S. corporation is subject to a foreign country's tax on worldwide income, or on a residence basis as opposed to a source basis, any taxable loss it incurs cannot reduce the taxable income of any other member of a U.S. affiliated group for that or any other taxable year. A company may be subject to foreign tax on a residence basis because its place of effective management is in a foreign country or for other reasons. Where a corporation is subject to foreign tax on a residence basis, then, for U.S. purposes, its loss will be available to offset income of that corporation in other years, but not income of another U.S. corporation. Regulatory authority is provided to exempt a U.S. corporation from this rule to the extent that its losses do not offset the income of foreign corporations for foreign tax purposes. Thus, for example, a U.S. corporation that resides in a foreign country, that has no affiliates in that country whose foreign tax its losses can reduce, and whose losses do not otherwise reduce foreign tax of a foreign corporation, will not be subject to this provision.

The conferees adopted a rule preventing use of losses, in lieu of the prohibition of consolidation that the Senate amendment contained, because of their view that the collateral implications of deconsolidation were sometimes undesirable. For example, if a U.S. corporation that is a dual resident corporation wholly owns several U.S. subsidiaries, denial of consolidation to the dual resident corporation would automatically have prevented application of the consolidated return rules to transactions between two of its U.S. subsidiaries under current regulations. The conferees saw no reason to prohibit application of the consolidated return rules in that case, so long as the dual resident corporation's losses do not reduce both the taxable income of a foreign corporation in a foreign country and the U.S. taxable income of some other U.S. corporation.

The agreement's provision applies to dual resident companies whether or not any of the income of any foreign corporation that the dual resident corporation's loss may reduce in the foreign country is or will be subject to U.S. tax. This rule expands that of the Senate amendment, which would not have applied when the income of a foreign corporation whose foreign tax the dual resident corporation's loss could reduce was or would be subject to U.S. tax. The conferees extended the impact of this provision to all foreign corporations that could benefit from a dual resident corporation's net operating loss, whether or not the foreign corporation's earnings are or will be subject to U.S. tax, for two reasons.

First, the conferees believe that this extension is fair: the conferees are not aware of a case where the use of one company's deduction by two other companies in two tax jurisdictions makes sense as a matter of tax policy. The conferees have not perceived any relevant distinction between a deduction that arises on account of interest expense and one that arises on account of some other expense, or between a deduction for a payment to a related party and one for a payment to an unrelated party.

Second, the conferees noted arguments that the Senate provision discriminated against foreign-owned U.S. corporations. As extended, the provision will apply to losses shared with foreign corporations whose earnings will be subject to U.S. tax (which are typically U.S.-controlled) and not only to losses shared with foreign corporations whose earnings are never subject to U.S. tax (which are typically foreign-controlled). The conferees are aware that some have attempted to argue that the provision as extended discriminates against foreign-controlled U.S. entities by somehow imposing on those entities some requirement for loss-sharing not imposed on U.S.-controlled U.S. entities. The conferees find no merit in this argument. If this provision somehow is found to conflict with any treaty, the provision is to be effective notwithstanding the treaty.

This provision is effective for taxable years beginning after 1986. Carryforwards attributable to losses incurred in years beginning prior to 1987 by a dual resident corporation are available to offset income that another member of the affiliated group earns in years beginning after 1986. For example, a dual resident corporation incurs a $100 net operating loss in 1986, its first year of operation, and it shares that loss with a foreign corporation. The only other member of its U.S. consolidated group earns $50 in 1986. All these corporations use the calendar year as a taxable year. In 1987, the $50 loss carryforward is available for use against 1987 income of the dual resident corporation or the other member of the U.S. affiliated group.

10. Interest Paid to Related Tax-Exempt Parties

Present Law

Certain taxpayers may reduce their tax to a significant extent by deducting interest paid or accrued to related parties who do not pay U.S. tax on the interest income.

House Bill

No provision.

Senate Amendment

The Senate amendment denies the deduction for interest paid or accrued to related, tax-exempt parties (other than ESOPs) to the extent net interest exceeds 50 percent of pre-net interest deduction taxable income. It provides carryovers for disallowed amounts. The Senate amendment's restriction on deductibility also applies to back-to-back loans that might otherwise defeat the purpose of this rule.

Conference Agreement

The conference agreement does not include the Senate amendment provision.

F. Taxation of Foreign Currency Exchange Rate Gains and Losses

1. Adoption of Functional Currency Concept

a. General rule

Present Law

There are no express statutory rules for determining the amount and timing of gain or loss arising from fluctuations in the value of foreign currency (referred to as "exchange gain or loss").

House Bill

The House bill adopts the functional currency concept, under which exchange gain or loss is recognized on a transaction-by-transaction basis in the case of certain transactions denominated in a currency other than a functional currency. Except as otherwise provided (*e.g.*, in the case of a qualified business unit), a taxpayer's functional currency is the U.S. dollar. All determinations under the Internal Revenue Code of 1985 are to be made in a taxpayer's functional currency.

Senate Amendment

The Senate amendment follows the House bill with one exception: the Secretary is authorized to issue regulations providing for Federal income tax determinations to be made in a nonfunctional currency. Pursuant to the Secretary's regulatory authority, it is contemplated that regulations will prescribe rules for the accrual of original issue discount ("OID") on nonfunctional currency denominated obligations. Pending issuance of regulations, OID is to be determined in terms of units of the nonfunctional currency and translated into the functional currency using the average exchange rate for the accrual period. The functional currency amount of OID included in income for an accrual period is added to the basis of the obligation (to determine the adjusted issue price). Similar rules apply to the calculation of bond premium.

Conference Agreement

The conference agreement follows the Senate amendment.

b. Business entities

Present Law

There are no prescribed rules for determining when the results of a foreign operation can be measured in a foreign currency before translation into dollars.

House Bill

In the case of a qualified business unit ("QBU"), a taxpayer accounts for the results of operation by measuring income or loss in the QBU's functional currency. A QBU is defined as any separate and clearly identified unit of a taxpayer's active trade or business, if such unit maintains separate books and records in a functional currency. A QBU's functional currency is the currency used by such unit in keeping its books and records, and in which a significant part of its business activities are conducted. If the activities of a QBU are primarily conducted in U.S. dollars, then the functional currency of such unit is the U.S. dollar.

Senate Amendment

The Senate amendment generally follows the House bill, with modifications. A QBU is defined as any separate and clearly identified unit of a taxpayer's trade or business, if such unit maintains separate books and records. Further, the definition of a QBU's functional currency is the currency of the economic environment in which a significant part of the unit's activities are conduct-

ed, and which is used in keeping books and records.

Conference Agreement

The conference agreement follows the Senate amendment. In general, the rule for QBUs will apply where the foreign operation constitutes a trade or business, a significant part of the activities of which are conducted in the local currency. The conference agreement contemplates that the U.S. dollar will be used as the functional currency of a foreign operation that is an integral extension of a U.S. operation (*e.g.*, a foreign corporation whose sole function is to act as a financing vehicle for affiliated U.S. corporations, or a foreign corporation used to hold portfolio stock investments or similar passive assets that could readily be carried on the parent corporation's books), or a foreign operation with a limited duration (e.g., an offshore construction project undertaken by a U.S. taxpayer). In this connection, the conferees wish to clarify that the existence of a QBU does not turn solely on the timeframe of a foreign activity. For example, in appropriate circumstances (*e.g.*, if the activity is subjected to tax in the host country), an activity of sufficient duration (*e.g.*, 12 months) may support the finding of the existence of a QBU. The conferees also anticipate that, where appropriate, the Secretary may require that dollar transactions entered into by a QBU with a functional currency other than the dollar be kept in dollars.

c. Treatment as accounting method

Present Law

There are no express statutory rules, although the case law treats the choice of a method of translating the income of a branch as a method of accounting.

House Bill

The choice of a functional currency, including an election to use the U.S. dollar (described below), is treated as a method of accounting that can be changed only with the consent of the Secretary.

Senate Amendment

The Senate amendment generally follows the House bill, but clarifies that any change in the choice of a functional currency is subject to such conditions as the Secretary may prescribe.

Conference Agreement

The conference agreement follows the Senate amendment.

d. Election to use U.S. dollar

Present Law

No provision.

House Bill

A taxpayer can elect to use the U.S. dollar as the functional currency for a QBU but only if the unit maintains its books and records in the U.S. dollar (*i.e.*, uses the separate transaction method).

Senate Amendment

The Senate amendment follows the House bill, and grants to the Secretary limited regulatory authority to permit the use of the U.S. dollar as a functional currency if the taxpayer uses a translation method that approximates dollar-based accounting.

Conference Agreement

Under the conference agreement, a taxpayer can elect to use the U.S. dollar only to the extent provided in regulations. The Secretary is authorized to prescribe regulatory exceptions in two cases: (1) if books and records are maintained in the U.S. dollar, or (2) if the method of translation used approximates the results of determining exchange gain or loss on a transaction-by-transaction basis. The conference agreement contemplates that regulations may implement the latter exception by requiring the comparison of year-end balance sheets using historical exchange rates for *all* balance sheet items, and that the Secretary may condition the application of either exception on the taxpayer making the election for all of the taxpayer's QBUs (on a worldwide basis).

The regulatory authority for the limited exception to the dollar-based books requirement was included to address the concerns of taxpayers operating in hyperinflationary economies. In such a case, local-currency based accounting might not accurately reflect the income or loss of a taxpayer with substantial fixed plant and equipment (because the local currency depreciation charge will become insignificant in relation to operating income). For these taxpayers, an election to use the U.S. dollar as the functional currency will not be conditioned on conforming books and records. The conferees wish to emphasize that there is no expectation that this exception will be made generally available to taxpayers who are not operating in hyperinflationary economies.

An election to use the U.S. dollar is effective for the taxable year for which made and all subsequent taxable years, unless revoked with the consent of the Secretary. For a U.S. person, the election is to be made on the return for the first taxable year for which a QBU exists, by making a statement that the QBU elects the U.S. dollar as its functional currency for U.S. tax purposes. For a foreign person, the election is to be made in the U.S. owner's return for the first taxable year in which the U.S. owner acquires at least a 50-percent ownership interest in the foreign person by making a statement that the foreign person's QBU elects the U.S. dollar as its functional currency for U.S. tax purposes. If there is no 50-percent U.S. shareholder, the conferees anticipate that the Secretary shall prescribe regulations providing a mechanism for an election on the occurrence of a significant event (*i.e.*, an event having U.S. tax consequences).

2. Foreign Currency Transactions

a. General rules

Present Law

Foreign currency is treated as personal property for Federal income tax purposes. Exchange gain or loss is separately accounted for, apart from any gain or loss attributable to an underlying transaction. Present law presents issues relating to the timing of recognition, the character, and the geographic source or allocation of exchange gain or loss.

House Bill

Foreign currency gain or loss is recognized with respect to certain transactions (referred to as "section 988 transactions") denominated in a nonfunctional currency: (1) the acquisition of or becoming the obligor under a debt instrument, (2) accruing or otherwise taking into account any item of expense or income to be paid on a later date, and (3) the disposition of foreign currency. The definition of foreign currency excludes any section 1256 contract (*e.g.*, a regulated futures contract) that is not part of a hedging transaction.

Foreign currency gain or loss is defined as gain or loss realized by reason of a change in the exchange rate between the date an asset is taken into account for tax purposes and the date it is paid.

The Secretary is authorized to prescribe regulatory exceptions for any class of items the taking into account of which is not necessary to carry out the purposes of the provision by reason of the small amounts or short periods involved, the regularity with which these items occur, or otherwise.

Senate Amendment

The Senate amendment generally follows the House bill, except the definition of a section 988 transaction is modified: (1) the acquisition of or becoming the obligor under a debt instrument, (2) accruing or otherwise taking into account any item of expense or gross income to be paid on a later date, (3) entering into or acquiring an interest in any forward contract, futures contract, option, or similar financial instrument (such as a currency swap) if such position is not marked to market under section 1256, or (4) the disposition of nonfunctional currency. An exception is provided for positions included in a mixed straddle that is identified under section 1256(d).

Further, the Senate amendment does not authorize the Secretary to prescribe a regulatory exception by reason of the regularity with which items occur.

Conference Agreement

The conference agreement generally follows the Senate amendment.

Rules are prescribed for the treatment of exchange gain or loss from transactions denominated in a currency other than a taxpayer's functional currency. For taxpayers using the U.S. dollar as a functional currency, the conference agreement generally retains present law principles under which the disposition of foreign currency results in the recognition of gain or loss, and exchange gain or loss is separately accounted for (apart from any gain or loss attributable to an underlying transaction). Similarly, the recognition of foreign currency gain or loss generally requires a closed and completed transaction (*e.g.*, the actual payment of a liability).

Foreign-currency denominated items are to be translated into U.S. dollars using the exchange rate that most properly reflects income; generally, the appropriate exchange rate will be the free market rate.

The conference agreement modifies the definition of a section 988 transaction by eliminating the exception for identified mixed straddles.

The conferees wish to clarify that the use of a nonfunctional currency to establish a demand or time deposit denominated in the same currency (or the conversion of such a deposit to another deposit in the same currency) is not a recognition event. This result obtains because, for purposes of the rule for dispositions of nonfunctional currency, the term nonfunctional currency includes not only coin and currency, but also nonfunctional currency demand deposits and similar instruments issued by a bank or other financial institution.

The conferees also wish to clarify an example in the committee report relating to the calculation of foreign currency gain that is accompanied by income from discharge of indebtedness. The manner in which foreign currency gain was calculated in that example is intended to have general application, and is not limited to cases in which there is income from discharge of indebtedness. In every case, to the extent that gain or loss is derived from a transaction, it is to be attributed first to exchange gain or loss measured by reference to the effect of movements in exchange rates on the units

of nonfunctional currency originally booked by the taxpayer. For example, if a taxpayer whose functional currency is the U.S. dollar acquires a debt obligation that is not part of a section 988 hedging transaction for 100 pounds when the exchange rate is 1 pound = $1 and sells the obligation for 200 pounds when the exchange rate is 1 pound = $2, $100 of the taxpayer's $300 gain ($400 sales price less $100 basis) is foreign currency gain. This is calculated by multiplying the difference in exchange rates between the booking date and the payment date by the units of functional currency originally booked by the taxpayer.

The conference agreement modifies the calculation of foreign currency gain or loss to clarify that foreign currency gain or loss is recognized only to the extent of the total gain or loss, taking into account gain or loss on an underlying transaction. Thus, in the above example, if the exchange rate had fallen to 1 pound = $.5, the taxpayer would have had no foreign currency gain or loss; if the exchange rate had fallen to 1 pound = $.75, the taxpayer would have had a $50 non-foreign currency gain; if the exchange rate had fallen to 1 pound = $.25, the taxpayer would have had a $50 foreign currency loss.

Section 267(f)(3)(C) authorizes the Secretary to prescribe regulations excepting certain foreign currency losses from the loss disallowance and loss deferral rules of section 267(a)(1) and section 267(f)(2), respectively. The statutory authorization relates to a loss sustained by a corporate lender on repayment of a foreign currency denominated loan by an affiliated corporation. Pursuant to this regulatory authority, the Secretary has issued temporary regulations. The conference agreement contemplates that the Secretary will review these temporary regulations, with a view towards conforming the regulatory exception and determining the appropriateness of applying the exception to every case that is covered by the current temporary regulations. For example, the application of the temporary regulations is limited to a loan that is "payable or denominated solely in a foreign currency;" consistent with the statutory definition of a section 988 transaction, the regulatory rule should take account of a loan where the principal is determined by reference to the value of a nonfunctional currency. Further, in connection with the section 988 regulatory authority to provide for the appropriate treatment of related-party transactions, the Secretary should determine the extent to which the scope of the section 267 regulatory exception should be limited. The conferees intend that any section 267 exceptions be narrowly drawn.

b. Treatment as ordinary income or loss

Present Law

No provision.

House Bill

Foreign currency gain or loss generally is treated as interest income or expense, except for purposes of withholding at source, information reporting requirements, or such other purposes as the Secretary may prescribe by regulation.

Senate Amendment

Foreign currency gain or loss is treated as ordinary income or loss, and as interest income or expense (for all Federal tax purposes) only as provided by regulation. Certain investment products that are not marked-to-market and are held for speculation are accorded capital gain or loss treatment if the taxpayer makes proper identification.

Conference Agreement

The conference agreement generally follows the Senate amendment.

The conference agreement modifies the Senate amendment in two respects: (1) it is clarified that the Secretary may prescribe regulations treating foreign currency gain or loss as interest income or expense for selected purposes only (and not for all Federal tax purposes), and (2) the rule for investment products accorded capital gain or loss treatment does not apply to an item that is part of a tax straddle (within the meaning of sec. 1092(c), but determined without regard to the exception for qualified covered calls in paragraph (4) thereof).

c. Special rule for hedging transactions

Present Law

No provision.

House Bill

If any transaction that would give rise to foreign currency gain or loss is part of a hedging transaction, all transactions included in the hedge are integrated.

Senate Amendment

The Senate amendment generally follows the House bill.

Conference Agreement

The conference agreement generally follows the Senate amendment.

The Secretary is authorized to issue regulations that address the treatment of transactions that give rise to foreign currency gain or loss and are part of a section 988 hedging transaction. The conferees included this regulatory authority to provide certainty of tax treatment for foreign currency hedging transactions that are fast becoming commonplace (such as fully hedged foreign currency borrowings) and to insure that such a transaction is taxed in accordance with its economic substance. No inference is intended as to the proper treatment of these transactions under present law.

A section 988 hedging transaction includes certain transactions entered into primarily to reduce the risk of (1) foreign currency exchange rate fluctuations with respect to property held or to be held by the taxpayer, or (2) foreign currency fluctuations with respect to borrowings made or to be made or obligations incurred or to be incurred by the taxpayer. A section 988 hedging transaction is to be identified by the taxpayer or the Secretary.

To the extent provided in regulations, in the case of any transaction giving rise to foreign currency gain or loss that is part of a section 988 hedging transaction (determined without regard to whether such transaction is marked-to-market under section 1256), all positions in the hedging transaction are integrated and treated as a single transaction, or otherwise treated consistently (*e.g.*, for purposes of determining the character, source, and timing of income or loss). The conferees intend that these regulations address two different categories of hedging transactions.

The first category is a narrow class of fully hedged transactions that are part of an integrated economic package through which the taxpayer (by simultaneously combining a bundle of financial rights and obligations) has assured itself of a cash flow that will not vary with movements in exchange rates. With respect to this category, the conferees intend that such rights and obligations be integrated and treated as a single transaction with respect to that taxpayer. For example, in the case of a fully hedged foreign currency borrowing, a taxpayer with the dollar as its functional currency will borrow foreign currency and hedge its exposure by entering into a series of forward purchase contracts or a single swap agreement. The forward contracts or swap agreement will assure the taxpayer of a stream of foreign currency flows to make interest and principal payments with respect to the foreign currency borrowing. The taxpayer, although it has borrowed foreign currency, is not at risk with respect to currency fluctuations because it has locked in the dollar cost of its future foreign currency requirements. The conferees intend that regulations treat the entire package as a dollar borrowing with dollar interest payments with respect to the borrower.

In the case of a foreign currency borrowing hedged with a series of forward purchase contracts, the rules of section 1271, *et seq.*, and 163(e) shall apply in determining the appropriate interest deduction. The conferees intend that similar rules apply to synthetic U.S. dollar securities (*e.g.*, a transaction in which a taxpayer with the U.S. dollar as its functional currency purchases a foreign currency denominated debt obligation and sells forward all interest and principal payments to assure itself of a stream of fixed dollar flows). The conferees intend that the regulations pertaining to integrated hedging transactions provide rules for transactions that are, in substance, equivalent to a transaction denominated in the taxpayer's functional currency. In addition, the conferees wish to clarify that the integration approach is not limited to U.S. dollar denominated transactions; thus, the rules also apply where several transactions are entered into by a U.S. dollar functional-currency taxpayer to establish a foreign currency position.

The second category of hedging transactions involves transactions that are not entered into as an integrated financial package but are designed to limit a taxpayer's exposure in a particular currency (*e.g.*, the acquisition of a foreign currency denominated liability to offset exposure with regard to a foreign currency denominated asset). These regulations need not provide for complete integration (*e.g.*, the form of a foreign currency borrowing may be respected and the interest deduction determined by reference to the spot rate on the date of payment). Where appropriate, these regulations should provide for consistent treatment with respect to character, source, and timing.

The conferees intend that both sets of regulations relating to hedging transactions provide rules to prevent taxpayers from selectively identifying only those transactions where the hedging rules are favorable to the taxpayer. The conferees are aware that rules applicable to partially hedged transactions may be necessary to achieve a hedging rule that is not susceptible to abuse. The conferees also intend that the regulations require a taxpayer to clearly identify a hedging transaction before the close of the day the transaction is entered into, in order to claim increased deductions attributable to the hedge. The Secretary may identify the transaction as a hedge at a later date. Further, (as discussed below), the Act clarifies the interaction of these rules and the tax straddle provisions, with a view towards providing an incentive for taxpayers to properly identify transactions that are part of a tax straddle.

In addition, the regulations will need to take account of the various mechanisms for hedging currency exposure. For purposes of the special regulatory rules, a hedging position may include any contract (1) to sell or exchange nonfunctional currency at a future date under terms fixed in the contract, (2) to purchase nonfunctional currency with functional currency at a future date under terms fixed in the contract, (3) to exchange functional currency for a nonfunctional currency at a future date under terms fixed in the contract (which would include parallel loans and currency swaps), or (4) to receive or pay a nonfunctional currency (*e.g.*, interest rate swaps denominated in a nonfunctional currency).

The conferees are particularly concerned about hedging transactions where a taxpayer borrows in a weak currency and eliminates virtually all risk of currency loss by establishing offsetting currency positions. If such a hedging transaction is not treated as an integrated transaction, the taxpayer may be able to defer tax on income (and to utilize capital losses, which would otherwise be unavailable, by converting ordinary income to capital gains).

d. Sourcing rules

Present Law

No provision.

House Bill

Foreign currency gain is sourced under the same rules that apply to interest income, except that such gain to a payor is sourced as though it were interest expense. Foreign currency loss is allocated and apportioned under the same rules that apply to interest expense, except such loss of a payee is sourced as though it were interest income.

Senate Amendment

In general, foreign currency gain is sourced, and foreign currency losses are allocated, by reference to the residence of the taxpayer or QBU on whose books the underlying financial asset or liability is properly reflected. For purposes of these rules, an individual's residence is defined as the country in which the "tax home" (as defined in sec. 911(d)(3)) is located. In the case of any U.S. person (as defined in sec. 7701(a)(30)) other than an individual, the residence is the United States. In the case of a foreign corporation, partnership, trust, or estate, the residence is treated as a foreign country. Where appropriate, foreign currency gain or loss that is treated under the section 988 hedging rules (discussed above) is to be sourced or allocated in a manner that is consistent with that of the hedged item.

The residence of a taxpayer's QBU (including the QBU of an individual) is the country in which the unit's principal place of business is located. A special rule is provided for purposes of determining the source or allocation of exchange gain or loss from certain related party loans. This rule was included because of a concern that the general rule that looks to residence could be manipulated to artificially increase foreign source income for purposes of computing allowable foreign tax credits. Under the special rule, for purposes of determining the source of interest income, related-party loans are marked-to-market on an annual basis, and interest income earned on the loan during the taxable year is resourced as domestic source income to the extent of any loss on the loan.

Conference Agreement

The conference agreement generally follows the Senate amendment, with modifications.

The conference agreement clarifies that the rules for sourcing or allocating foreign currency gain or loss apply to investment products with respect to which an election is made to treat gain or loss as capital. The conference agreement provides the Secretary with regulatory authority to apply rules similar to the rules for related-party loans to loans to U.S. persons.

The conference agreement contemplates that the Secretary will address the appropriate treatment of payments made to a counter-party under a swap transaction for purposes of withholding under sections 871 and 881.

e. Application to transactions of a personal nature

Present Law

No provision.

House Bill

No provision.

Senate Amendment

The section 988 rules apply to transactions entered into by an individual only to the extent that expenses attributable to such transactions would be deductible under section 162 (as a trade or business expense) or section 212 (as an expense of producing income, other than expenses incurred in connection with the determination, collection or refund of taxes). Thus, for example, the rules would be inapplicable to foreign currency gain or loss recognized by a U.S. individual residing outside of the United States upon repayment of a foreign currency denominated mortgage on the individual's principal residence. The principles of current law would continue to apply to such transaction.

Conference Agreement

The conference agreement follows the Senate amendment, but clarifies that the determination of whether expenses would be deductible under section 212 is made without regard to the two-percent floor (added by sec. 132 of the Act) applicable to investment expenses.

f. Tax straddle provisions

Present Law

Statutory rules prevent the use of straddles (interests in actively traded personal property, the holding of one of which substantially diminishes the risk of loss from holding one or more others such interests) to defer income. Under the loss-deferral rule of section 1092, the deduction of a loss realized on disposition of a position in a tax straddle is limited to the excess of the loss over any unrecognized gain in offsetting positions. The mark-to-market rule of section 1256 treats certain investment products (referred to as "section 1256 contracts") as if they were sold for fair market value on the last day of the year. By their terms, the tax straddle rules apply to most transactions undertaken to hedge foreign exchange exposure, unless the transaction satisfies the requirements of a hedging exemption. Under a special rule, banks are not required to satisfy all of the requirements of the hedging exemption.

House Bill

The House bill repeals the special rule that permits banks to qualify for the hedging exemption without establishing all of the facts other taxpayers must show.

Senate Amendment

The Senate amendment follows the House bill. In addition, the Senate amendment coordinates the interaction of the rules for foreign currency gain or loss and the tax straddle provisions. Neither the loss deferral rule of section 1092 nor the mark-to-market regime under section 1256 will apply to a transaction that is part of a section 988 hedging transaction and described in regulations to be issued under by the Secretary. Further, as described above, the general rule that treats foreign currency gain or loss as ordinary gain or loss is inapplicable to a section 1256 contract that is marked to market. The exception for section 1256 contracts is available to taxpayers who take such contracts off the mark-to-market system by making a mixed straddle election under section 1256(d).

The Senate amendment clarifies that an obligor's interest in a foreign currency denominated obligation is a "position" for purposes of the loss deferral rule. The rationale for this treatment is that a foreign currency borrowing is economically similar to a short position in the foreign currency. In addition, the Senate amendment makes clear that foreign currency for which there is an interbank market is presumed to be "actively traded" property for purposes of the loss deferral rule.

Conference Agreement

The conference agreement follows the Senate amendment. The conferees wish to emphasize that bank forward contracts with maturities longer than the maturities ordinarily available for regulated futures contracts are within the definition of a foreign currency contract in section 1256(g), if the requirements of that subsection are satisfied otherwise.

Regarding the amendment relating to currency for which there is an active interbank market, no inference is intended regarding the proper application of present law to a currency that is not the subject of a regulated futures contract but for which there is an active interbank market, (*e.g.*, the Australian dollar). Thus, the Internal Revenue Service is free to provide by regulations for the treatment of such currencies for taxable years after the effective date of the Economic Recovery Act of 1981 (which introduced the straddle rules) and before the effective date of this Act.

3. Foreign Currency Translation

a. Translation method

Present Law

A taxpayer operating abroad is permitted to maintain the books and records of operation in a foreign currency. The method of translating the results of a foreign operation into U.S. dollars depends on whether the activity is conducted through a branch or through a subsidiary corporation. In many instances, taxpayers have discretion to use a profit-and-loss method (under which net income or loss is translated into U.S. dollars at year end) or a net-worth method (which involves the comparison of year-end balance sheets).

House Bill

The same translation rule applies to the earnings and profits of a foreign corporation and the income or loss of a branch or other QBU. An entity that uses a nonfunctional currency to measure the results of operation is required to use a profit-and-loss method to translate income or loss into the functional currency.

Senate Bill

The Senate amendment follows the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment. These translation rules apply without regard to the form of enterprise through which the taxpayer conducts business (*e.g.*, sole proprietorship, partnerships, or corporation), as long as such form of enterprise rises to the level of a QBU.

b. Determination of foreign corporation's earnings and profits and foreign taxes

Present Law

The earnings and profits of a controlled foreign corporation ("CFC") are calculated by computing the sum of the CFC's profit or loss, and adding to that amount the exchange gain or loss determined by comparing year-end balance sheets (after taking account of the translated profit or loss and other relevant items).

House Bill

For purposes of determining the tax of any shareholder of a foreign corporation, the earnings and profits of the corporation are determined in the corporation's functional currency.

On the distribution of earnings and profits from a 10-percent owned foreign corporation, a U.S. corporate shareholder is required to translate such amounts using the average exchange rate for the year in which the income arose. Exchange gain or loss with respect to such distribution is characterized as ordinary income or loss, and subject to a separate limitation for purposes of the foreign tax credit.

For purposes of determining the amount of foreign taxes deemed paid under section 902 or 960, foreign taxes are translated into U.S. dollars using the exchange rate in effect as of the date of payment, any refund of a foreign tax is translated using the rate in effect as of the original payment date, and any increase is translated at the rate in effect on the date of adjustment.

Senate Amendment

The Senate amendment codifies the result under the *Bon Ami* case (39 B.T.A. 825 (1939)) by requiring taxpayers to use a common exchange rate to translate actual distributions, deemed distributions of subpart F income, or gain that is recharacterized as dividend income on the disposition of stock in a CFC or former CFC, and foreign taxes deemed paid with respect thereto.

On the distribution of earnings and profits from a 10-percent owned foreign corporation, a U.S. shareholder is required to translate such amounts (if necessary) at the current exchange rate on the date the distribution is included in income. Similarly, in the case of gain that is treated as a distribution of earnings under section 1248, the deemed dividend is translated (if necessary) at the current exchange rate on the date the amount is included in income. Thus, for actual distributions and deemed dividends under section 1248, no exchange gain or loss is separately recognized as the result of exchange rate fluctuations between the time earnings and profits arise and the time of distribution.

In the case of deemed distributions of subpart F income, the required income inclusion is translated at the weighted average exchange rate for the foreign corporation's taxable year. Exchange gain or loss is recognized as the result of exchange rate fluctuations between the time of a deemed distribution and the time such previously taxed income ("PTI") is actually distributed. Exchange gain or loss on distributions of PTI is to be treated as ordinary income or loss from or allocable to domestic sources. The Secretary is authorized to prescribe regulations for the treatment of distributions of PTI through several tiers of foreign corporations.

For purposes of determining the amount of foreign taxes deemed paid under sections 902 or 960, a foreign income tax paid by a foreign corporation is translated into U.S. dollars (if necessary) using the same exchange rate used to translate the income inclusion with respect to which such tax is deemed paid. Adjustments to the amount of tax paid by a foreign corporation are translated into U.S. dollars using the same exchange rate used to translate the income with respect to which the adjustment was made.

Conference Agreement

Under the conference agreement, for purposes of determining the tax of any shareholder of a foreign corporation, the corporation's earnings and profits are determined in the corporation's functional currency. In the case of any U.S. person, the earnings and profits so determined are translated (if necessary) at the current exchange rate on the date the distribution is included in income. A similar rule applies to gain that is treated as a distribution of earnings under section 1248. Thus, for actual distributions and deemed dividends under section 1248, no exchange gain or loss resulting from exchange rate fluctuations between the time earnings and profits arise and the time of distribution is separately recognized.

The conference agreement follows the Senate amendment with respect to deemed distributions of subpart F income and PTI, except the weighted average exchange rate is also used for foreign personal holding company income (sec. 551(a)) and amounts defined in section 1293(a) (relating to passive foreign investment companies), and exchange gain or loss on PTI is sourced or allocated in the same manner as the associated income inclusion. In addition, the conference agreement applies the rules for recognizing exchange gain or loss with respect to PTI to amounts defined in section 1293(c).

The conference agreement follows the House bill for purposes of determining the amount of foreign taxes deemed paid under sections 902 or 960. An increase to foreign taxes is translated on the date of the payment of additional tax.

Under section 1504(d), a domestic corporation can elect to treat certain wholly owned subsidiaries organized under the laws of a contiguous foreign country (*i.e.*, Canada or Mexico) as domestic corporations. As a result of treatment as domestic corporations, these subsidiaries are included with the domestic parent corporation in the filing of a consolidated Federal income tax return. The result of a section 1504(d) election combined with use of the net worth accounting method is that gains and losses from contiguous country currency fluctuations are recognized on the U.S. tax return.

The conference agreement contemplates that the Internal Revenue Service will allow corporations to elect out of section 1504(d) status as a result of the enactment of the provision requiring use of the profit and loss method. As under present law, the revocation of a section 1504(d) election will (1) trigger excess loss accounts, if any, under Treasury regulations section 1.1502-19, (2) implicate the rules for recapture of foreign losses under section 904(f), and (3) be subject to the rules of section 367(a), among other applicable rules.

The conferees intend that any procedure adopted by the Internal Revenue Service will contain appropriate safeguards to limit recognition of exchange loss upon the revocation of a section 1504(d) election.

Foreign corporations with respect to which section 1504(d) elections are revoked are likely to succeed to earnings and profits accumulated by a foreign corporation that has been treated as a domestic corporation. As a result, section 243(d) will be applicable to distributions by a foreign corporation out of these accumulated earnings. The conferees believe it desirable to make it clear that section 243(d) applies for purposes of section 243(a)(3). Section 243(d) provides that a distribution by a foreign corporation of earnings and profits accumulated by a domestic corporation shall be treated as if made by a domestic corporation for purposes of the dividends received deduction. The conferees wish to clarify that in the case of such a distribution, the distributing corporation is to be treated as a domestic corporation for all purposes of section 243(a), including for purposes of determining under section 243(a)(3) whether the distribution is a qualifying dividend. Thus, for example, if a foreign corporation makes a distribution out of earnings and profits that were accumulated by a foreign corporation with section 1504(d) status while such corporation was a member of an affiliated group, and the distributing foreign corporation would be a member of the same affiliated group if it were a domestic corporation, then the distribution qualifies for the 100% dividends received deduction provided the domestic parent makes a section 243(b) election and that no section 1562 election was in effect during the year the earnings were accumulated. The domestic parent may make the section 243(b) election even though it files a consolidated federal income tax return. The conference agreement contemplates that the regulations relating to section 243(d) will be modified in order to reflect this clarification.

c. Translation of branch income and losses and foreign taxes

Present Law

A foreign branch that maintains a separate set of books in a foreign currency can use either a "profit and loss" or a "net worth" method to determine U.S. taxable income attributable to the branch operation.[2] Under the profit and loss method, the net profit computed in the foreign currency is translated into dollars at the exchange rate in effect at the end of the taxable year. If the branch made remittances during the year, these amounts are translated into U.S. dollars at the exchange rate in effect on the date remitted, and only the balance of the profit, if any, is translated at the year-end exchange rate.

Under the net worth method, U.S. taxable income is defined generally as the difference between the branch's net worth at the end of the prior taxable year and at the end of the current taxable year. Under this method, the branch's balance sheet is translated into U.S. dollars. In general, the values of current assets and liabilities are translated at the year-end exchange rate, and fixed

[2] *See* Rev. Rul. 75-107, 1975-1 C.B. 32 (relating to the profit and loss method); *and* Rev. Rul. 75-106, 1975-1 C.B. 31, *and* Rev. Rul. 75-134, 1975-1 C.B. 33 (relating to the net worth method).

(long-term) assets are translated at the exchange rate in effect on the date the asset was acquired (the "historical rate"). The translation of an item at its historical rate defers recognition of exchange gain or loss. Remittances are translated at the exchange rate in effect on the date of remittance, and are then added to the U.S.-dollar amount computed by comparing year-end balance sheets.

When a foreign branch remits currency in excess of the current year's profit, the basis of the excess amount must be determined in order to calculate exchange gain or loss. Present law does not provide explicit rules for calculating exchange gain or loss on remittances.

House Bill

A taxpayer with a QBU whose functional currency is a currency other than the U.S. dollar will be required to use the profit and loss method to compute income.

For each taxable year, the taxpayer will compute income or loss separately for each QBU in the unit's functional currency, converting this amount to U.S. dollars at the appropriate exchange rate. This amount will be included in income without reduction for remittances from the branch during the year.

The appropriate exchange rate is to be determined under regulations issued by the Treasury Department. In general, the appropriate exchange rate will be the weighted average exchange rate for the taxable period over which the income or loss accrued.

A taxpayer will recognize exchange gain or loss on remittances of branch profits (whether or not actually converted to dollars) to the extent the value of the currency in the year of the remittance differs from the value when earned. Remittances of foreign branch earnings (and interbranch transfers involving branches with different functional currencies) after 1985 will be treated as paid pro rata out of post-1985 accumulated earnings of the branch. In general, the value of the currency will be determined by translating the currency at an average exchange rate for the year in which received rather than the rate in effect on the date of remittance. Exchange gains and losses on such remittances will be deemed to be ordinary, and subject to separate foreign tax credit limitations.

The translation of payments of, and subsequent adjustments to, foreign taxes by a branch will be performed under the same rules that apply in determining the foreign tax credit allowable to a parent corporation with respect to taxes paid by a foreign subsidiary.

Senate Amendment

The Senate amendment generally follows the House bill, with modifications.

A taxpayer will recognize exchange gain or loss on remittances (without regard to whether or when the remittances are converted to dollars), to the extent the value of the currency at the time of the remittance differs from the value when earned. Remittances of foreign branch earnings (and interbranch transfers involving branches with different functional currencies) after 1986 will be treated as paid pro rata out of post-1986 accumulated earnings of the branch. For purposes of calculating exchange gain or loss on remittances, the value of the currency will be determined by translating the currency at the rate in effect on the date of remittance. Exchange gains and losses on such remittances will be deemed to be ordinary and domestic source or allocable thereto.

The translation of payments of, and subsequent adjustments to, foreign taxes by a branch will be performed under the same rules that apply in determining the foreign tax credit allowable to a parent corporation with respect to taxes paid by a foreign subsidiary.

Conference Agreement

The conference agreement generally follows the Senate amendment with respect to remittances except that it is clarified that (1) any remittance of property (not just currency) will trigger exchange gain or loss inherent in accumulated earnings or branch capital, and (2) exchange gain or loss on remittances will be sourced or allocated by reference to the income giving rise to post-1986 accumulated earnings (generally, the residence of the qualified business unit, unless the income of the unit is derived from U.S. sources). The conferees anticipate that regulations may treat contributions of appreciated property to a QBU as a recognition event where appropriate.

The conferees wish to clarify that the rule for triggering exchange gain or loss on remittances does not apply to transactions involving the use of a related party's assets or liabilities (*e.g.*, in the case of a bank, the deposit and withdrawal of funds in a branch). The committee anticipates that regulations will provide rules that, in the case of a branch using a functional currency other than the United States dollar, will limit the deduction of branch losses to the taxpayer's dollar basis in the branch (that is, the original dollar investment plus subsequent capital contributions and advances, unremitted earnings, and indebtedness for which the taxpayer is liable).

The conference agreement generally follows the House bill with respect to foreign taxes. Thus, the translation of foreign taxes paid by a branch will be performed under the same rules that apply in determining the foreign tax credit allowable to a corporation with respect to taxes paid by a foreign corporation. For example, assume a branch pays a tax of 100 Swiss francs in year one. In year two, the branch's tax liability is 50 francs, and the year one tax is adjusted downwards to 60 francs (so there was an overpayment of 40 francs). The 40-franc overpayment from year one is applied against the 50-franc liability for year two. In year three, the 50-franc tax paid in year two is refunded. On these facts, (1) regarding the reduction in the tax paid in year one, the 40 francs are translated at the exchange rate used to translate the tax in year one, (2) regarding the crediting of the 40-franc overpayment against the 50-franc tax liability for year two, the entire 50-franc tax is translated at the rate in effect on the date the taxpayer is treated as having paid such tax, and (3) on refund of the year-two 50-franc tax in year three, the refund is translated at the same rate that was used to translate the tax payment in year two.

The conference agreement contemplates that a prepayment of foreign tax (*e.g.*, an estimated tax payment or a withheld tax) will be translated at the exchange rates in effect on the payment date. Generally, a similar rule is to apply to installment payments of tax.

d. Application of section 905

Present Law

If the amount of foreign taxes accrued differs from the amount paid, or if a foreign tax is refunded in whole or in part, a taxpayer must notify the Internal Revenue Service and redetermine the allowable foreign tax credit for the taxable year.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that, for purposes of applying section 905(c), the determination of whether accrued taxes when paid differ from the amounts claimed as credits by the taxpayer is made by reference to the functional currency of the QBU that accrued and paid the taxes. Thus, exchange rate fluctuations with respect to a functional currency other than the U.S. dollar are not taken into account under section 905(c).

Conference Agreement

Under the conference agreement, the Secretary is authorized to prescribe regulations providing for an alternative adjustment (*e.g.*, the adjustment of a dollar-based pool of taxes) in lieu of the redetermination required by section 905(c).

4. Other Issues

Present Law

No provision.

House Bill

The Secretary is granted general regulatory authority to carry out the purposes of the new subpart relating to foreign currency transactions.

Senate Amendment

In general, the Secretary is authorized to issue such regulations as may be necessary to carry out the purposes of the new rules for foreign currency transactions, including regulations (1) setting forth procedures to be followed by taxpayers with QBUs using a net worth method of accounting before enactment of subpart J, to prevent a mismatching of exchange gain and loss, (2) limiting the recognition of foreign currency loss on remittances from QBUs (to prevent the selective recognition of exchange losses), and (3) providing for the recharacterization of interest and principal payments with respect to obligations denominated in hyperinflationary currencies. The Senate amendment contemplates that the Secretary will also issue regulatory rules providing for the treatment of U.S. branches of foreign persons (addressing issues such as the extent to which exchange gain or loss on remittances are treated as effectively connected with a U.S. trade or business).

Conference Agreement

The conference agreement follows the Senate amendment, and adds specific authority for providing for the appropriate treatment of related-party transactions (including transactions between QBUs of the same taxpayer), as well as section 905(c) adjustments (as discussed above).[3]

[3] The conferees are aware of tax shelters that are premised on the creation of debt denominated in a hyperinflationary currency. For example, in one transaction, a U.S. partnership entered into an agreement with a Brazilian Sociedade civil limitada for the performance of services in Brazil. Payment was to be made in cruzeiros on a deferred basis, beginning seven years *after* the services were performed. The taxpayers involved took the position that the foreign currency account payable could be accrued currently by the U.S. partnership, even though the actual U.S. dollars required seven years hence will be much less than the U.S.-dollar value of the amount accrued. In this transaction, stated interest was 11% per annum, which might be adequate for a dollar borrowing but is below market

5. Effective Date

House Bill

The House bill provisions are effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment provisions are effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, but provides that for purposes of claiming a deemed paid foreign tax credit under either sections 902 or 960, the agreement's provisions only apply to foreign taxes paid or accrued with respect to earnings and profits of a foreign corporation for taxable years after 1986.

G. Other Rules Applicable to U.S. Possessions

Present Law

U.S. Virgin Islands

The U.S. Virgin Islands (like Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa) generally uses the Code as it changes from time to time as its local tax code. For corporate tax purposes, the United States treats each of these possessions as a foreign country and each of these possessions treats the United States as a foreign country. This system of taxation has acquired the name "mirror system" because the possession uses the Code (but substitutes its own name for the United States and, for some purposes, treats the United States as the United States treats a possession).

The Virgin Islands may impose a surtax of up to 10 percent of the mirror tax. The Virgin Islands can rebate its mirror tax on its resident individuals and on U.S. and V.I. corporations that operate primarily in the Virgin Islands.

An "inhabitant" of the Virgin Islands pays tax to the Virgin Islands on its worldwide income, but pays no U.S. tax. Certain corporations qualify for inhabitant status, including some U.S. corporations.

A V.I. corporation is not subject to the U.S. 30-percent withholding tax on passive income so long as it meets criteria designed to prevent the use of V.I. corporations as conduits for third-country residents: the V.I. corporation must be less than 25 percent foreign-owned and earn at least 20 percent of its income from V.I. sources.

Guam, CNMI, and American Samoa

U.S. law requires that Guam use the Code as its local code. (See general description of the mirror system of taxation above.) Individual residents of the United States or Guam need file a tax return only with the place where they resided on the last day of the year. Guamanian corporations are not subject to the U.S. 30-percent withholding tax, except Guamanian corporations that are conduits (under the rules that apply to V.I. corporations). The Commonwealth of the Northern Mariana Islands (CNMI) is required to use the mirror system in basically the same way as Guam. The latter treatment generally began on January 1, 1985.

American Samoa has adopted its own income tax system. American Samoa has chosen to use the Code, with minor amendments, as its internal income tax system.

Interest income on U.S. obligations held by the Bank of Guam is treated as effectively connected with the conduct of a U.S. trade or business.

House Bill

U.S. Virgin Islands

The House bill clarifies the operation of the U.S. Virgin Islands' mirror system to prevent unintended results. It treats any bona fide V.I. resident on the last day of the taxable year as taxable only in the Virgin Islands, and not in the United States. A U.S. individual (other than a V.I. resident) who derives income from the Virgin Islands files two identical returns, one with the United States and one with the Virgin Islands, and pays a pro rata amount of tax to each. The House bill provides for cooperation between the IRS and the Virgin Islands Bureau of Internal Revenue. It provides anti-abuse rules and authorizes the Secretary to prescribe regulations for purposes of determining V.I. tax liability.

The House bill permits the Virgin Islands to impose any nondiscriminatory local income taxes in addition to those it now imposes under the mirror system.

The House bill permits the Virgin Islands to rebate tax on U.S. corporations whatever the extent of their activities in the Virgin Islands. It allows reduction of V.I. tax on V.I. income of foreign persons.

The House bill repeals the V.I. inhabitant rule. It amends the rules that prevent foreigners from using V.I. corporations as conduits to avoid the U.S. 30-percent withholding tax by substituting a requirement that 65 percent of a corporation's income be effectively connected with a trade or business in a possession or in the United States in place of the 20-percent source of income requirement in current law, and by adding a requirement that prevents a corporation from substantially reducing its taxable income with payments to persons not resident in the Virgin Islands. The Virgin Islands provisions of the House bill are effective for taxable years beginning after 1985, but certain provisions are contingent upon implementation of a U.S.-V.I. agreement to coordinate the U.S. and V.I. tax systems.

Guam, CNMI, and American Samoa

The House bill grants Guam and the CNMI full authority to determine their own income tax laws. This treatment places them on a par with American Samoa. The House bill requires that Guam and the CNMI implement tax systems that would raise at least as much revenue as their current mirror systems. Residents of Guam and the CNMI who receive income from outside those possessions have to file U.S. tax returns. The United States collects the tax on that nonpossession income, but transfers the money to the possession where the taxpayer resides. For the purpose of the U.S. 30-percent withholding tax, the bill modifies the anti-conduit rule for Guam and the CNMI in the same manner as modified for the Virgin Islands.

For American Samoa, Guam, and the CNMI, the House bill implements anti-abuse provisions to prevent the use of corporations in these possessions to avoid U.S. tax. It applies anti-abuse rules to individuals resident in a possession. It coordinates taxes among these possessions and provides for exchange of information between each possession and the United States. Each possession would receive taxes withheld on compensation of U.S. Government personnel stationed there, or taxes paid to the United States by civilian employees resident in the posession.

The House bill provides that interest income on U.S. Government obligations held by the Bank of Guam is treated as not effectively connected with the conduct of a U.S. trade or business.

The non-V.I. provisions of the House bill are generally effective for taxable years beginning after 1985, but only if (and so long as) an agreement is in effect between a possession and the United States to coordinate the U.S. and possession tax systems. The provision concerning the Bank of Guam is effective for taxable years beginning after November 16, 1985.

Senate Amendment

The Senate amendment is generally the same as the House bill, but it contains modifications specified below.

The Senate amendment allows reduction of V.I. tax on non-U.S., non-V.I. income of V.I. corporations with less than 10 percent U.S. ownership.

The Senate amendment is generally effective for taxable years beginning after 1986, but only if (and so long as) an agreement is in effect between a possession and the United States to coordinate the U.S. and possession tax systems. If an implementing agreement is not in place within one year after enactment, Treasury is to report on the status of negotiations. The provision concerning the Bank of Guam is effective for taxable years beginning after November 16, 1985. Repeal of the V.I. inhabitant rule applies to all open years.

Conference Agreement

The conference agreement generally follows the Senate amendment, with modifications described below.

The conferees express the desire that the Secretary of the Treasury consult as appropriate with officials of the Virgin Islands in formulating regulations for purposes of determining tax liability incurred to the Virgin Islands. In adopting the Senate provision allowing reduction of V.I. tax on non-U.S., non-V.I. income of V.I. corporations with less than 10 percent U.S. ownership, the conferees do not intend that other U.S. possessions offer tax advantages to non-U.S. investors beyond those available in the Virgin Islands. The agreement does not allow the Virgin Islands to reduce or rebate tax on non-V.I. income of local individuals.

The conference agreement eliminates from the definition of wages subject to withholding (under Code sec. 3401) any remuneration paid for services for the United States or any U.S. agency within a U.S. possession to the extent the United States or the agency withholds taxes on that remuneration pursuant to an agreement with the possession. Under present law, the United States must withhold on payments to U.S. employees working in certain possessions even though the possession rather than the United States is entitled to tax on those payments. At the end of the year, the United States refunds the withheld amounts to the taxpayer, who is then to satisfy his or her liability to the possession. This provision of the conference agreement allows the United States and its agencies not to withhold for the account of the U.S. government on income the tax on which is

---

when compared to the analogous AFR for cruzeiros. Thus, the conferees concluded that the Secretary has adequate authority to treat this transaction in accordance with its economic substance under the rules relating to below market loans (*See* Prop. Treas. reg. sec. 1.7872-11(f)). Nevertheless, the conferees determined that the Secretary should be granted additional regulatory authority to ensure that such transactions are properly characterized under Federal tax laws, apart from whether stated interest is adequate when measured in a foreign currency.

due to a possession so long as the payor withholds for the account of the possession.

The repeal of the Virgin Islands inhabitant rule applies to taxable years beginning after 1986. With respect to income other than income from V.I. sources or income that is effectively connected with a V.I. trade or business, it applies (with targeted exceptions) to any income derived in any pre-1987 taxable year for which (on the date of enactment) the assessment of a deficiency of income tax is not barred by any law or rule of law. To the extent that the Virgin Islands either collects tax by the date of enactment or, pursuant to an assessment issued by August 16, 1986, collects tax by January 1, 1987, on non-V.I. source, non-V.I. effectively connected income of a V.I. inhabitant that is subject to U.S. tax for pre-1987 taxable years, that V.I. tax is to be creditable against the U.S. tax liability on that income. To the extent that that V.I. tax is imposed on U.S. income, it is to be creditable against U.S. tax on that particular income notwithstanding the general limitations on the foreign tax credit.

The agreement makes it clear that the possessions cannot discriminate against U.S. corporations (as well as U.S. citizens or residents) or similar persons from other possessions. In the event that any one of the contemplated implementing agreements between the United States and these possessions is not executed within a year of enactment, the conference agreement specifies that the House Committee on Interior and Insular Affairs (in addition to the House Committee on Ways and Means and the Senate Committee on Finance) is to receive the Secretary's report on the status of negotiations and the reasons for not executing the agreement.

The agreement provides that a U.S. person who becomes a resident of Guam, American Samoa, or the Northern Mariana Islands is to pay tax to the United States on U.S. source income, income effectively connected with a U.S. trade or business, and gains from sales of certain assets with a U.S. connection for the 10-year period beginning when that person became a resident. This provision applies to income earned after 1985. This provision makes it clear, for example, that a U.S. person who moves to one of these possessions while holding appreciated stock of a U.S. corporation and who sells the stock during 1986 cannot contend that the income from that sale is non-U.S. source income the tax on which a possession is free to reduce or rebate. The agreement grants regulatory authority to provide exceptions to this rule in cases where the Secretary determines that adequate tax will be collected. The conferees do not intend that any regulatory exception contain a subjective standard considering a taxpayer's intent.

TITLE XIII. TAX-EXEMPT BONDS

A. General Restrictions on Tax Exemption

Present Law

General rule

Interest on bonds issued by or on behalf of State or local governments, the proceeds of which are to be used to finance operations of such governments, is exempt from tax under Code section 103.

Trade or business use and security interest tests

Subject to certain exceptions, interest on State and local government bonds is taxable if the bonds are industrial development bonds (IDBs). IDBs are bonds which are part of an issue—

(1) more than 25 percent of the proceeds of which are to be used in a trade or business of a person other than a State or local government or section 501(c)(3) organization (the "trade or business use" test), and

(2) more than 25 percent of the principal or interest on which are secured by or to be derived from money or property to be used in such a trade or business (the "security interest" test).

Use pursuant to certain management contracts

The determination of whether use pursuant to a management contract is treated as private trade or business use, for purposes of determining whether a bond is an IDB, is made on a facts and circumstances basis. The Treasury Department has stated that, under certain conditions, it will issue an advance ruling that a facility managed by a private management company is *not* considered to be used in that company's trade or business. Under these guidelines, such a ruling will be issued if—

(1) the management services are provided for a reasonable, periodic flat fee, under a contract not exceeding 5 years' duration (including renewal options), with the exempt owner having the option to cancel the contract (without penalty) at the end of any 2-year period, or

(2) in the case of certain newly operational facilities, compensation is based on a percentage of gross revenues from the facility, for a period which generally may not exceed one year.

To qualify under (1) or (2) above, the owner of the facilities and the management company must not be subject to common control, with allowances for *de minimis* cases.[1]

Related use restriction

Except for the IDB requirements and the private loan restriction (described below), present law does not specifically require that private use of bond proceeds be related to governmental use of facilities also financed with the bonds.

Private loan restriction

Interest on private loan bonds also is taxable. Private loan bonds are bonds which are part of an issue 5 percent or more of the proceeds of which are to be used to finance direct or indirect loans to persons other than a State or local government or section 501(c)(3) organization. Exceptions to the private loan bond restriction are provided for (1) IDBs, mortgage subsidy bonds, and student loan bonds for which tax-exemption specifically is provided in the Code; (2) excluded loans, i.e., certain loans (other than for use in a trade or business) to finance governmental taxes or assessments of a general nature and for an essential governmental function; and (3) bonds issued as part of a specified veterans' land bond program and a small scale energy conservation and renewable resource loan program authorized by section 243 of the Crude Oil Windfall Profit Tax Act of 1980.[2]

[1] Similar principles are applied in determining whether advance rulings will be issued where bond-financed hospitals or similar facilities are used by nonexempt persons other than employees (e.g., use of public or private charitable hospitals by private physicians).

[2] The exception for the veterans' land program is limited to bonds issued before March 15, 1987.

Bonds for volunteer fire departments

Certain volunteer fire departments are treated as qualified issuers of tax-exempt bonds.

House Bill

General rule

As under present law, interest on bonds to finance operations of governmental units is exempt from tax.

Trade or business use and private loan tests

Under the House bill, interest on nonessential function bonds issued by State and local governments is taxable. Bonds are nonessential function bonds if—

(1) an amount equal to or exceeding the lesser of 10 percent or $10 million of the bond proceeds is to be used in a trade or business of a person other than a State or local government, or

(2) an amount equal to or exceeding the lesser of 5 percent or $5 million of the bond proceeds is to be used to make or finance direct or indirect loans to persons other than States and local governments.

Exceptions to the revised private loan restriction (item (2) above) are provided for (1) nonessential function bonds used to finance certain specified facilities, loans, and other activities; (2) excluded loans, defined as under present law but clarified to include loans to persons engaged in a trade or business; and (3) bonds issued as part of the Texas Veterans' Land Bond Program, which may be issued as nonessential function bonds without any sunset date.

Use pursuant to certain management contracts

The House bill retains the present law rules relating to management contracts.

Use pursuant to certain cooperative research agreements

The House bill provides that use of bond-financed research facilities at governmental and section 501(c)(3) universities by private businesses is not treated as a trade or business use if the use is pursuant to certain cooperative research agreements pursuant to which title to and control of any resulting patents rests exclusively with the university rather than the private business. Under this special rule, control is not treated as resting exclusively with the university if the research arrangement provides for use of resulting patents by participating private businesses in advance of development of the product which is the subject of the patent.

Bonds for volunteer fire departments

The special exception treating certain volunteer fire departments as qualified issuers of tax-exempt bonds is deleted; rather these bonds must be issued as small-issue bonds.

Senate Amendment

General rule

As under present law, interest on State and local government bonds to finance operations of such governmental units is exempt from tax under Code Section 103.

Trade or business use and security interest tests

Interest on State and local government bonds is taxable if the bonds are IDBs, defined generally as under present law. The amendment clarifies that direct or indirect payments made by a person other than a governmental unit or section 501(c)(3) organization with respect to the use of bond proceeds may satisfy the security interest test for determining whether an issue is an issue

of IDBs, whether or not formally pledged as security for the issue.

Use pursuant to certain management contracts

The Senate amendment directs the Treasury Department to liberalize its advance ruling guidelines to provide that use pursuant to management contracts not exceeding 5 years is *not* treated as private trade or business use as long as (1) compensation is not based on a share of *net* profits, and (2) the exempt owner of the bond-financed facility has the option to cancel the contract, without penalty, at the end of any 3-year period.

Use pursuant to certain cooperative research agreements

The Senate amendment follows the House bill with two modifications. First, the amendment clarifies that universities may enter into agreements permitting exclusive use of resulting patents with participating private businesses provided the private business pays a fair market price for use of the patent. Second, the amendment provides that the university may permit sponsoring private businesses to use resulting patents without charge, provided the use is on a nonexclusive basis.

Related use restriction

The Senate amendment provides that if private trade or business use of bond proceeds exceeds 5 percent, any excess must be related to the governmental use also being financed with the proceeds of the issue.

Private loan restriction

The Senate amendment retains the present-law private loan restriction. A further exception is also added for the Iowa Industrial New Jobs Training Program, subject to a $100 million ceiling on outstanding bonds.

Bonds for volunteer fire departments

The present-law treatment of certain volunteer fire departments as qualified issuers of tax-exempt bonds is retained.

Conference Agreement

Overview

Like the House bill, the conference agreement reorganizes and amends the present-law rules governing tax-exemption for interest on obligations issued by or on behalf of qualified governmental units. As part of this reorganization, the present-law rules contained in Code sections 103 and 103A are divided, by topic, into 11 Code sections (secs. 103 and 141-150). The conferees intend that, to the extent not amended, all principles of present law continue to apply under the reorganized provisions.[3] As under both the House bill and the Senate amendment, interest on bonds,[4] the proceeds of which are used to finance operations of State or local governmental units, is tax exempt under Code section 103 without regard to many of the restrictions that apply to bonds used to benefit other persons.[5] Interest on State and local government bonds is taxable if the bonds are private activity bonds unless a specific exception is included in the Code.

An issue is an issue of private activity bonds if (1) a trade or business use and security interest test (similar to the present-law IDB tests) or (2) a private loan restriction is satisfied.[6] The conference agreement also adopts the Senate amendment's related use requirement, with technical modifications, described below.

Private activity bonds qualifying for tax-exemption include exempt-facility bonds, qualified mortgage bonds and qualified veterans' mortgage bonds, qualified small-issue bonds, qualified redevelopment bonds, qualified student loan bonds, qualified 501(c)(3) bonds, and bonds issued under three specifically described programs.[7]

Exempt-facility bonds are bonds issued to finance airports, docks and wharves, mass commuting facilities, water facilities, sewage disposal facilities, solid waste disposal facilities, qualified residential rental projects, qualified hazardous waste facilities, facilities for the local furnishing of electricity or gas, or local district heating or cooling facilities. All facilities financed with such bonds must satisfy a public use requirement.

The conferees recognize that section 501(c)(3) organizations typically perform functions which governments would otherwise have to undertake. The use of the term private activity bond to classify the obligations of section 501(c)(3) organizations in the Internal Revenue Code of 1986 in no way connotes any absence of public purpose associated with their issuance. Thus, the conferees intend, and the statute requires, that any future change in legislation applicable to private activity bonds generally shall apply to qualified 501(c)(3) bonds only if expressly provided in such legislation.

Trade or business use and security interest tests

In general

Under the conference agreement, an issue is an issue of private activity bonds if—

(1) an amount exceeding 10 percent of the proceeds[8] are to be used (directly or indirectly) in any trade or business carried on by any person other than a governmental unit, and

(2) more than 10 percent of the payment of principal or interest on the issue is to be made (directly or indirectly, and whether or not to the issuer) with respect to such a trade or business use of the bond proceeds, or is otherwise secured by payments or property used in a trade or business.

Trade or business use test

The conference agreement generally retains the present-law rules under which use by persons other than governmental units is determined for purposes of the trade or business use test. Thus, as under present law, the use of bond-financed property is treated as use of bond proceeds.[9] As under present law, a person may be a user of bond proceeds and bond-financed property as a result of (1) ownership or (2) actual or beneficial use of property pursuant to a lease, a management or incentive payment contract, or (3) any other arrangement such as a take-or-pay or other output-type contract. Use on the same basis as the general public (including use as an industrial customer) is not taken into account. However, trade or business use by all persons on a basis different from the general public is aggregated in determining if the 10-percent threshold for being a private activity bond is satisfied.

For purposes of the trade or business use test, all activities of section 501(c)(3) organizations, the Federal Government (including its agencies and instrumentalities), and other nongovernmental persons who are not natural persons are treated as trade or business activities.[10]

Security interest test

The conference agreement adopts the Senate amendment's security interest test, with technical modifications. Under the revised security interest test, both direct and indirect payments made by any person (other than a governmental unit) who is treated as using the bond proceeds are counted. Such payments are counted whether or not they are formally pledged as security or are directly used to pay debt service on the bonds. Similarly, payments to persons other than the issuer of the bonds may be considered. For example, payments made by a lessee of bond-financed property to a redevelopment agency are considered under the test even though the city, as opposed to the redevelopment agency, actually issues the bonds.

Revenues from generally applicable taxes are not treated as payments for purposes of the security interest test; however, special charges imposed on persons satisfying the use test (but not on members of the public generally) are so treated if the charges are in substance fees paid for the use of bond proceeds.

For example, where bonds are used to acquire land that is to be sold for redevelopment to private persons, amounts paid by those persons for the land are payments for purposes of the security interest test, even though incremental tax revenues are the stated security for the bonds. Similarly, if a facility is leased to a nongovernmental user

---

[3] As under present law, interest on certain bonds authorized under non-Code provisions of law is tax-exempt under Code section 103 if the authorizing legislation was enacted before January 1, 1984, and the bonds comply with all appropriate Code requirements. The appropriate Code requirements include all requirements that apply to Code bonds with respect to which the use of bond proceeds is comparable, including, but not limited to, the new private activity bond volume limitation, the arbitrage rules, the information reporting requirements, the limitation on bond-financing of costs of issuance, and the restrictions on issuance of tax-exempt bonds for certain specified activities.

[4] Under these rules, the term bond also includes debt obligations of a qualified governmental unit that do not involve the formal issuance of a bond or note. For example, installment purchase agreements, finance leases, and other evidences of debt issued pursuant to the borrowing power of a qualified governmental unit are treated as bonds.

[5] The conference agreement continues the present-law rule allowing bonds to be issued either by or on behalf of qualified governmental units. *See*, e.g., Rev. Rul. 63-20, 1963-2, C.B. 397.

[6] The term loan is a subset of the term use, so a use arises in every case where a loan is present. A private loan bond may not satisfy the trade or business use and security interest tests, however, in cases where the private use totals no more than 10 percent of bond proceeds or is made to an individual not engaged in a trade or business.

[7] The three programs are the Texas Veterans' Land Bond Program (with the present-law sunset deleted), the Oregon Small Scale Energy Conservation and Renewable Resource Loan Program, and the Iowa Industrial New Jobs Training Program. As with other private activity bonds, 95 percent or more of the proceeds of these private activity bonds must be used for the exempt purpose of the borrowing, no more than 2 percent of bond proceeds may be used to finance certain costs of issuance (described below), and the bonds are subject to the new State private activity bond volume limitations.

[8] In determining the amount of proceeds for this purpose, costs of issuance and amounts invested in a reserve or replacement fund are allocated between the governmental use and private use portions of the issue.

[9] Similarly, use of bond proceeds is treated as use of bond-financed property.

[10] The conferees intend that use of bond proceeds by the Bonneville Power Administration be treated as use by a governmental unit to the extent that BPA is treated as an exempt person under a transitional exception contained in present Treasury regulations, section 1.103-7(b)(2)(iii).

and receipts from a special user tax are formally pledged as security, lease payments from the private user are considered for purposes of the security interest test, even if the user tax revenues (rather than the lease or other payments) comprise the direct source for repayment of the bonds.

Use pursuant to certain management contracts

The conference agreement follows the Senate amendment's directive to the Treasury Department to liberalize its advance ruling guidelines on treatment of nongovernmental use pursuant to certain management contracts, with a modification. Under the agreement, Treasury is directed to modify its advance ruling guidelines to provide that use pursuant to management contracts not exceeding five years (including renewal options) is not treated as private trade or business use if—

(1) at least 50 percent of the compensation to any manager other than a governmental unit is on a periodic, fixed-fee basis;

(2) no amount of compensation is based on a share of net profits; and

(3) the governmental unit owning the facility may terminate the contract (without penalty) at the end of any three year period.[11]

Except for the specific changes indicated, the conferees do not intend Treasury to alter the present-law advance ruling guidelines and regulations for determining when nongovernmental use is disregarded for purposes of the trade or business use test or to limit the Treasury Department's authority to determine what constitutes (or does not constitute) a use of bond proceeds.

Use pursuant to certain cooperative research agreements

The conference agreement follows the Senate amendment on treatment of private use under certain cooperative research agreements, with a clarification that the amount charged participating private businesses for the use of patents or other resulting technology must be determined at the time the patent or technology is available for use. As under the House bill and Senate amendment, private use pursuant to research agreements not satisfying the requirements of the conference agreement is counted for purposes of the trade or business use and security interest tests and the private loan restriction (if the use in substance involves a loan).

Special rule for certain output facilities

In general

The conference agreement provides a special limit on bond-financing for output facilities used by persons other than governmental units or members of the general public. In the case of bonds 5 percent or more of the proceeds of which are to be used to finance output (e.g., power but not water) projects such as electric and gas generation, transmission, and related facilities, the maximum amount of bond-financing that may be used by nongovernmental persons on a basis other than as a member of the general public and by governmental units is $15 million.[12] Thus, with respect to any issue used to finance an output facility or related facilities, the amount of bond proceeds used by persons other than governmental units may not exceed the lesser of 10 percent or $15 million of the proceeds.[13] Additionally, in determining whether the $15 million limit is exceeded, all outstanding prior issues issued with respect to a project are counted.[14] Application of this restriction may be illustrated by the following examples:

Example 1.—Assume that a single issue of tax-exempt bonds is contemplated to finance the acquisition of an electric generating facility for $500 million. Assume further that 10 percent of the output of the facility will be sold to an investor-owned utility under an output contract. The maximum amount of tax-exempt financing that may be provided for the acquisition is $465 million (i.e., $450 million for the 90 percent of the facility that is governmentally used, and $15 million for the private use portion).

Example 2.—Alternatively, assume that the facility in Example 1, is financed with four bond issues. Assume further that the first issue is for $100 million. The maximum private use portion for this issue is $10 million (10 percent of the issue). Assume a second issue of $150 million with respect to the facility. The maximum permitted private use portion for the second issue is $5 million ($15 million less the $10 million private use portion of the first issue). For all subsequent issues for the facility, no private use financing would be permitted.

Use pursuant to certain pooling and exchange arrangements and certain spot sales of output capacity

The conferees wish to clarify that certain power pooling and exchange arrangements and certain spot sales of output capacity are treated as sales to the general public under the trade or business use and security interest tests. The conferees intend that the presence of a nongovernmental person acting solely as a conduit for exchange of power output among governmentally owned and operated utilities is to be disregarded in determining whether the trade or business and security interest tests are satisfied. In addition, exchange agreements that provide for "swapping" of power between governmentally owned and operated utilities and investor-owned utilities do not in any event give rise to trade or business use where (1) the "swapped" power is in approximately equivalent amounts determined over periods of 1 year or less, (2) the power is swapped pursuant to an arrangement that does not involve output-type contracts, and (3) the purpose of the agreements is to enable the respective utilities to satisfy differing peak load demands or to accommodate temporary outages.

The conference agreement further provides that spot-sales of excess power capacity for temporary periods, other than by virtue of output contracts with specific purchasers, are not treated as trade or business use. For purposes of this exception, a spot sale is a sale pursuant to a single agreement that is limited to no more than 30 days duration.

Related use restriction

Under the conference agreement, the amount of private use financed with an issue which use is unrelated to a governmental use also being financed or which is disproportionate to a related governmental use also being financed may not exceed 5 percent of the proceeds. If the sum of such private use for an issue exceeds 5 percent of the net proceeds of the issue, (and a 5-percent security interest test, determined with respect to such use is satisfied) then the interest on the bonds is taxable. The determination of whether a private use is related to governmental use also being financed with the bond proceeds is to be made on a case-by-case basis, emphasizing the operational relationship between the governmental and nongovernmental uses. In most—but not all—cases, this will result in a related private use facility being located within or adjacent to any governmental facility to which it is related. For example, a newsstand located in a courthouse is related to the courthouse, and a privately operated school cafeteria is related to the school in which it is located. By contrast, the use of 6 percent of school bond proceeds to build an administrative office building for a catering company that operates cafeterias for the school system is not a related use of bond proceeds and would result in interest on the bond issue from which the proceeds are derived being taxable. Similary, office space for lawyers engaged in the private practice of law is not related to financing of a courthouse or other government building.

Private-use financing provided with bond proceeds in excess of the unrestricted 5-percent portion generally may not be disproportionate to the amount of bond proceeds used for a related governmental use.[15] The determination of whether a private use which is related to a government use also being financed with the bond proceeds is disproportionate to the government use to which such private use relates is determined by comparing the amount of bond proceeds used for the related private and government uses. The related private use is disproportionate to the related government use to the extent it exceeds such use in amount. Multiple, related private use facilities for any government use are treated as one facility for purposes of this rule.[16]

The related use restriction may be illustrated by the following examples:

Example 1.—Assume County X issues $20 million of bonds for construction of a new school building and decides to use $18.1 million of the proceeds for construction of the new school building and $1.9 million of the proceeds for construction of a privately operated cafeteria in the county's administrative office building. The $1.9 million of proceeds is not related to the governmental use (i.e., school construction) being financed with the bonds; thus interest on the bonds is taxable. Had County X limited use of bond proceeds for the privately operated cafeteria to $1 million, however, the related use restriction would be satisfied since the amount of unrelated private use would not have exceeded 5 percent.

---

[11] The conferees intend that similar changes will be made to these advance ruling guidelines as applied to qualified 501(c)(3) bonds. *See*, Rev. Proc. 82-15, 1982-1 C.B. 460.

[12] The conference agreement directs the Treasury Department to modify its present regulations (Treas. reg. sec. 1.103-7(b)(5)) for determining the portion of an output facility that is privately used to reflect the reduced limits on such use. Specifically, Treasury is directed to delete the special exception under which users of 3 percent or less of the output of a facility are disregarded in calculating whether the issue satisfies the trade or business use and security interest test.

[13] A parallel reduction applies to the security interest test.

[14] Issues issued before September 1, 1986, are counted for purposes of this limit.

[15] Under the general test for private activity bonds, all private use financing must be less than 10 percent of the net proceeds of the issue.

[16] If the sum of the amount of unrelated and disproportionate related private use for an issue exceeds 5 percent of the proceeds of the issue (and a 5-percent security interest test, determined with respect to such use is satisfied), then the interest on such bonds is taxable.

Example 2.—Assume City Y issues $50 million of bonds for construction of a new public safety building ($32 million) and for improvements to an existing courthouse ($15 million). (The maximum private use (related and unrelated) portion for these bonds may not exceed $5 million, and the maximum unrestricted private use portion may not exceed $2.5 million.) Assume further that Y decides to use $3 million of the bond proceeds for renovation of an existing privately operated cafeteria located in the courthouse. If there is no other private use financed with the bonds, Y's use of the $3 million for the privately operated cafeteria satisfies the related use restriction. These expenditures are treated as being derived first from the permitted related private use portion (up to $2.5 million), and then from the unrestricted private use portion ($0.5 million).

Example 3.—Assume the facts of Example 2, except City Y decides to use $1.5 million of the bond proceeds to construct a privately operated parking garage adjacent to its new public safety building (reducing the proceeds available for the public safety building to $30.5 million). Under these facts, the allocation for the privately used courthouse facilities is determined as in Example 2. The expenditures for the public safety building parking garage are treated as derived from the unrestricted private use portion ($1.5 million) since the entire 5-percent related use portion for the issue was used for the courthouse cafeteria. Thus, the related use restriction is satisfied.

Private loan restriction

The conference agreement follows the House bill's limitation on the amount of bond proceeds that may be used to make private loans to an amount exceeding the lesser of 5 percent or $5 million of proceeds. As under the House bill, the restriction applies to loans to all persons other than governmental units.

The agreement retains the present-law exceptions to the private loan restriction for all private activity bonds for which tax-exemption is provided specifically in the Code, and follows the House bill and Senate amendment clarifications of the application of the excluded loan exception for specific essential governmental functions to permit indirect loans to businesses as well as to nonbusiness persons, provided the loans are available on an equal basis to both business and nonbusiness borrowers.

The conferees intend that, as under present law, a loan may arise from the direct lending of bond proceeds or may arise from transactions in which indirect benefits that are the economic equivalent of a loan are conveyed. Thus, the determination of whether a loan is made depends on the substance of a transaction, as opposed to its form. For example, a lease or other contractual arrangement (e.g., a management contract or an output or take-or-pay contract) may in substance constitute a loan, even if on its face, such an arrangement does not purport to involve the lending of bond proceeds. However, a lease or other deferred payment arrangement with respect to bond-financed property that is not in form a loan of bond proceeds generally is not treated as such unless the arrangement transfers tax ownership to a nongovernmental person. Similarly, an output or management contract with respect to a bond-financed facility generally is not treated as a loan of bond proceeds unless the agreement in substance shifts significant burdens and benefits of ownership to the purchaser or manager of the facility.

Volunteer fire departments

The conference agreement retains the present law treatment of volunteer fire department bonds subject to a requirement that 95 percent or more of the net proceeds be used for qualified purposes.

Effective dates

Definition of private activity bond

In general.—As provided in the Joint Statements on Effective Dates of March 14, 1986,[17] and July 17, 1986,[18] the amendments to the definition of a private activity bond generally apply to bonds (including refunding bonds) issued on or after September 1, 1986. This includes the 10 percent trade or business use test (10 percent or $15 million, for output facilities); the 5 percent unrelated use limitation; and the $5 million limitation contained in the amended private loan restriction.[19]

As provided in the Joint Statements, the September 1, 1986, effective date does *not* apply to bonds which under present law are (1) industrial development bonds (IDBs), (2) bonds that would be IDBs, treating section 501(c)(3) organizations as private persons engaged in trades or businesses, (3) student loan bonds, (4) mortgage revenue bonds, or (5) other private ("consumer") loan bonds for which tax-exemption is permitted. With respect to these bonds, these provisions of the conference agreement generally are effective for bonds (including refunding bonds) issued after August 15, 1986.

Modification of security interest test.—The amendments to the security interest test, to clarify that the test takes into account both direct and indirect payments made by users of bond-financed property (whether or not formally pledged), apply to bonds (including refunding bonds) issued after August 15, 1986.

Use pursuant to certain management contracts.—The direction to the Treasury Department to modify its advance ruling guidelines with respect to private use pursuant to certain management contracts is effective on the date of enactment.

Use pursuant to certain cooperative research agreements.—The provisions regarding use pursuant to certain cooperative research agreements generally apply to bonds (including refunding bonds) issued after August 15, 1986.

Transitional exceptions

The conference agreement includes three generic transitional exceptions to the amendments to the definition of private activity bonds (including the modification of the security interest test).[20]

Certain "in-progress" projects.—The first transitional exception is provided for bonds (other than refunding bonds) with respect to facilities—

(1) the original use of which commences with the taxpayer and the construction (including reconstruction or rehabilitation) of which began before September 26, 1985, and is completed on or after that date;

(2) the original use of which commences with the taxpayer and with respect to which a binding contract to incur significant expenditures for construction (including reconstruction or rehabilitation) of facilities financed with the bonds was entered into before September 26, 1985 and is binding at all times thereafter, and part or all of such expenditures are incurred on or after that date; or

(3) acquired after September 25, 1985, pursuant to a binding contract entered into on or before that date and that is binding at all times after that date.

Bonds eligible for this transitional exception are bonds that, under present law, are not IDBs, qualified mortgage bonds, qualified veterans' mortgage bonds, student loan bonds, other private loan bonds for which tax-exemption is permitted,[21] or non-Code bonds comparable to any of the foregoing, but which are private activity bonds under the conference agreement.

The transitional exception applies only to facilities for which the bond financing in question was approved by a governmental unit (or by voter referendum) before September 26, 1985. Governmental approval for this purpose includes approval by means of an inducement resolution or, if the governmental unit does not generally adopt inducement resolutions for the type of bond concerned, other comparable approval.

For purposes of the exception for facilities qualifying under (1) or (2), above, construction of a facility is deemed complete when the facility is placed in service for Federal income tax purposes.

Whether or not an arrangement constitutes a contract is determined under the applicable local law. A binding contract is not considered to have existed before September 26, 1985, however, unless the property to be acquired or services to be rendered were specifically identified or described before that date.

A binding contract for purposes of this provision exists only with respect to property or services for which the taxpayer is obligated to pay under the contract. In addition, where a contract obligates a taxpayer to purchase a specified number of articles and also grants an option to purchase additional articles, the contract is binding only to the extent of the articles that must be purchased.

---

[17] Joint Statement by The Honorable Dan Rostenkowski (D., Ill.), Chairman, Committee on Ways and Means, The Honorable Bob Packwood (R., Ore.), Chairman, Committee on Finance, The Honorable John J. Duncan (R., Tenn.), Ranking Member, Committee on Ways and Means, The Honorable Russell Long (D., La.), Ranking Member, Committee on Finance, and The Honorable James A. Baker, III, Secretary of the Treasury, on the Effective Dates of Pending Tax Reform Legislation, March 14, 1986.

[18] Joint Statement of Chairman Rostenkowski, Chairman Packwood, and Secretary Baker, July 17, 1986.

[19] The exceptions to the private loan restriction (including the continuation of the present-law exceptions) are effective for bonds issued after August 15, 1986.

[20] Transitional exceptions are provided to many of the effective dates of other provisions of this title under circumstances similar to those described in this section. For purposes of those transitional exceptions, the determination of whether original use commences with the taxpayer; of whether construction (including reconstruction or rehabilitation) began before (and is completed on or after) a specified date; of whether significant expenditures are made; and of whether a binding contract existed (and pursuant to which expenditures are made after a specified date) is made in the same manner as described in this section. Additionally, the determination of whether a facility is described in a properly adopted inducement resolution (or other comparable approval) is made in the same manner as that described in this section.

[21] These bonds include generally bonds issued as part of the Texas Veterans' Land Bond Program, the Oregon Small-Scale Energy Conservation and Renewable Resource Loan Program, and the Iowa Industrial New Jobs Training Program.

A contract may be considered binding on a person even though (1) the contract contains conditions which are under the control of a person not a party to the contract, or (2) the person has the right under the contract to make minor modifications as to the details of the subject matter of the contract.

A contract that was binding on September 25, 1985, will not be considered binding at all times thereafter if it is modified (other than as described in (2) above) after that date. Additionally, for purposes of the binding contract exception, payments under an installment payment agreement are incurred no later than the date on which the property that is the subject of the contract is delivered rather than the due date of each installment.

For purposes of the binding contract rule, significant expenditures means expenditures in excess of 10 percent of the reasonably anticipated cost of the facilities.

Certain current refundings.—A second transitional exception is provided with respect to certain current refunding bonds.[22] This exception applies to current refundings of bonds issued before the applicable date (including a series of refundings where the original bond was issued before that date), if—

(1) the amount of the refunding bonds does not exceed the outstanding amount of the refunded bonds, and

(2) the average maturity of the refunding issue (1) does not exceed 120 percent of the reasonably expected economic life of the property identified as being financed with the refunded bonds (in a series of refundings, the original bonds) when those bonds were issued, or (2) the final maturity date of the refunding bonds is not later than 17 years after the issuance of the refunded (original) bonds.[23]

This exception also applies to current refundings of bonds to which the "in progress" transition rule described above applies (including a series of such refundings).

Certain advance refundings.—A third transitional exception is provided permitting advance refunding of bonds that were governmental when issued (satisfying the 25-percent rather than 10-percent trade or business use test) subject to the new restrictions on advance refundings of governmental bonds.

Bonds for volunteer fire departments

The extension and modification of authority for certain volunteer fire departments to issue tax-exempt bonds is effective on the date of enactment. The repeal of the sunset date for the Texas land bond program and the provision regarding the Iowa Industrial New Jobs Training Program are effective on the date of enactment.

B. Private Activity Bonds

1. Exempt-Facility Bonds

a. Overview

Present Law

Tax-exempt industrial development bonds (IDBs) may be issued to finance the following specified categories of exempt activities: multifamily residential rental projects, sports facilities, convention or trade show facilities, airports, docks and wharves, mass commuting facilities, parking facilities, sewage disposal facilities, solid waste disposal facilities, facilities for the local furnishing of electric energy or gas, facilities for the furnishing of water, local district heating or cooling facilities, and air or water pollution control facilities.

Exempt-activity IDBs formerly were permitted for certain hydroelectric generating facilities. This exception expired generally after December 31, 1985. A special transition rule was provided for certain facilities with respect to which an application for license had been docketed with the Federal Energy Regulatory Commission before January 1, 1986.

Exempt-activity IDBs are subject to numerous targeting requirements, described below, including a requirement that at least 90 percent of proceeds of each issue be used to finance the exempt activity for which the bonds are issued. Net proceeds are defined as proceeds, in effect reduced by certain amounts, such as amounts invested in a reasonably required reserve or replacement fund and amounts used to pay costs of issuance.

House Bill

Exempt-facility bonds may be issued to finance multifamily residential rental projects, airports, docks and wharves, mass commuting facilities, sewage disposal facilities, solid waste disposal facilities, and facilities for the furnishing of water (other than irrigation facilities).

Amendments are made to the targeting rules for multifamily residential rental projects, the definitions of airports, docks and wharves, and certain of the rules applicable to all exempt-facility bonds, including a requirement that all net proceeds of each issue be used to finance the exempt facility for which the bonds are issued. Net proceeds are defined as proceeds less amounts invested in a reasonably required reserve or replacement fund and amounts used to pay costs of issuance.

Senate Amendment

Under the Senate amendment, exempt-activity IDBs may be issued to finance multifamily residential rental projects, airports, docks and wharves, sewage disposal facilities, solid waste disposal facilities, facilities for the local furnishing of electric energy or gas, facilities for the furnishing of water (including irrigation systems), local district heating or cooling facilities, and hazardous waste treatment facilities.

Amendments are made to the targeting rules for multifamily residential rental projects and the definition of airports and docks and wharves. Additionally, at least 95 percent of the net proceeds of each issue is required to be used to finance the exempt activity for which the bonds are issued including functionally related and subordinate property. Net proceeds are defined as proceeds less amounts invested in a reasonably required reserve or replacement fund and amounts used to pay costs of issuance.

Conference Agreement

Under the conference agreement, exempt-facility bonds may be issued to finance multifamily residential rental projects, airports, docks and wharves, mass commuting facilities, sewage disposal facilities, solid waste disposal facilities, facilities for the local furnishing of electric energy or gas, facilities for the furnishing of water (including irrigation systems), local district heating or cooling facilities, and certain hazardous waste disposal facilities.

Amendments are made to the targeting rules for multifamily residential rental projects, the definition of airports, docks and wharves, and mass commuting facilities, and certain of the rules applicable to all exempt-facility bonds. The conference agreement further provides that at least 95 percent of the net proceeds of each issue must be used for the exempt facility for which the bonds are issued and functionally related and subordinate property. Net proceeds are defined as proceeds less amounts invested in a reasonably required reserve or replacement fund. (No reduction is made for amounts paid for costs of issuance since those amounts are not treated as spent for the exempt purpose of the borrowing.)

b. Rules applicable to specific exempt facilities

(1) Multifamily residential rental projects

Present Law

Exempt-activity IDBs may be issued to finance projects for multifamily residential rental property. At least 20 percent (15 percent in targeted areas) of the housing units in these projects must be occupied by individuals whose income does not exceed 80 percent of the applicable area median income when they first occupy the unit, determined with adjustments for family size.

Bond-financed projects must satisfy these requirements for a qualified project period, generally the longer of 10 years or 50 percent of the term of the bonds for the project having the longest maturity.

House Bill

Exempt-facility bonds may be issued to finance projects for multifamily residential rental property. Bond-financed projects must satisfy one of the two following set-aside requirements:

(1) At least 25 percent of housing units must be occupied by persons whose income does not exceed 80 percent of area median income; or

(2) At least 20 percent of housing units must be occupied by persons whose income does not exceed 70 percent of area median income.

All income determinations are made with adjustments for family size.

The operator of each bond-financed project must certify annually to the Treasury Department that the project is in compliance with the applicable set-aside requirement, based on current tenant incomes. If noncompliance is not corrected after it reasonably should have been discovered, interest on bond financing is nondeductible to the project owner from the first day of the year in which noncompliance commenced until correction occurs.

Existing low- or moderate-income tenants continue to be counted as such unless their incomes exceed 120 percent of the otherwise applicable income ceiling. If a project ceases to comply with set-aside requirements because of increases in existing tenants' income, no penalties are imposed if each available unit after noncompliance occurs is rented to a new low- or moderate-income tenant, until the project is again in compliance.

Bond-financed projects are required to be used as rental housing for a qualified project period, generally the longer of 15 years or until the date on which bonds are no longer outstanding.

The Treasury Department is required to report annually on compliance with the set-aside requirements.

---

[22] Advance refunding bonds, as defined in the conference agreement, may not be issued pursuant to this exception.

[23] This exception applies to bonds that are governmental bonds under present law but are private activity bonds under the conference agreement. This exception does not change the present-law rules which prohibit refundings of various types of bonds that were eliminated or restricted under the Deficit Reduction Act of 1984.

Senate Amendment

The Senate amendment is the same as the House bill, except—

(1) The qualified project period extends for a minimum of 12 (rather than 15) years.

(2) If a project ceases to comply with the applicable set-aside requirement because of increases in current tenants' income, only available units of comparable or smaller size are required to be rented to new low- or moderate-income tenants, until the project is again in compliance.

(3) A special rule is provided for projects that charge significantly lower than market rents to low- or moderate-income tenants and that elect to satisfy a stricter low-income set-aside requirement. Under this rule, (a) low- or moderate-income tenants continue to qualify as such, as long as their income does not exceed 150 percent of the applicable income ceiling, and (b) if the project ceases to comply with the set-aside requirements because of increases in existing tenants' income, no penalties are imposed if each available low-or-moderate income unit is rented to tenants having 50 percent or less of area median income, until the project is again in compliance.

Conference Agreement

The conference agreement generally follows the Senate amendment, with several exceptions.[24] The low-income set-aside requirements are modified to conform to the requirements applicable to the low-income housing credit provided in the conference agreement (see II.E.3, above). Thus, bond-financed projects are required to meet one of the two following set-aside requirements (to be elected by the issuer on or before the date the bonds are issued):

(1) At least 40 percent of rental housing units must be occupied by tenants having incomes of 60 percent or less of area median gross income; or

(2) At least 20 percent of rental housing units must be occupied by tenants having incomes of 50 percent or less of area median gross income. To conform with the low-income housing credit, the conference agreement further provides that existing low-income tenants will continue to count as such as long as their family incomes do not increase above 140 percent of the income qualifying as low-income with respect to the project.

The conference agreement follows the House bill with respect to the qualified project period, during which bond-financed projects are required to be used as rental housing. Thus, the qualified project period ends on the latest of (1) the date which is 15 years after 50 percent of the units are occupied, (2) the first day on which no bonds are outstanding with respect to the project, or (3) the date on which any assistance provided to the project under section 8 of the United States Housing Act of 1937 terminates.

The conference agreement also makes conforming amendments to the provision in the Senate amendment, under which special rules are applied to certain rent-skewed projects which elect to satisfy stricter targeting requirements. Under the modified rule, projects qualify for the special treatment contained in the Senate amendment only if 15 percent or more of the low-income units are occupied by individuals having incomes of 40 percent (rather than 50 percent or 60 percent) or less of area median gross income, and the average rent charged to market-rate tenants is at least 300 percent of the average rent charged to low-income tenants for comparable units. (The limitations on rent charged to low-income tenants, contained in the Senate amendment, are retained.) If a project elects to satisfy these requirements, increases in an existing tenant's income, up to 170 percent of the qualifying income, do not disqualify the tenant as a low-income tenant; upon an increase over 170 percent, only the next available low-income unit must be rented to a tenant having an income of 40 percent or less of area median income.

(2) Sports facilities

Present Law

Exempt-activity IDBs may be issued to finance sports facilities.

House Bill

Authority to issue tax-exempt bonds for sports facilities is repealed.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

(3) Convention or trade show facilities

Present Law

Exempt-activity IDBs may be issued to finance convention or trade show facilities.

House Bill

Authority to issue tax-exempt bonds for convention or trade show facilities is repealed.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

(4) Airports

Present Law

Present law allows exempt-activity IDBs to be issued to finance airports and related storage and training facilities. Under Treasury regulations, airports include runways, terminals, and other public facilities, as well as functionally related and subordinate airport hotels and commercial facilities; hangars for one or more airlines; and certain other property not for use directly by the general public.

House Bill

The House bill allows exempt-facility bonds to be used to finance governmentally owned airports, defined as ground facilities directly related and essential to the air transportation of passengers and cargo. These include runways, air traffic control towers, hangars, terminal facilities, and public parking, but do not include airport hotels, shops, and food preparation facilities.

Senate Amendment

The Senate amendment allows exempt-activity IDBs to be issued to finance airports, defined as under present law except the amendment excludes airport hotels.

Conference Agreement

The conference agreement allows exempt-facility bonds to be issued to finance airports, and related storage and training facilities. The conference agreement provides that the term airport does not include any of the following facilities if they are used in a private business use:

(1) Airport hotels (or other lodging facilities).

(2) Retail facilities (including food and beverage facilities) located in a terminal in excess of a size necessary to serve passengers[25] and employees at the airport.

(3) Retail facilities for passengers or the general public (including, but not limited to, rental car lots) located outside the airport terminal.[26]

(4) Office buildings for individuals who are not employees of a governmental unit or of the public airport operating authority.

(5) Industrial parks or manufacturing facilities.

For purposes of these exclusions, property is considered to be used in a private trade or business if it is leased to or managed by any person other than a qualified governmental unit or an airport authority acting on behalf of a qualified governmental unit.

(5) Docks and wharves

Present Law

Exempt-activity IDBs may be issued to finance docks and wharves and related storage and training facilities.

House Bill

The House bill allows exempt-facility bonds to be issued to finance governmentally owned docks and wharves, defined as facilities directly related and essential to the transportation of passengers and cargo by water. Under this definition, long-term storage facilities (generally, those with more than 30 days capacity) may not be financed with tax-exempt bonds.

Senate Amendment

The Senate amendment retains present law.

Conference Agreement

The conference agreement allows exempt-facility bonds to be used to finance docks and wharves and related storage and training facilities (including long-term storage where permitted under present law). The term dock and wharf does not include any of the following facilities, if the facilities are used in a private business use:

(1) Hotels (or other lodging facilities);

(2) Retail facilities (including food and beverage facilities) located in a terminal in excess of a size necessary to serve passengers and employees at the port;

(3) Retail facilities (other than public parking) for passengers or members of the general public located outside the port terminal;

(4) Office buildings for individuals who are not employees of a governmental unit or of the public port operating authority); and

(5) Industrial parks or manufacturing facilities.

---

[24] As under present law, multifamily residential rental property is eligible for tax-exempt financing only if the housing units are used other than on a transient basis. In addition, each residential rental unit must include separate and complete facilities for living, sleeping, eating, cooking, and sanitation. Hotels, dormitories, hospitals, nursing homes, retirement homes, and trailer parks do not qualify as residential rental property.

[25] For purposes of these limitations, the term passengers includes persons meeting or accompanying persons arriving and departing on flights to and from the airport.

[26] Public airport parking is not treated as a retail facility for purposes of this limitation, but such parking must be limited to no more than a size necessary to serve passengers and employees at the airport.

For purposes of these exclusions, property is considered to be used in a private trade or business if it is leased to or managed by any person other than a qualified governmental unit or a port authority acting on behalf of a qualified governmental unit.

(6) Mass commuting facilities

Present Law

Exempt-activity IDBs may be issued to finance mass commuting facilities and related storage and training facilities. The term mass commuting facility does not include mass commuting vehicles.

House Bill

Exempt-facility bonds may be issued to finance governmentally owned mass commuting facilities, defined generally as under present law, but limited to facilities directly related and essential to the ground transportation of passengers.

Senate Amendment

Authority to issue exempt-activity IDBs for mass commuting facilities is repealed.

Conference Agreement

The conference agreement follows the House bill, and defines such facilities generally as under present law, except that the term mass commuting facilities does not include any of the following facilities, if they are used in a private business use: [27]

(1) Hotels (or other lodging facilities).

(2) Retail facilities (including food and beverage facilities) located in a mass commuting terminal in excess of a size necessary to serve passengers and employees of the mass commuting facility.

(3) Retail facilities (other than public parking) for passengers and members of the general public located outside the mass commuting terminal.

(4) Office buildings for individuals who are not employees of a governmental unit or of the public mass commuting operating authority; and

(5) Industrial parks or manufacturing facilities.

For purposes of these exclusions, property is considered to be used in a private trade or business if it is leased to or managed by any person other than a qualified governmental unit or an operating authority acting on behalf of a qualified governmental unit.

(7) Parking facilities

Present Law

Exempt-activity IDBs may be issued to finance parking facilities.

House Bill

Authority to issue tax-exempt bonds (other than small-issue bonds) for parking facilities is repealed. (This repeal does not affect the ability to issue tax-exempt bonds to finance parking facilities that are functionally related and subordinate to an exempt facility.)

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment. This provision does not affect the ability to finance parking facilities which are functionally related and subordinate to another exempt facility. (*See*, B.1.D., above.)

(8) Sewage disposal facilities

Present Law

Present law allows exempt-activity IDBs to be issued to finance sewage disposal facilities.

House Bill

Exempt-facility bonds may be issued to finance sewage disposal facilities, defined generally as under present law, but limited to directly related and essential facilities.

Senate Amendment

The Senate amendment retains present law.

Conference Agreement

The conference agreement allows exempt-facility bonds to be issued to finance sewage disposal facilities, defined as under present law.

(9) Solid waste disposal facilities

Present Law

Exempt-activity IDBs may be issued to finance solid waste disposal facilities. Qualified steam-generating or alcohol-producing facilities may also be financed under this exception.

House Bill

Exempt-facility bonds may be issued to finance solid waste disposal facilities, defined generally as under present law, but limited to directly related and essential facilities. The provision regarding qualified steam-generating or alcohol-producing facilities is repealed.

Senate Amendment

The Senate amendment retains present law.

Conference Agreement

The conference agreement allows exempt-facility bonds to be issued to finance solid waste disposal facilities, defined generally as under present law. Thus, as under present law, tax-exempt financing may be provided for the processing of solid waste or heat into usable form, but not, as an exempt facility bond, for further processing that converts the resulting materials or heat into other products (e.g., for turbines or electric generators). (*See*, Temp. Treas. reg. sec. 17.1.) The special rule for certain qualified steam-generating or alcohol-producing facilities is repealed. The conferees wish to clarify that solid waste does not include most hazardous waste (including radioactive waste).

(10) Facilities for the local furnishing of electric energy or gas

Present Law

Exempt-activity IDBs may be issued to finance facilities for the local furnishing of electric energy or gas, in areas not exceeding two contiguous counties or a city and one contiguous county.

House Bill

Authority to issue tax-exempt bonds for facilities for the local furnishing of electric energy or gas is repealed.

Senate Amendment

The Senate amendment retains present law.

Conference Agreement

The conference agreement follows the Senate amendment.[28]

(11) Pollution control facilities

Present Law

Air or water pollution control facilities may be financed with exempt-activity IDBs.

House Bill

Authority to issue tax-exempt bonds for air or water pollution control facilities is repealed.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

(12) Facilities for the furnishing of water

Present Law

Exempt-activity IDBs may be issued to finance facilities for the furnishing of water, including irrigation systems.

House Bill

The House bill allows exempt-facility bonds to be issued to finance facilities for the furnishing of water, defined generally as under present law but excluding irrigation systems.

Senate Amendment

The Senate amendment retains present law.

Conference Agreement

The conference agreement allows exempt-facility bonds to be issued to finance facilities for the furnishing of water, defined as under present law (including irrigation systems).

(13) Certain hydroelectric generating facilities

Present Law

Exempt-activity IDBs were permitted to be issued to finance qualified hydroelectric generating facilities. This provision generally expired after 1985; however, the provision is extended (through 1988) for property with respect to which an application has been docketed by the Federal Energy Regulatory Commission (FERC) before January 1, 1986.

House Bill

The House bill repeals authority to issue tax-exempt bonds to finance hydroelectric generating facilities, including the transitional exception included in present law that allows certain bonds for these facilities to be issued after the provision's general December 31, 1985, termination date.

Senate Amendment

The Senate amendment follows the House bill, but retains the present law transitional exception for property with respect to which a FERC application was docketed before January 1, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, with a clarification that, in order for the present-law transitional exception to apply, an application for a license (rather than for a preliminary permit) must have been docketed with FERC by December 31, 1985.

---

[27] In retaining the present-law definition of mass commuting facilities, as modified above, the conferees do not intend to prejudge the possible need in the future to allow tax-exempt financing for high-speed rail systems in a manner similar to that allowed under the agreement for mass commuting facilities.

[28] Present-law exceptions under which specified facilities are treated as facilities for the local furnishing of electricity (secs. 644 and 645 of the Deficit Reduction Act of 1984) are retained under the conference agreement.

(14) Local district heating or cooling facilities

Present Law

Exempt-activity IDBs may be used to finance local district heating or cooling facilities.

House Bill

The House bill repeals the authority to issue tax-exempt bonds for local district heating or cooling facilities.

Senate Amendment

The Senate amendment retains present law.

Conference Agreement

The conference agreement allows exempt-facility bonds to be issued to finance local district heating or cooling facilities, defined as under present law.

(15) Qualified hazardous waste facilities

Present Law

There is no provision allowing tax-exempt IDBs to be issued to finance hazardous waste treatment or disposal facilities. (Solid waste disposal facilities do not include facilities disposing of liquid or gaseous wastes, including most hazardous waste.)

House Bill

No provision.

Senate Amendment

The Senate amendment allows exempt-activity IDBs to be issued to finance hazardous waste treatment facilities. This exception is limited to facilities which are subject to final permit requirements under subtitle C of Title II of the Solid Waste Disposal Act, as in effect on the date of enactment of the Senate amendment.

Conference Agreement

Under the conference agreement, exempt-facility bonds may be issued to finance qualified hazardous waste facilities. These include facilities for the land incineration or the permanent entombment of hazardous waste, which facilities are subject to final permit requirements under subtitle C of Title II of the Solid Waste Disposal Act, as in effect on the date of enactment of the conference agreement.

Tax-exempt financing is available only for facilities (or the portion of a facility) to be used by the public as opposed to the generator of the hazardous waste.[29] The conferees further intend that the term hazardous waste not include radioactive waste, and that rules similar to the present-law rules regarding solid waste disposal IDBs will apply, including rules limiting hazardous waste to materials having no market or other value at the place at which they are located and rules limiting tax-exempt financing to that portion of a facility which is actually engaged in the incineration or entombment of hazardous waste. (*See, e.g.*, Treas. Reg. sec. 1.103-8(f)(2) and Temp. Treas. Reg. sec. 17.1.)

c. Effective dates for exempt-facility bond provisions

The repeal of specified categories of exempt-activity IDBs and the amendments to the definition of certain exempt facilities apply to bonds issued after August 15, 1986.

A transitional exception from the new rules for exempt-facility bonds is provided for bonds (other than refunding bonds) that may be issued under the present IDB rules, but which may not be issued under the conference agreement. This transitional exception applies to bonds for facilities with respect to which the commencement of construction (including reconstruction or rehabilitation) or binding contract, or acquisition, rules described in the discussion of effective dates for the new rules on governmental bonds are satisfied. (*See*, A., above.)

A second transitional exception to the exempt-facility bond provisions applies in the case of certain current refunding bonds. This exception applies to refundings (including a series of refundings) of bonds issued before August 16, 1986, which bonds qualify for tax-exemption under present law, but do not so qualify under the conference agreement, provided that the rules of the transitional exception for current refundings of certain governmental bonds (described in A., above) are satisfied.

The requirement that 95 percent of the net proceeds of exempt-facility bonds be used to finance exempt facilities (including functionally related and subordinate facilities) applies to bonds issued after August 15, 1986, except for bonds covered under the second transitional exception above (for current refunding bonds). The option to issue bonds for qualified hazardous waste facilities applies after August 15, 1986.

d. Miscellaneous restrictions on exempt-facility bonds

(1) Functionally related and subordinate test

Present Law

In the case of exempt-activity IDBs, all property that is functionally related and subordinate to the exempt activity may be financed with bond proceeds. Expenditures for such functionally related and subordinate property are treated as made for the exempt purpose of the borrowing.

House Bill

The House bill repeals the functionally related and subordinate test. Thus, only property comprising the exempt facility may be financed with exempt-facility bonds.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the Senate amendment with a modification providing that office space generally is not treated as functionally related and subordinate to an exempt facility (subject to the modifications described above that apply to airports, docks and wharves, and mass commuting facilities).[30] Only office space that is directly related to the day-to-day operations at an exempt facility and that is located at or within the facility may be financed with exempt-facility bonds and small issue IDBs for manufacturing. Thus, a separate office building, or an office wing of a mixed-use facility, is not treated as functionally related and subordinate to an exempt facility.

Effective date.—This provision applies to bonds (including refunding bonds) issued after August 15, 1986. A transitional exception applies in the case of certain current refunding bonds. This exception applies to refundings (including a series of refundings) of bonds issued before August 16, 1986, which bonds qualify for tax-exemption under present law, but do not so qualify under the conference agreement, provided that the rules of the transitional exception for current refundings of certain governmental bonds (described in A., above) are satisfied.

(2) Ownership of exempt-facility bond-financed property

Present Law

There are no general restrictions on private ownership of property financed with exempt-activity IDBs. Under a special rule, however, for bonds to be exempt from the present-law private activity bond volume limitations, certain transportation and other facilities must be governmentally owned.

House Bill

The House bill requires that all property financed with exempt-facility bonds for airports, docks and wharves, mass commuting facilities and water facilities be governmentally owned. Governmental ownership is determined using general Federal income tax concepts of ownership.

Senate Amendment

The Senate amendment follows present law, with a modification to the safe-harbor rules for financing airports, docks and wharves, and certain other facilities outside of the State volume limitations on IDBs. Under this safe-harbor, these exempt facilities are not treated as privately owned solely by reason of a lease (including service or management contract) if (a) the term of the lease (including renewal periods) does not exceed 80 percent of the reasonably expected economic life of the bond-financed property and (b) the private user of the facility does not have an option to purchase the facility at other than fair market value, and (c) the leasee makes an irrevocable election not to claim an investment tax credit with respect to any property financed with the issue.

Conference Agreement

The conference agreement follows the House bill in requiring that all property financed with exempt-facility bonds for airports, docks and wharves, and mass commuting facilities, be governmentally owned. The conference agreement modifies the Senate amendment's safe-harbor rule for permitting airport, dock and wharf, and solid waste bonds to be exempt from the State volume limitations as a safe-harbor test for purposes of this requirement.

Under the agreement, property is considered owned by a governmental unit if the leasee makes an election (binding on successors in interest) not to claim depreciation or an investment tax credit with respect to the property, the lease term is not more than 80 percent of the property's useful life and the leasee has no option to purchase the property at other than fair market value. In the case of a solid waste facility a lease of 20 years or less is considered to meet the 80 percent test.

Effective date.—This provision applies to bonds (including refunding bonds) issued after August 15, 1986.

A transitional exception is provided for bonds (other than refunding bonds) that may be issued under the present IDB rules, but which may not be issued under the conference agreement. This transitional exception applies to bonds for facilities with respect to which the commencement of construction (including reconstruction or rehabilitation) or binding contract or acquisition rules described in the discussion of effective

[29] This requirement is considered to be satisfied, if 95 percent or more of the net proceeds are to be used with respect to that portion of the facility used by persons other than the owner or operator of the facility (or any related person).

[30] These restrictions are identical to the restrictions that apply under present law and the conference agreement as part of the definition of manufacturing facility under the small-issue bond rules.

dates for the new rules on governmental bonds are satisfied. (*See* A., above.)

A second transitional exception to the exempt-facility bond provisions applies in the case of certain current refunding bonds. This exception applies to refundings (including a series of refundings) of bonds issued before August 16, 1986, which bonds qualify for tax-exemption under present law, but do not so qualify under the conference agreement, provided that the rules of the transitional exception for current refundings of certain governmental bonds (described in A., above) are satisfied.

2. Industrial Park Bonds

Present Law

Tax-exempt IDBs may be issued to finance acquisition or development of land as a site for an industrial park. Up to 50 percent of the proceeds of these bonds may be used to acquire land.

House Bill

The House bill repeals the tax exemption for interest on industrial park IDBs.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

Effective date.—This provision is effective for bonds (including refunding bonds) issued after August 15, 1986.

A transitional exception from the repeal of authority to issue tax-exempt bonds for industrial parks applies to such bonds for facilities with respect to which the commencement of construction (including reconstruction or rehabilitation) or binding contract or acquisition rules described in the discussion of effective dates for the new rules on governmental bonds are satisfied. (*See* A., above.)

A second transitional exception to this provision applies in the case of certain current refunding bonds. This exception applies to refundings (including a series of refundings) of bonds issued before August 16, 1986, which bonds qualify for tax-exemption under present law, but do not so qualify under the conference agreement, provided that the rules of the transitional exception for current refundings of certain governmental bonds (described in A., above) are satisfied.

3. Small-Issue Bonds

Present Law

Interest on small-issue IDBs is exempt from tax. Small-issue IDBs must be part of an issue not exceeding $1 million, the proceeds of which are used to finance land or depreciable property. The $1 million limitation is increased to $10 million if an election is made to take certain related capital expenditures into account.

As with exempt-facility bonds, 90 percent of the net proceeds (defined in the same manner as under the rules on exempt-facility bonds) of small-issue bonds must be used for the exempt purpose of the borrowing.

Under a special exception to the general restriction on use of bond proceeds to finance land, described below, certain limited amounts of small-issue bond proceeds may be used to finance farmland for use by first-time farmers. *De minimis* amounts of used equipment purchased in connection with farmland also may be financed under this exception. Bonds for first-time farmers are treated as bonds for nonmanufacturing facilities.

No special restrictions are imposed on the use of small-issue IDBs to finance new, depreciable farm property.

The small-issue exception expires generally for bonds issued after December 31, 1986. In the case of small-issue bonds for manufacturing facilities only, the exception expires after December 31, 1988.

House Bill

The House bill repeals the present-law sunsets applicable to small-issue bonds, i.e., the ability to issue these bonds is indefinitely extended. As in the case of exempt-facility bonds, all bond proceeds (other than issuance costs and a reasonably required debt service reserve fund) must be used for the exempt purpose of the borrowing.

Senate Amendment

The Senate amendment retains the present-law sunset dates applicable to small-issue IDBs, but extends the presently scheduled termination of the special exception for bonds for farmland by treating those bonds as bonds for manufacturing facilities.

Additionally, 95 percent of the proceeds of each issue must be used for the exempt purpose of the borrowing.

The special exception for bonds to finance farmland for first-time farmers is expanded to include financing land for individuals who previously owned land which they disposed of while insolvent. Additionally, the amount of used equipment that may be financed for first-time farmers is increased to 25 percent of the financing provided (i.e., a maximum of $62,500), regardless of whether such equipment is financed in conjunction with financing for the purchase of farmland.

A $250,000 lifetime limit is imposed on the amount of depreciable farm property (including both new and used property) that may be financed for any principal user or related persons. Bonds issued prior to the effective date of this provision are not affected, but count in determining the amount of financing allowed to be provided to any person by subsequent issues.

Conference Agreement

The conference agreement follows the Senate amendment, except that the sunset date for issuance of manufacturing bonds (including bonds for first-time farmers) is extended for one additional year, through December 31, 1989. At least 95 percent of the net proceeds (without reduction for issuance costs) must be used for the exempt purpose of the borrowing. (*See also*, the description of new restrictions on financing costs of issuance.)

Effective date.—These provisions, including the $250,000 limit on depreciable farm property, apply to bonds (including refunding bonds) issued after August 15, 1986.

A transitional exception applies to certain current refunding bonds that may be issued under current law but that may not be issued under the conference agreement and for current refundings of small-issue bonds occurring after the prescribed termination dates. Current refundings qualifying under this exception are issues—

(1) that do not extend the maturity of the refunded issue;

(2) that have a lower interest rate than the rate on the refunded issue; and

(3) the amount of which does not exceed the outstanding amount of the refunded bonds.

4. Student Loan Bonds

Present Law

Tax-exemption is permitted for interest on student loan bonds issued in connection with the Department of Education's Guaranteed Student Loan (GSL) and Parents' Loans for Undergraduate Students (PLUS) programs. Tax-exemption is not permitted for interest on student loan bonds not issued in connection with these Federal programs (e.g., supplemental student loans).

House Bill

The House bill retains the present exemption for interest on student loan bonds issued in connection with the Federal GSL and PLUS programs, and expands the exemption to include student loan bonds issued under certain State supplemental student loan programs. Under the House bill, all proceeds of student loan bonds (other than amounts invested in a reasonably required reserve or replacement fund or used to pay costs of issuance) must be used to make or finance student loans.

Senate Amendment

The Senate amendment is the same as the House bill, except only 85 percent of the proceeds are required to be used to make or finance student loans.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment with a modification requiring that at least 90 percent of net proceeds (without any reduction for issuance costs) must be used to finance student loans in the case of bonds issued in connection with the Federal GSL and PLUS programs. In the case of other student loan bonds for which tax-exemption is permitted, 95 percent is substituted for 90 percent. (*See also*, the description below of new restrictions on financing costs of issuance.)

The conference agreement also requires that a student borrower must be a resident of the issuing State or enrolled in an educational institution located within the State. Where two or more States each use a portion of the State's volume limitation in a single issue to finance student loans, the limitation described in the preceding sentence applies separately to each State's share of the issue.

Effective date.—These provisions apply to bonds (including refunding bonds) issued after August 15, 1986.

A transitional exception is provided permitting current refundings of qualified student loan bonds issued before August 16, 1986, including a series of refundings, which qualify for tax-exemption under present law, but do not qualify under the conference agreement, provided that the amount of the refunding bonds does not exceed the outstanding amount of the refunded bonds. The conferees intend that, as under present law, the period provided for financing student loans in the case of these current refunding bonds be determined from the date of issue of the refunded bonds (original bonds in the case of series of refundings) rather than a new period commenced on the date of the refunding. Additionally, the last maturity date of the refunding bonds may be no later than 17 years after the date of issuance of the refunded bonds (original bonds in the case of a series of refundings).

5. Mortgage Revenue Bonds

a. Qualified mortgage bonds and mortgage credit certificates

Present Law

Qualified mortgage bonds

Tax-exemption is permitted for interest on qualified mortgage bonds, defined as bonds all lendable proceeds of which are used to finance mortgages on single-family,

owner-occupied residences. The targeting requirements for these bonds include the following:

(1) At least 90 percent (0 percent in targeted areas) of lendable proceeds of each issue must be used to finance loans to first-time homebuyers (i.e., persons who have held no present ownership interest in a principal residence during the preceding three years);

(2) The purchase price of bond-financed residences may not exceed 110 percent (120 percent in targeted areas) of the average area purchase price applicable to that residence; and

(3) Issuers must publish and submit to the Treasury Department annual reports of their policies on the use of the proceeds of these bonds.

Mortgage credit certificates

Issuers of qualified mortgage bonds may elect to exchange part or all of their bond authority for authority to issue mortgage credit certificates (MCCs). The aggregate principal amount of MCCs issued pursuant to such an election may not exceed 20 percent of the exchanged bond authority. MCCs generally are subject to the same targeting requirements as qualified mortgage bonds.

Certain cooperative housing corporations

Tenant-shareholders of cooperative housing corporations are allowed a deduction for rents paid to the cooperative equal to their allocable share of interest and taxes paid by the cooperative. Housing units owned by cooperative housing corporations may be financed with qualified mortgage bonds; all targeting rules for qualified mortgage bonds apply to such financings.

Termination of programs

Authority to issue both qualified mortgage bonds and MCCs terminates after December 31, 1987.

House Bill

Qualified mortgage bonds

The House bill makes the following modifications to the present targeting rules for qualified mortgage bonds:

(1) All bond proceeds (50 percent in targeted areas) other than issuance costs and amounts invested in reasonably required reserve or replacement funds must be used to finance residences to first-time homebuyers;

(2) The purchase price of bond-financed residences may not exceed 90 percent (110 percent in targeted areas) of the average area purchase price applicable to that residence;

(3) The present requirements of annual Treasury Department reports and published policy statements by issuers of qualified mortgage bonds are repealed; and

(4) New Federal income limitations are imposed with respect to purchasers of homes financed with qualified mortgage bonds.

Mortgage credit certificates

Authority to issue MCCs is continued; the targeting requirements for MCCs are conformed to the revised targeting rules for qualified mortgage bonds.

Certain cooperative housing corporations

The House bill follows present law.

Termination of programs

The House bill retains the present-law termination date.

Senate Amendment

Qualified mortgage bonds

The Senate amendment retains the present-law targeting rules for qualified mortgage bonds.

Mortgage credit certificates

The Senate amendment increases the rate at which qualified mortgage bond authority may be exchanged to issue MCCs from 20 percent to 25 percent. No other amendments are made to the MCC rules.

Certain cooperative housing corporations

An exception is provided to the general cooperative housing corporation rules permitting limited equity cooperative housing corporations to elect to be eligible for tax-exempt financing under the rules applicable to multifamily residential rental property (as modified by the amendment). If such an election is made—

(1) the tenant-shareholders of the cooperative are not entitled to a deduction for interest and taxes paid by the cooperative (under sec. 216); and

(2) the volume of such bonds counts toward the state volume limitation applicable to qualified mortgage bonds.

Bonds for limited equity cooperative housing are subject to the December 31, 1987, termination date for qualified mortgage bonds.

Termination of programs

The Senate amendment is the same as the House bill.

Conference Agreement

Qualified mortgage bonds

The conference agreement follows the House bill, with the following modifications—

(1) At least 95 percent of the net proceeds of each qualified mortgage issue (without any reduction for issuance costs) must be used to finance mortgage loans to first-time homebuyers. *(See also,* the description of new restrictions on financing costs of issuance.)

(2) As under present law, there is no requirement that a minimum percentage of financing in targeted areas be provided to first-time homebuyers.

(3) The House bill's income limits for purchasers of residences financed with qualified mortgage bond proceeds are adopted, modified, as follows:

(a) All financing must be provided to borrowers whose family income does not exceed 115 percent of the higher of area or Statewide median income.

(b) In targeted areas, one-third of the financing may be provided to borrowers without regard to the limitation in (a); the balance of the financing must be provided to mortgagors having incomes not exceeding 140 percent of the higher of area or Statewide median income.

Mortgage credit certificates

The conference agreement follows the Senate amendment's increase in the exchange rate for MCCs and follows the House bill in conforming amendments to the targeting rules for recipients of the certificates to the new requirements (under the conference agreement) for qualified mortgage bonds.

Certain cooperative housing corporations

The conference agreement follows the Senate amendment with conforming amendments which require electing limited equity cooperative corporations to satisfy the revised targeting rules for multifamily residential rental projects contained in the agreement and extending the termination of the exception to parallel the new termination dates for qualified mortgage bonds and MCCs. The election to forego deductions for proportionate interest and taxes, in return for financing as multifamily rental housing, applies throughout the qualified project period (as defined for multifamily housing bond purposes).

Bonds for electing limited-equity cooperatives are counted toward the State volume limitation for private activity bonds.

Termination of programs

The conference agreement extends the scheduled termination dates for the qualified mortgage bond and MCC programs one year, to December 31, 1988.

Effective date

These provisions are effective with respect to bonds (including refunding bonds) issued, and bond authority exchanged for authority to issue MCCs, after August 15, 1986. The special provision on limited equity cooperative housing corporations applies to bonds issued after August 15, 1986.

A transitional exception is provided permitting current refundings of qualified mortgage bonds issued before August 16, 1986, which qualify for tax-exemption under present law, but do not qualify under the conference agreement, provided the amount of the refunding bonds does not exceed the outstanding amount of the refunded bonds. The conferees intend that, as under present law, the period allowed to provide financing for qualified mortgagors in the case of these current refunding bonds be determined from the date of issue of the refunded bonds (original bonds in the case of a series of refundings) rather than a new period commenced on the date of the refunding. Additionally, the last maturity date of such refunding bonds may be no later than 32 years from the date of issuance of the refunded bonds (original bonds in the case of a series of refundings).

b. Qualified veterans' mortgage bonds

Present Law

Qualified veterans' mortgage bonds are bonds 90 percent or more of the proceeds of which are used to finance loans to veterans for the purchase of single-family, owner-occupied residences. Tax-exempt qualified veterans' mortgage bonds may be issued only by the five States that issued such bonds before June 22, 1984. Mortgage loans financed with these bonds may be made only to veterans who served on active duty before 1977, and who apply for a loan before 30 years after leaving active service.

House Bill

The House bill follows present law, except consistent with the rules for other private activity bonds, all bond proceeds (other than issuance costs and amounts invested in a reasonably required reserve or replacement fund) are required to be used to finance mortgage loans to qualified veterans.

Senate Amendment

The Senate amendment retains present law.

Conference Agreement

The conference agreement follows the Senate amendment, with a modification providing that at least 95 percent of net proceeds (without any reduction for issuance costs) must be used to finance mortgage loans to qualified veterans.

Additionally, a clarification is provided that in order not to be counted toward the

State volume limitations, current refundings of qualified veterans' mortgage bonds may not exceed the outstanding amount of the refunded bonds. The last maturity date of such refunding bonds may be no later than 32 years from the date of issuance of the refunded bonds (original bonds in the case of a series of refundings).

Effective Date.—The new provisions apply to bonds (including refunding bonds) issued after August 15, 1986.

A transitional exception is provided permitting current refundings of bonds issued before August 16, 1986, which qualify for tax-exemption under present law, but do not qualify under the conference agreement, provided the amount of the refunding bonds does not exceed the outstanding amount of the refunded bonds and that the period during which financing is provided to qualified mortgagors is determined from the date of issuance of the refunded bonds (or original bonds in the case of a series of refundings) rather than a new period commenced on the date of the refunding. Additionally, the last maturity date of the refunding bonds must be no later than 32 years after the date of issuance of the refunded bonds (original bonds in the case of a series of refundings).

6. Qualified Redevelopment Bonds

a. Overview

Present Law

No provisions in present law relate specifically to redevelopment activities; however, bonds issued for such activities are taxable if they violate the IDB or private loan bond restrictions.

House Bill

The House bill permits bonds to finance certain land acquisition and redevelopment in blighted areas, for ultimate use by nongovernmental persons, to be issued as qualified redevelopment bonds, a type of tax-exempt private activity bond.

Qualified redevelopment bonds must be part of an issue—

(1) all proceeds (other than costs of issuance and proceeds invested in a reasonably required reserve fund) of which are used for redevelopment purposes in a locally designated blighted area, and

(2) with respect to which incremental property tax revenues (i.e., additional tax revenues attributable to increased property values by reason of bond-financed redevelopment) are reserved exclusively for debt service on the issue, to the extent necessary to cover such debt service.

Real property taxes in the designated area must be imposed at the same rate and in the same manner as for similar property located elsewhere in the jurisdiction. No additional fees or charges may be imposed in the designated area that are not imposed on other similar property elsewhere in the jurisdiction.

Senate Amendment

The Senate amendment treats qualified redevelopment bonds, defined generally as under the House bill, as tax-exempt IDBs. Ninety-five percent (rather than 100 percent) of bond proceeds are required to be used for redevelopment purposes in a locally designated blighted area.

Conference Agreement

The conference agreement treats qualified redevelopment bonds as tax-exempt private activity bonds.

Qualified redevelopment bonds must be part of an issue—

(1) 95 percent or more of the net proceeds (without reduction for issuance costs) of which are to be used for redevelopment purposes in a locally designated blighted area; and

(2) the payment of principal and interest on which is secured (a) primarily by taxes of general applicability imposed by a general purpose governmental unit or (b) by a pledge of incremental property tax revenues reserved, to the extent necessary, for debt service on the issue.

Thus, under the conference agreement, qualified redevelopment bonds may be repaid, or their repayment secured, either (a) by incremental tax revenues (as under the House bill and Senate amendment), (b) by general tax revenues of the governmental unit (e.g., a pledge of the full faith and credit of the issuing jurisdiction), or (c) by a combination of (a) and (b) above. Repayment of qualified redevelopment bonds may *not* be secured by payments from any person other than such security that would render the bonds IDBs under present law (using a 10-percent use and security interest test). Additionally, the pledged tax revenues must be the primary security for repayment of the bonds. Whether such revenues are the primary security is a factual determination. This requirement is intended to be satisfied, however, only when the pledge of taxes represents a direct and substantial financial commitment by the issuer of the bonds.

As under the House bill and Senate amendment, taxes in the designated blighted area must be imposed at the same rates and using the same assessment methods as apply with respect to comparable property located elsewhere in the jurisdiction. Additionally, no fees or other charges may be imposed on owners or users of property in the designated area to which owners or users of other comparable property are not subject. (Insubstantial fees for amenities such as parking are not treated as assessments for this purpose.) Where financing is provided with respect to only a portion of a blighted area, these rules apply only with respect to the area being financed.

b. Permitted uses of bond proceeds

Present Law

No provision.

House Bill

The proceeds of qualified redevelopment bonds must be used for one or more of the following purposes:

(1) To acquire by eminent domain (or the threat thereof), clear, and prepare land in a designated blighted area for redevelopment, and to transfer real property interests to nongovernmental persons for fair market value;

(2) To rehabilitate the real property (acquired as above); and

(3) To relocate occupants of structures on the acquired real property.

Qualified redevelopment bond proceeds may not be used to construct buildings or other new structures for use by nongovernmental persons.

Senate Amendment

The Senate amendment is the same as the House bill, except that, for purposes of (1) above the Senate amendment clarifies that—

(1) the requirement that property be sold for its fair market value is determined by taking into account covenants and restrictions relating to the use of real property that are imposed by the issuer of the bonds; and

(2) the actual threat of eminent domain is not required, if the acquiring agency has the power of eminent domain and the power could be exercised with respect to the property concerned.

Conference Agreement

The conference agreement generally follows the Senate amendment. Thus, under the conference agreement, qualified redevelopment bond proceeds may be used for the following purposes:

(1) To acquire real property located in a designated blighted area, provided that the acquiring governmental unit has the power to exercise eminent domain with respect to the real property in the area.

(2) To clear and prepare land in the designated blighted area for redevelopment.

(3) To rehabilitate the real property acquired as above or otherwise owned by a governmental unit (e.g., property acquired by tax lien foreclosure).

(4) To relocate occupants of structures on the acquired real property.

Under the conference agreement, real property acquired by a governmental unit (under (1) above) need not be transferred to a nongovernmental person; however, if it is so transferred, the transfer must be for fair market value. The determination of fair market value for this purpose is made taking into account covenants and restrictions imposed on the use of the relevant real property by the issuer of the bonds.

As under the House bill and Senate amendment, qualified redevelopment bond proceeds may not be used to construct new buildings or other property, including the enlargement of any existing building.[31]

c. Designation of blighted areas

Present Law

No provision.

House Bill

Criteria for designation

Qualified redevelopment bonds may be issued only pursuant to (1) a State law that authorizes the issuance of such bonds for permitted purposes in blighted areas, and (2) a redevelopment plan adopted (before issuance of the bonds) by the governing body of the general purpose local governmental unit having jurisdiction over the blighted areas.

Designation of blighted areas also must be made by the general purpose local governmental unit having jurisdiction over the area, and must be based on prescribed State statutory criteria which take into account specified indicators of blight.

Size limitations

The following size limitations are imposed on designated blighted areas:

[31] Bonds, the proceeds of which are used to finance such governmental facilities as street paving, sidewalks, street-lighting, and similar facilities are treated as governmental bonds under the conference agreement. These bonds are, therefore, not subject to the new requirements for qualified redevelopment bonds, provided that they do not violate the restrictions pertaining to trade or business use, unrelated use, or private loans, described in A., above (i.e., provided that they are not private activity bonds). The conferees understand that both governmental activities and private redevelopment activities may be financed with a single issue of redevelopment bonds. The conferees intend that the Treasury Department will develop rules allowing such composite financing to continue by treating the governmental component and the qualified redevelopment bond component of such issues as separate issues in appropriate circumstances.

(1) The aggregate blighted areas designated by a general purpose local governmental unit may not contain real property, the assessed value of which is more than 10 percent of the assessed value of all real property within its jurisdiction.

(2) A designated blighted area may not be smaller than a contiguous ¼-square mile (160 acres).

Senate Amendment

Criteria for designation

The Senate amendment follows the House bill.

Size limitations

The Senate amendment imposes the following size limitations on designated blighted areas (in lieu of those contained in the House bill):

(1) Blighted areas designated by a local governmental unit may not exceed 25 percent of the assessed value of all real property within the jurisdiction.

(2) A designated blighted area may not be smaller than 10 contiguous acres.

Conference Agreement

Criteria for designation

The conference agreement follows the House bill and the Senate amendment with respect to designation of blighted areas. Thus, under the conference agreement, qualified redevelopment bonds may be issued only pursuant to (1) a State law which authorizes the issuance of such bonds to redevelop blighted areas, and (2) a redevelopment plan adopted by the governing body of the general purpose local governmental unit having jurisdiction over the area, before the issuance of the bonds.

The designation of blighted areas is to be based on State statutory criteria which take into account all relevant factors, including the excessive presence in the area of vacant land on which structures were previously located, abandoned or vacant buildings, substandard structures, vacancies, and delinquencies in payment of real property taxes. Designations are to be based on an affirmative finding of a substantial presence of these factors.

The conferees are aware that certain redevelopment agencies have previously adopted redevelopment plans that are consistent with the general goals of the conference agreement but that may not meet the specific criteria established by the agreement. The conferees do not intend to require existing redevelopment agencies, which had adopted redevelopment plans as of August 15, 1986, pursuant to a State law, to resubmit a new plan to the general purpose governmental unit having jurisdiction over the designated blighted area. The conferees further do not intend to require such agencies to reexamine the original criteria used to designate blighted areas. However, no new bonds may be issued for activities in such grandfathered districts which may not otherwise be financed with qualified redevelopment bonds under the conference agreement. (*See also*, the rules below on application of the 20-percent limit to these areas.)

For purposes of designating blighted areas, general purpose local governmental units are the smallest governmental units having general purpose sovereign powers over a given area.[32] Thus, in most cases, designations will be made by cities or (for areas outside any city) by county governments. The State itself and special purpose governmental units (e.g., a redevelopment agency itself) are not treated as governmental units entitled to designate blighted areas.[33]

Size limitations

Maximum area size

Under the conference agreement, the aggregate blighted areas designated by a general purpose local governmental unit may not contain real property, the assessed value of which exceeds 20 percent of the assessed value of all real property located within the jurisdiction of the governmental unit. The percentage with respect to any area is to be determined at the time the area is designated, with these percentages being aggregated for purposes of the 20 percent test. For example, assume that a city designates a redevelopment area in 1987 that contains 10 percent of the assessed value of real property located in the city (determined as of 1987). Assume further that the city designates a second area in 1992 containing 5 percent of the assessed value of all real property in the city (determined as of 1992). If the city wishes to designate a third area in 1997, that area may not contain more than 5 percent of the assessed value of real property in the city, determined as of 1997.[34] Previously designated areas cease to be taken into account, for purposes of the 20 percent test, if no qualified redevelopment bonds (or similar bonds issued under prior law) remain outstanding with respect to the area. Once an area ceases to be counted, the area must be redesignated under the rules of the conference agreement before further bonds may be issued for redevelopment therein.

Districts designated before January 1, 1986, and with respect to which qualifying activities were in progress on that date, are not subject to the 20 percent rule. However, no new districts may be designated, or existing districts expanded, until the jurisdiction is in compliance with the 20 percent limit (determined inclusive of those existing districts).

Minimum area size

A designated blighted area must satisfy one of the two following requirements:

(1) The area is comprised of at least 100 compact and contiguous acres; or

(2) The area is comprised of between 10 and 100 compact and contiguous acres, and no more than 25 percent of the bond-financed land in the area is to be provided to any one person or related persons. The 25 percent rule is not considered to be violated if more than 25 percent of financing is to be made available to one person (or related persons) on an interim basis for use in redevelopment activities and the redevelopment property is to be transferred with reasonable speed to persons satisfying the 25-percent limitation as part of a unified development plan. This latter determination is to be based on the financing provided pursuant to the overall redevelopment plan for the area, rather than on an issue-by-issue basis. For purposes of this rule, the fact that more than 25 percent may be used by a developer on a temporary, interim basis while redevelopment activities are conducted may be disregarded.

The conferees intend that the designation of blighted areas will be made in contemplation of the redevelopment of the entire designated area and that areas will not be artificially designated in order to allow bond financing for one or a few specific facilities which happen to be located in the area.

d. Application of IDB limitations

Present Law

Special targeting requirements apply to rental and owner-occupied housing constructed with tax-exempt bond proceeds. (*See*, the descriptions above on the rules for exempt-facility bonds for residential rental projects and the rules for qualified mortgage bonds.)

The financing of certain facilities (including airplanes, skyboxes, health clubs, gambling facilities, and liquor stores) with IDB proceeds is prohibited (sec. 103(b)(18) of present law). The financing of certain other facilities (including retail food and beverage establishments, automobile sales and service, recreation and entertainment facilities, and various specified types of facilities) is either restricted or prohibited with respect to small issue IDBs (sec. 103(b)(6)(O)).

House Bill

General rules

Qualified redevelopment bonds are subject to the volume and other limitations applicable to private activity bonds, except the limitation on use of bond proceeds to finance nonagricultural land.

Rental and owner-occupied housing

Owner-occupied housing rehabilitated with qualified redevelopment bond proceeds, or constructed on land financed with qualified redevelopment bonds, is permitted only if (a) the first purchaser of each residence reasonably expects it to be his or her principal residence, and (b) the residence satisfies the purchase price limitation which would apply for qualified mortgage bonds in the same location.

Residential rental housing rehabilitated with qualified redevelopment bond proceeds, or constructed on bond-financed land, must satisfy all Code targeting requirements applicable to bond-financed multifamily residential rental property throughout the qualified project period (as defined for these exempt-facility bonds).

Prohibited facilities

Facilities, the financing of which is restricted or prohibited with respect to exempt-facility or small-issue bonds, may not be located on land financed with qualified redevelopment bonds.

Senate Amendment

General rules

Qualified redevelopment bonds are treated as IDBs, and hence generally are subject to all IDB restrictions, including the volume limitation for IDBs and student loan bonds. An exception is provided from the limitation on the use of bond proceeds to finance nonagricultural land.

Rental and owner-occupied housing

The Senate amendment does not apply qualified mortgage bond or rental housing IDB targeting rules to housing rehabilitated with qualified redevelopment bonds, or constructed on land financed with these bonds.

Prohibited facilities

Except as provided in the following paragraph, no more than 25 percent of bond pro-

[32] This is similar to the test applied for purposes of allocating bond authority among overlapping units for purposes of the private activity bond volume limitation.

[33] The State is, however, required to establish the criteria for designating these areas, as described above.

[34] For purposes of determining these percentages, the total assessed value of real property in the jurisdiction includes real property located in previously designated blighted areas.

ceeds may be used for facilities with respect to which IDB financing is restricted or for land on which such facilities are to be located.

The following facilities may not be financed with redevelopment bonds or located on land financed with such bonds:

(1) Private or commercial golf courses;

(2) Country clubs;

(3) Massage parlors, hot tub facilities, or suntan facilities; and

(4) Racetracks and other facilities primarily used for gambling.

Conference Agreement

General rules

Qualified redevelopment bonds are treated as tax-exempt private activity bonds and generally are subject to the rules applicable to such bonds. An exception is provided from the limitation on use of bond proceeds to acquire nonagricultural land.[35]

Rental and owner-occupied housing

The conference agreement follows the Senate amendment. Thus, the targeting rules for qualified mortgage bonds or multifamily residential rental housing bonds are not applied to housing constructed or rehabilitated on land financed with these bonds. (No new housing (or other structures) may be constructed, or existing structures expanded, with the bond proceeds themselves; however, this housing may be financed with (1) private, taxable financing, or (2) mortgage revenue bonds or exempt-facility bonds for residential rental housing with or without conjunctive use of the new low income housing tax credit (subject to the targeting and other restrictions applicable to those bonds.)

Prohibited facilities

The conference agreement generally follows the Senate amendment. Thus, under the conference agreement, no more than 25 percent of qualified redevelopment bond proceeds may be used to finance facilities the financing of which is restricted or prohibited with respect to qualified small-issue bonds (new sec. 144(a)(8)) or for private activity bonds generally (new sec. 147(e)),[36] or the land on which such facilities are or are to be located. Additionally, no proceeds of qualified redevelopment bonds may be used to finance the following facilities (or land for such facilities):

(1) Private or commercial golf courses;

(2) Country clubs;

(3) Massage parlors, hot tub facilities, or suntan facilities;

(4) Racetracks or other facilities used primarily for gambling; and

(5) Any store the principal business of which is the sale of alcoholic beverages for off-premises consumption.

Effective date

The new rules for qualified redevelopment bonds apply to bonds issued after August 15, 1986.

[35] The limitation on use of bond proceeds to acquire existing facilities, unless rehabilitation expenditures equal or exceed 15 percent of bond-financed acquisition costs does apply to qualified redevelopment bonds. However, the conferees intend that if land and existing structures located thereon are acquired with an intent to demolish the structures, that all costs of acquiring the property are to be treated as land acquisition costs. (*See also*, sec 280B.)

[36] These parallel the present law facilities which are restricted or prohibited with respect to small issue IDBs or IDBs in general.

7. Qualified 501(c)(3) Bonds

Present Law

Interest on bonds used to finance exempt activities of nonprofit organizations described in Code section 501(c)(3) generally is tax-exempt. Bonds the proceeds of which are to be used by these organizations generally are subject to similar requirements as those for bonds for general governmental operations. Interest on these bonds is not tax-exempt if more than 25 percent of the proceeds are used in trades or businesses of the organizations unrelated to their exempt purpose and the present-law security interest is satisfied.

House Bill

The House bill permits tax-exemption for interest on qualified 501(c)(3) bonds, defined generally as bonds all proceeds (other than amounts used to pay issuance costs or invested in a reasonably required reserve or replacement fund) of which are used to finance activities directly related to the exempt purpose of the organization. Additionally, all property financed with such bonds must be owned either by a section 501(c)(3) organization or by a governmental unit. For this purpose, ownership is determined using general income tax rules.

The House bill further restricts the outstanding amount of bonds that any section 501(c)(3) organization (or group of related organizations) may have outstanding at any time to $150 million. This $150 million restriction does not apply to hospital bonds. Under the House bill, the term hospital is defined as a facility that—

(1) is accredited by the Joint Commission on Accreditation of Hospitals (JCAH), or is accredited or approved by a program of the qualified governmental unit in which such institution is located if the Secretary of Health and Human Services has found that the accreditation or comparable approval standards of such qualified governmental unit are essentially equivalent to those of the JCAH;

(2) is primarily used to provide diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons as hospital in-patients, under the supervision of physicians;

(3) has a requirement that every patient be under the care and supervision of a physician; and

(4) provides 24-hour nursing services rendered or supervised by a registered professional nurse and has a licensed practical nurse or registered nurse on duty at all times.

The term hospital does not include rest or nursing homes, day care centers, medical school facilities, research laboratories, or ambulatory care facilities (e.g., surgicenters).

Senate Amendment

The Senate amendment is the same as the House bill except only 95 percent (rather than all) bond proceeds (other than amounts used to pay issuance costs or invested in reasonably required reserve or replacement funds) must be used for the exempt activities of the section 501(c)(3) organization. The Senate amendment also does not contain the $150 million limitation on outstanding nonhospital bonds for these organizations.

Conference Agreement

The conference agreement permits tax-exemption for interest on qualified 501(c)(3) bonds, defined generally as bonds at least 95 percent of the net proceeds of which are to be used by no person other than a section 501(c)(3) organization or a governmental unit. A bond is not a qualified 501(c)(3) bond if the bond would be a private activity bond if section 501(c)(3) organizations were treated as governmental units with respect to their exempt activities and 5 percent were substituted for 10 percent in the private business use and security interest tests. Under the conference agreement as under present law, the use of bond proceeds by a section 501(c)(3) organization in an unrelated trade or business (as determined by applying sec. 513(a)) is a private use. Further, under the conference agreement, as is true of other private activity bonds, costs of issuance are not treated as spent for the exempt purpose of the borrowing. (*See also*, the description below of the new limitations on financing costs of issuance.)

The conferees understand that some governmental units issue composite issues, a part of the proceeds of which is to be used for governmental activities and a part of which is to be used for financing for section 501(c)(3) organizations operating within the jurisdiction of the issuer. The conferees do not intend to preclude continuation of such composite issues provided all applicable requirements for tax-exemption for each type of use concerned are satisfied. Thus, the conferees intend that, where an issue consists of two components—governmental financing and qualified 501(c)(3) financing—and the two components, viewed as separate issues, satisfy all requirements for tax-exemption as (a) governmental bonds and (b) qualified 501(c)(3) bonds, respectively, a composite tax-exempt issue be permitted.[37]

The conferees further are aware that certain State or local governmental universities and hospitals (including certain public benefit corporations) also have received determination letters regarding their tax-exempt status under Code section 501(c)(3). The committee intends that, to the extent that such an entity is a governmental unit or an agency or instrumentality of a governmental unit (determined as under present law), bonds for the entity will be treated as governmental bonds rather than as qualified 501(c)(3) bonds.

The conference agreement follows the House bill and the Senate amendment on the ownership requirement for property financed with qualified 501(c)(3) bonds, and follows the House bill on the $150 million per organization limitation on outstanding non-hospital bonds, with a modification providing that the limitation takes into account only qualified 501(c)(3) bonds.[38] The conferees intend that the definition of hospital include persons who are mentally ill in the term "sick persons." The conference agreement further clarifies that bonds issued before August 16, 1986, for section 501(c)(3) organizations count toward the $150 million limitation only if more than 25 percent of the proceeds were to be used directly or indirectly by a such an organization or organizations (and other nongovernmental persons) and the present-law security interest test was satisfied.[39]

[37] The portion of the composite issue that is a qualified 501(c)(3) bond is to be treated as such for all purposes, e.g., the $150 million limitation on nonhospital bonds and the change in use penalties.

[38] As under the House bill, refundings, other than advance refundings, do not count toward the $150 million limit if the amount of the refunding bonds does not exceed the outstanding amount of the refunded bonds.

[39] A special transitional exception, similar to that provided under the $40 million limit for small-issue

The conferees intend that as under the House bill, if an issue is to be used only in part for hospitals, the portion actually used for hospitals is to be exempt from the $150 million limit as a hospital bond. The conferees further are aware that some bond-financed facilities may be used partially as part of a hospital and partially as a part of a nonhospital, related facility. For example, a laboratory may serve both a hospital and private physicians' offices. Bonds used for such mixed-use facilities may be treated as hospital bonds to the extent of the proportionate share of the use of the facilities for in-patient hospital services or to the extent provided pursuant to other allocation formulae prescribed by the Treasury Department.

Additionally, the conference agreement permits section 501(c)(3) organizations to elect not to treat such bonds as qualified 501(c)(3) bonds, and to benefit thereby from exempt-facility bond and qualified redevelopment bond financing, provided that financing is subject to the new State private activity bond volume limitations. For example, a section 501(c)(3) organization may participate in a multifamily residential rental project financed with bonds subject to the State volume limitations by making such an election.

Effective date.—These provisions apply to bonds (including refunding bonds) issued after August 15, 1986, subject to the following transitional exceptions:

(1) Bonds for section 501(c)(3) organizations (other than refunding bonds) are not subject to the new ownership requirements provided the commencement of construction (including construction or rehabilitation) or binding contract rules described in the discussion of effective dates for the new rules on governmental bonds are satisfied; and

(2) Current refundings of bonds for these organizations originally issued before August 16, 1986, which refunded bonds qualify for tax-exemption under present law, but do not qualify under the agreement, are not subject to the new rules provided the amount of the refunding bonds does not exceed the outstanding amount of the refunded bonds and the maturity limitations applicable to qualified 501(c)(3) bonds under the conference agreement are satisfied.

(3) Advance refundings of bonds issued for section 501(c)(3) organizations before August 16, 1986, are permitted under a transitional exception (without regard to whether the bonds satisfy all requirements under the agreement to be qualified 501(c)(3) bonds). These advance refundings must comply with the new advance refunding restrictions applicable to qualified 501(c)(3) bonds.

8. Miscellaneous Restrictions on Private Activity Bonds

a. Use of bond proceeds for activity qualifying for tax-exempt financing and limitation on bond-financing of costs of issuance

Present Law

Under present law, at least 90 percent of the proceeds of IDBs and qualified veterans' mortgage bonds must be used for the exempt purpose of the borrowing; the remaining 10 percent may be used for any purpose. At least 85 percent of the proceeds of qualified student loan bonds must be used to make or finance student loans; the remaining 15 percent may be used for any purpose. In determining whether the 90 or 85 percent requirements are satisfied, amounts invested in a reasonably required reserve or replacement fund and amounts used to pay costs of issuance are disregarded (i.e., the 90- or 85-percent requirement is determined by reference to the bond proceeds, without regard to these amounts).

All lendable proceeds of qualified mortgage bonds must be used to finance mortgage loans; at least 90 percent of the lendable proceeds must be used to finance loans to first-time homebuyers. Lendable proceeds are defined as gross proceeds minus amounts invested in a reasonably required reserve or replacement fund and amounts used to pay costs of issuance.

At least 75 percent of the proceeds of bonds issued for section 501(c)(3) organizations must be used to finance exempt activities of the organization for which the bonds are issued. Bond-financing for activities constituting an unrelated trade or business or for other private purposes in excess of 25 percent of the issue (5 percent if used for loans) results in the bonds being taxable IDBs or private loan bonds.

No overall limitation is imposed on the amount of costs of issuance that may be financed with bond proceeds.

House Bill

The House bill requires that all net proceeds of each issue of private activity bonds be used for the exempt purpose of the borrowing. Net proceeds are defined as the proceeds of the issue minus amounts invested in a reasonably required reserve or replacement fund and amounts paid for costs of issuance.

Senate Amendment

The Senate amendment generally requires that at least 95 percent of net proceeds (defined as under the House bill) be used for the exempt purpose of the borrowing. In the case of qualified student loan bonds, the required percentage is 85, and in the case of qualified veterans' mortgage bonds, the required percentage is 90.

Conference Agreement

The conference agreement requires that at least 95 percent of the net proceeds of all issues of private activity bonds be used for the exempt purpose of the borrowing. This percentage is reduced to 90 percent in the case of qualified student loan bonds issued in connection with the Federal GSL and PLUS programs. Net proceeds is defined as the proceeds of the issue minus amounts invested in a reasonably required reserve or replacement fund.[40] Thus, amounts used to pay any costs of issuance must be paid from the so-called 5 percent "bad money" portion of an issue.

The conference agreement further restricts the amount of private activity bond proceeds that may be used to finance costs of issuance to 2 percent of the face amount of the issue. This amount is increased to 3.5 percent in the case of issues of mortgage revenue bonds the face amount of which does not exceed $20 million.

Costs of issuance subject to the two-percent limitation include all costs incurred in connection with the borrowing—in general, all costs that are treated as costs of issuance under the present Treasury Department regulations and rulings. Examples of costs of issuance that are subject to the two-percent limitation include (but are not limited to)—

(1) underwriters' spread (whether realized directly or derived through purchase of the bonds at a discount below the price at which they are expected to be sold to the public);

(2) counsel fees (including bond counsel, underwriter's counsel, issuer's counsel, company counsel in the case of borrowings such as those for exempt facilities, as well as any other specialized counsel fees incurred in connection with the borrowing);

(3) financial advisor fees incurred in connection with the borrowing;

(4) rating agency fees;

(5) trustee fees incurred in connection with the borrowing;

(6) paying agent and certifying and authenticating agent fees related to issuance of the bonds;

(7) accountant fees (e.g., accountant verifications in the case of advance refundings) related to issuance of the bonds;

(8) printing costs (for the bonds and of preliminary and final offering materials);

(9) costs incurred in connection with the required public approval process (e.g., publication costs for public notices generally and costs of the public hearing or voter referendum); and

(10) costs of engineering and feasibility studies necessary to the issuance of the bonds (as opposed to such studies related to completion of the project, but not to the financing).

As described in E., below, bond insurance premiums and certain letter of credit fees may be treated as interest expense under the arbitrage restrictions. To the extent of their treatment as interest, the initial cost of these types of costs of issuance may be financed in addition to the two-percent limit on financing other costs of issuance.

Effective date.—These provisions apply to all private activity bonds (including refunding bonds) issued after August 15, 1986.

b. Relationship of bond maturity to life of assets

Present Law

The weighted average maturity of IDBs may not exceed 120 percent of the reasonably expected economic life of the bond-financed property. The economic life of property is a factual determination; however, the ADR midpoint lives may be used as a safe-harbor. For real property, the safe-harbor is 50 years.

No special maturity restrictions apply to bonds other than IDBs.

House Bill

The House bill extends to all private activity bonds (other than mortgage revenue bonds and student loan bonds) the present-law rule that the weighted average maturity of bond-financed property may not exceed 120 percent of its reasonably expected economic life.

Senate Amendment

The Senate amendment extends the present-law restriction only to qualified 501(c)(3) bonds, with an exception for bonds issued to finance mortgage loans insured under certain FHA programs. Additionally, the Senate amendment provides that for certain pooled issues for multiple section 501(c)(3) organizations, compliance with the requirement is to be determined treating each loan as a separate issue.

---

bonds applies to current refundings of 501(c)(3) bonds. This exception applies to current refunding bonds that—

(1) have a lower interest rate than the rate on the refunded issue; and

(2) the amount of which does not exceed the outstanding amount of the refunded bonds.

[40] *See also*, the description of the rules on required use of bond proceeds in the discussion of each type of private activity bond.

Conference Agreement

The conference agreement follows the Senate amendment, with a modification providing that the safe-harbor maturity to be used for bond-financed land is 30 years.

Effective date.—This provision applies to bonds (including refunding bonds) issued after August 15, 1986.

c. Restriction on bond-financing for land and existing property

Present Law

Interest on IDBs is generally is taxable if more than 25 percent of the proceeds of an issue is used to finance land. Acquisition of existing property may not be financed with tax-exempt IDBs unless a statutory rehabilitation requirement is satisfied.

House Bill

The House bill extends the present IDB restrictions on financing land and existing property to all private activity bonds (other than mortgage revenue bonds and student loan bonds).

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the Senate amendment.

d. Restriction on bond-financing for certain specified facilities

Present Law

Interest on IDBs is not tax-exempt if any portion of the proceeds are used to provide airplanes, skyboxes or any other private luxury boxes, any health club facility, any facility primarily used for gambling, or any store the principal business of which is the sale of alcoholic beverages for consumption off premises. Small-issue bonds are subject to additional restrictions on financing of certain specified facilities.

House Bill

The House bill extends the present IDB requirements to all private activity bonds.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill, with a modification providing that the restriction on health club facilities does not apply to qualified 501(c)(3) bonds if the health club facility is directly used for the purpose qualifying the section 501(c)(3) organization for tax exemption. Additionally, the conference agreement provides that qualified redevelopment bonds are subject to a specific separate list of facilities for which financing is restricted or may not be provided in lieu of this general restriction.

Effective date.—This provision is effective for bonds (including refunding bonds) issued after August 15, 1986.

Transitional exceptions are provided for bonds (other than refunding bonds) which may be issued under present law, but not under the conference agreement, if (1) the property to be financed is acquired after September 25, 1985, pursuant to a contract entered into on or before that date, and that was binding at all times thereafter, or (2) the original use of the bond-financed property begins with the taxpayer and either (a) a binding construction contract for significant expenditures was entered into before September 26, 1986, with respect to the property or (b) construction of the property commenced before that date and was completed after September 25, 1985. For purposes of this rule, the term significant expenditures has the same meaning as under the transitional exceptions for the new definition of essential function bond. *(See,* A., above.)

A further transitional exception is provided for current refundings of bonds that qualify for tax-exemption under present law, but do not qualify under the conference agreement, provided the amount of the refunding bonds does not exceed the outstanding amount of the refunded bonds and that the refunding bonds comply with the restriction, described above, on the relationship of bond maturity to economic life of bond-financed property. *(See,* A., above.)

e. Public hearing and approval or voter referendum requirement

Present Law

IDBs may be issued only after the issuer holds a public hearing and the issuance of the bonds is approved by a designated elected official. Alternatively, issuance of the IDBs may be approved by a voter referendum.

House Bill

The House bill extends this present IDB requirement to all private activity bonds.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill.

Effective date.—This provision applies to bonds (including refunding bonds) issued after December 31, 1986. (IDBs presently subject to the requirement are not affected by this prospective effective date.)

f. Substantial user restriction

Present Law

Interest on IDBs is taxable during any period when the bonds are held by a substantial user (or any related person) of the bond-financed facilities.

House Bill

The House bill extends the substantial user restriction to all private activity bonds, other than mortgage revenue bonds and qualified student loan bonds.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the Senate amendment.

g. Change in use of private-activity bond-financed property

Present Law

Tax-exempt bonds generally are not required to be redeemed if the use of bond-financed property changes from a use qualifying interest on the bonds for tax-exemption to a nonqualified use. In certain cases, however, interest on the bonds becomes taxable.

House Bill

The House bill provides that a change in use of property financed with private activity bonds to a use not qualifying for tax-exempt financing generally results in loss of income tax deductions for rent, interest, or equivalent amounts paid by the person using the property in the nonqualified use. Section 501(c)(3) organizations realize unrelated business income with respect to any such use.

These consequences apply in addition to any loss of tax exemption on bond interest provided under present law.

Senate Amendment

The Senate amendment follows the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

Effective date.—This provision applies to changes in use of bond-financed property occurring after August 15, 1986, with respect to financing provided after that date.

C. Volume Limitations on Private Activity Bonds

Present Law

Three separate sets of volume limitations are imposed under present law with respect to certain types of private activity bonds.

Limitation on student loan bonds and most IDBs

Aggregate volume.—The amount of student loan bonds and most IDBs that may be issued within a State during any calendar year is limited to the greater of $150 for each resident of the State or $200 million. The $150 per capita limitation is scheduled to be reduced to $100 after 1986.

Allocation of bond authority.—Each State's volume limitation is allocated one-half to State issuers and one-half to localities within the State on the basis of relative populations, unless the State adopts a statute providing a different allocation. Governors of each State are permitted to issue proclamations overriding the Federal rules during an interim period before State legislatures meet. Each person allocating bond authority must certify that the allocation is not made in consideration of any bribe, gift or campaign contribution. (A special allocation rule applies for States having constitutional home rule cities.)

Carryforward of bond authority.—Bond issuers may elect to carry forward unused bond authority (for up to three years generally) for specific, identified exempt-activity IDB projects, or for the general purpose of issuing student loan bonds. Carryforward elections are not permitted for small-issue IDBs.

Qualified mortgage bonds

Aggregate volume.—The annual volume of qualified veterans' bonds that may be issued within a State is limited to the greater of (1) 9 percent of the average annual aggregate principal amount of mortgages executed during the three preceding years for single-family owner-occupied residences located in the State, or (2) $200 million.

Allocation of bond authority.—Qualified mortgage bond authority is allocated among issuers in each State pursuant to rules like those applicable to student loan bonds and most IDBs.

Carryforward of bond authority.—States may not carryforward unused qualified mortgage bond authority.

Qualified veterans' mortgage bonds

Aggregate volume.—The five States permitted to issue qualified veterans' mortgage bonds are subject to volume limitations based on the volume in which they issued bonds during the period beginning on January 1, 1979, and ending on June 22, 1984.

Allocation of bond authority.—Qualified veterans' mortgage bonds are general obligation bonds of the issuing State. This bond authority is not allocated to any local governmental issuers.

Carryforward of bond authority.—States may not carry forward unused qualified veterans' mortgage bond authority.

Private activity bonds not subject to volume limitations

No volume limitations are imposed with respect to private activity bonds the proceeds of which are to be used—

(1) by section 501(c)(3) organizations;
(2) for multifamily rental housing; or
(3) for governmentally owned airports, docks and wharves, mass commuting facilities, convention centers, and trade show facilities.

For purposes of item (3), above, facilities are not treated as privately owned solely by reason of the lease term if the lessee makes an irrevocable election not to claim depreciation on or the investment tax credit with respect to the facility.

House Bill

Unified volume limitation

A single volume limitation is imposed with respect to the following bonds issued by States and local government issuers within the State:

(1) All private activity (i.e., nonessential function) bonds with respect to which tax exemption is permitted (except certain airport and dock and wharf bonds, discussed below); and

(2) The portion of an essential function (i.e., governmental) bond issue in excess of $1 million that is used by persons other than a State or local government (i.e., the "private use" portion).

Aggregate volume.—The annual volume of tax-exempt private activity bonds (including the private use portion of essential function bonds, discussed above) issued by each State and local government issuer within the State may not exceed the greater of $175 per resident of the State or $200 million.

This per capita limitation is reduced to $125 per resident after 1987 to reflect the present-law scheduled sunset of tax exemption for qualified mortgage bonds.

Current refunding bonds are not subject to the volume limitation if the amount of the refunding bonds does not exceed the amount of outstanding refunded bonds and the bonds do not have a maturity date after expiration of 120 percent of the reasonably expected economic life of the bond-financed property (17 years for nonfacility bonds and 32 years for tax-exempt mortgage revenue bonds).

Allocation of bond authority.—Each State's volume limitation is allocated one-half to State issuers and one-half to local issuers within the State on the basis of relative populations unless the State adopts a statute providing a different allocation. Governors of each State are permitted to issue proclamations overriding the Federal allocation rules, effective during an interim period until the end of the year in which the State legislature next meets in regular session.

The present-law required certification by persons allocating bond authority is repealed.

Other administrative provisions of the present IDB volume limitation (including the rules for determining the location of property receiving volume allocations, and the special rule for States having constitutional home rule cities) apply under the new unified volume limitation.

Carryforward of bond authority.—Bond issuers may elect to carry forward unused bond authority for up to three years for specific, identified projects and for the general purpose of issuing either (a) qualified mortgage bonds, (b) qualified veterans' mortgage bonds, or (c) student loan bonds. Carryforward elections are not permitted for small-issue bonds or for the private use portion of essential function bonds.

Permanent set-aside for qualified 501(c)(3) bonds.—An annual amount equal to $25 per capita ($30 million for States having a $200 million limit) is set-aside permanently for qualified 501(c)(3) bonds.

Protection of qualified redevelopment bonds.—Unless overridden by a State statute, at least $6 per capita ($8 million for States using the $200 million limit) must be set-aside for qualified redevelopment bonds in States that issued more than $25 million in tax-increment financing bonds between July 18, 1984, and January 1, 1986.

Protection of housing bonds.—Unless overridden by a State statute, at least 50 percent (reduced to 25% after 1987 to reflect the sunset of authority to issue qualified mortgage bonds) of each State's annual unified volume limitation is required to be used for—

(1) Multifamily rental housing bonds;
(2) Qualified mortgage bonds; or
(3) Qualified veterans' mortgage bonds.

At least one-third of the housing portion must be used for multifamily housing and one-third for single-family housing, unless otherwise provided by the governor or a State statute.

Private activity bonds not subject to volume limitations

No State volume limitations are imposed with respect to:

(1) Bonds to finance airports (other than cargo handling facilities), and

(2) Bonds to finance docks and wharves (other than storage facilities).

(Tax-exempt financing for these facilities is not permitted unless the facilities are governmentally owned, which is determined by reference to general income tax concepts of ownership.)

Senate Amendment

Volume limitations

Three separate sets of volume limitations are imposed in a manner similar to present law.

Limitation on student loan bonds and most IDBs

The Senate amendment follows present law, including the reduction in the State volume limitations to $100 per capita after 1986. (Hazardous waste disposal facility bonds and qualified redevelopment bonds are subject to this volume limitation, together with student loan bonds and other IDBs (subject to the exceptions below).)

Qualified mortgage bonds

The Senate amendment retains the present-law State qualified mortgage bond volume limitations.

Qualified veterans' mortgage bonds

The Senate amendment retains the present-law qualified veterans' mortgage bond volume limitations.

Bonds not subject to volume limitations

No State volume limitations are imposed with respect to—

(1) Qualified 501(c)(3) bonds;

(2) Bonds for multifamily rental housing; or

(3) Bonds for airports, docks and wharves, sewage, solid waste disposal, and water-furnishing facilities, if the bond-financed property is governmentally owned.

Under a safe harbor rule, facilities described in (3) above, are treated as governmentally owned for purposes of this provision if (a) the lessee (including a user pursuant to a management contract or similar agreement) makes an irrevocable election not to claim depreciation or an investment tax credit with respect to the facility; (b) the term of any lease, management contract, or similar arrangement does not exceed 80 percent of the reasonably expected economic life of the property; and (c) the lessee, etc., does not have an option to purchase the facility other than at fair market value. The requirements of (b) and (c) above do not apply to bonds for solid waste disposal facilities.

Conference Agreement

Private activity bond volume limitations

The conference agreement follows the House bill, with numerous modifications. Under the agreement, the two separate sets of volume limitations that apply under present law to IDBs and student loan bonds and qualified mortgage bonds are replaced with a single private activity bond volume limitation. Qualified veterans' mortgage bonds remain subject to their present-law State volume limitations.

Allowable bond volume

The annual volume limitation for each State is equal to the greater of (1) $75 for every individual who is a resident of the State (as determined by the most recent estimate of the State's population released by the Bureau of Census before the beginning of the calendar year to which the limitation applies) or (2) $250 million. These annual State volume limitations continue through December 31, 1987, after which time each State's volume limitation is reduced to an amount equal to the greater of (1) $50 per resident of the State or (2) $150 million.

For purposes of the volume limitation, the District of Columbia is treated as a State (and therefore may receive a $250 million volume limitation until 1988, when it will receive a $150 million limitation). U.S. possessions, having populations more than that of the least populous State are limited to the $75/$50 per capita amounts. U.S. possessions having populations less than that of the least populous State receive annual volume limitations equal to the per capita amount actually received by the least populous State (i.e., the $250/$150 million safe-harbor divided by the least populous State's population).

Unlike the House bill, there are no special set-asides for specified types of private activity bonds under the new private activity bond volume limitation.

Bonds subject to the private activity bond volume limitation

Bonds subject to the new private activity bond volume limitation include most private activity bonds for which tax-exemption is permitted and the private use portion (in excess of $15 million) of governmental bonds.[41] Specifically, the volume limitation applies to (1) exempt-facility bonds (other than bonds for airports, docks and wharves, and certain governmentally owned solid waste disposal facilities), (2) qualified mortgage bonds, (3) small-issue bonds, (4) qualified student loan bonds, and (5) qualified redevelopment bonds. Certain other private activity bonds for which tax-exemption specifically is provided also are subject to the new private activity bond volume limitations.[42]

---

[41] The portion of a governmental bond that may be used in a trade or business of a person other than a qualified governmental unit may not exceed 10 percent of net proceeds. Under a special restriction on bonds for output facilities, the aggregate bond-financed private use for such facilities may not exceed $15 million; therefore, private use for these facilities will never exceed the amount that renders the private use portion of governmental bonds subject to the new volume limitations.

[42] Bonds issued under the Texas Veterans' Land Bond Program, the Oregon Small-Scale Energy

An exception to the requirement that private use of governmental bond proceeds in excess of $15 million be subject to the State volume limitations is provided in the case of use by section 501(c)(3) organizations, if the proceeds used by the section 501(c)(3) organization, viewed as a separate issue, satisfy all requirements to be a qualified 501(c)(3) bond. For a more complete description of the rules on composite issues involving both governmental and 501(c)(3) use, *see* the discussion of the new rules for qualified 501(c)(3) bonds.

Mortgage credit certificates (MCCs) may continue to be issued by a qualified governmental unit provided that the aggregate annual volume of MCCs issued does not exceed 25 percent of the amount of the issuer's private activity bond volume limitation exchanged by the issuer.

Consistent with the conference agreement's treatment of advance refunding bonds as additional bonds (since the original bonds are not redeemed within 90 days), advance refundings of governmental bonds are subject to the new private activity bond volume limitations to the extent of any private use of the refunding bonds that exceeds $15 million. Generally, the portion of the proceeds of the refunding bonds attributable to private use will be determined at the time the original bonds are issued. Similarly, in the case of a second advance refunding, this private use portion is determined by reference to the original bond issue, including bonds issued before 1986. However, if there is a change in facts or circumstances, not originally anticipated at the time of the original issuance, which alters the percentage of private use of the underlying facility, the percentage of private use of the refunding bonds is to take into account the change in circumstances. Thus, for example, if a governmental participant owner of an output facility sells a portion of its ownership interest in the facility to an investor-owned utility (which sale was not anticipated at the time of original issuance), the percentage of private use of refunding bonds issued after such sale must reflect the increased percentage of private use resulting from the sale. Similarly, if a private participant sells its interest to a governmental participant, the reduction in percentage also is to be taken into account in a later refunding issue.

As under the present-law State volume limitations applicable to IDBs, a qualified governmental unit generally may not allocate its bond authority to property to be located outside the State. An exception is provided permitting a qualified governmental unit to allocate a portion of its private activity bond volume limitation to financing for facilities located outside the State's boundaries in the case of specified facilities to the extent of the State's share of the use of those facilities. Facilities located outside a State's boundaries to which a portion of its volume limitation may be allocated include (1) facilities for the furnishing of water, (2) qualified sewage disposal facilities, (3) solid waste disposal facilities, and (4) hazardous waste disposal facilities. In the case of sewage, solid waste, and hazardous waste disposal faclities, the determination of a State's share of the use of a facility is based on the percentage of the facility's total treatment provided to the State and its residents.[43]

Allocation of private activity bond volume limitation among the State and other qualified governmental units therein

The conference agreement follows the House bill's rules for allocating a State's volume limitation among issuers with the State, except there are no set-asides for specified types of bonds.[44] The conferees wish to clarify that gubernatorial proclamations issued before the date of enactment of the conference agreement, or state legislation enacted before that date, both are recognized for purposes of allocating the new volume limitations, provided that the proclamation or legislation refers to the new private activity bond volume limitation. Bonds issued before such gubernatorial proclamation or State legislation may not be denied use of a prior allocation of the new private activity bond volume limitation to the extent of the bond authority the issues received based on population.

Similar to the House bill, allocation formulae provided under a gubernatorial proclamation terminates at the end of the next year after 1986 when the legislature meets in regular session. In the case of States where the governor does not have the veto power and where any such proclamation is subject to legislative review when issued, it is the intent of the conferees that the proclamation be treated as legislation, unless specifically overridden by action of the applicable State legislature.

Three-year carryforward

An issuer may elect to carry forward any portion of its private activity bond volume limitation for up to three years for certain purposes. The election may not be made for projects to be financed with small-issue bonds or for bond volume limitation to be used to finance the private use portion of governmental bonds. Where the election applies, bonds issued in the three calendar years following the calendar year for which the election is made are not counted toward's the State's private activity bond volume limitation in the year of issuance to the extent that the proceeds from the bonds are used for the purpose for which the election is made. The bond authority specified in carryforward elections is absorbed in the order of the calendar years in which they arose.

The election to carry forward unused State volume limitation is to be made as provided in Treasury Department regulations. For purposes of this election, identification of a purpose to be financed with exempt-facility bonds, such as sewage or water facilities, is to be deemed sufficient if the type of facility is identified.

The purpose of issuing student loan bonds, of issuing qualified redevelopment bonds, of issuing qualified mortgage bonds, or of issuing MCCs is considered a separate purpose that is adequately specified for purposes of the carryforward election. As under the House bill, the authority to carryforward bond volume limitation to issue qualified mortgage bonds and MCCs is limited to bonds or credits that will be issued before expiration of authority to issue such bonds or credits (i.e., to bonds or credits that will be issued before 1989).

Except as specifically provided above, no part of any State's volume limitation may be carried forward to any portion of a succeeding year. (Carryforward elections for the present-law volume limitations of IDBs are not permitted for 1986 bond authority.) Similarly, a State may not borrow against future volume limitations.

Bonds not subject to the new private activity bond volume limitations

Qualified 501(c)(3) bonds

Qualified 501(c)(3) bonds are not subject to the new State volume limitations. Similarly, portions of a governmental bond used by 501(c)(3) organizations in excess of $15 million (and up to the permitted 10 percent private use portion) are not subject to the new volume limitations, if the 501(c)(3) portion would be a qualified 501(c)(3) bond if issued as a separate issue (and assuming appropriate allocations of items such as costs of issuance, reserve funds, and unrestricted money portions).

Certain exempt-facility bonds

Exempt-facility bonds for airports and docks and wharves are not subject to the new State private activity bond volume limitations. (Under the general rules permitting tax-exempt financing such facilities, all property financed with such bonds must be governmentally owned.)

Exempt-facility bonds for solid waste disposal facilities are not subject to the new State volume limitations, if all property to be financed with the bonds is governmentally owned. Under a safe-harbor rule, property financed with the bonds generally is treated as governmentally owned provided (1) the term of any service contract or lease (including renewal terms) does not exceed 20 years, (2) the service contractor or lessee has no option to purchase any of the property for other than its fair market value, and (3) the lessee irrevocably elects not to claim depreciation deductions (or investment tax credit under any transition rule) with respect to any property financed by the issue.

Certain refunding issues

Certain refunding bonds (other than advance refunding bonds) are not subject to the volume limitation, provided the amount of the refunding bonds does not exceed the outstanding amount of the refunded bonds. In the case of current refundings of student loan bonds and governmental bonds (having private use in excess of $15 million) subject to the new volume limitations, the refunding bonds are not subject to the new volume limitation only if the maturity of the refunding bonds does not exceed (1) the weighted average maturity date of the refunded bonds, or (2) the date that is 17 years after the date on which the refunded obligation was issued (or in the case of a series of refundings, the date on which the original issue was issued).[45] This rule is ap-

---

Conservation and Renewable Resource Loan Bond Program, and the Iowa Industrial New Jobs Training Program are subject to the new private activity bond volume limitation.

[43] The fact that loans financed with student loan bonds generally must be available to all individuals attending schools within the issuing State and to all residents of the State regardless of the State in which they attend school is not affected by the limitation on financing out-of-state facilities, since those bonds are not used to finance property. *See however*, the new prohibition on financing loans for students who are enrolled in out-of-state schools and who are not residents of the issuing State.

[44] The conference agreement also follows the House bill regarding the special rule for constitutional home rule cities.

[45] The maturity of private activity bonds (including refunding bonds) the proceeds of which are used to finance facilities generally is limited to 120 percent of the economic life of the property being financed.

plied in the case of qualified mortgage bonds by substituting 32 years for 17 years.[46] For purposes of the new private activity bond volume limitation, the term refunding includes a rollover of commercial paper and other comparable actions which, under present law, constitutes a reissuance of so-called flexible bonds.

Effective date

In general

Except as specifically provided below, the new State private activity bond volume limitations apply to bonds (including refunding bonds) issued after August 15, 1986. An exception is included in the substantive rules for these limitations which exempts current refundings of bonds otherwise subject to the limitations if the amount of the refunding bonds does not exceed the outstanding amount of refunded bonds and the maturity of the refunded bonds is not extended beyond certain limits.

Advance refundings of pre-August 16, 1986, bonds, where permitted under the conference agreement, are subject to the new volume limitations to the extent that the refunded bonds would be if originally issued on the date of the advance refunding and if more than 5 percent of the refunded bond proceeds were used for output projects (other than facilities for furnishing of water). For purposes of this rule on advance refundings, the requirement that the excess over $15 million of the proceeds of a governmental bond used by private persons be allocated State volume limitations applies. However, the new definition of governmental bond (e.g., the 10-percent business use test) does not apply to make the entire issue (or any proceeds not exceeding $15 million used by private persons) subject to these volume limitations. Similarly, the 95-percent use requirement for qualified 501(c)(3) bonds does not apply to advance refundings of section 501(c)(3) organization bonds originally issued before August 16, 1986. Thus, the private use portion (not in excess of 25 percent of proceeds) of these pre-August 16, 1986, section 501(c)(3) organization bonds is not subject to the State volume limitations.

Transitional exceptions

The conference agreement includes two general transitional exceptions under which bonds issued after August 16, 1986, are not subject to the new private activity bond volume limitations. Both of these exceptions require that the bonds be issued with respect to facilities satisfying the commencement of construction or binding contract rules described under the discussion of effective dates for the new rules on governmental bonds.

If the bond-financed facilities satisfy one of the transitional exceptions, bonds that are not subject to State volume limitations under present law (e.g., bonds for multifamily residential rental property and the nongovernmental portion of governmental bonds) are not subject to the new State private activity bond volume limitations even if issued after August 15, 1986.

Second, if the bond-financed facilities satisfy one of the transitional exceptions, bonds that are subject to a State volume limitation under present law (i.e., most other IDBs, all student loan bonds, and qualified mortgage bonds), and that are issued after August 15, 1986, are not subject to the new private activity bond volume limitations to the extent that the bonds are issued pursuant to a carryforward election allowed under the current State volume limitations of bond authority for 1984 or 1985, and that carryforward election was filed with the Treasury Department before November 1, 1985.

The conferees are aware that carryforward elections may have been made with respect to only a portion of the bond authority required for a project. Bonds in excess of the amounts allocated in carryforward elections are subject to the new private activity bond volume limitations. Bonds subject to volume limitations and for which carryforward elections are not allowed under present law (e.g., qualified mortgage bonds and qualified small-issue bonds) are subject to the new volume limitations if issued after August 15, 1986.

The present-law volume limitations are repealed, effective for bonds issued after August 15, 1986. Issuance of bonds pursuant to elections to carryforward of bond authority under the present volume limitations for most IDBs and all student loan bonds is not permitted except as specifically provided above.

D. Arbitrage and Related Restrictions

1. General Restrictions Applicable to All Tax-Exempt Bonds

Present Law

Profit limitations

If bond proceeds are reasonably expected to be invested in securities or obligations (other than tax-exempt bonds) having a yield that is materially higher than the yield on the bonds, bond interest is taxable (i.e., the bonds are arbitrage bonds). For this purpose, Treasury Department regulations define bond proceeds to include original proceeds, investment proceeds, amounts accumulated in a sinking fund, other amounts replaced by bond proceeds, and transformed proceeds of a refunding issue. (Treas. Reg. sec. 1.103-13, -14.) The amount of permitted arbitrage earnings depends on whether the bond proceeds are invested in obligations related to the purpose of the borrowing or in other, nonpurpose obligations, and whether the issuer may earn unlimited arbitrage profits for certain temporary periods. Under Treasury Department regulations, an election may be made to forgo temporary periods and to earn more arbitrage over the term of the bonds. Generally, this results in the ability to earn 0.5 percentage points over the yield of the issue during the entire term of the bonds rather than 0.125 percentage points.

Exceptions

Investments during an initial temporary period, generally not exceeding 3 years, prior to use for the purpose of the borrowing, are not subject to yield restrictions. Shorter temporary periods apply in numerous specific situations. Treasury Department regulations also permit temporary periods in excess of three years in the case of certain long-term projects.

In addition to the temporary period exceptions, a minor portion (15 percent) of the proceeds may be invested without regard to the arbitrage restrictions. The minor portion is determined with reference to the original face amount of the issue unless the original proceeds determined without regard to issuing expenses is less than 98 percent of that amount. (Treas. Reg. sec. 1.103-13(b)(1)(B)(ii).) A reasonably required debt service reserve or replacement fund is the most important example of the use of this exception. Thus, if an issue qualifies for a reserve fund, the aggregate amount of proceeds, including both the reserve fund and other minor portion amounts, that may be invested in materially higher yielding investments may not exceed 15 percent of the proceeds.

Determination of bond yield

Bond yield is interpreted to mean the discount rate at which all anticipated payments of principal and interest on the bonds equals the issue price after deducting the costs of issuance. (This deduction of issuance costs permits bond issuers to earn a higher yield on the investment of bond proceeds, and thereby to pay issuance costs out of arbitrage profits.)

House Bill

Profit limitations

The House bill modifies the profit limitations applicable to all tax-exempt bonds in several ways. First, the House bill clarifies that the present-law reasonable expectations test does not protect subsequent intentional acts to create arbitrage profits. Thus, if an issuer intentionally acts to create arbitrage profits in excess of that permitted under the general arbitrage restrictions after the date of issue, the bonds are taxable arbitrage bonds.

Second, the House bill eliminates the present-law election to forgo temporary periods when unlimited arbitrage profits may be earned and thereby to be permitted to earn higher profits over the term of an issue. Thus, the definition of the term materially higher generally is limited to 0.125 percentage points.

Third, the House bill expands the types of investments of bond proceeds that are subject to the arbitrage restrictions to include all investment-type property (including other than customary prepayments) except bonds exempt from tax under Code section 103 (rather than just other taxable securities). Additionally, the House bill provides that investment property includes investment in deferred compensation arrangements. Thus, investments in annuity contracts to fund pension obligations are subject to the arbitrage restrictions in the same manner as if bond proceeds were deposited directly in the pension fund.

Exceptions

The House bill generally follows present law, except statutory temporary periods when unlimited arbitrage profits are permitted are imposed for issues the proceeds of which are used for acquisition or construction of property.

The House bill repeals the exception under which a minor portion of bond proceeds may be invested without regard to the arbitrage yield restrictions over the term of the bonds. Thus, except for amounts invested in a reasonably required reserve or replacement fund and investments during permitted temporary periods, all bond proceeds are subject to the arbitrage yield restrictions.

Determination of bond yield

The House bill provides that the yield on bonds is determined on the basis of the original issue discount rules of the Code rather than as under the present general arbitrage restrictions. Thus, yield is deter-

[46] The conference agreement provides that, for current refundings of student loan bonds and mortgage revenue bonds to be exempt from the volume limitation the period permitted for making loans to finance student loans or owner-occupied residences must be measured from the date the refunded (or original) bonds were issued. See, the discussion under the effective date provisions for the new rules on these bonds for a description of this provision.

mined based on the price at which a substantial number of the bonds are sold to the public and must reflect a current market price. (This amendment reverses the case of *State of Washington* v. *Commissioner.*)

Senate Amendment

Profit limitations

The Senate amendment is the same as the House bill, except the Senate amendment extends the present-law treatment of certain bond insurance premiums as interest expense for purposes of the arbitrage bond yield calculation to letter of credit fees.

Exceptions

The Senate amendment retains the present-law rules on temporary periods when unlimited arbitrage profits may be earned (i.e., does not include new statutory temporary periods like those of the House bill).

The Senate amendment imposes a new, statutory restriction on the amount of bond proceeds that may be invested (other than during permitted temporary periods) without regard to arbitrage yield restrictions. First, a minor portion of the proceeds of an issue not in excess of the lesser of 5 percent of the proceeds of the issue or $100,000 may be invested without regard to the general restrictions on yield. Second, the Senate amendment provides that this minor portion is determined without regard to amounts invested in a reasonably required reserve fund, defined as under present law.

Determination of bond yield

The Senate amendment is the same as the House bill.

Conference Agreement

Profit limitations

Subsequent intentional acts to create arbitrage

Under the conference agreement (as under present law), the determination of whether bonds are arbitrage bonds generally is based upon the reasonable expectations of the issuer on the date of issue. If subsequent intentional acts are taken after the date of issue to earn arbitrage, however, the reasonable expectations test does not prevent the bonds from being arbitrage bonds. *See*, e.g., Rev. Rul. 80-91, 1980-1 C.B. 29, Rev. Rul. 80-92, 1980-1 C.B. 31, and Rev. Rul. 80-188, 1980-2 C.B. 47.

For purposes of this continuing requirement, any investment with respect to which impermissible arbitrage earnings accrue may result in the interest on the issue becoming taxable, retroactive to the date the issue was issued. For example, if after the expiration of an allowable temporary period, the issuer continued to invest the bond proceeds at a materially higher yield in order to earn impermissible arbitrage, interest on the bonds would become taxable, retroactive to the date of issue. The conferees intend that the determination of whether intentional actions to earn arbitrage have been taken is made on a case-by-case basis, taking into account all facts and circumstances that a prudent investor would consider in determining whether to invest bond proceeds.

Repeal of election to forego temporary periods

The conference agreement repeals the right to elect under Treasury Department regulations to forego a temporary period during which unlimited arbitrage earnings are permitted and by doing so to receive the right to earn arbitrage of 0.5 percentage points over the yield of the issue. Thus, the definition of the term materially higher generally is limited to 0.125 percentage points over the yield on the issue, regardless of whether temporary periods when unlimited arbitrage earnings are permitted are claimed with respect to an issue.

Expansion of investments subject to yield restriction

The conference agreement follows the House bill and the Senate amendment in providing additional restrictions on the types of obligations in which bond proceeds may be invested without regard to yield restrictions.[47] Under the conference agreement, therefore, the arbitrage restrictions are expanded to apply to the acquisition of any property held for investment other than another bond exempt from tax under Code section 103. Thus, investment in any taxable security as well as any deferred payment contract (e.g., an annuity) or other property held for investment is precluded if the yield on the property is materially higher than the yield on the issue.

Treatment of certain credit enhancement fees

The conference agreement retains the present-law rules under which bond insurance premiums are treated as interest expense if the bond insurance results in a reduction in the interest rate on the issue and follows the Senate amendment provision extending this treatment to fees for certain other credit enhancement devices (i.e., letter of credit fees). Thus, if the purchase of a letter of credit results in a net present value interest savings, the fee is treated as if it were interest expense. (*See* Treas. reg. sec. 1.103-13(c)(8).) The treatment of these costs of issuance as interest for purposes of the arbitrage yield calculation is limited, however, to such fees arising from an arm's-length transaction and to fees that represent a reasonable charge for credit risk. Thus, the conferees understand that the Treasury Department may restrict this treatment to such credit enhancement devices purchased pursuant to competitive bidding by credit-enhancement providers. Additionally, the conferees intend that if a fee or premium is increased to reflect indirect payment of costs of issuance (i.e., costs in addition to a charge for transfer of credit risk), the entire fee or premium is not to be treated as interest expense.

Exceptions

The conference agreement follows the House bill and Senate amendment, with the following modifications:

Statutory temporary period rules

The conference agreement, like the House bill, imposes new, statutory restrictions on temporary periods when unlimited arbitrage earnings are permitted, but limits application of these new statutory rules to pooled financings. In the case of pooled financings, net proceeds to be used to make loans which have not been used to make loans within 6 months of the date of issue may not be invested at an unrestricted yield after such period until they have actually been used to make loans. In the case of amounts representing repayments of loans from a pool, the 6-month period is reduced to 3 months.

These limitations on pools do not extend the maximum temporary periods allowed under present law in the case of pooled financings but rather are limitations on the temporary periods allowed under present law. Thus, if, as under present law, proceeds of a pooled financing are to be used to make construction loans, the aggregate temporary period allowed to the pool and the borrowers generally may not exceed three years (a maximum of six months to the pool and a maximum of 30 additional months to the borrower). Similarly, in the case of pools for tax and revenue anticipation loan financing, the aggregate temporary period to the pool and the borrower may not exceed 13 months. Under the conference agreement, whether a financing constitutes a pool is a factual determination. In general, however, the term pool only includes issues the proceeds of which are to be used to make loans, as opposed to an issue to finance a specific project that will be jointly owned by more than one entity.

The statutory temporary period rules for pools do not apply to mortgage revenue bonds since substantive rules for those bonds require, in certain cases, that proceeds not be expended until after expiration of one year. Additionally, in the case of qualified student loan bonds issued in connection with the Federal Guaranteed Student Loan (GSL) and Parents' Loans for Undergraduate Students (PLUS) programs, 18 months is substituted for six months (for bonds issued before January 1, 1989). Tax-exempt student loan bonds other than bonds issued before 1989 in connection with these two Federal programs are subject to the six-month period provided generally for pools.

Minor portion exception

The conference agreement follows the Senate amendment's limitation of the minor portion exception from the arbitrage yield restrictions to an amount not exceeding the lesser of five percent or $100,000 of bond proceeds. As under the Senate amendment, the minor portion is in addition to the exception for amounts invested in a reasonably required reserve or replacement fund.

Reasonably required reserve fund exception

The conference agreement limits the amount of proceeds received from the sale of the bonds that may be invested in a reasonably required reserve or replacement fund to an amount not exceeding 10 percent of the proceeds of the issue to which the fund relates unless the Treasury Department determines that a larger amount is necessary with respect to an issue. The conferees intend, for example, that a reserve or replacement fund in excess of 10 percent may be allowed if the master legal document authorizing issuance of the bonds (i.e., a master indenture) was adopted before August 16, 1986, and the indenture—

(1) requires a reserve or replacement fund in excess of 10 percent of proceeds, but of not more than maximum annual debt service;

(2) is not amended after August 31, 1986, and

(3) provides that bonds having a parity of security may not be issued by or on behalf of the issuer for the purposes provided under the indenture without satisfying the debt service reserve fund requirements of the indenture.

The conferees understand that issuers may, in certain cases, pledge additional amounts as part of a reserve or replacement

[47] Section 648 of the Deficit Reduction Act of 1984 provides that, in certain cases, property held in the Permanent University Fund of the University of Texas and Texas A&M University is not treated as an investment of bond proceeds for purposes of the Code arbitrage restrictions. The conference agreement does not affect this provision regarding the Permanent University Fund.

fund, which amounts are derived other than from sale of the issue, but which are treated for purposes of the arbitrage restrictions as bond proceeds. *See*, e.g., Treasury regulation sec. 1.103-14(d)(4) and (5) regarding circumstances in which certain pledged endowment funds are treated under present law as amounts invested in a reserve or replacement fund. The 10-percent limitation on the amount of bond proceeds that may be deposited in a reasonably required reserve or replacement fund applies only to amounts of proceeds from sale of an issue that are invested in such a fund. Thus, these other amounts may continue to form part of a reserve or replacement fund (in addition to amounts of actual bond proceeds forming part of such a fund) even if they exceed the 10-percent limitation.

The conference agreement continues the present-law rule that amounts of proceeds invested in a reserve or replacement fund (up to this new 10-percent maximum) are not subject to the arbitrage yield restrictions and does not affect the present-law exceptions under the Treasury regulations (Treas. reg. sec. 1.103-14(d)).[48]

Determination of bond yield

The conference agreement follows the House bill and the Senate amendment.

Effective dates

General rule

These provisions apply generally to bonds (including refunding bonds) issued after August 15, 1986 (August 31, 1986 in the case of bonds and provisions covered under the Joint Statement on Effective Dates of March 14, 1986).

Exceptions

The restriction on investment in annuity contracts applies to bonds (including refunding bonds) issued after September 25, 1985.

The new method of determining bond yield applies to bonds (including refunding bonds) issued after December 31, 1985.

The directions to the Treasury Department to modify its regulations to delete the election to be permitted to earn higher arbitrage over the term of the bonds by foregoing temporary periods and to treat certain letter of credit fees as interest under the arbitrage regulations are effective on August 15, 1986.

2. Extension of Additional Arbitrage Restrictions to All Tax-Exempt Bonds

Present Law

Additional restrictions for most IDBs

Industrial development bonds (other than IDBs for multifamily residential rental projects) are subject to the following additional arbitrage restrictions:

(1) The arbitrage earnings on each issue of bonds must be rebated to the Federal Government at specified intervals.

(2) The amount of bond proceeds that may be invested at unrestricted yield in obligations unrelated to the purpose of the borrowing is limited to 150 percent of scheduled annual debt service.

The rebate requirement does not apply if all gross proceeds are spent for the governmental purpose of the borrowing within 6 months of issuance of the bonds, or to certain debt service funds on which less than $100,000 is earned in a bond year. Rebate payments are due at 5-year intervals, with the last payment being due within 30 days after redemption of the issue.

The restriction on investment in nonpurpose obligations does not apply to investments for an initial temporary period or to investments for temporary periods related to current debt service (as opposed to reserve funds for future debt service).

Additional restrictions for qualified mortgage bonds

The effective rate of interest on mortgage loans provided with qualified mortgage bonds may not exceed the yield on the issue by more than 1.125 percentage points.

Investment of qualified mortgage bond proceeds in obligations unrelated to the purpose of the borrowing is restricted in a manner similar to that for most IDBs. Additionally, arbitrage profits must be rebated to the Federal Government or paid or credited to the mortgagors.

Additional restrictions for student loan bonds

In 1984, the Treasury Department was directed to prescribe regulations applying additional arbitrage restrictions similar to those now applying to most IDBs to student loan bonds eliminating the present-law special rule on treatment of special assistance payments (SAP payments). These regulations have not yet been prescribed.

House Bill

The House bill extends the present-law limit on nonpurpose investments and rebate requirements that apply to most IDBs to all tax-exempt bonds, other than mortgage revenue bonds. The present nonpurpose investment and rebate requirements for qualified mortgage bonds continue to apply to those bonds, and are extended to qualified veterans' mortgage bonds. Finally, the House bill retains the 1984 direction to the Treasury Department for new arbitrage regulations for student loan bonds, to the extent that that direction is consistent with the provisions of the bill.

Senate Amendment

The Senate amendment follows the House bill, with the following modifications:

(1) Current debt service funds of governmental units with general taxing powers are exempted from the rebate requirements.

(2) An exception from the rebate requirement is provided for issues the proceeds of which are used to finance operations of or facilities for governmental units with general taxing powers if all tax-exempt bonds issued by or on behalf of the governmental unit in the year are not reasonably expected to exceed $5 million.

(3) In the case of governmental bonds and qualified 501(c)(3) bonds, a special penalty is imposed in lieu of loss of tax-exemption for certain errors in or late rebates of arbitrage profits, and the Treasury Department is directed to develop a system for monitoring rebate payments through use of the required information reports on all tax-exempt bonds (described below).

(4) Certain arbitrage profits earned on student loan bonds issued in connection with the Federal GSL and PLUS programs during an initial temporary period is exempt from the rebate requirement.

Conference Agreement

Extension of additional IDB restrictions

The conference agreement follows the House bill in extending to all tax-exempt bonds (including refunding bonds) other than mortgage revenue bonds the arbitrage rebate restrictions presently applicable to most IDBs. The limitation on the amount of bond proceeds that may be invested in materially higher yielding nonpurpose investments is extended to all private activity bonds (other than qualified 501(c)(3) bonds). These restrictions are in addition to the general arbitrage restrictions for all tax-exempt bonds, described above. The determination of amounts to be rebated, the due dates of rebate payments, and the operation of the limitation on investment in materially higher yielding nonpurpose investments generally are the same as under the present-law IDB restrictions.

The conferees intend that the Treasury Department may modify the requirement that arbitrage rebate payments be made at 5-year intervals in the case of advance refunding bond proceeds placed in escrow accounts. Escrow account investments may involve investment at differing yields over the term of the bonds which in the aggregate comply with the Code arbitrage yield restrictions. This situation is distinguished from non-escrow funds or regular variable rate debt since the yield on the issue to maturity is determined when the escrow account is established. Thus, for advance refunding escrow proceeds, the Secretary may determine that, in appropriate circumstances, rebate payments are not required until the escrow is fully paid out.

The conferees further intend that the Treasury Department may permit issuers to use such simplified accounting methods as are deemed appropriate to ease administrative burdens of complying with the rebate requirement.

Finally, a technical amendment is made providing that the last rebate payment with respect to an issue is due no later than 60 days (rather than 30 days) after redemption of the issue.

Exceptions to rebate requirement

The conference agreement retains the present-law exception to the rebate requirement that applies when all gross proceeds of an issue are expended within six months of the issue date for the purpose for which the bonds are issued. The conferees further wish to clarify that application of the six-month expenditure requirement to pooled financings, including bond banks, is to be determined by reference to when the gross proceeds of the issue are spent for the ultimate exempt purpose of the borrowing, rather than when loans are made.[49]

The conference agreement further retains the present-law exception for certain temporary investments in a bona fide debt service fund, including the $100,000 limit on earnings for funds qualifying under the exception.

The conference agreement provides three additional exceptions to the rebate requirement. First, the conference agreement liberalizes the Senate amendment's exception for bonds used to finance the activities of small governmental units. Under this liberalized exception, no rebate is required on these governmental bonds if the governmental unit reasonably expects to issue no more than $5 million in governmental bonds during the calendar year when the issuance occurs. In determining whether the $5 mil-

[48] As under present law, amounts invested in a reserve or replacement fund are not treated as having been spent for the governmental purpose of the borrowing; thus any arbitrage profits on such a fund must be rebated to the Federal Government. *See*, the discussion of the arbitrage rebate requirements, below.

[49] The conferees further intend that the Treasury Department may, by regulation, treat pooled financings as separate issues in appropriate circumstances. This regulation may not, however, change the present-law rule that the making of a loan by a pool is not treated as an expenditure of gross proceeds for the exempt purpose of the borrowing.

lion limit is reasonably expected to be exceeded, all governmental bonds issued by the issuing governmental unit and all other governmental units that are subordinate to it under applicable State or local law are counted. (Private activity bonds issued by or on behalf of the issuing governmental unit or subordinate governmental units are not so counted and are not eligible for this exception from the rebate requirement.) *See* section IX. B., for a description of subordinate governments.

A second exception is provided for governmental bonds and qualified 501(c)(3) bonds [50] if all but a minor portion of the gross proceeds of an issue are spent for the exempt purpose of the borrowing within six months after the date of issuance. Thus, if the gross proceeds of an issue, other than an amount not exceeding the lesser of five percent or $100,000 of the proceeds, are so spent, the conference agreement permits an additional six months to spend the remaining proceeds before rebate payments are required. Additionally, for purposes of this exception, unlike the general rules for the rebate requirement, redemption of the allowable *de minimis* portion of proceeds before expiration of the additional six-month period is treated as an expenditure for the purpose of the borrowing.

Third, the conference agreement provides a transitional exception from rebate for certain qualified student loan bonds issued in connection with the Federal GSL and PLUS program similar to the exception included in the Senate amendment. This transitional exception applies only with respect to bonds issued before January 1, 1989, and is designed to allow issuers of qualified student loan bonds to continue to issue bonds while they find other sources of revenue to defray administrative costs and costs of issuance. (Typically, other revenue sources such as direct Federal funding or funding from State or local governments have not been provided for these purposes in the past.)

Under this modified exception, the rebate requirement does not apply to arbitrage profits earned during the initial 18-month temporary period permitted for such bonds if the profits are used to pay cost of issuance financed with the bond proceeds and also to such profits to the extent that—

(1) the proceeds of the issue are used to make or finance qualified student loans before the end of the 18-month temporary period permitted under the conference agreement; and

(2) the arbitrage is used to pay administrative costs associated with the issue.

Arbitrage profits may not be used to pay either costs of issuance or administrative costs if those costs are to be reimbursed by borrowers.

As with the special exception to the new temporary period rules described above (i.e., an 18-month temporary period rather than 6 months is permitted for pooled financings generally), this exception does not apply to tax-exempt student loan bonds other than bonds issued in connection with the Federal GSL and PLUS programs.

Rebate safe-harbor for certain governmental financings

As under both the House bill and the Senate amendment, arbitrage profits on all tax-exempt bonds, including tax and revenue anticipation notes (TRANs) issued to fund cash-flow shortfalls of governmental units must be rebated to the Federal Government if all gross proceeds of an issue are not spent for the exempt purpose of the borrowing within six months of the date of issuance. In general, TRAN proceeds are deemed to be spent as the cash-flow shortfall for which the notes are issued occurs. The conference agreement provides a special safe-harbor exception for TRANs pursuant to which all gross proceeds are deemed to have been spent for the exempt purpose of the borrowing within six months.

Under this safe-harbor exception, if during the six-month period after issuance, the cumulative cash-flow deficit of the governmental unit issuing the TRANs has exceeded 90 percent of the issue size, all net proceeds and earnings thereon of the TRAN issue are deemed to have been spent for the purpose of the borrowing. Solely for purposes of the safe-harbor, cumulative cash-flow deficit is defined as the excess of the amount the governmental unit spends during the relevant period over the sum of all amounts (other than the issue proceeds) that are available for payment of the expenses during that period. As under the general rules on arbitrage rebate, redemption of bonds is not treated as an expenditure for the purpose of the borrowing. [51]

Limitation on loss of tax-exemption for certain rebate errors

The conference agreement modifies the Senate amendment's provision of a special penalty, in lieu of loss of tax-exemption, for certain failures to rebate arbitrage profits in the case of governmental bonds and qualified 501(c)(3) bonds. Under the conference agreement, the Treasury Department is authorized to waive loss of tax-exemption on an issue where an error in the amount rebated or a late payment occurs, if the error or late payment is not due to willful neglect. In such cases, a penalty equal to 50 percent of the amount not properly paid is imposed and interest accrues on these late payments and underpayments in the same manner as on late payments of tax. The penalty and interest may, however, be waived by Treasury.

Additional restrictions on mortgage revenue bonds

The conference agreement follows the House bill and the Senate amendment on imposing the present-law additional arbitrage restrictions for qualified mortgage bonds on both those bonds and qualified veterans' mortgage bonds. These restrictions are in lieu of the IDB-type additional restrictions that apply to all other tax-exempt bonds.

Additional restrictions on student loan bonds

The conference agreement follows the House bill and the Senate amendment in retaining the 1984 direction to the Treasury Department to develop regulations imposing additional arbitrage restrictions on tax-exempt student loan bonds, to the extent that that direction is not inconsistent with specific provisions of the agreement applicable to student loan bonds.

Effective dates

These provisions apply to bonds (including refunding bonds) issued after—

(1) August 31, 1986, in the case of bonds and provisions covered under the Joint Statement on Effective Dates of March 14, 1986;

(2) 3:00 p.m., E.D.T., July 17, 1986 in the case of application of the arbitrage rebate requirement to governmental bonds issued to fund certain pools, described below;

(3) August 15, 1986, for application of the limit on higher yielding investments in nonpurpose investments; and

(4) December 31, 1985, in the case of bonds not covered under (1) and (2).

The conferees intend that no payment of rebate be due before the date that is 60 days after the date of enactment.

Pools described in (2) are bonds satisfying one or more of the following four criteria:

(1) The proceeds of the issue are to be used to fund a pool or pools to make loans to governmental units other than governmental units subordinate (determined under applicable State or local law) the issuer (or the the governmental unit on behalf of which the issuer acts).

(2) The proceeds of the issue are to be used to fund a pool or pools with respect to which less than 75 percent of the proceeds of the issue is to be used to make loans to initial borrowers to finance projects identified (with specificity) by the issuer on the date of issue as projects to be financed with the proceeds of such issue.

(3) The proceeds of the issue are to be used to fund a pool or pools and on or before the date of issue, commitments have not been entered into by such initial borrowers to borrow at least 25 percent of the proceeds of such issue.

(4) The term of the issue exceeds 30 years and principal repayments on any loans are to be used to make or finance additional loans.

Paragraphs (2) and (3) apply only if bonds were not issued by the issuer before January 1, 1986, to fund similar governmental bond pools, or if the issuer had established a similar pool or pools before that date, issuance of bonds for such pools during 1986 exceeds 250 percent of the average annual issuance for such pools during calendar years 1983, 1984, and 1985.

For purposes of the special rule on pooled financings, an issue of bonds sold to a securities firm, broker, or other person acting in the capacity of an underwriter or wholesaler is not treated as issued before such bonds have been re-offered to the public (pursuant to final offering materials) and at least 25 percent of such bonds actually have been sold to the public.

3. Modification of Treasury Department State and Local Government Series Program

Present Law

The Treasury Department issues a special State and Local Government Series (SLGS) of Treasury obligations to enable issuers of tax-exempt bonds to avoid earning impermissible arbitrage profits. Interest rates on SLGS are set by reference to the permitted yield on each issue of tax-exempt bonds. Purchasers of SLGS must give Treasury 20 days notice of their intent to purchase the obligations. The minimum maturity of SLGS is 45 days.

House Bill

No provision.

Senate Amendment

The Senate amendment directs the Treasury Department to modify its SLGS program to provide investments similar to those offered by private money market

[50] This exception does not apply to so-called tax and revenue anticipation notes (TRANs); rather a special safe-harbor exception from the rebate requirement, described below, is provided for those governmental bonds.

[51] This safe-harbor does not affect the amount of TRANs that may be issued by a governmental unit, that qualify for a temporary period exception from arbitrage yield restrictions, or any other present-law rules governing issuance of such notes.

funds (paying yields that will eliminate impermissible arbitrage profits and thereby eliminate the need to account for such profits) and to operate the program at no net cost to the Government.

These new rules are to permit demand deposits under the SLGS program by deleting advance notice requirements related to the purchase of SLGS and by deleting minimum maturity requirements.

Conference Agreement

The conference agreement follows the Senate amendment. Thus, notwithstanding any other provisions of law, or any regulation issued pursuant to such a provision, the Treasury Department is directed to expand its SLGS program to permit demand deposits, as well as time deposits for a period specified by the purchaser (as under present law). All obligations issued as part of the revised SLGS program are to be available in the same manner as secondary market transaction, (i.e., for next day settlement unless forward settlement is specified.)

The conferees further intend that the revised SLGS program will be operated at no net cost to the Federal Government. Thus, the Treasury is authorized to charge appropriate fees and/or to establish interest rates on SLGS such as the difference between any investments of the bond proceeds and the rate paid thereon are sufficient (in connection with any fees charged) to defray costs of operating the program.

Finally, the conferees are aware that the Treasury has rigidly applied many of the requirements of the present SLGS program in the past. For example, if SLGS are not purchased on the date specified in the application, Treasury bars the issuer from investing in SLGS for 6 months. The conferees intend that the Treasury apply its regulations under the revised program in the most flexible manner possible, in light of the conferees' intent in adopting this provision (e.g., if inability to settle on a specified date is due to reasonable cause, a delayed closing date, without penalty, should be permitted).

Effective Date

This provision is effective on the date of enactment. The revised SLGS program is to be in effect on January 1, 1987.

E. Restrictions on Advance Refundings

Present Law

Bonds other than IDBs and mortgage revenue bonds may be advance refunded. IDBs and mortgage revenue bonds may not be refunded more than 180 days before the refunded bonds are redeemed. An exception, contained in proposed Treasury Department regulations, waives this 180-day rule in the case of refunded bonds having a maturity of less than three years.

House Bill

The House bill prohibits advance refundings of all private activity bonds. An exception is provided for certain bonds for section 501(c)(3) organizations that were originally issued before January 1, 1986, if the advance refunding is required to comply with a change in Federal law. Advance refundings are defined as refundings where the refunded bonds are not redeemed within 30 days after issuance of the refunding bonds. Certain new technical requirements are imposed on permitted advance refundings.

Senate Amendment

The Senate amendment prohibits advance refundings of all private activity bonds (other than bonds for section 501(c)(3) organizations). Advance refundings are defined as refundings where the refunded bonds are not redeemed within 90 days after issuance of the refunding bonds. Certain new technical requirements are imposed on permitted advance refundings.

Conference Agreement

General rules

The conference agreement follows the Senate amendment in permitting advance refundings of both governmental bonds and qualified 501(c)(3) bonds and in defining an advance refunding as a refunding where the refunded bonds are not redeemed within 90 days after issuance of the refunding bonds. A technical clarification is provided substituting 180 days for 90 days in the case of refundings that occurred before January 1, 1986.

The conference agreement follows the House bill and the Senate amendment with respect to the technical requirements that are imposed on permitted advance refundings—

(1) Issues that were originally issued before January 1, 1986, may be advance refunded a total of two times. All advance refunding issues that were outstanding on January 1, 1986, or that are issued on or after that date, are counted in determining whether the two-times limit has been reached. (A special transitional exception permits bonds that had been advance refunded two or more times before March 15, 1986, to be advance refunded one additional time after March 14, 1986.)

(2) Issues that are originally issued after December 31, 1985, may be advance refunded a total of one time.

(3) In the case of advance refundings producing a present value debt service savings—

(a) The refunded bonds must be redeemed no later than the first date on which their redemption is not prohibited if the refunded bonds are issued after December 31, 1985; and

(b) The refunded bonds must be redeemed no later than the first date on which they may be redeemed at a premium of 3 percent or less if the refunded bonds were issued before January 1, 1986.

(4) New restrictions on temporary periods when unlimited arbitrage earnings are permitted apply to both the refunded and refunding bonds—

(a) The initial temporary period for advance refunding bonds is limited to 30 days; and

(b) The initial temporary period for refunded bonds terminates no later than the date the advance refunding bonds are issued.

(5) The permitted minor portion that may be invested without regard to arbitrage yield restrictions claimed with respect to the refunded issue must be reduced to an amount no greater than that permitted under the conference agreement when an issue is advance refunded.

(6) As described more fully under the section on the new private activity bond volume limitation, proceeds of an advance refunding issue are subject to the volume limitation to the same extent as if the refunding issue were an original issue.

The conference agreement follows the Senate amendment's prohibition on advance refundings involving the use of a "device" to obtain a material financial advantage based on arbitrage other than savings arising from lower interest rates generally. The conferees do not intend to restrict *per se* so-called "low-to-high" advance refundings occurring to obtain relief from specific covenants included in the refunded bonds or to restructure debt service provided those advance refundings do not additionally involve an abusive device, as described in the Senate amendment, or Treasury regulations and rulings issued pursuant to this provision.

Effective date

The new restrictions on advance refundings apply to advance refunding bonds issued after—

(1) August 15, 1986, in the case of advance refundings of 501(c)(3) organization bonds, other private activity bonds for which advance refunding is permitted under present law, and governmental bonds originally issued after that date; and

(2) August 31, 1986, in the case of bonds and provisions covered by the Joint Statements, except December 31, 1985, in the case of provisions not included in the Joint Statements (e.g., the new 30-day initial temporary period for advance refunding bonds).

A transitional exception applies to permit advance refundings of certain tax-exempt governmental and section 501(c)(3) organization bonds that may not be issued originally under the conference agreement. These advance refundings generally are subject to the new advance refunding, and certain other, restrictions. In the case of advance refundings permitted under the transitional exception of such bonds (other than bonds for output facilities, as defined under the conference agreement), the requirement that a volume allocation be obtained for the private use portion in excess of $15 million does not apply.

An exception is provided for advance refunding bonds issued under this transitional exception with respect to the general 150 percent limitation on investment in materially higher yielding nonpurpose investments in the case of amounts deposited in an advance refunding escrow account. (Amounts invested in such an escrow account are not, however, treated as spent for the governmental purpose of the borrowing until they are used to redeem the refunded bonds; thus, the arbitrage rebate requirement applies to such proceeds, as well as to other proceeds (including transferred proceeds) for which an exception is not specifically provided under the rebate requirement, discussed above.

F. Restrictions on Early Issuance

Present Law

No specific rules require that bond proceeds be spent within a specified time following issuance; however, issuers are required to proceed with due diligence to realize the governmental purpose of the borrowing to qualify for a temporary period when unlimited arbitrage may be earned.

House Bill

Five percent or more of bond proceeds are required to be spent for the purpose of the borrowing within 30 days after bond issuance. All bond proceeds (other than costs of issuance and amounts deposited in a reasonably required reserve or replacement fund) must be spent no later than 3 years after issuance. The Treasury Department is authorized to extend the 30-day and 3-year periods in cases where undue hardship otherwise would result.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the Senate amendment.

G. Information Reporting Requirement for All Tax-Exempt Bonds

Present Law

Issuers of private activity bonds (defined as IDBs, student loan bonds, and bonds for section 501(c)(3) organizations) and mortgage revenue bonds are required to report certain information about volume and users of bond-financed property to the Treasury Department.

House Bill

Information reporting requirements similar to those contained in present law are extended to all tax-exempt bonds.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment with a modification authorizing the Treasury Department to waive loss of tax-exemption on an issue if an information report is filed late and Treasury finds that the late filing is not due to willful neglect.

Effective Date

This provision applies to to bonds issued after December 31, 1986. (Bonds presently subject to information reporting requirements are not excused from those requirements by virtue of the December 31, 1986, effective date.)

H. Certain Targeted Transitional Exceptions

The conference agreement follows the House bill and the Senate amendment, with modifications, in providing certain targeted transitional exceptions for specifically described facilities. Each of these targeted transitional exceptions applies only to one described project or issue of bonds or to a limited group of described projects, and each is subject to a maximum dollar amount of bonds. Additionally, these rules generally require that the transitioned bonds be issued before January 1, 1989.

Certain transitional exceptions provided in the Deficit Reduction Act of 1984 are reenacted by the agreement. These transitional exceptions are those exempting a specifically described project, or a limited group of such projects, from one or more of the provisions of the conference agreement. The agreement further provides that the 1984 Act transitional exceptions re-enacted by the agreement are retained only if the transitioned bonds are issued before January 1, 1990.[52]

The conference agreement also includes a limited exception to the rule that FSLIC- and FDIC-guaranteed bonds issued before the prohibition of such guarantees of tax-exempt bonds may not be refunded. Permitted current refunding under the agreement must satisfy specified requirements rendering them in substance a renegotiation of interest rates.

I. General Stock Ownership Corporations (GSOCs)

Present Law

A State may establish a General Stock Ownership Corporation (GSOC) that serves as an investment fund for its citizens. GSOCs may elect to be exempt from tax with the shareholders reporting as income their prorata share of the GSOC's taxable income. (No State has used this provision.)

House Bill

The GSOC provisions are repealed as deadwood, effective as of January 1, 1984.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

TITLE XIV. TRUSTS AND ESTATES; MINOR CHILDREN; GIFT AND ESTATE TAXES; GENERATION-SKIPPING TRANSFER TAX

A. Income Taxation of Trusts and Estates

Present Law

Trusts

In general

The income taxation of a trust depends on whether the trust is a grantor or nongrantor trust. In the case of a grantor trust (i.e., one where the grantor (or other person with the power to revoke the trust) has certain powers with respect to the trust), income is taxed directly to the grantor. In the case of a nongrantor trust, each trust is treated as a separate taxable entity.

Nongrantor trusts

Calculation of tax liability.—A trust is allowed the following deductions in calculating its tax liability: (1) a deduction in lieu of a personal exemption of $100 (or $300 in cases where all trust income is required to be distributed currently); (2) no zero bracket amount or standard deduction is permitted; (3) an unlimited charitable deduction is available; and (4) a distribution deduction generally is allowed for distributions to beneficiaries.

Taxable year.—The trust may elect to use a taxable year other than that of the grantor or its beneficiaries. Beneficiaries of trusts are taxable on distributions from a trust to the extent of the trust's taxable income for taxable years ending with, or within, the taxable year of the beneficiary. If the trust is on a different taxable year than its beneficiaries, the beneficiaries defer taxable income from one taxable year to the next. A trust can elect to use any year as its taxable year.

Applicable rate.—Each nongrantor trust separately calculates its tax liability at the rate applicable to married taxpayers filing separately.

Aggregation of trusts.—Pursuant to Treasury regulations, two or more trusts will be treated as a single trust if (1) the trusts have substantially the same grantor or grantors and substantially the same primary beneficiary or beneficiaries, and (2) a principal purpose of the use of a separate trust is the avoidance of Federal income tax.

Taxation of distributions to beneficiaries.—Distributions to beneficiaries are taxed to beneficiaries and deductible by the trust to the extent of the distributable net income (DNI) of the trust. DNI is allocated first to distributions that are required to be made out of income for the year, secondly to distributions made to charity out of trust income, and lastly to other distributions.

Taxation of previously accumulated income.—Distributions to beneficiaries out of previously accumulated income are taxed to beneficiaries under a throwback rule designed to tax the income upon distribution at the beneficiaries' average marginal rate in the previous five years.

Grantor trusts

Under certain circumstances, the grantor (or other person having the power to revoke the trust) is taxed directly on trust income.

The grantor.—The grantor generally is treated as the owner of all or a portion of the trust if (1) the grantor has a reversionary interest expected to return to him within ten years; (2) the grantor has the power to control the beneficial enjoyment of the income or corpus, (3) the grantor retains certain administrative powers; (4) the grantor retains the right to revoke the trust at any time during the first ten years of the trust's existence, or (5) the income of the trust may be distributed to the grantor or the grantor's spouse during the first ten years of the trust's existence.

Persons other than the grantor.—A person other than the grantor is treated as the owner of all or a portion of the trust if (1) that person has the power to revoke the trust, or (2) that person surrendered the power to revoke and that person retained one of the powers listed above.

Estates

A decedent's estate is treated as a separate taxable entity, beginning as of the date of death. The estate may elect a taxable year different than the decedent's taxable year. Under present law, an estate is allowed a $600 deduction in lieu of a personal exemption and otherwise computes its tax liability generally in the same manner as a nongrantor trust, except that the throwback rules do not apply.

Payment of estimated income taxes by trusts and estates

Neither trusts nor estates are required to make estimated payments of their income taxes. Trusts are required to pay their income tax at the time of filing of the income tax return. Income tax of an estate is payable in four quarterly payments after the year in which the income is earned.

House Bill

The House bill limits the scope of the grantor trust rules and continues to tax the income of a grantor trust directly to the grantor. Nongrantor trusts generally are taxed at the top marginal rate of the grantor. In addition, special rules may permit the use of lower rates where the trust's beneficiaries are minor children of the grantor. Where all of the trust belongs to one beneficiary, the income generally is taxed to the trust at the top marginal rate of the beneficiary.

The provisions apply to irrevocable trusts created after September 25, 1985, and to trusts that are revocable on September 25, 1985, for taxable years beginning on or after that date. Amounts contributed after that date to a trust that is irrevocable on that date are treated as a separate trust created after that date.

Senate Amendment

Trusts

Nongrantor trusts

Rates of tax.—Nongrantor trusts and estates are taxed as under present law, except that the tax brackets applicable to such trusts and estates are narrowed. Under the revised rates for taxable years beginning after 1987, the first $5,000 of income of a trust or estate is taxed at the rate of 15 percent and income in excess of $5,000 is taxed at 27 percent. In addition, the benefit of the 15-percent bracket is phased-out for trust or estate income between $13,000 to $25,000.

[52] Re-enactment of these project-specific transition rules does not change the general prohibition contained in the 1984 Act on refunding certain obligations (e.g., private loan bonds) that may not be originally issued under that Act.

Taxable year.—Nongrantor trusts (both newly created and existing) must adopt a taxable year ending in October, November, or December.

Grantor trusts

The 10-year exception of present law (i.e., the so-called "Clifford rule") is repealed. In addition, interests and powers of the grantor's spouse are treated as interests and powers of the grantor.

Estates

The undistributed income of both existing and newly created estates is taxed at the rate of a married person filing separately for the first two years of their existence. The undistributed income of estates after the first two years of their existence is taxed at the same rates as nongrantor trusts.

Payment of estimated income taxes by trusts and estates

Trusts and estates are required to make estimated payment of income tax in the same manner as individuals. In addition, the special rule permitting estates to pay their income tax in four equal quarterly installments after the year it is earned is repealed.

Effective date

The rate changes are effective on July 1, 1987. For 1987 returns, a blended rate schedule based upon the present law rates and new rates would apply. The changes in the grantor trust provisions are effective for transfers in trust made after March 1, 1986 with an exception under which the 10-year rule of present law would continue to apply to certain trusts created pursuant to certain binding property settlements entered into before March 1, 1986.

The change in the taxable year rule is effective with respect to taxable years beginning after December 31, 1986. Distributions of distributable net income during any short taxable year arising from a required change in taxable years are to be included in income of the beneficiary evenly over a 4-year period.

The change in the rule requiring trusts and estates to pay estimated tax is effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment with the following modifications:

First, the rate schedule applicable to trusts and estates is modified to reflect the top individual rate of 28 percent. Thus, taxable income of trusts and estates in excess of $5,000 is taxed at 28 percent. In addition, the phase-out rate for the benefit of the 15-percent bracket is similarly modified so that the benefit phases out between $13,000 and $26,000. An additional rate schedule[1] is provided for taxable years beginning in 1987.

If taxable income is—	*The tax is—*
Not over $500	11% of taxable income
Over $500 but not over $4,700.	$55 plus 15% of the excess over $500
Over $4,700 but not over $7,550.	$685 plus 28% of the excess over $4,700
Over $7,550 but not over $15,150.	$1,483 plus 35% of the excess over $7,550
Over $15,150	$4,143 plus 38.5% of the excess over $15,100

[1] The income tax schedule for estates and trusts for 1987 would be as follows:

Second, the special rule providing that the tax rates applicable to estates for their first two years are the rates applicable to a married person filing separately is deleted. Thus, the rates applicable to trusts will apply to all taxable years of an estate.

Third, the conference agreement provides that estates are not required to pay estimated taxes for their first two taxable years. In addition, the conference agreement provides that, in the case of trusts making estimated payments the trustee may elect to assign any amount of its quarterly payments to a beneficiary or beneficiaries. Such an election must be made on the income tax return of the trust which is filed within 65 days after the end of the trust's taxable year. If the trustee makes such an election, the amount of credits assigned to beneficiaries is considered a distribution under the 65-day rule of section 663. Thus, the beneficiary to whom the credit is assigned is deemed to receive a distribution on the last day of the trust's year for Federal income tax purposes. Nonetheless, the beneficiary treats the credit as received on the date the election is made for purposes of the beneficiary's estimated taxes.

Fourth, both newly created and existing trusts (but not estates) are required to adopt a calendar year as their taxable year. However, the conference agreement provides an exception under which tax-exempt trusts (described in sec. 501) and wholly charitable trusts (described in sec. 4947(a)(1)) are not required to adopt a calendar year.

B. Unearned Income of a Minor Child

Present Law

If income-producing assets are transferred to a minor child, income earned on those assets generally is taxed to the child at the child's rate.

House Bill

The unearned income of a child under 14 years of age is taxed to the child at the top rate of the parents to the extent the income is attributable to property received from the parents. The provision applies with respect to a child under 14 years of age who has at least one living parent as of the close of the taxable year.

The top rate of the parents is deemed to be the top rate applicable to individuals unless the parent assigns an unused rate bracket amount at a lower rate to the child.

Earned income and unearned income derived from assets received from sources other than a parent that are placed in a qualified segregated account are taxed at the child's rate. Property eligible to be placed in a qualified segregated account includes earned income, money, or property received from someone other than the parent or step-parent, and property received by reason of the parent's or step-parent's death.

The House bill is effective for taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment generally is the same as the House bill, except that the tax payable by a child on the parental source unearned income is equal to the additional amount of tax that the parent would be required to pay if the child's parental source unearned income were included in the parent's taxable income. The Senate amendment is effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment except that the provision is applied to all net unearned income of a child under 14 years of age regardless of the source of the assets creating the child's net unearned income. Net unearned income means unearned income less the sum of $500 and the greater of: (1) $500 of the standard deduction or $500 of itemized deductions or (2) the amount of allowable deductions which are directly connected with the production of the unearned income. The $500 figures are to be adjusted for inflation beginning in 1988. The conferees expect that the Treasury Department will issue regulations providing for the application of these provisions where either the child or the parent is subject to the alternative minimum tax for the year. In addition, where the tax on capital gains of a trust is determined by reference to that income of the parent (under sec. 644 for any year for which the income of that parent's also is determined by reference to that parent, the conferees intend that the tax of the trust be determined before the tax of the child is determined.)

The following examples illustrate the tax consequences of this provision to a dependent child under age 14 in 1988.

Example 1.—If the child has $400 of unearned income and no earned income, the child's standard deduction is $400 which is allocated against the child's unearned income, so that the child has no Federal income tax liability.

Example 2.—If the child has $900 of unearned income and no earned income, the child's standard deduction is $500 which is allocated against the first $500 of unearned income. The child's net unearned income is $400. Because the child's net unearned income is less than $500, the net earned income is taxed at the child's rates.

Example 3.—If the child has $1,300 of unearned income and no earned income, the child's standard deduction is $500 which is allocated against unearned income. The child has net unearned income equal to $800 of which the first $500 is taxed at the child's rates, and the remaining $300 of unearned income is taxed at the top rate of the parents.

Example 4.—If the child has $700 of earned income and $300 of unearned income, the child's standard deduction is $700 of which $300 is allocated against unearned income and $400 is allocated against earned income. The child has no net unearned income and the remaining $300 of earned income is taxed at the child's rates.

Example 5.—If the child has $800 of earned income and $900 of unearned income, the child's standard deduction is $800 of which $500 is allocated against unearned income and $300 is allocated against earned income. The child has net unearned income of $400. Because net unearned income is less than $500, the child's net unearned income is taxed at the child's rates. The remaining $500 of earned income also is taxed at the child's rates.

Example 6.—Assume the child has $300 of earned income and $1,200 of unearned income, and itemized deductions of $400

(net of the 2-percent floor) which are directly connected with the production of the unearned income. The child has $400 of other deductions. Because of the deductions directly connected with the production of the unearned income ($400) are less than the maximum amount of deductions ($500) which are allocated against unearned income, $500 of the $800 total deductions are allocated against unearned income. Therefore, the child has net unearned income of $700 ($1,200 of unearned income less $500) of which $500 is taxed at the child's rates and $200 is taxed at the parents' rate.

Example 7.—Assume the child has $700 of earned income and $3,000 of unearned income, and itemized deductions of $800 (net of the 2-percent floor) which are directly connected with the production of the unearned income. The child has $200 of other deductions. The entire amount of deductions relating to the production of unearned income is allocated against his unearned income, because this amount ($800) exceeds $500. Therefore, the child has net unearned income equal to $2,200 ($3,000 of unearned income less $800) of which $500 is taxed at child's rates and $1,700 at the parents' top rate. The child has $200 of deductions which is allocated against earned income. The remaining $500 of earned income is taxed at the child's rates.

The provision is effective for taxable years beginning after the date of enactment.

C. Gift and Estate Taxes

1. Current Use Valuation Recapture Period for Pre-1982 Estates

Present Law

Real property used in certain farming and other closely held business activities may be valued at its current use, rather than fair market, value for estate tax purposes. A special recapture tax is imposed if the property is disposed of or ceases to be used in its qualified use within a 10-year recapture period. (In 1981, this recapture period was reduced from 15 years, effective for estates of individuals dying after December 31, 1981.)

House Bill

No provision.

Senate Amendment

The reduction in the recapture period to 10 years enacted in 1981 is extended to estates of individuals who died after 1976 and before 1982.

Conference Agreement

The conference agreement follows the House bill (i.e., retains present law).

2. Filing Estate Tax Current Use Valuation Elections

Present Law

Real property used in certain farming and other closely held business activities may be valued at its current use, rather than fair market, value for estate tax purposes. This provision is available only if it is elected on the first estate tax return filed, and only if the election, as filed, substantially complies with the requirements of Treasury Department Regulations concerning information to be supplied when making the election and execution of an agreement by all parties having an interest in the specially valued property.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that estates of individuals dying before January 1, 1986, that substantially complied with the requirements enumerated on the Federal Estate Tax Return (as opposed to Treasury Department regulations) are allowed to perfect defective elections within 90 days of being notified of errors by the Treasury. Specifically, the March 1982 edition of Form 706, Federal Estate Tax Return, did not specify that the required agreement had to be submitted with the estate tax return. This provision, therefore, permits late filing of the required agreements for estates that used the March 1982 edition of Form 706.

Conference Agreement

The conference agreement follows the Senate amendment, with a modification adding a targeted transitional exception for the estate of an individual who died on January 30, 1984, and for whose estate the Federal estate tax return was filed on October 30, 1984.

3. Gift Tax Treatment of Certain Disclaimers

Present Law

A disclaimer is an irrevocable refusal to accept property. If a disclaimer complies with Federal rules, the disclaimed property is not treated as having been transferred by the party making the disclaimer for Federal gift tax purposes. Disclaimers made after 1976 are governed by statutory rules; disclaimers made before 1977 are governed by Treasury regulations, adopted on November 15, 1958. (The U.S. Supereme Court upheld these regulations in *Jewett* v. *Commissioner*, 455 U.S. 305 (1982).

House Bill

No provision.

Senate Amendment

Disclaimers of property transferred before November 15, 1958, that were made before December 9, 1980, are valid for Federal gift tax purposes if the requirements of the 1958 Treasury regulations (other than timing) were satisfied and the disclaimer was made within a reasonable time after the property vested (rather than was transferred, as required by the regulations).

Conference Agreement

The conference agreement follows the House bill (i.e., retains present law).

4. Gift and Estate Tax Deductions for Certain Conservation Easements

Present Law

A special exception to the general restrictions on tax deductions for charitable contributions of partial interests in property applies in the case of qualified conservation contributions (e.g., easements). (In general, gifts of less than the entire interest in property held by the donor are nondeductible.) To qualify for a gift or estate tax deduction, qualified conservation contributions must satisfy the same requirements, including a conservation purpose requirement, that apply for income tax deductions.

House Bill

No provision.

Senate Amendment

The Senate amendment permits gift or estate tax deductions to be claimed for qualified conservation contributions without regard to whether the contribution satisfies the income tax conservation purpose requirement.

Conference Agreement

The conference agreement follows the Senate amendment, with a targeted transitional exception deeming certain conservation contributions to the Acadia National Park in Maine to satisfy the conservation purpose requirement.

This provision applies to transfers occurring after December 31, 1986.

5. Special Rule for Estate of James H. W. Thompson

Present Law

Gift and estate tax deductions are permitted for charitable contributions only if property with respect to which deductions are claimed is transferred directly to a qualified organization and certain other requirements are satisfied.

House Bill

No provision.

Senate Amendment

The Senate amendment allows an estate tax deduction for certain property transferred by James H. W. Thompson to his nephew who then transferred the property to a charitable foundation pursuant to his uncle's instructions. This property is treated as if it passed directly from Thompson to the charitable foundation.

Conference Agreement

The conference agreement follows the Senate amendment.

6. Gift and Estate Tax Marital Deduction Elections

Present Law

A deduction is allowed for gift and estate tax purposes for property transfered to a spouse. This "marital deduction" is not allowed for terminable interests (i.e. property interests that will not be subject to gift or estate tax if the property is transferred by the donee-spouse) unless the property is qualified terminable interest property ("QTIP" property) and a special election is made. This special election is made, the property is subject to gift or estate tax if the donee-spouse subsequently transfers it.

House Bill

No provision.

Senate Amendment

Estates that in good faith claim a marital deduction on property that is found to be terminable interest property on audit are permitted to make QTIP elections within 90 days after that finding if the property otherwise qualifies for the election.

Conference Agreement

The conference agreement follows the House bill (i.e., retains present law).

D. Generation-Skipping Transfer Tax

Present Law

A generation-skipping transfer tax (GST tax) is imposed on transfers under a trust or similar arrangement having beneficiaries in more than one generation below that of the grantor of the trust. Subject to certain transitional exceptions, the GST tax applies to transfers occurring after June 11, 1976.

Taxable transfers

The GST tax is imposed on taxable terminations under and taxable distributions (other than income) from a trust or a similar arrangement in which beneficiaries in more than one generation younger than that of the grantor have an interest (or certain powers over the property) (i.e., generation-sharing arrangements). Direct transfers to persons more than one generation below that of the grantor are not subject to GST tax (i.e., direct skips).

In the case of trusts having beneficiaries assigned to three or more younger generations, GST tax is imposed on the termination of the interests (or powers) of each of the intermediate younger generations (when the trust property is not subject to gift or estate tax).

Exemption from tax

There is no specific exemption or credit that a grantor may apply against GST tax; however, if a generation-skipping transfer occurs at or after the deemed transferor's death, any unused portion of the deemed transferor's gift and estate tax unified credit may be applied against GST tax. Additionally, a special $250,000 per deemed transferor exemption is permitted for transfers to grandchildren.

Tax rate

The GST tax is imposed at the gift or estate tax rate that would apply if the property were transferred to the beneficiary by a deemed transferor (generally, the parent of the beneficiary). GST tax on taxable terminations is determined on a tax-inclusive basis (like the estate tax) and taxable distributions are taxed on a tax-exclusive basis (like the gift tax).

Credit for State taxes

A limited credit against GST tax is permitted for State taxes imposed on generation-skipping transfers (based on the deemed transferor concept).

House Bill

Similar to present law, a GST tax is imposed on transfers under a trust or similar arrangement having beneficiaries in more than one generation below that of the grantor of the trust. Additionally, a GST tax is imposed on direct transfers to beneficiaries more than one generation below that of the transferor.

Taxable transfers

The modified GST tax is imposed on taxable terminations and taxable distributions (including distributions of income) under generation-sharing arrangements, defined generally as under present law. Taxable beneficiaries include only persons having interests in (as opposed to powers over) property.

The modified GST also applies to direct skips (as described under the discussion of present law).

Exemption from tax

A specific exemption of $1 million per transferor is provided in lieu of the present credit and grandchild exclusion (described in present law). Generation-skipping transfers by married individuals are treated as made one-half by each spouse pursuant to rules similar to the present gift tax rules on such gifts to third persons. A special $2 million per grandchild exemption applies to direct skips.

Tax rate

All generation-skipping transfers are subject to tax at a flat rate, equal to the maximum gift and estate tax rate (currently 55 percent; scheduled to decline to 50 percent in 1988). GST tax on taxable terminations and taxable distributions is determined on a tax-inclusive basis. GST tax on direct skips is determined on a tax-exclusive basis.

Credit for State taxes

A credit against GST tax is permitted equal to 5 percent of State taxes on generation-skipping transfers.

Effective date

The amended GST tax applies to transfers after the date of enactment, subject to the following exceptions:

(1) Inter vivos transfers occurring after September 25, 1985, are subject to the amended tax.

(2) Transfers from trusts that were irrevocable before September 26, 1985, are exempt to the extent that the transfers are not attributable to additions to the trust corpus occurring after that date.

(3) Transfers pursuant to wills in existence before September 26, 1985, are not subject to the amended tax if the testator was incompetent on September 25, 1985, and at all times thereafter until death.

The present GST tax is repealed, retroactive to June 11, 1976.

Senate Amendment

No provisions.

Conference Agreement

The conference agreement follows the House bill, with a modification providing that the special $2 million per grandchild exemption does not apply to transfers made after December 31, 1989.

A second modification provides that an election may be made to treat *inter vivos* and testamentary contingent transfers in trust for the benefit of a grandchild as direct skips if (1) the transfers occur before date of enactment, and (2) the transfers would be direct skips except for the fact that the trust instrument provides that, if the grandchild dies before vesting of the interest transferred, the interest is transferred to the grandchild's heirs (rather than the grandchild's estate). Transfers treated as direct skips as a result of this election are subject to Federal gift and estate tax on the grandchild's death in the same manner as if the contingent gift over had been to the grandchild's estate.

A third modification exempts from the revised generation-skipping transfer tax testamentary direct skips occurring under wills executed before the date of enactment if the testator dies before January 1, 1987.

The conferees adopted these delays in effective dates to permit a reasonable period for individuals to re-execute their wills to conform to the extension of GST tax to direct skips. No comparable period is provided for generation-sharing transfers because those transfers are subject to GST tax under present law.

TITLE XV. COMPLIANCE AND TAX ADMINISTRATION

A. Penalties

1. Penalties for Failure to File Information Returns or Statements

Present Law

The Code requires that information returns be filed with the IRS, and a copy be given to the taxpayer, detailing all wages, most other types of income, and some deductions. These requirements apply to a variety of specific payments, and are described in a number of Code provisions.

The Code also provides civil penalties for failure either to file an information return with the IRS (sec. 6652) or to provide a copy to the taxpayer (sec. 6678). The general penalty for failure to supply an information return to the IRS is separate from the penalty for failure to give a copy to the taxpayer. Generally, these penalties are $50 for each failure; the maximum penalty under each provision is $50,000 per year.

The Code also provides a penalty of either $5 or $50 (depending on the nature of the failure) for failure to furnish a correct taxpayer identification number (for individuals, the social security number) (sec. 6676). The Code does not provide a penalty for including other incorrect information on an information return.

House Bill

The House bill consolidates the penalty for failure to file an information return with the IRS with the penalty for failure to supply a copy of that information return to the taxpayer in the same subchapter of the Code. The general level of each of these penalties remains at $50 for each failure. The maximum penalty is raised from $50,000 to $100,000 for each category of failure.[1] Thus, a maximum penalty of $100,000 applies to failure to file information returns with the IRS, and another maximum penalty of $100,000 applies to failure to supply copies of information returns to taxpayers.

The House bill also adds to the Code a new penalty for failure to include correct information either on an information return filed with the IRS or on the copy of that information return supplied to the taxpayer. This new penalty applies to both an omission of information or an inclusion of incorrect information. The amount of the penalty is $5 for each information return or copy for the taxpayer, up to a maximum of $20,000 in any calendar year.

The House bill also clarifies the provisions relating to furnishing a written statement to the taxpayer of a number of the substantive information reporting provisions of the Code. Under present law, a number of these provisions arguably may be technically effective only if the person required to supply the copy to the taxpayer has actually provided the information return to the IRS. These provisions have been redrafted so that it is clear that the requirement to supply a copy of the information return to the taxpayer is triggered when there is an obligation to file (instead of the actual filing of) an information return with the IRS.

The provision is effective for information returns the due date of which (determined without regard to extensions) is after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that the Senate amendment also provides that the $20,000 maximum penalty for filing inaccurate information returns does not apply in cases of intentional disregard. The Senate amendment is effective for information returns the due date of which (determined without regard to extensions) is after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, except that certain modifications of the information return provisions for interest, dividends, and patronage dividends are effective on the date of enactment (see Modification of Separate Mailing Requirement for Certain Information Reports, C.6., below).

2. Increase in Penalty for Failure to Pay Tax

Present Law

The Code provides that a taxpayer who fails to pay taxes when due must pay a penalty (sec. 6651(a)(2) and (3)). The penalty applies to a taxpayer who fails to pay taxes shown on the tax return. It also applies to a

[1] The bill also raises from $50,000 to $100,000 the maximum penalty for failure to supply taxpayer identification numbers (sec. 6676).

taxpayer who fails to pay taxes not shown on the tax return within 10 days of notice and demand for payment by the IRS. The penalty is one-half of one percent of the tax for the first month not paid, and is an additional one-half of one percent for each additional month the failure to pay continues, up to a maximum of 25 percent.

This penalty can be abated if the failure is due to reasonable cause and not willful neglect. This penalty is not deductible for tax purposes.

House Bill

The House bill modifies the penalty for failure to pay taxes that exists in present law by increasing in specified situations the amount of that penalty from one-half of one percent per month to one percent per month.[2] This increase occurs after the IRS notifies the taxpayer that the IRS will levy upon the assets of the taxpayer. The IRS can do this in either of two ways. The most common method is that the IRS sends to the taxpayer a notice of intention to levy; this notice must be sent out at least 10 days before the levy occurs (sec. 6331(d)). In these circumstances, the increase in the penalty occurs at the start of the month following the month in which the 10-day period expires. The second method may be used when the IRS finds that the collection of the tax is in jeopardy. If this occurs, the IRS may make notice and demand for immediate payment of the tax, and, if the tax is not paid, the IRS may levy upon the assets of the taxpayer without regard to the 10-day requirement (sec. 6331(a)). Under this second method, the IRS makes notice and demand for immediate payment either in person or by mail. In these circumstances, the increase in the penalty occurs at the start of the month following the month in which notice and demand is made.

The House bill also improves the coordination of the penalty for failure to pay taxes with the penalty for failure to file a tax return.

The increase in the penalty for failure to pay taxes (as well as the repeal of the special coordination rule of section 6651(c)(1)(B)) is effective for amounts assessed for periods after December 31, 1985, regardless of when the failure to pay began.

Senate Amendment

The Senate amendment is the same as the House bill, effective after December 31, 1986. In addition, the Senate amendment requires the Treasury Department to report to the Senate Committee on Finance and the House Committee on Ways and Means by March 1, 1987, with specific recommendations as to how the cost of collection charge described in the President's tax reform proposal would be implemented.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment in increasing the failure to pay penalty, generally effective for periods after December 31, 1986. The conference agreement does not include the provision of the Senate amendment requiring a report on the cost of collection charge.

[2] Once the penalty rate in effect is one percent for any month with respect to a particular taxable year and type of tax, the one-percent rate is applicable to any penalty for failure to pay taxes for that taxpayer for all subsequent months.

3. Negligence and Fraud Penalties

Present Law

Negligence

Taxpayers are subject to a penalty if any part of an underpayment of tax is due to negligence or intentional disregard of rules or regulations (but without intent to defraud) (Code sec. 6653(a)). There are two components to this penalty. The first component is 5 percent of the total underpayment, where any portion of the underpayment is attributable to negligence or intentional disregard of rules or regulations. Thus, if a taxpayer has underpaid $1,000 in taxes and the portion due to negligence is $200, the amount of the penalty is $50 (5 percent of $1,000). The second component is an amount equal to one-half the interest payable on the portion of the underpayment attributable to negligence or intentional disregard, for the period beginning on the last day prescribed for payment of the underpayment (without regard to any extension) and ending on the date of the assessment of the tax (or the date of payment of the tax, if that date is earlier).

Generally, once the IRS has determined that negligence existed, the burden is on the taxpayer to establish that the IRS' determination of negligence is erroneous. The taxpayer must meet a higher standard in the case of interest or dividend payments (sec. 6653(g)). This section provides that if the taxpayer fails to include in income an interest or dividend payment shown on an information return, the portion of the underpayment attributable to this failure is treated as due to negligence in the absence of clear and convincing evidence to the contrary. The effect of this provision is that the IRS may automatically assert the negligence penalty in these circumstances, and the taxpayer must present clear and convincing evidence that no negligence was involved in order to avoid the penalty.

The negligence penalty applies only to underpayments of income taxes, gift taxes, and the windfall profits tax.

Fraud

Taxpayers are also subject to a penalty if any part of an underpayment of tax is due to fraud (sec. 6653(b)). This penalty is in lieu of the negligence penalty. There are two components to the fraud penalty. The first component is 50 percent of the total underpayment, where any portion of the underpayment is attributable to fraud. Thus, if a taxpayer has underpaid $1,000 in taxes and the portion due to fraud is $500, this component of the penalty is $500 (50 percent of $1,000). The second component is an amount equal to one-half the interest payable on the portion of the underpayment attributable to fraud, for the period beginning on the last day prescribed for payment of the underpayment (without regard to any extension) and ending on the date of the assessment of the tax (or the date of payment of the tax, if that date is earlier). The burden of proof is on the IRS to establish that fraud existed (sec. 7454(a)) with respect to an item on the taxpayer's return.

House Bill

Negligence

The House bill expands the scope of the negligence penalty by making it applicable to all taxes under the Code. The bill also generally redrafts the negligence penalty to make it clearer and more comprehensible. One element of that redrafting involves the provision of a definition of negligence. The bill includes within the scope of the definition of negligence both any failure to make a reasonable attempt to comply with the provisions of the Code as well as any careless, reckless, or intentional disregard of rules or regulations. The bill does not, however, limit the definition of negligence to these items only. Thus, all behavior that is considered negligent under present law will remain within the scope of this negligence penalty. Also, any behavior that is considered negligent by the courts but that is not specifically included within this definition is also subject to this penalty.

The House bill also expands the scope of the special negligence penalty that is currently applicable to failures to include in income interest and dividends shown on an information return. The bill expands this provision so that it is applicable to failures to show properly on the taxpayer's tax return any amount that is shown on any information return. This penalty applies to the same information returns that are subject to the penalties for failure to provide information returns. Thus, if a taxpayer fails to show properly on the taxpayer's tax return any amount that is shown on an information return, the taxpayer's failure is treated as negligence in the absence of clear and convincing evidence to the contrary.

Fraud

The House bill modifies the fraud penalty by increasing the rate of the penalty but at the same time narrowing its scope. First, the bill increases the rate of the basic fraud penalty from 50 to 75 percent. (The time-sensitive component of the fraud penalty is not altered.) Second, the scope of the fraud penalty is reduced so that in effect it applies only to the amount of the underpayment attributable to fraud (this is essentially the same amount to which the present-law time-sensitive component of the fraud penalty applies). The bill does this by providing that, once the IRS has established that any portion of an underpayment is attributable to fraud, the entire underpayment is treated as attributable to fraud, except to the extent that the taxpayer establishes that any portion of the underpayment is not attributable to fraud. This is done so that, once the IRS has initially established that fraud occurred, the taxpayer then bears the burden of proof to establish the portion of the underpayment that is not attributable to fraud. The fraud penalty is determined at the top marginal rate applicable to the taxpayer.

These modifications to the fraud penalty do not affect the statute of limitations for false or fraudulent returns (sec. 6501(c)). Thus, if a taxpayer files a return that is in some respects fraudulent, the statute of limitations with respect to the entire return never expires.

Interaction of negligence and fraud penalties

If an underpayment of tax is partially attributable to negligence and partially attributable to fraud, the negligence penalty (which generally applies to the entire underpayment of tax) does not apply to any portion of the underpayment with respect to which a fraud penalty is imposed.

The amendments to the negligence and fraud penalties are applicable to returns the due date of which (determined without regard to extensions) is after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill. In addition, the Senate amendment modifies the negligence penalty by increasing the rate of the penalty but at the same time narrowing its scope. First, the bill increases the rate of the negligence penalty from 5 to 10 percent. (The time-sensitive component of the negligence penalty is not altered.) Second, the scope of the negligence penalty is reduced so that in effect it applies only to the amount of the underpayment attributable to negligence (this is the same amount to which the present-law time-sensitive component of the negligence penalty applies). The negligence penalty is determined at the top marginal rate applicable to the taxpayer.

The amendments to the negligence and fraud penalties are applicable to returns the due date of which (determined without regard to extensions) is after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, except that it does not increase the rate of the negligence penalty or apply it only to the portion of the underpayment attributable to negligence. Instead, the conference agreement maintains the 5-percent rate of present law, and the present-law application of that penalty to the entire amount of the underpayment, not just to the portion of the underpayment attributable to negligence.[3]

4. Penalty for Substantial Understatement of Tax Liability

Present Law

If a taxpayer substantially understates income tax for any taxable year, the taxpayer must pay an addition to tax equal to 10 percent of the underpayment of tax attributable to the understatement (sec. 6661). An understatement is substantial if it exceeds the greater of 10 percent of the tax required to be shown on the tax return or $5,000 ($10,000 in the case of most corporations). An understatement is generally the excess of the amount of tax required to be shown on a tax return over the amount of tax actually shown on the tax return. The penalty generally does not apply to amounts with respect to which (1) there was substantial authority for the taxpayer's treatment of the amount, or (2) the taxpayer discloses the relevant facts with respect to that amount on the tax return.

House Bill

No provision.

Senate Amendment

The Senate amendment increases the addition to tax for a substantial understatement of tax liability from 10 percent to 20 percent of the amount of the underpayment of tax[4] attributable to the understatement. The increase in this addition to tax is applicable to returns the due date of which (determined without regard to extensions) is after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

B. Interest Provisions

1. Differential Interest Rate

Present Law

Taxpayers must pay interest to the Treasury on underpayments of tax (Code sec. 6601). Interest generally accrues from the due date of the tax return (determined without regard to extensions). The Treasury must pay interest to taxpayers on overpayments of tax (sec. 6611). Both the rate taxpayers pay to the Treasury and the rate the Treasury pays to taxpayers are the same rate (sec. 6621). That rate is determined semi-annually for the 6-month periods ending on September 30 and March 31. The adjusted rate takes effect on the following January 1 (for September 30 determinations) and July 1 (for March 31 determinations). The rate utilized is the prime rate quoted by large commercial banks as determined by the Board of Governors of the Federal Reserve System.

House Bill

The House bill provides that the interest rate that Treasury pays to taxpayers on overpayments is the three-month Treasury bill rate plus 2 percentage points. The bill also provides that the interest rate that taxpayers pay to the Treasury on underpayments is the three-month Treasury bill rate plus 3 percentage points. The rates are rounded to the nearest full percentage.

The interest rates are to be adjusted quarterly. The rates are determined during the first month of a calendar quarter, and become effective for the following calendar quarter. Thus, for example, the rates that are determined during January are effective for the following April through June. This reduces by one month (from three months to two) the lag that exists in present law between the determination of the interest rate and the date it becomes effective.

The interest rate is determined by the Secretary based on the average market yield on outstanding three-month Treasury bills. This is parallel to the mechanism for determining Federal rates, which are used to test the adequacy of interest in certain debt instruments issued for property and certain other obligations (see sec. 1274(d)). This provision is effective for purposes of determining interest for periods after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, except that the interest rate is based upon the Federal short-term rate. The interest rates are determined by the Secretary based on the average market yield on outstanding marketable obligations of the United States with remaining periods to maturity of three years or less. This is the mechanism for determining short-term Federal rates, which are used to test the adequacy of interest in certain debt instruments issued for property and certain other obligations (see sec. 1274(d)).

Section 6601(f) provides that, to the extent a portion of tax due is satisfied by a credit of an overpayment, no interest is imposed on that portion of the tax. Consequently, if an underpayment of $1,000 occurs in year 1 and an overpayment of $1,000 occurs in year 2, no interest is imposed in year 2 because of the rule of section 6601(f). The IRS can at present net many of these offsetting overpayments and underpayments. Nevertheless, the IRS will require a transition period during which to coordinate differential interest rates with the requirements of section 6601(f). The Senate amendment, therefore, provides that the Secretary of the Treasury may prescribe regulations providing for netting of tax underpayments and overpayments through the period ending three years after the date of enactment of the bill. By that date, the IRS should have implemented the most comprehensive netting procedures that are consistent with sound administrative practice.

This provision is effective for purposes of determining interest for periods after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

2. Interest on Accumulated Earnings Tax

Present Law

The accumulated earnings tax (sec. 531) is imposed to prevent corporations from accumulating (rather than distributing) income with the intent of reducing or avoiding taxes. Interest is charged only from the date the IRS demands payment of the tax, rather than the date the return was originally due to be filed.[5]

House Bill

The House bill provides that interest is imposed on underpayments of the accumulated earnings tax from the due date (without regard to extensions) of the income tax return for the year the tax is initially imposed, effective for returns that are due (without regard to extensions) after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, effective for returns that are due (without regard to extensions) after December 31, 1986.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, effective for returns that are due (without regard to extensions) after December 31, 1985.

C. Information Reporting Provisions

1. Information Reporting on Real Estate Transactions

Present Law

Brokers must, when required by Treasury regulations, file information returns on the business they transact for customers (sec. 6045). To date, the IRS has issued regulations requiring reporting only of gross proceeds of sales of securities, commodities, regulated futures contracts, and precious metals. Reporting on real estate transactions is not currently required under these regulations. The term "broker" is broadly defined as any person who, in the ordinary course of a trade or business, stands ready

[3] In a recent case, the Sixth Circuit held that the negligence penalty "should be applied only to that portion of the deficiency attributable to [the negligent action]." *(Asphalt Products Co. v. Comm'r.*, Nos. 84-1841, 84-1882, slip op. (6th Cir. July 17, 1986)). The conference agreement provides that the negligence penalty applies (once one element of negligence has been demonstrated) to the entire underpayment, not just to the portion attributable to negligence. The conference agreement is, with respect to this issue, a continuation of the rule of present law, which also provides that the negligence penalty applies to the entire underpayment, not just to the portion attributable to negligence. The conferees note that this case both inaccurately states present law and is in any event of no effect under the conference agreement.

[4] Examples of the types of taxes to which this provision applies include individual income taxes, corporate income taxes, and the unrelated business income tax.

[5] See Rev. Rul. 72-324, 1972-1 C.B. 399.

to effect sales to be made by others (Treas. Reg. sec. 1.6045-1).

House Bill

The House bill requires that real estate transactions be reported. The reporting is to be done by the settlement attorney or other stakeholder. This would generally be the person responsible for closing the transaction. Thus, in some localities the stakeholder could include either a title insurance company or a bank. If there is no stakeholder in a transaction, the reporting is to be done by the person designated in Treasury regulations.

The provision is effective for real estate transactions occurring on or after January 1, 1986.

Senate Amendment

The Senate amendment also requires that real estate transactions be reported. The title company is the first person responsible to do the information reporting. If there is no title company, then the reporting is to be done by the mortgage lender. If there is no mortgage lender, then the reporting is to be done by the settlement attorney or other person responsible for closing the transaction. If there is no settlement attorney, the reporting is to be done by the seller's broker. If there is no seller's broker, the reporting is to be done by the buyer's broker. If there is no buyer's broker, the reporting is to be done in accordance with regulations to be prescribed by the Treasury.

The Senate amendment also provides that real estate transactions will be subject to backup withholding (sec. 3406) only to the extent required by Treasury regulations. Treasury is to provide taxpayers with guidance as to how backup withholding is to be implemented with respect to real estate transactions. The provision is effective for real estate transactions with respect to which closing on the contract occurs on or after January 1, 1987.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, with modifications. The conference agreement provides that the primary responsibility for reporting is on the person responsible for closing the transaction, including any title company or attorney who closes the transaction. This is generally the person conducting the settlement. Treasury may issue regulations specifying who is the person responsible for closing the transaction, because it may not be clear which of several persons is the one responsible for closing the transaction. (These regulations need not rely upon the presence or absence of a legal obligation at closing.) Thus, Treasury may provide uniform rules to determine which of the persons involved with the closing is the one with primary responsibility for the information reporting.

If there is no person responsible for closing the transaction, the reporting must be done by the mortgage lender. If there is no mortgage lender, the reporting must be done by the seller's broker. If there is no seller's broker, the reporting must be done by the buyer's broker. If there is no buyer's broker, the reporting is to be done in accordance with regulations to be prescribed by the Secretary.

The Secretary is to provide guidance to taxpayers on how this information reporting is to be accomplished well before the effective date of this provision. The Secretary should provide guidance as to what real estate transactions are subject to information reporting. The Secretary may also exclude from information reporting certain types of real estate transactions where information reporting on those transactions would not be useful. Information reporting is not required on refinancings of real estate, unless the Secretary otherwise provides. The Secretary should also provide guidance as to the gross proceeds required to be reported.

The conferees anticipate that this information reporting will be done on a Form 1099, similar to that required for other transactions effected by brokers. The conferees also anticipate that the rules requiring that information returns from brokers be filed on magnetic media (see sec. 6011(e)) will encompass these information returns on real estate. Thus, all the information returns required to be filed by one entity would generally be filed together in one magnetic media filing. Because the provision is drafted so that mandatory reporting on real estate transactions is done under the general information reporting requirements relating to brokers (sec. 6045 (a) and (b)), all penalties and related provisions that apply to the general broker reporting requirements also apply to reporting on real estate transactions.

The provision is effective for real estate transactions with respect to which closing on the contract occurs on or after January 1, 1987.

2. Information Reporting on Persons Receiving Contracts From Certain Federal Agencies

Present Law

There is no provision of present law that requires information reporting on persons receiving Federal contracts.

House Bill

The House bill requires the head of each Federal executive agency to file an information return indicating the name, address, and taxpayer identification number (TIN) of each person with which the agency enters into a contract. The Secretary is given the authority both to establish minimum amounts for which no reporting is necessary as well as to extend the reporting requirements to Federal license grantors and subcontractors of Federal contracts.

This provision is effective on January 1, 1986. Thus, all contracts signed on or after that date are subject to information reporting. In addition, all contracts signed prior to that date are subject to information reporting if they are still in effect on that date.

Senate Amendment

The Senate amendment is the same as the House bill, effective January 1, 1987.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, effective January 1, 1987.

3. Information Reporting on Royalties

Present Law

A number of provisions of the Code require that payors of specified payments report those payments to the IRS and provide a copy of the information report to the taxpayer receiving the payment. Section 6041 is the broadest of these provisions; this section requires information reporting on "rent, salaries, wages, premiums, annuities, compensations, remunerations, emoluments, or other fixed or determinable gains, profits, and income." The Treasury regulations for this section specifically require information reporting on royalties.

Information reporting under section 6041 applies to payments totalling $600 or more during the taxable year. Other information reporting provisions, such as those for interest (section 6049), dividends (section 6042), patronage dividends (section 6044), and unemployment compensation (section 6050B), apply to payments totalling $10 or more during the taxable year.

House Bill

No provision.

Senate Amendment

The Senate amendment includes a new provision of the Code that requires that persons who make payments of royalties aggregating $10 or more to any other person in a calendar year must provide an information report on the royalty payments to the IRS. A copy of this information report must be supplied to the taxpayer. If a person makes payments to a nominee, the nominee must report the information to the taxpayer and to the IRS, as required in Treasury forms or regulations. Examples of royalty payments required to be reported under this provision include royalty payments with respect to the right to exploit natural resources, such as oil, gas, coal, timber, sand, gravel, and other mineral interests, as well as royalty payments for the right to exploit intangible property, such as copyrights, trade names, trademarks, franchises, books and other literary compositions, musical compositions, artistic works, secret processes or formulas, and patents.

The generally applicable rules for information returns for payments of interest and dividends apply to this provision. Thus, the information report to the taxpayer must be provided by the end of January and the report to the IRS must be provided by the end of February of the year following the year in which the payments were made. Payors filing large numbers of these reports with the IRS are subject to the general magnetic media filing requirements of section 6011(e)(1). If the payee does not furnish the payor with the payee's taxpayer identification number (for individuals, the social security number), the royalty payments generally are subject to backup withholding.

This provision is effective for royalty payments made after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

4. Taxpayer Identification Numbers (TINs) Required for Dependents Claimed on Tax Returns

Present Law

The taxpayer (and the taxpayer's spouse, if they file a joint return) must put his taxpayer identification number (TIN) on his tax return. There is no requirement that a taxpayer claiming a dependent on a tax return report the TIN of that dependent on that tax return. A taxpayer's TIN is generally that taxpayer's social security number. Some taxpayers are exempted from social security self-employment taxes due to their religious beliefs. These taxpayers do not have a social security number; instead, the IRS administratively assigns them a taxpayer identification number.

House Bill

No provision.

Senate Amendment

A taxpayer claiming a dependent who is at least 5 years old must report the taxpayer identification number of that dependent on that tax return. This provision is effective

for returns due on or after January 1, 1987 (without regard to extensions).

Conference Agreement

The conference agreement follows the Senate amendment, effective for returns due on or after January 1, 1988 (without regard to extensions). The conferees have delayed the effective date for one year so that taxpayers may apply for and receive TINs for their dependents who do not have them well in advance of the due date of the returns on which the TINs must be provided. In addition, this delay will provide sufficient time for the IRS and the Social Security Administration to publicize this new requirement extensively.

The penalty for failing to include the TIN of a dependent (or for including an incorrect TIN) is $5 per TIN per return. In addition, the IRS may continue its current practice of denying any deduction for a dependent if it cannot be established that it is proper to claim that dependent on the tax return.

The conferees note that certain taxpayers, because of their religious beliefs, are exempted from the social security self-employment taxes (sec. 1402(g)). The conferees intend that these taxpayers and their dependents who currently acquire their TINs from the IRS continue to be permitted to do so. It is the intent of the conferees that these taxpayers continue to be exempted from the general requirement of obtaining a social security number from the Social Security Administration. Others of these taxpayers obtain their TINs under special procedures with the Social Security Administration. The conferees intend that these procedures continue to be available to these taxpayers.

Additionally, the IRS may continue its current administrative practice of directly providing TINs for nonresident aliens, rather than requiring that nonresident aliens obtain their TINs from the Social Security Administration.

5. Tax-exempt Interest Required to be Shown on Tax Returns

Present Law

There is no requirement that all taxpayers report the amount of tax-exempt interest they receive on their tax returns. The individual income tax return (Form 1040) for 1985 does, however, require that taxpayers with taxable social security benefits report the tax-exempt interest they receive.

House Bill

The House bill requires that any person required to make a return of income under section 6012 include on that return the amount of tax-exempt interest received or accrued during the taxable year. The provision is effective for taxable years beginning after December 31, 1985.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill, effective for taxable years beginning after December 31, 1986.

6. Modification of Separate Mailing Requirement for Certain Information Reports

Present Law

Payors of interest, dividends, and patronage dividends are required to report to the IRS the amounts of these payments that the payors make (secs. 6042, 6044, and 6049). Payors are required to provide a copy of this information report to the taxpayer who received the payment. These information reports must be made on the official IRS form (Form 1099) or an authorized substitute. The Code requires that the copy of the information report supplied to the taxpayer must be provided either in person or in a separate, first-class mailing. Generally, nothing other than the information report is permitted to be enclosed in the envelope.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that payors of interest, dividends, patronage dividends, and royalty payments must provide copies of information returns to the taxpayer either in person (as is provided under present law) or in a statement mailing sent by first-class mail. The only enclosures that can be made with a statement mailing are: (1) a check, (2) a letter explaining why no check is enclosed (such as, for example, because a dividend has not been declared payable), or (3) a statement of the taxpayer's specific account with the payor (such as a year end summary of the taxpayer's transactions with the payor).[6] The envelope must state on the outside "Important Tax Return Document Enclosed." In addition, each enclosure (i.e. the check, the letter, or the account statement) must state "Important Tax Return Document Enclosed." A mailing is not a statement mailing if it encloses any other material such as advertising, promotional material, or a quarterly or annual report.

This provision is effective for information returns required to be filed after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment, except that the provision is effective for information returns with respect to interest, dividends, and patronage dividends filed after the date of enactment. IRS regulations permit these three types of information returns to be mailed prior to December 31 under certain conditions. Payors satisfying those conditions will be able to take advantage of this liberalized enclosure rule for those three types of information returns that are mailed after the date of enactment.

7. Information Reporting on State and Local Taxes

Present Law

Individual taxpayers who itemize deductions may deduct State and local income, real property, personal property, and general sales taxes. There is no provision of present law that requires State and local governments to provide information reports to the IRS and the taxpayer on payments of State and local income, real property, and personal property taxes.

House Bill

The House bill requires that any State or local government that imposes an income tax, a real property tax, or a personal property tax, report to the individual who paid those taxes and to the IRS the amount of those taxes paid by that individual. These information reports must be filed in accordance with the timetable generally applicable to other information returns.

The provision is effective on January 1, 1987. Thus, State and local governments will first provide information returns to individual taxpayers by the end of January 1988, and to the IRS by the end of February 1988, on taxes that were paid in 1987.

Senate Amendment

No provision.

Conference Agreement

The conference agreement does not include the provision of the House bill.

D. Tax Shelters

1. Tax Shelter User Fee

Present Law

The cost of administering the tax law with respect to tax shelters is paid as part of the overall IRS budget, which is funded from general revenues. This cost is approximately $165 million annually, and includes audits, examination, appeals, litigation, and criminal investigation. No specific fee is imposed on tax shelters or tax shelter-related audits or investigations to offset this cost.

House Bill

No provision.

Senate Amendment

The Senate amendment requires taxpayers who, with respect to each tax shelter, claim on their tax returns cumulative net losses (plus three times the value of cumulative tax credits) that exceed cumulative actual cash invested in the tax shelter to pay a user fee of 1 percent of the losses claimed and 3 percent of the credits claimed with respect to that tax shelter (as defined in section 461(i)). These percentages are set at a level that will raise revenue approximately equal to the estimated IRS cost of administering the law with respect to tax shelters.

The provision is effective for returns filed after December 31, 1986.

Conference Agreement

The conference agreement does not include the provision of the Senate amendment.

2. Tax Shelter Registration

Present Law

Tax shelter organizations are required to register with the IRS tax shelters they organize, develop, or sell (sec. 6111). A tax shelter is any investment for which the ratio of the deductions plus 200 percent of the credits to the cash actually invested is greater than 2 to 1. The investment also must (1) be subject to Federal or State securities requirements, or (2) be privately placed with 5 or more investors with an aggregate amount that may be offered for sale exceeding $250,000.

House Bill

No provision.

Senate Amendment

Tax credits are multiplied by 375 percent (instead of 200 percent) to conform the tax shelter ratio computation more closely to the tax rate schedule in the Senate amendment.

This provision is effective July 1, 1987 (the same date that the rate changes are effective).

Conference Agreement

The conference agreement follows the Senate amendment, modified to conform to the new tax rate schedule agreed to in conference. The provision is effective for tax shelters in which interests are first offered for sale after December 31, 1986.

[6] These are in addition to the other enclosures, such as other information reports or tax forms, that the IRS currently permits to be enclosed.

3. Tax Shelter Penalties

a. Penalty for failure to register a tax shelter

Present Law

Specified tax shelters are required to register with the IRS and obtain a tax shelter identification number (see previous item). The penalty for failure to register a tax shelter with the IRS is $10,000 or, if less, one percent of the aggregate amount invested in the tax shelter (but in no event less than $500) (sec. 6707(a)).

House Bill

No provision.

Senate Amendment

The Senate amendment increases the level of this penalty to the greater of one percent of the aggregate amount invested in the tax shelter or $10,000. This provision is effective on the date of enactment.

Conference Agreement

The conference agreement deletes the $10,000 maximum for the penalty from present law, effective on the date of enactment.

b. Penalty for failure to report the tax shelter identification number

Present Law

If a taxpayer invests in a tax shelter that has a tax shelter identification number, the taxpayer is required to include that number on the taxpayer's tax return (sec. 6707(b)). The penalty for failure to do so is $50, unless the failure is due to reasonable cause.

House Bill

No provision.

Senate Amendment

The Senate amendment increases the penalty for failure to report a tax shelter identification number on a tax return from $50 to $250. The present-law exception from the penalty where the failure to report the number is due to reasonable cause remains unchanged. The provision is effective for tax returns filed after the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment.

c. Penalty for failure to maintain lists of tax shelter investors

Present Law

Organizers and sellers of specified tax shelters are required to maintain lists of investors (sec. 6112). The penalty for failure to do so is $50 for each name missing from the list, unless the failure is due to reasonable cause, up to a maximum of $50,000 per year (sec. 6708).

House Bill

No provision.

Senate Amendment

The Senate amendment increases the penalty for failure to maintain lists of tax shelter investors from $50 to $100 per name omitted. The Senate amendment also increases the maximum penalty that can be imposed in any calendar year from $50,000 to $100,000. The increase in this penalty is effective on the date of enactment.

Conference Agreement

The conference agreement raises the maximum penalty to $100,000, effective for failures occurring or continuing after the date of enactment. The conference agreement does not raise the penalty of $50 per name omitted.

4. Tax Shelter Interest

Present Law

Taxpayers who underpay their taxes must pay interest. If the interest is attributable to an underpayment of tax of more than $1,000 that is attributable to a tax-motivated transaction (such as a tax shelter), interest is computed at 120 percent of the generally applicable interest rate.

House Bill

No provision.

Senate Amendment

The Senate amendment increases the rate of interest computed with respect to underpayments of tax attributable to tax-motivated transactions from 120 percent to 200 percent of the generally applicable interest rate. The provision is effective for interest accruing after December 31, 1986.

Conference Agreement

The conference agreement does not include the provision of the Senate amendment increasing the rate of interest on tax-motivated transactions. The conference agreement instead makes a technical correction to the present-law provision that increases the rate of interest for tax-motivated transactions.

The Tax Court has recently held (*DeMartino v. Comm'r.*, T. C. Memo 1986-263 (June 30, 1986); *Forseth v. Comm'r.*, T. C. Memo 1985-279 (June 11, 1985)) that sham transactions that would be subject to this special interest rate were they not shams are not subject to this special interest rate because they are shams. The conferees view it as anomalous that a genuine transaction (lacking the proper profit motive) would be subject to a higher interest rate, while a sham transaction, which is significantly more abusive, would escape the higher interest rate simply because it is a sham. Accordingly, the conference agreement, consistent with the legislative intent in originally enacting section 6621(d) in 1984, explicitly adds sham or fraudulent transactions to the list of transactions subject to this higher interest rate. The intent of the conferees is to reverse the holding of these Tax Court cases on this issue.

This clarification of present law applies to interest accruing after December 31, 1984, which is the date this higher interest rate took effect. This clarification does not apply, however, to any underpayment with respect to which there was a final court decision (either through exhausting all appeals rights or the lapsing of the time period within which an appeal must be pursued) before the date of enactment of this Act.

E. Estimated Tax Payments

1. Individuals

Present Law

Individuals owing income tax who do not make estimated tax payments are generally subject to a penalty (Code sec. 6654). In order to avoid the penalty, individuals must make quarterly estimated tax payments that equal at least the lesser of 100 percent of last year's tax liability or 80 percent of the current year's tax liability. Amounts withheld from wages are considered to be estimated tax payments.

House Bill

The House bill increases from 80 percent to 90 percent the proportion of the current year's tax liability that taxpayers must make as estimated tax payments in order to avoid the estimated tax penalty. The alternate test of 100 percent of the preceding year's liability remains unchanged. This provision is effective with respect to taxable years beginning after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, effective with respect to taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, effective with respect to taxable years beginning after December 31, 1986. Thus, the estimated tax payment due January 15, 1987, which is the final payment for taxable year 1986, is unaffected by this provision. All subsequent estimated tax payments are, however, subject to this provision.

2. Certain Tax-Exempt Organizations

Present Law

Private foundations must pay an excise tax on their net investment income. Tax-exempt organizations are subject to tax on income from an unrelated business. These taxes are paid when the tax returns are filed.

Corporations are required to make quarterly estimated tax payments of corporate income taxes; failure to do so is subject to a penalty.

House Bill

No provision.

Senate Amendment

Quarterly estimated payments must be made of the excise tax on net investment income of private foundations and of the tax on unrelated business income of tax-exempt organizations. These quarterly estimated payments must be made under the same rules that apply to corporate income taxes. These provisions are effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

3. Waiver of Estimated Tax Penalties

Present Law

Under present law, if the withholding of income taxes from wages does not cover an individual's total income tax liability, the individual, in general, is required to make estimated tax payments. Also, corporations are normally required to make quarterly estimated tax payments. An underpayment of an estimated tax installment will, unless certain exceptions are applicable, result in the imposition of an addition to tax on the amount of underpayment for the period of underpayment.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement makes several changes that increase tax liabilities from the beginning of 1986. Consequently, the conference agreement allows individual taxpayers until April 15, 1987, and corporations until March 15, 1987 (the final filing dates for calendar year returns) to pay their full 1986 income tax liabilities without incurring any additions to tax on account of underpayments of estimated tax to the extent that the underpayments are attributable to changes in the law made by the conference agreement.

F. Tax Litigation and Tax Court

1. Awards of Attorney's Fees in Tax Cases

Present Law

The Civil Rights Attorney's Fees Awards Act of 1976

The Civil Rights Attorney's Fees Awards Act of 1976 (42 U.S.C. sec. 1988) provides, in part, that in any civil action or proceeding brought by or on behalf of the United States to enforce, or charging a violation of, a provision of the Internal Revenue Code, the court in its discretion may allow the prevailing party, other than the United States, reasonable attorney's fees as a part of the costs. This provision is limited to actions brought by or on behalf of the Federal Government (that is, to cases in which the taxpayer is the defendant). Most civil tax litigation is initiated by the taxpayer who brings suit against the Government. In the United States Tax Court, the taxpayer is the petitioner in a deficiency proceeding. In the Federal district courts and the U.S. Claims Court, the taxpayer is the plaintiff suing the Government for a refund.

The Equal Access to Justice Act

In 1980, as part of Public Law 96-481, Congress enacted the Equal Access to Justice Act (28 U.S.C. sec. 2412) which, in part, authorizes awards to a prevailing party, other than the United States, of attorney's fees and other expenses, unless the court finds that the position of the United States was substantially justified or that special circumstances make an award unjust. This provision applies, specifically, to cases in Federal district courts and the United States Claims Court. However, the provision is not applicable to cases in the United States Tax Court.[7]

The provision became effective on October 1, 1981. The provision repealed the applicability of the Civil Rights Attorney's Fees Awards Act of 1976 to tax litigation.

Under the Equal Access to Justice Act, fees and other expenses that may be awarded to a prevailing party include the reasonable expenses of expert witnesses, the reasonable cost of any study, analysis, engineering report, test, or project which is found by the court to be necessary for the preparation of the party's case, and reasonable attorney's fees. In general, no expert witness may be compensated at a rate that exceeds the highest rate of compensation for expert witnesses paid by the United States. Attorney's fees in excess of $75 per hour may not be awarded unless the court determines that a higher fee is justified.

Code section 7430

In general, Code section 7430 authorizes the award of reasonable litigation costs, including attorney's fees and court costs, to a taxpayer who prevails in a tax case in any Federal court. Such costs may be awarded whether the action was brought by or against the taxpayer. No award may be made to the Government if the taxpayer does not prevail, or to any creditor of a prevailing taxpayer.

Section 7430 is the exclusive provision for awards of litigation costs in any action or proceeding to which it applies.

The amount that may be awarded for litigation costs in a particular proceeding (such as a Tax Court case) may not exceed $25,000. This limitation applies regardless of the number of parties to the proceeding or the number of tax years at issue.

Section 7430 authorizes an award of reasonable litigation costs only if the taxpayer establishes that the position of the Government in the case was unreasonable and the taxpayer has substantially prevailed with respect to the amount in controversy or the most significant issue or set of issues presented. The determination by the court on this issue is made on the basis of the facts and legal precedents relating to the case as revealed in the record.

No award may be made unless the court determines that the taxpayer had exhausted all administrative remedies available within the Internal Revenue Service.

Section 7430, which was enacted in the Tax Equity and Fiscal Responsibility Act of 1982, became effective for cases begun after February 28, 1983. Under present law, the provision does not apply to any proceeding commenced after December 31, 1985.

Damages assessable for instituting proceedings before the Tax Court merely for delay

Under present law, if it appears to the Tax Court that proceedings before it have been instituted or maintained by a taxpayer primarily for delay, or that the taxpayer's position in the proceedings is frivolous or groundless, then the court may award damages to the United States. Such damages may not exceed $5,000 (sec. 6673).

House Bill

The House bill provides for a 4-year extension of the authority to award reasonable litigation costs, including attorney's fees, under section 7430. Thus, that section applies to any proceeding commenced on or before December 31, 1989. Also, the bill provides that such awards in Tax Court cases are payable in the same manner as an award in a case before a district court.

Further, the House bill requires the Secretary of the Treasury to submit a report within 90 days after the close of each calendar year beginning after 1985 and before 1990 to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate. This report is to include (1) the number of awards made under Code section 7430 during such calendar year, (2) the number of proceedings in which claims for such awards were made by substantially prevailing parties during such calendar year, and (3) the aggregate amount payable by the United States pursuant to the awards so made during such calendar year.

The House bill also gives discretion to the court in tax cases to assess all or a portion of any award under section 7430 against the IRS employee if the court determines that the proceeding resulted from any arbitrary or capricious act of the employee.

This provision applies to proceedings commenced after December 31, 1985, and on or before December 31, 1989.

Senate Amendment

The Senate amendment modifies section 7430 to conform it more closely to the Equal Access to Justice Act. Consequently, under the Senate amendment the burden of proof is on the Government to prove that its position was substantially justified or that special circumstances exist that make an award of attorney's fees and court costs unjust. (Unless the Government proves this, attorney's fees may be awarded.) This burden of proof and standard for awards replaces the rules under section 7430 that require the taxpayer to prove that the Government's position was unreasonable before the taxpayer may be awarded attorney's fees. Furthermore, under the Senate amendment, the "substantially justified" standard is applicable to prelitigation actions or inaction of Government agents as well as the litigation position of the Government.

The Senate amendment does not modify the present-law requirement that, in order to be eligible to be awarded attorney's fees, the taxpayer must either substantially prevail with respect to the amount in controversy or substantially prevail with respect to the most significant issue or set of issues presented. The Senate amendment also does not modify the present-law provision that only the taxpayer (and not the Government) may be awarded attorney's fees.

The Senate amendment eliminates the $25,000 cap on the award of attorney's fees and substitutes a $75 an hour limitation on attorney's fees, unless the court determines that a higher rate is justified. To make this determination, the court may look to an increase in the cost of living or a special factor, such as the limited availability of qualified attorneys to deal with the particular issues involved in the case. As under prior law, only reasonable litigation costs are recoverable by the taxpayer. Unlike prior law, however, prevailing market rates are applied to determine what are reasonable expenses of expert witnesses and reasonable costs of any study, analysis, or other project necessary to the preparation of the taxpayer's case. In no event may expert witnesses be compensated at a rate in excess of the highest rate of compensation for expert witnesses paid by the United States.

The Senate amendment also denies any award to a prevailing party who unreasonably protracts the proceedings. Although this requirement is part of the Equal Access to Justice Act, it has not previously applied to Tax Court cases.

This provision applies to proceedings commenced after December 31, 1985, with no sunset date. However, payments may not be made as a result of this provision before October 1, 1986.

Conference Agreement

The conference agreement generally follows the Senate amendment, except as to the burden of proof. Thus, the conference agreement provides that the taxpayer (as opposed to the Government) must carry the burden of proving that the Government's action was not substantially justified. The conference agreement also provides that the net worth limitations of the Equal Access to Justice Act are made applicable in tax cases. In addition to providing for attorney's fees with respect to litigation expenses, the conference agreement also provides that attorney's fees may be awarded with respect to the administrative action or inaction by the District Counsel of the IRS (and all subsequent administrative action or inaction) upon which the proceeding is based.

This provision applies to actions commenced after December 31, 1985. If a case was commenced after that date and was finally disposed of before the date of enactment, the conference agreement provides that such taxpayers may request attorney's fees with respect to those cases during the 30-day period immediately following the date of enactment. Awards of attorney's fees in cases commenced before January 1, 1986, will continue to be governed by Code section 7430, as in effect before that date.

---

[7] This is because the Equal Access to Justice Act is contained in Title 28 of the United States Code, which deals with courts created under Article III of the United States Constitution. The United States Tax Court was established under Article I of the United States Constitution.

The conference agreement also provides that awards of attorney's fees in Tax Court cases are payable in the same manner as an award in a case before a district court, effective for actions or proceedings commenced after February 28, 1983.

2. Exhaustion of Administrative Remedies

Present Law

Under present law, taxpayers who are dissatisfied with proposed adjustments to their tax returns by the Examination personnel of the IRS can take their case immediately to the United States Tax Court rather than appeal administratively within the IRS.

House Bill

The Tax Court is authorized to impose a penalty equal to $120 (twice the current filing fee) if it determines the taxpayer did not use reasonable efforts in good faith in attempting to resolve the case administratively. The taxpayer is considered to have met the requirements of this provision (and therefore not be subject to this penalty) in the following situations: he is only challenging an existing regulation or ruling (or a similar matter with respect to which Appeals has no authority to negotiate); he has attended one first level Appeals meeting; he cannot attend a first level Appeals meeting because it would be unduly burdensome; the IRS has waived the Appeals meeting; or the case has been in Appeals for six months with no action. This new provision does not make exhaustion of administrative remedies a jurisdictional prerequisite to Tax Court review. This penalty is in addition to the original filing fee of the Tax Court. Exhaustion for purposes of this provision is not considered to be exhaustion for purposes of section 7430(b)(2) (relating to attorney's fees).

The exhaustion of administrative remedies penalty applies to cases filed with the Tax Court on or after January 1, 1987.

Senate Amendment

No provision.

Conference Agreement

The conference agreement does not include the provision of the House bill. Instead, the conference agreement provides that failure by a taxpayer to exhaust administrative remedies is an additional basis that the Tax Court may consider in imposing the section 6673 penalty for dilatory or frivolous proceedings in the Tax Court.

3. Report on Tax Court Inventory

Present Law

No provision requires an annual report from the Tax Court and the IRS on the Tax Court inventory.

House Bill

The House bill requires an annual report from the IRS and the Tax Court indicating the actions taken to deal with the Tax Court inventory by closing cases more efficiently.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill, except that the reports are due every two years, beginning with 1987.

4. Tax Court Provisions

a. Tax Court practice fee

Present Law

The Tax Court imposes a $25 application fee prior to admission to practice before the Court (Tax Court Rule 200). No fee is imposed after the application fee has been paid.

The Tax Court rules authorize the Court to initiate disciplinary proceedings against practitioners who appear before it (Tax Court Rule 202). The Court is authorized to appoint independent counsel to pursue disciplinary matters.

House Bill

No provision.

Senate Amendment

The Senate amendment authorizes the Tax Court to impose a periodic registration fee on practitioners admitted to practice before it. The Tax Court is to establish the level of the fee and the frequency of its collection, but the fee may not exceed $30 per year. These funds are available to the Tax Court to pay independent counsel engaged by the Court to pursue disciplinary matters. This provision is effective January 1, 1987.

Conference Agreement

The conference agreement follows the Senate amendment.

b. Clarification of jurisdiction over penalty for failure to pay tax

Present Law

The Tax Court has held that it does not have jurisdiction over the addition to tax for failure to pay the amount of tax shown on the taxpayer's return, even though it has jurisdiction to redetermine a deficiency in tax with respect to that return (*Est. of Young v. Comm'r.*, 81 T.C. 879 (1983)).

House Bill

No provision.

Senate Amendment

The Senate amendment provides that the Tax Court has jurisdiction over this addition to tax for failure to pay an amount shown on the return where the Tax Court already has jurisdiction to redetermine a deficiency in tax with respect to that return.

Aside from resolving this jurisdictional issue, the provision does not alter the jurisdiction of the Tax Court. The provision is not intended to change existing law insofar as (1) the section 6651(a)(1) late filing addition to tax, or (2) the procedure for assessing additions to tax under section 6662(b) is concerned.

This provision is effective for any action or proceeding before the Tax Court which has not become final before the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment.

c. U.S. Marshals

Present Law

United States Marshals provide courtroom security, among other duties. It is not clear that the Tax Court has the authority to request the assistance of U.S. Marshals, because the Tax Court is an Article I (rather than Article III) court.

House Bill

No provision.

Senate Amendment

The Senate amendment requires that the U.S. Marshal for any district in which the Tax Court is sitting must attend any session of the Tax Court, when requested to do so by the Chief Judge of the Tax Court. This provision is effective on the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment.

d. Special Trial Judges

Present Law

The Chief Judge of the Tax Court is authorized to appoint Special Trial Judges, who assist in the work of the Court. The Code provides that their salary is determined by the procedures relating to the Commission on Executive, Legislative, and Judicial Salaries. The Executive Order implementing that provision fails to include Special Trial Judges.

Prior to January 17, 1985, Special Trial Judges were entitled to reimbursement for travel expenses on the same basis as other Federal judges. On that date, the Comptroller General determined that they were entitled only to reduced reimbursement pursuant to the Federal Travel Regulations.

House Bill

No provision.

Senate Amendment

The Senate amendment consolidates in one new section of the Code a number of the provisions relating to the Special Trial Judges. The Senate amendment also specifies that Special Trial Judges are to be paid 90 percent of the salary paid to Tax Court Judges, and that Special Trial Judges are to be reimbursed for travel and subsistence expenses to the same extent as are Tax Court Judges.

Generally, these provisions are effective on the date of enactment. The provision relating to the salary of Special Trial Judges is effective on the first day of the first month beginning after the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment.

e. Election to practice law after retirement and receive retirement pay

Present Law

United States District Court judges meeting age and longevity of tenure requirements may resign, engage in the practice of law, and continue to receive retirement pay. This retirement pay is not, however, adjusted to reflect changes in the pay of active District Court judges.

Retired Tax Court judges who engage in the practice of Federal tax law forfeit all retirement pay. Forfeiture also occurs if a retired Tax Court judge accepts another Government position, whether compensated or not.

House Bill

No provision.

Senate Amendment

The Senate amendment permits Tax Court judges meeting specified age and tenure requirements to elect to receive full retired pay as of the date they make the election (which would not be adjusted to reflect changes in the pay of active Tax Court judges) and not be subject to the prohibition on practicing tax law. The Senate amendment also suspends retired pay for the period of time during which a retired Tax Court judge holds a compensated Government position. This provision generally is effective on the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment.

f. Appeals from interlocutory orders

Present Law

The Second Circuit has held that the United States Courts of Appeals do not have

jurisdiction over any interlocutory order issued by the Tax Court (*Shapiro v. Comm'r.*, 632 F.2d 170 (2d Cir. 1980)).

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement authorizes an appeal from an interlocutory order of the Tax Court if a judge of the Tax Court includes in an interlocutory order a statement that a controlling question of law is involved, that there is substantial ground for difference of opinion regarding the question of law, and that an immediate appeal from the order might materially advance the ultimate termination of the litigation.

The Court of Appeals is given discretion as to whether or not to permit the appeal. Neither the application for nor the granting of an appeal stays proceedings in the Tax Court unless a stay is ordered by either the Tax Court or the Court of Appeals.

This provision applies to any order of the Tax Court entered after the date of enactment.

g. Annuities for surviving spouses and dependent children of Tax Court Judges

Present Law

Tax Court Judges may elect to have 3 percent of their salary deducted to fund an annuity for their surviving spouses and dependent children. The survivors annuity provisions relating to other Federal judges were recently updated (Pub. L. 99-335, June 6, 1986); the survivors annuity provisions relating to Tax Court Judges were not updated at the same time.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement makes the survivors annuity provisions relating to Tax Court Judges parallel to those applicable to other Federal judges. This provision is generally effective on November 1, 1986.

G. Tax Administration Trust Fund

Present Law

The Internal Revenue Service is responsible for administering almost all of the tax laws.[8] The cost of the entire IRS is funded through annual appropriations of general revenues. There are several trust funds in the Trust Fund Code of the Internal Revenue Code, as well as some trust funds outside the Internal Revenue Code. These are generally financed from earmarked taxes.

House Bill

No provision.

Senate Amendment

The Senate amendment establishes a Tax Administration Trust Fund in the Trust Fund Code of the Internal Revenue Code. The Trust Fund is funded by appropriation of (1) all interest paid by taxpayers on deficiencies and (2) penalties (such as, for example, for fraud and negligence) and additions to tax received under the Internal Revenue Code. Amounts in the Trust Fund (subject to specified limitations) may be utilized by the IRS without additional appropriations legislation. The Trust Fund will fund a level of IRS spending approximately equivalent to current spending plus a sizeable increase each year. The increase is targeted to examination, collection, and other increased compliance measures.

The Trust Fund is effective October 1, 1986 (the start of the 1987 fiscal year). It expires on September 30, 1991. All amounts remaining in the Trust Fund after that date revert to the general fund of the Treasury.

Conference Agreement

The conference agreement does not include the provision of the Senate amendment.

H. Tax Administration Provisions

1. Suspend Statute of Limitations During Prolonged Dispute Over Third-Party Records

Present Law

There is generally a three-year statute of limitations on tax returns, except in cases of fraud, failure to file, or a sizeable understatement of income (sec. 6501). The statute continues to run even if the IRS must obtain records held by third parties.[9] If the IRS must litigate to obtain access to the third-party records, the statute of limitations can expire prior to final determination as to the availability of the records.

House Bill

No provision.

Senate Amendment

If the dispute between the third-party recordkeeper and the IRS is not resolved within six months after the IRS issues an administrative summons, the statute of limitations is suspended until the issue is resolved. The issue is not resolved during the pendency of any action to compel production of the documents. Also, the issue is not resolved during the pendency of any action to quash the summons. The third-party recordkeeper is also required to provide notice of the suspension of the statute of limitations to the taxpayer whose records are the subject of the dispute if the summons requesting the records does not identify the taxpayer by name. Failure by the third party to do so does not prevent the suspension of the statute.

Also, as is the case under present law, the statute of limitations is suspended during the period when a taxpayer intervenes in a dispute between the IRS and a third-party recordkeeper. The statute is suspended from that date until the entire dispute is resolved. This provision is effective on the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment.

2. Authority to Rescind Statutory Notice of Deficiency

Present Law

Under present law, once the IRS has issued a statutory notice of deficiency (90-day letter), the IRS does not have the authority to withdraw the letter. The statutory notice is a jurisdictional prerequisite to petitioning the Tax Court for review of the IRS determination; the notice must be issued before the expiration of the statute of limitations. Once the notice has been issued, only a Tax Court decision can alter its effect.

House Bill

Where the IRS and the taxpayer mutually agree, a statutory notice of deficiency may be rescinded. Once the notice has been properly rescinded, it is treated as if it never existed. Therefore, limitations regarding credits, refunds, and assessments relating to the rescinded notice are void and the parties are returned to the rights and obligations existing prior to the issuance of the withdrawn notice. Also, the IRS may issue a later notice for a deficiency greater or less than the amount in the rescinded notice.

Under Code section 7805, the Secretary has the authority to establish by regulation the procedures necessary to implement the withdrawal of notice provision to assure that the taxpayer has consented to the withdrawal of the statutory notice. The regulations should also clarify the effect of rescission on other provisions of the Code.

This provision is effective for statutory notices of deficiency issued on or after January 1, 1986.

Senate Amendment

The Senate amendment is the same as the House bill, effective for statutory notices of deficiency issued on or after the date of enactment.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, effective for statutory notices of deficiency issued on or after January 1, 1986.

3. Authority to Abate Interest Due to Errors or Delay by the IRS

Present Law

Under present law, the IRS does not generally have the authority to abate interest charges where the additional interest has been caused by IRS errors and delays. This results from the IRS' long-established position that once tax liability is established, the amount of interest is merely a mathematical computation based on the rate of interest and due date of the return. Consequently, the interest portion of the amount owed to the Government cannot be reduced unless the underlying deficiency is reduced. The IRS does, however, have the authority to abate interest resulting from a mathematical error of an IRS employee who assists taxpayers in preparing their income tax returns (sec. 6404(d)).

House Bill

In cases where an IRS official fails either to perform a ministerial act in a timely manner or makes an error in performing a ministerial act, the IRS has the authority to abate the interest attributable to such delay. No aspect of the delay can be attributable to the taxpayer. The House bill gives the IRS the authority to abate interest but does not mandate that it do so (except that the IRS must do so in cases of certain erroneous refunds of $1 million or less, described below). The interest abatement only applies to the period of time attributable to the failure to perform the ministerial act.

The provision applies only to failures to perform ministerial acts that occur after the IRS and the taxpayer have been in contact. This provision does not therefore permit the abatement of interest for the period of time between the date the taxpayer files a return and the date the IRS commences an audit, regardless of the length of that time period. Similarly, if a taxpayer files a return but does not pay the taxes due, this provision would not permit abatement of this interest regardless of how long

[8] The Bureau of Alcohol, Tobacco, and Firearms administers the alcohol, tobacco, and firearms excise taxes.

[9] The statute is, however, suspended if the taxpayer intervenes in the dispute between the IRS and the third-party recordkeeper (sec. 7609(e)).

the IRS took to contact the taxpayer and request payment.

The IRS must abate interest in certain instances in which it issues an erroneous refund check. There are two limitations on this rule. First, it is not to apply in instances in which the taxpayer (or a related party) has in any way caused the overstated refund to occur. Second, it is not to apply to any erroneous refund checks that exceed $1 million. If the taxpayer does not repay the erroneous refund when requested to do so by the IRS, interest would then begin to apply to the amount of the erroneous refund.

This provision is effective for interest accruing with respect to deficiencies or payments for taxable years beginning after 1981.

Senate Amendment

The Senate amendment is the same as the House bill, except that no significant aspect of the delay can be attributable to the taxpayer, and the provision applies only to failures to perform ministerial acts that occur after the IRS has contacted the taxpayer in writing.

Conference Agreement

The conference agreement follows the Senate amendment, except that the rule requiring the abatement of interest on erroneous refund checks of $1 million or less is only made applicable to erroneous refund checks of $50,000 or less. The provision is effective for taxable years beginning after December 31, 1978.

4. Suspension of Compounding Where Interest on Deficiency is Suspended

Present Law

Under present law, in the case of a deficiency in income, estate, gift, and certain excise taxes, a waiver of restrictions on assessment of the deficiency is filed when the IRS and the taxpayer agree on the proper amount of tax due at the conclusion of an audit. If, however, the Secretary fails to make notice and demand for payment within 30 days after the filing of the waiver, interest is not imposed on the deficiency from the 31st day after the waiver was filed until the date the notice and demand is issued. The provision does not, however, suspend the compounding of interest for the same period on the interest which previously accrued on the underlying deficiency.

House Bill

Both the interest on the deficiency as well as the compounded interest on the previously accrued interest are suspended, starting 31 days after a taxpayer has filed a waiver of restrictions on assessment of the underlying taxes and ending when a notice and demand is issued to the taxpayer. The provision is effective for interest accruing in taxable periods after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, effective for interest accruing in taxable periods after December 31, 1982.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, effective for interest accruing in taxable periods after December 31, 1982.

Taxpayers may obtain refunds of interest subject to this provision that they paid by filing a claim for refund of their interest with the IRS. The IRS presently does not possess the data processing capability to suspend the compounding of interest on previously accrued interest. Taxpayers who consider themselves entitled to the relief provided by this provision may apply to the IRS, and, in appropriate cases, the IRS will perform the required computations.

5. Exemption From Levy For Service-Connected Disability Payments

Present Law

Under present law, various payments, such as unemployment benefits, workmen's compensation, a minimum amount of ordinary wages, as well as certain pensions and annuities, are exempt from levy. This means that the IRS cannot seize these payments to collect delinquent taxes by serving a levy on the payment source. The IRS can collect the delinquent taxes from other nonexempt sources available to the delinquent taxpayer.

House Bill

The IRS is prohibited from levying on any amount payable to an individual as a service-connected disability benefit under specified provisions of Title 38 of the United States Code.

The term "service-connected" means that the disability was incurred or aggravated in the line of duty in the active military, naval, or air service. The exemption covers direct compensation payments, as well as other types of support payments for education and housing.

This provision is effective for payments made after December 31, 1985.

Senate Amendment

The Senate amendment is the same as the House bill, effective for payments made after December 31, 1986.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, effective for payments made after December 31, 1986.

6. Modification of Administrative Rules Applicable to Forfeiture

Present Law

Under present law, the IRS can seize property that is used in violating the provisions of the Internal Revenue laws. If the amount of personal property seized is valued at $2500 or less, the IRS may use administrative procedures to forfeit the property and sell it without judicial action, after both appraisal and notice to potential claimants. A claimant may post a bond of $250 and require the Government to proceed by judicial action to sell the property. These procedures are separate and distinct from those the IRS uses for routine collection of past-due taxes.

House Bill

The House bill allows the Treasury administratively to sell up to $100,000 of personal property used in violation of the Internal Revenue laws. Such sale would require both an appraisal to determine value and a notice by newspaper publication to potential claimants. Potential claimants can require a judicial forfeiture action by posting a $2500 bond. This provision is effective on January 1, 1986.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill, effective on the date of enactment.

7. Certain Recordkeeping Requirements

Present Law

In general, law enforcement officers are not subject to the substantiation rules of section 274(d) and the income and wage inclusion rules of section 132 for specified use of a law enforcement vehicle. The conference report on the repeal of the contemporaneous recordkeeping requirements for automobiles [10] provided that IRS special agents are not to be included within the term "law enforcement officers."

House Bill

The House bill provides that, for purposes of sections 132 and 274, use of an automobile by a special agent of the IRS is treated in the same manner as use of an automobile by an officer of any other law enforcement agency, effective on the date of enactment.

Senate Amendment

The Senate amendment is the same as the House bill, effective beginning after December 31, 1984.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment, effective beginning after December 31, 1984.

8. Disclosure of Return Information to Certain Cities

Present Law

Section 6103 provides for the confidentiality of returns and return information of taxpayers. The conditions under which returns and return information can be disclosed are specifically enumerated in that section. Disclosure of returns and return information to local income tax administrators is not permitted. Unauthorized disclosure is a felony punishable by a fine not exceeding $5,000 or imprisonment of not more than 5 years, or both, under section 7213. An action for civil damages may also be brought for unauthorized disclosure under section 7431.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that any city with a population in excess of 2,000,000 that imposes an income or wage tax may, if the Secretary in his sole discretion [11] so provides, receive returns and return information for the same purposes for which States may obtain information under present law, subject to the same safeguards as apply to States under present law. Cities that receive information must reimburse the Internal Revenue Service for its costs in the same manner as a State must under present law. Population is determined on the basis of the most recent decennial United States census data available.

Any disclosure would be required to be in the same manner and with the same safeguards as disclosure is made to a State. The present-law requirements of maintaining a system of standardized requests for information and the reasons for the request and of maintaining strict security against release of the information are also made applicable to the local agencies. Disclosure will be permitted only for the purpose of, and only to the extent necessary in, the administration of a local jurisdiction tax. Disclosure of returns or return information to any elected official or the chief official (even if not elected) of the local jurisdiction will not be permitted. Any unauthorized disclosure of returns and return information by an employee of an agency receiving this information will subject the employee to the fine

[10] H. Rept. 99-67 (May 7, 1985).

[11] The Secretary may, in accordance with this discretion, implement this provision on a trial basis.

and imprisonment provided by section 7213 and to the civil action provided by section 7431.

This provision is effective on the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment.

9. Regulatory Flexibility Act Applied to IRS

Present Law

The Regulatory Flexibility Act requires that an analysis of the impact of rules and regulations (other than interpretative regulations) on small business be performed. Treasury's position is that most IRS rules and regulations are interpretative.

House Bill

No provision.

Senate Amendment

The Senate amendment applies the Regulatory Flexibility Act to all rules and regulations prescribed by the Treasury, effective on the date of enactment.

Conference Agreement

The conference agreement does not include the provision of the Senate amendment.

10. Priority of Local Law in Certain Forfeitures

Present Law

If a person owing tax fails to pay that tax, a lien is created on all the taxpayer's property at the time of assessment. This lien takes priority over any other attachment to the taxpayer's property that has not been perfected at the time of assessment. Thus, under State law in a number of States, a State law enforcement agency may perform an extensive investigation of an individual, leading to the seizure and forfeiture of that individual's property. If the State has cooperated with the IRS and the IRS files a lien, the IRS lien may take priority over the State's claim to the property.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement provides that a forfeiture under local law of property seized by a law enforcement agency of either a State or a political subdivision of a State relates back to the time of seizure. The provision does not apply to the extent that local law provides that someone other than the governmental unit has priority over the governmental unit in the property. For purposes of this provision, a State or local tax agency is not considered to be a law enforcement agency. This provision is effective on the date of enactment.

11. Release of Certain Seized Property to the Owner

Present Law

The Federal Government has the power, after proper notice and demand, to seize and sell the property of a delinquent taxpayer. As soon as practicable after seizure, the Government is required to give written notice of the seizure to the owner of the property. This notice must describe the property seized and specify the sum of money owed and demanded for release of the property. The Government also must give notice of the sale of the seized property to its owner as soon as practicable after seizure. This notice must specify the property to be sold as well as the time, place, manner, and conditions of the sale.

Before the sale, the Government is required to set a minimum price for the property, taking into account the expenses to the Government of the levy and sale. At the sale, the property is sold to the highest bidder who meets or exceeds the minimum price. If no bid meets or exceeds the minimum price, the property is deemed to be sold to the Government for the minimum price. Thus, the Government has no discretion under present law in purchasing the property itself when no bid meets or exceeds the minimum price.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement requires that, before the sale of the property, the IRS determines (based upon criteria prescribed by the Treasury) whether the purchase of the property at the minimum price is in the best interests of the Federal Government. Property would continue to be sold to the highest bidder who meets or exceeds the minimum price.

If no bid meets or exceeds the minimum price, the Government would purchase the property at the minimum price only if the purchase were in its best interests. If the purchase were determined not to be in the best interests of the Government, the property would be released back to the owner. The property would still be subject to a Government lien. Also, any expense of the levy and sale would be added to the amount of delinquent taxes due.

The provision is effective for sales of seized property conducted after the date of enactment.

12. Allocation of Employee Tips

Present Law

Employers are required, under certain circumstances, to provide an information report of an allocation of tips in large food or beverage establishments (defined generally to include those establishments that normally employ more than 10 employees). Under this provision, if tipped employees of large food or beverage establishments report tips aggregating 8 percent or more of the gross receipts of the establishment, then no reporting of a tip allocation is required. However, if this 8-percent reporting threshold is not met, the employer must allocate (as tips for information reporting purposes) an amount equal to the difference between 8 percent of gross receipts and the aggregate amount reported by employees. This allocation may be made pursuant to an agreement between the employer and employees or, in the absence of such an agreement, according to Treasury regulations.

These Treasury regulations provide that this allocation may be made by the employer in either of two ways. One is to allocate based on the portion of the gross receipts of the establishment attributable to the employee during a payroll period. The second is to allocate based on the portion of the total number of hours worked in the establishment attributable to the employee during a payroll period.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement provides that the method of allocation based on the number of hours worked may be utilized only by an establishment that employs less than the equivalent of 25 full-time employees during a payroll period. Establishments employing the equivalent of 25 or more full-time employees would consequently have to use the portion of gross receipts method to allocate tips during the payroll period (absent an agreement between the employer and employees).

This provision is effective for any payroll period beginning after December 31, 1986.

13. Treatment of Forfeitures of Land Sales Contracts

Present Law

Generally, before Federal tax liens can be extinguished, notice must be given to the Government. Several cases have held (*Runkel* v. *United States*, 527 F.2d 914 (9th Cir. 1977); *Brookbank* v. *Hubbard*, 712 F.2d 399 (9th Cir. 1983)) that forfeitures of land sales contracts are not subject to these notice requirements. Notice provides the Government with the opportunity to redeem the property.

House Bill

No provision.

Senate Amendment

No provision.

Conference Agreement

The conference agreement provides that forfeitures of land sales contracts are subject to these notification requirements, effective for forfeitures after the thirtieth day after the date of enactment. Thus, these two cases are explicitly overturned as to this issue. The effect of this provision is to provide the Government with both notice and the opportunity to redeem the property, which it currently has with respect to most other transfers of real estate.

I. Modification of Withholding Schedules

Present Law

The Code requires that the Secretary prescribe tables and computational procedures for determining the appropriate amount of taxes to be deducted and withheld from wages (sec. 3402(a)). Form W-4 is the form on which that calculation is done. It is completed by the employee, who furnishes it to the employer. The employer uses this form to determine the proper level of wage withholding. The employer does this by using tables issued by the Secretary that specify the proper amount of withholding, considering the employee's wage level and number of withholding allowances claimed.

The employee completes the Form W-4 by determining the proper number of withholding allowances (or exemptions) to which he is entitled. Withholding allowances may be claimed for the employee and any dependents (sec. 3402(f)) and for itemized deductions and estimated tax credits (sec. 3402(m)). Other items prescribed in regulations may also be claimed. For example, the regulations permit IRA contributions and the tax savings attributable to income averaging to be considered (see Treas. Reg. sec. 31.3402(m)-1). An employee's Form W-4 generally remains in effect until the employee revokes it and files a new one.[12]

[12] The employer is required to furnish copies of certain Forms W-4 to the IRS, such as those that claim more than 14 allowances or that claim total exemption from withholding (where wages are above $200 per week). Treas. Reg. sec. 31.3402(f)(2)-1(g). The IRS examines these forms, and if it determines that a claim of withholding allowances

The IRS has authority to issue regulations permitting employees to request, once the amount of their withholding has been determined on the basis of Form W-4 and the withholding tables, that that amount of withholding be increased or decreased. The IRS has long permitted taxpayers to request increases in withholding; the IRS has never permitted taxpayers to request decreases in withholding.

House Bill

The House bill requires that the IRS and Treasury modify the withholding schedules under section 3402 to approximate more closely tax liability under the amendments made by the bill. This modification will affect at least two major items. First, Form W-4 will be modified. Second, the withholding tables used by employers to determine the proper amount of wage withholding will also be modified.

With respect to modifying Form W-4, the IRS is to make every effort to notify taxpayers that Form W-4 has been modified and that many taxpayers will need to file the modified form with their employers. The modified form and tables are to be designed so that withholding from a taxpayer's wages approximates as closely as possible the taxpayer's ultimate tax liability.

The House bill also repeals the provision of present law giving the IRS authority to issue regulations permitting employees to request decreases in withholding. The provision relating to increases in withholding is unaffected.

The provision relating to modifications to the withholding forms and tables is effective for taxable years 1986 and following. The provision relating to decreases in withholding is effective on the date of enactment.

Senate Amendment

The Senate amendment is the same as the House bill. In addition, the Senate amendment requires that employees file a revised Form W-4 before January 1, 1988. They must do so on a Form W-4 that has been revised by the IRS to reflect the changes in the Code made by this bill.[13] If an employee does not file a revised Form W-4 before that date, the employer must withhold income taxes as if the employee claimed one allowance (if the employee checked the "Single" box on the most recent Form W-4 that the employee filed) or two allowances (if the employee checked the "Married" box).

The mandatory withholding change that takes effect if an employee does not file a new Form W-4 is effective for wages paid after December 31, 1987. The provision relating to decreases in withholding is effective on the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment, except that employees must file a new Form W-4 before October 1, 1987, in order to avoid the mandatory withholding change that takes effect if an employee does not file a new Form W-4, which is also effective October 1, 1987. This date will follow more closely the extensive IRS publicity campaign on withholding changes.

cannot be justified, it notifies the employer to change the employee's withholding.

[13] It is also permissible for employees to fulfill the requirements of this provision by filing on a substitute Form W-4 provided by the employer, so long as that form has been revised to parallel the official form and the substitute form complies with all IRS requirements pertaining to substitute Forms W-4.

J. Report on the Return-Free Tax System

Present Law

Taxpayers are generally required to file a paper document as their individual income tax return for the taxable year. These forms are currently the Form 1040 ("the long form"), the Form 1040A ("the short form"), and the recently created Form 1040EZ. In addition, the IRS is experimenting with magnetic tape return filing that allows approved return preparers to volunteer to file individual tax returns that they prepare with the IRS in a magnetic tape format. The return preparer retains the paper version of the tax return.

House Bill

The House bill requires a report from the IRS setting forth:

(1) the identification of classes of individuals who would be permitted to use a return-free system;

(2) how such a system would be phased in;

(3) what additional resources the IRS would need to carry out such a system; and

(4) the types of changes to the Internal Revenue Code which would inhibit or enhance the use of such a system.

The report is to be submitted within six months of the date of enactment to the Senate Committee on Finance and the House Committee on Ways and Means.

In addition, the IRS is to consider conducting an in-house feasibility test using previously filed information returns and individual income tax returns to test the practicality of the proposed system. The report is due six months after enactment of the bill.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

A number of provisions of the conference agreement provide that the Secretary of the Treasury or his delegate is to prescribe regulations. Notwithstanding any of these references, the conferees intend that the Secretary may, prior to prescribing these regulations, issue guidance for taxpayers with respect to the provisions of the conference agreement by issuing Revenue Procedures, Revenue Rulings, forms and instructions to forms, announcements, or other publications or releases. The conferees intend that the IRS provide taxpayers with this guidance as quickly as is possible.

TITLE XVI. EXEMPT AND NONPROFIT ORGANIZATIONS

A. Exchanges and Rentals of Donor or Member Lists of Certain Tax-Exempt Organizations

Present Law

Charitable and other tax-exempt organizations are subject to a tax on income from an unrelated trade or business (the UBIT), i.e., a business the conduct of which is not substantially related to the exempt functions of the organization (Code secs. 511-514).

The U.S. Court of Claims has held that income received by the Disabled American Veterans from other exempt organizations and from commercial businesses for the use of its mailing lists constitutes unrelated business taxable income, and does not constitute royalties exempted from the UBIT under section 512(b)(2). The court found that the DAV operated in a competitive, commercial manner with respect to taxable firms in the direct mail industry; that the organization regularly carried on the mailing list activities; and that these activities were not substantially related to accomplishment of exempt purposes.

House Bill

The House bill provides an exception from the UBIT, available only to tax-exempt organizations eligible to receive tax-deductible charitable contributions, for income from the exchanging or renting of membership or donor mailing lists with or to other such tax-exempt organizations. This provision is effective for exchanges and rentals of lists occurring after the date of enactment.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

B. Distribution of Low Cost Articles by Charities

Present Law

Charitable and other tax-exempt organizations are subject to a tax on income from an unrelated trade or business (the UBIT), i.e., a business the conduct of which is not substantially related to the exempt functions of the organization (secs. 511-514).

Under Treasury regulations, the UBIT does not apply where an organization "sends out low cost items incidental to the solicitation of charitable contributions" (Reg. sec. 1.513-1(b)). The regulations do not provide a definition of low cost articles.

House Bill

The House bill provides a statutory exception from the UBIT, available only to tax-exempt organizations eligible to receive tax-deductible charitable contributions, for income from activities relating to certain unsolicited distributions of low cost articles incidental to soliciting charitable contributions. A low cost article is defined as any article with a cost not in excess of $5 (adjusted for inflation beginning in 1988). This provision is effective for distributions of low cost articles occurring after the date of enactment.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill.

C. Expansion of UBIT Exception for Certain Trade Show Income

Present Law

Charitable and other tax-exempt organizations are subject to a tax on income from an unrelated trade or business (the UBIT), i.e., a business the conduct of which is not substantially related to the exempt functions of the organization (secs. 511-514).

An exception from the UBIT is provided for income derived by trade associations (sec. 501(c)(6)), or by labor, agricultural, or horticultural organizations (sec. 501(c)(5)), from qualified trade show and convention activities at which members of the sponsoring organization sell products or services (sec. 513(d)).

House Bill

No provision.

Senate Amendment

The Senate amendment expands the section 513(d) exception from the UBIT to cover (1) qualified trade shows or conventions at which suppliers to the sponsoring organization's members sell products or

services related to the exempt activities of the organization, and (2) qualified trade show and convention activities of charitable organizations (sec. 501(c)(3)) and social welfare organizations (sec. 501(c)(4)). This provision is effective for qualified trade show or convention activities conducted in taxable years beginning after the date of enactment.

Conference Agreement

The conference agreement follows the Senate amendment.

D. Tax Exemption for Certain Title-Holding Companies

Present Law

A corporation organized to hold title to property, and to distribute the income therefrom to one or more related tax-exempt organizations, may itself be tax exempt (sec. 501(c)(2)). The IRS has taken the position that such a title-holding company is not tax exempt if two or more of its parent organizations are unrelated.

Any income of an exempt organization from debt-financed property generally is subject to the unrelated business income tax (sec. 514). However, under an exception in present law, certain educational institutions and pension plans generally are not subject to the UBIT on income from certain debt-financed real property (sec. 514(c)(9)), subject to specified limitations (including such limitations as are applicable to pass-through entities pursuant to sec. 514(c)(9)(D)).

House Bill

No provision.

Senate Amendment

The Senate amendment adds a new category of organizations that are tax-exempt under section 501(c) (new Code sec. 501(c)(25)). An organization is described in section 501(c)(25) if it is a corporation or trust that (1) is operated for the exclusive purpose of holding title to real property and distributing the income therefrom to eligible shareholders or beneficiaries, (2) has no more than 35 shareholders or beneficiaries, (3) has only one class of stock or beneficial interest, and (4) meets certain other requirements. Eligible shareholders or beneficiaries are qualified pension plans (sec. 401(a)); governmental pension plans (sec. 414(d)); Federal or State political subdivisions, agencies, or instrumentalities; and tax-exempt charitable organizations described in sections 501(c)(3) and 501(c)(25).

The Senate amendment also extends the present-law exception from the unrelated business income tax (UBIT) under the debt-financed property rules for certain real property (sec. 514(c)(9)) to organizations described in the new section 501(c) category. As under present law, the UBIT exception is subject to the limitations contained in section 514(c)(9)(B), including such limitations as are applicable to pass-through entities (sec. 514(c)(9)(D)).

The Senate amendment does not modify present law with respect to title-holding corporations (described in sec. 501(c)(2)) holding title to property for one or more related tax-exempt organizations.

These provisions are effective for taxable years beginning after December 31, 1986.

Conference Agreement

The conference agreement follows the Senate amendment.

E. Divestiture Exemption for Certain Excess Business Holdings of Private Foundations

Present Law

If on May 26, 1969, a private foundation (together with disqualified persons) had business holdings exceeding permitted limitations (generally, 20 percent), the amount of foundation/disqualified person holdings must be reduced in two phases (sec. 4943). In general, a disqualified person is a substantial contributor to the foundation, a family member of a substantial contributor, or a substantial owner of an entity that is a substantial contributor.

If the 1969 holdings exceeded 95 percent, the foundation has a 20-year period (i.e., until May 26, 1989) to reduce the combined holdings to 50 percent. Within 15 years after the first-phase deadline, the holdings must be reduced, in certain cases, to 35 percent; in addition, the foundation itself may not hold more than 25 percent of the voting stock, dependent on whether disqualified persons own more than two percent.

House Bill

No provision.

Senate Amendment

Under the Senate amendment, the 20-year exception for certain excess business holdings acquired prior to May 27, 1969, is made permanent if—

(1) the management of the foundation and the management of the business enterprise are sufficiently unrelated;

(2) no disqualified person who was not a foundation manager on May 6, 1986, becomes a foundation manager after that date;

(3) no disqualified person receives compensation (other than reasonable directors' fees) from both the foundation and the business enterprise;

(4) the foundation continues to meet the charitable payout rules of present law; and

(5) the foundation and any disqualified persons comply with the section 4943 rules applicable to any holdings in the enterprise acquired after May 26, 1969.

Conference Agreement

The conference agreement does not include the Senate amendment.

F. Reduction of Private Foundation Payout Requirement by Certain Costs of Hazardous Waste Removal

Present Law

To avoid penalty excise taxes, a private nonoperating foundation annually must make expenditures or grants for charitable purposes in an amount (the "distributable amount") equal to five percent of the fair market value of its investment assets (sec. 4942).

House Bill

No provision.

Senate Amendment

Under the Senate amendment, the otherwise applicable distributable amount for the James Graham Brown Foundation is reduced by certain costs paid or incurred by the Foundation for removal or remedial action with respect to a hazardous substance released at a facility owned or operated by the Foundation. This provision is effective for taxable years beginning after December 31, 1982.

Conference Agreement

The conference agreement does not include the Senate amendment.

G. Exception to Membership Organization Deduction Rules

Present Law

A membership organization generally may deduct expenses relating to the furnishing of goods or services to members only from income derived from members or from transactions with members (sec. 277). This rule does not apply to certain financial institutions, insurance companies, securities or commodities exchanges, or certain other organizations.

House Bill

No provision.

Senate Amendment

The Senate amendment provides an additional exception to the section 277 deduction limitation rule for membership organizations that are engaged primarily in the gathering and distribution of news to their members for publication.

Conference Agreement

The conference agreement follows the Senate amendment, effective for taxable years beginning after the date of enactment.

H. Tax-Exempt Status for Technology Transfer Organization

Present Law

In November, 1985, the U.S. Tax Court denied tax-exempt status under section 501(c)(3) to the Washington Research Foundation, a nonprofit organization formed to assist the transfer of technology from universities and tax-exempt research institutions to the private sector. The Tax Court held that the organization was not exclusively operated for charitable purposes because its major activity of providing patenting and licensing services was commercial in nature.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that an organization that transfers technology from universities and scientific research organizations to the private sector is treated as a tax-exempt charitable organization if it meets certain requirements, including that it was incorporated on July 20, 1981. The intended beneficiary of this provision is the Washington Research Foundation. The provision is effective on enactment.

Conference Agreement

The conference agreement follows the Senate amendment. No inference is intended as to whether such technology transfer or related purposes or functions of any other organization constitute purposes or functions described in Code sections 501(c)(3) or 170(c).

TITLE XVII. MISCELLANEOUS PROVISIONS

A. Targeted Jobs Tax Credit

Present Law

Employers may claim a tax credit for wages paid to individuals from nine targeted groups (Code sec. 51). These groups include individuals who are recipients of payments under means-tested transfer programs, who are economically disadvantaged (as measured by family income), or who are disabled.

The credit generally equals 50 percent of the first $6,000 of qualified first-year wages and 25 percent of the first $6,000 of qualified second-year wages. A credit equal to 85 percent of up to $3,000 of wages of a qualified summer youth employee also is allowed.

The employer's deduction for wages must be reduced by the amount of the credit.

Under present law, the credit does not apply with respect to targeted-group individuals who begin work for the employer after December 31, 1985.

House Bill

The House bill extends the targeted jobs credit for two years (i.e., for individuals who begin work for an employer on or before December 31, 1987), with the following modifications.

The credit for first-year wages is reduced from 50 percent to 40 percent of the first $6,000 of qualified first-year wages (in the case of qualified summer youth employees, the present-law credit of 85 percent of up to $3,000 of wages is retained), and the credit for second-year wages is repealed. Under the House bill, no credit is allowed for an individual who works for the employer for fewer than 14 days. These modifications apply with respect to individuals beginning work for the employer after 1985 and before 1988. In addition, the authorization for appropriations for administrative and publicity expenses related to the credit is extended through fiscal year 1987.

Senate Amendment

The Senate amendment is the same as the House bill, except that (1) the credit is extended for three years (together with authorization for related administrative and publicity expenses); (2) a 50-percent credit is retained for first-year wages (the present-law credit for hiring qualified summer youth employees also is retained); and (3) no wages paid to a targeted-group member are to be taken into account for credit purposes unless the individual both (a) is employed by the employer for at least 90 days (14 days in the case of qualified summer youth employees), and (b) has completed at least 120 hours of work performed for the employer (20 hours in the case of qualified summer youth employees).

These provisions apply with respect to individuals beginning work for the employer after 1985 and before 1989. A special certification rule applies for targeted group individuals hired after December 31, 1985 and before the 26th day following enactment of the bill.

Conference Agreement

The conference agreement is the same as the Senate amendment except (1) the credit for first-year wages is reduced from 50 percent to 40 percent of the first $6,000 of qualified first-year wages (in the case of qualified summer youth employees, the present-law credit equal to 85 percent of up to $3,000 of wages is retained); (2) the conference agreement does not include the special certification rule in the Senate amendment; and (3) the minimum employment period rule is liberalized so that the credit is available if the targeted group member either is employed by the employer for at least 90 days (14 days in the case of qualified summer youth employees), or has completed at least 120 hours of work performed for the employer (20 hours in the case of qualified summer youth employees).

B. Olympic Trust Fund and Excise Tax

Present Law

No provision.

House Bill

Excise tax.—Under the House bill, a 10-percent excise tax is imposed on amounts paid for U.S. television and radio broadcast rights for Olympic games. This provision applies to amounts paid after November 22, 1985, other than pursuant to binding contracts in effect on that date.

Olympic Trust Fund.—An Olympic Trust Fund is established in the Treasury to receive amounts from the new excise tax. Trust fund monies, less related Treasury administrative expenses, are available to be paid to the U.S. Olympic Committee for Olympic-related expenses.

Senate Amendment

No provision.

Conference Agreement

The conference agreement does not include the House bill provision. The conferees did not include the House provision because the International Olympic Committee and the U.S. Olympic Committee have voluntarily implemented an arrangement comparable monetarily to that contemplated by the House provision. In the event that the arrangement is terminated, the conferees intend that the Congress consider implementing such an arrangement on a statutory basis.

C. Collection of Diesel Fuel and Gasoline Excise Taxes

Present Law

Diesel fuel tax.—An excise tax of 15 cents per gallon is imposed on the sale of diesel fuel for use in a diesel-powered highway vehicle. This tax is collected at the retail level (sec. 4041).

Gasoline tax.—An excise tax on gasoline of nine cents per gallon is imposed and collected at the manufacturer's level (sec. 4081). Collection of this tax may be deferred to the last sale before retail, however, if all parties are registered with the IRS.

House Bill

The House bill permits an election to collect the diesel fuel excise tax on the sale by the wholesaler to the retailer of the fuel (or on the sale by the manufacturer where that sale is direct to the retailer) in the case of a qualified retailer. This provision is effective for sales of diesel fuel (for use in highway vehicles) after the first calendar quarter beginning more than 60 days after the date of enactment.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

Diesel fuel tax.—The conference agreement follows the House bill and the Senate amendment, with technical modifications.

Gasoline tax.—Under the conference agreement, the gasoline tax is imposed on removal of gasoline, gasoline blend stocks and products commonly used as additives in gasoline, from the refinery (or manufacturing plant) or customs custody (sale, if earlier) effective January 1, 1988. An exception is provided permitting bulk transfers of gasoline or gasoline blend stocks or additives to registered terminals without payment of tax. In such cases, terminal operators are liable for collection of the tax upon removal of the gasoline or gasoline blend stocks or additives from the terminal.

Registered gasohol blenders are permitted to purchase gasoline at 3 cents per gallon if blending occurs at the terminal. In all other cases, gasohol blenders (like all other purchasers) must purchase gasoline and gasoline blend stocks tax-paid. Gasoline separated from gasohol is taxable at a rate of 5⅔ cents per gallon. Blenders (other than registered gasohol blenders that blend at the terminal) are taxable on the use or sale of blended gasoline. However, they may claim a credit for any tax paid on purchases of gasoline, blendstocks, or additives to the extent that such blended gasoline is not used as a fuel. The purchaser may obtain a refund upon establishing that the ultimate use was not as a taxable fuel. A special, accelerated refund procedure is provided, however, for gasohol blenders who buy tax-paid. Under the accelerated refund procedure if the Secretary has not paid a claim within 20 days of the date of filing, the claim is to be paid with interest from such date.

The Secretary will provide regulations defining the terms gasoline blend stocks and products commonly used as additives in gasoline. He may also require that all persons who must register post bond. In addition, the Secretary may register industrial users of gasoline blend stocks or additives as terminal operators permitting them to purchase such products in bulk form tax free. The Treasury Department is directed to study the incidence of evasion of the gasoline tax and to report to the Congress by December 31, 1986.

D. Social Security and FUTA Provisions

1. Allow ministers to reelect social security coverage

Present Law

The Federal Insurance Contributions Act (FICA) imposes separate payroll taxes on employers and employees equal to a percentage of wages paid as remuneration for employment. For self-employed individuals, a similar tax is imposed on self-employment income under the Self-Employment Contributions Act (SECA). These taxes are used to fund social security programs.

As a general rule, ministers of a church, members of religious orders, and Christian Science practitioners ("ministers") are treated as self-employed individuals for purposes of SECA taxes, even if otherwise they would be classified as employees (secs. 1402(c), 3121(b)(8)). However, a minister who is conscientiously, or because of religious principles, opposed to participation in a public insurance system generally may elect to be exempt from social security coverage and SECA taxes by filing with the IRS an irrevocable application for such exemption within two years of beginning the ministry (sec. 1402(e)).

House Bill

No provision.

Senate Amendment

The Senate amendment provides a limited period (generally, up to April 15, 1988) during which a minister who previously had elected out of social security coverage may make an irrevocable election back into social security coverage. An electing minister becomes subject to SECA tax, and his or her post-election earnings are credited for social security benefit purposes.

The Senate amendment also provides that a minister of a church or member of a religious order who files an application (after 1986) for exemption from social security coverage and SECA taxes on religious or conscientious grounds must include with the application a statement that he or she has informed the ordaining, commissioning, or licensing body of the church or order that he or she is opposed to the acceptance of public insurance benefits based on ministerial service. The Senate amendment also provides that an exemption application from a minister may be approved by the Treasury Department only if, subsequent to receiving the application, it separately verifies (in-person or by telephone communication)

that the applicant is aware of the grounds for exemption and seeks exemption on such grounds. The Treasury Department may enter into an agreement with the Secretary of Health and Human Services (HHS) pursuant to which such verification may be made by HHS.

Conference Agreement

The conference agreement generally follows the Senate amendment. Under the conference agreement, Treasury regulations are to provide that exemption applications filed with the IRS (after 1986) are to include information showing that the applicant has informed the church body or order of his or her religious or conscientious opposition to social security coverage, in conformity with the revised exemption procedure. The regulations may provide procedures under which, pursuant to agreement between the Secretary of the Treasury and the Secretary of Health and Human Services, HHS has the responsibility of communicating with the applicant in order to make the separate verification required as a prerequisite for approving the exemption application. The conference agreement does not require that the subsequent verification be in-person or by telephone communication, but the verification procedure must be effective to establish that the applicant is aware of the grounds for exemption from the social security system and has sought an irrevocable exemption on such grounds. Under these procedures, the disclosure of information to HHS by the IRS concerning a ministerial exemption application for such verification purposes is authorized by Code section 6103(l)(1).

2. Common paymaster rule for FICA and FUTA taxes

Present Law

The Federal Insurance Contributions Act (FICA) imposes payroll taxes on employers and employees. For 1986, the employer's FICA tax is 7.15 percent of wages paid to the employee up to $42,000. Similarly, the Federal Unemployment Tax Act (FUTA) imposes a tax on an employer with respect to all its employees. The FUTA tax is 0.8 percent on the first $7,000 of wages.

In general, when the same individual is employed by two or more employers, each employer is subject to the FICA and FUTA tax on the base wages of the individual. An exception applies where two or more related corporations concurrently employ the same individual and compensate him or her through a common paymaster, i.e., one of the related corporations. Under this exception, payroll taxes are determined as though the individual has only one employer, the common paymaster. As a result, the taxes are applied against only a single base amount of wages.

House Bill

No provision.

Senate Amendment

The Senate amendment extends the common-paymaster exception for purposes of collection of FICA and FUTA taxes to the case where the same employee works for related corporations and/or partnerships. The same test used for determining related corporations is employed to determine whether a partnership is related. This provision is effective for wages paid or incurred after December 31, 1986.

Conference Agreement

The conference agreement does not include the Senate amendment.

3. Agricultural wages subject to FUTA

Present Law

The Federal unemployment tax (FUTA) applies to wages of workers in agricultural operations with a payroll of at least $20,000 in any calendar quarter, or with 10 or more employees in 20 weeks of the year (sec. 3306(c)(1)).

House Bill

No provision.

Senate Amendment

Under the Senate amendment, the quarterly payroll threshold at which agricultural wages are subject to FUTA tax is increased from $20,000 to $40,000, effective for wages paid after September 30, 1986.

Conference Agreement

The conference agreement does not include the Senate amendment.

4. FUTA for certain Indian tribal governments

Present Law

Generally, Indian tribal governments are treated as any other employer and are subject to Federal unemployment tax (FUTA). No exception is provided if unemployment compensation coverage is denied by the State in which the employer conducts business. Certain Indian tribal governments have been denied unemployment compensation coverage by the State of Colorado and are not required to pay State unemployment compensation taxes.

House Bill

No provision.

Senate Amendment

The Senate amendment provides an exemption from FUTA tax for Indian tribal governments the service for which was not covered by a State unemployment compensation program on June 11, 1986. This provision is effective for services performed before January 1, 1988, including services performed prior to the date of enactment (but does not authorize a refund of any previously paid FUTA tax). It is anticipated that the State of Colorado and the affected Indian tribal governments will work out an unemployment compensation coverage agreement prior to January 1, 1988 similar to such agreements currently in effect in other States.

Conference Agreement

The conference agreement follows the Senate amendment.

5. Treatment of certain technical personnel

Present Law

Section 530 of the Revenue Act of 1978, as amended, provides generally that taxpayers who in the past had a reasonable basis (such as past industry practice) for not treating workers as employees may continue such treatment, under certain circumstances, without incurring employment tax liabilities.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that section 530 of the Revenue Act of 1978 does not apply in the case of an individual who, pursuant to an arrangement between the taxpayer and another person, provides services for such other person as an engineer, designer, drafter, computer programmer, systems analyst, or other similarly skilled worker engaged in a similar line of work. This provision is effective for services performed after the date of enactment. By virtue of the exception to section 530 of the 1978 Act provided under the Senate amendment, the prohibition against issuance of regulations or rulings concerning employment tax status in section 530 of the 1978 Act does not prohibit issuance of regulations or rulings with respect to the employment tax status of individuals with respect to whom the Senate amendment applies.

Under the Senate amendment, it is intended that certain individuals retained by firms providing technical services are classified, for income and employment tax purposes, as employees or as independent contractors under the generally applicable common law (nonstatutory) standards without regard to section 530 of the Revenue Act of 1978. Technical services firms have retained engineers, designers, drafters, computer programmers, systems analysts, and other similarly skilled personnel who are engaged in lines of work similar to those listed for assignments for clients of the technical services firms. Some of these individuals have taken the position that they should be treated as independent contractors, which would relieve the technical services firms of the obligation to withhold income and employment taxes from their earnings.

The Senate amendment applies whether the services of such individuals are provided by the firm to only one client during the year or to more than one client, and whether or not such individuals have been designated or treated by the technical services firm as independent contractors, sole proprietors, partners, or employees of a personal service corporation controlled by such individual. The effect of the provision cannot be avoided by claims that such technical service personnel are employees of personal service corporations controlled by such personnel. For example, an engineer retained by a technical services firm to provide services to a manufacturer cannot avoid the effect of this provision by organizing a corporation that he or she controls and then claiming to provide services as an employee of that corporation.

This provision does not affect the application of Code section 414(n), relating to employee leasing, to technical services personnel in circumstances where that provision applies under present law. Also, the provision does not apply with respect to individuals who are classified, under the generally applicable common law standards, as employees of a business that is a client of the technical services firm.

Conference Agreement

The conference agreement follows the Senate amendment with a technical modification clarifying the language of the Senate amendment to conform to the language of section 530 of the Revenue Act of 1978 and with an amendment to the effective date. The conferees further clarify that the provision does not affect the application of the Treasury's authority under Code section 414(o) to prevent avoidance of certain employee benefit requirements. The conferees believe that the provision will provide more consistent tax treatment of individuals performing services in the technical service industry.

The conference agreement is effective for remuneration paid and services performed after December 31, 1986.

6. Payroll tax deposits

Present Law

The manner and time for depositing an employer's FICA taxes and the income and

FICA taxes withheld from employees are specified in Treasury regulations (sec. 6302). If the aggregate amount of undeposited taxes totals $3,000 or more at the end of any one-eighth-monthly period, the employer must deposit the taxes within three banking days of the close of the one-eighth-monthly period (Reg. sec. 31.6302(c)-1).

House Bill

No provision.

Senate Amendment

The Senate amendment increases from $3,000 to $5,000 the amount of undeposited payroll taxes an employer may aggregate before the one-eighth-monthly deposit rule applies, effective for months beginning after December 31, 1986.

Conference Agreement

The conference agreement does not include the Senate amendment.

E. Budget-Related Provisions

1. Revenues for budget purposes

Present Law

No provision.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that any "revenue windfall" (i.e., any increase in revenues over present law) in fiscal years 1986 or 1987 that is attributable to provisions of the bill is not to be taken into account for determining total budget revenues for fiscal years 1986-1989. For fiscal years 1988 or 1989, any revenue shortfall attributable to the bill is not to be taken into account to the extent that it exceeds any fiscal year 1986 or 1987 windfall. This provision applies for determining Budget Act points of order and for purposes of sequestrations under the "Gramm-Rudman-Hollings" budget legislation.

Conference Agreement

The conference agreement does not include the Senate amendment.

2. Budget revenue fluctuations

Present Law

No provision.

House Bill

No provision.

Senate Amendment

The Senate amendment includes a sense of the Senate resolution that the conference committee on the bill should report Federal tax reform legislation that produces a revenue path with minimal revenue fluctuations.

Conference Agreement

The conference agreement does not include the Senate amendment.

F. Tax Code Revisions

1. Reference to Internal Revenue Code

Present Law

The current tax code (title 26 of the U.S. Code) is referred to as the "Internal Revenue Code of 1954, as amended" or the "1954 Code."

The 1954 Code provides that no provision of the statute is to apply if it would be contrary to any treaty obligation of the United States in effect on the date of enactment of the 1954 Code (sec. 7852(d)).

House Bill

The House bill enacts into law the Internal Revenue Code of 1985. That is, the bill reenacts the provisions of the 1954 Code—as in effect on the date of enactment of the bill—together with amendments as made by the bill. The committee report states that this reenactment is not intended to change any substantive provisions of the tax law not otherwise modified by this bill.

The bill also provides that no provision of the Internal Revenue title that was in effect on August 16, 1954 shall apply in any case where its application would be contrary to any treaty obligation of the United States in effect on the date of enactment of the 1954 Code. This provision is intended to clarify that treaty provisions that were in effect in 1954 and that conflict with the 1954 Code as originally enacted are to prevail over then-existing statutes, but not over later-enacted statutes, and that treaty benefits that are now properly available under the 1954 Code will remain available under the 1985 Code.

Senate Amendment

No provision.

Conference Agreement

Under the conference agreement, the "short title" of the tax statute is the Internal Revenue Code of 1986.

A number of provisions of the conference agreement provide that the Secretary of the Treasury or his delegate is to prescribe regulations. Notwithstanding any of these references, the conferees intend that the Treasury may, prior to prescribing these regulations, issue guidance for taxpayers with respect to the provisions of the conference agreement by issuing Revenue Procedures, Revenue Rulings, forms and instructions to forms, announcements, or other publications or releases. The conferees expect that the Treasury will provide taxpayers with this guidance as soon as feasible.

2. Moratorium on major tax revisions

Present Law

No provision.

House Bill

No provision.

Senate Amendment

The Senate amendment includes a sense of the Congress resolution that the provisions of the Internal Revenue Code that are added or amended in the current legislation should remain unchanged for a period of at least five years from the date of enactment.

Conference Agreement

The conference agreement does not include the Senate amendment.

G. Miscellaneous Provisions

1. Foster care payments

Present Law

A foster parent may exclude from gross income certain reimbursements for expenses of caring for a foster child under age 19 who has been placed in a foster family home by a government agency or a State-licensed, tax-exempt child placement agency (sec. 131). The exclusion also applies to certain difficulty of care payments with respect to a handicapped foster child (but not for more than 10 children in the foster home during a year). To obtain the exclusion, the foster parents must account for all expenses incurred for each foster child in their care.

House Bill

The House bill modifies the present-law exclusion to eliminate the requirement of detailed recordkeeping, effective for taxable years beginning on or after January 1, 1986.

Senate Amendment

No provision.

Conference Agreement

The conference agreement follows the House bill in eliminating the requirement of detailed recordkeeping as a condition for obtaining the exclusion. This provision otherwise does not expand the types of payments eligible for the exclusion.

Also, the conference agreement deletes the present-law limitation that the exclusion applies with respect to foster care only of children under age 19. (However, in the case of any foster home in which there is a foster care recipient who has attained age 19, foster care payments, including difficulty of care payments, are not excludable to the extent made for more than five such foster care recipients.) The conferees intend that this extension of the exclusion to adult foster care is limited to cases of individuals who provide foster care within their own homes to adults who have been placed in their care by an agency of the State or political subdivision thereof specifically designated as responsible for such function. The exclusion does not apply to payments to operators of boarding homes who provide room and board to adults who have not been placed in their care through the actions of a governmental agency responsible for adult foster care.

These provisions are effective for taxable years beginning on or after January 1, 1986.

2. Rules for spouses of Vietnam MIAs

Present Law

Certain tax relief provisions applicable with respect to Vietnam MIAs and their spouses expired after 1982 (secs. 2(a)(3)(B), 692(b), 6013(f)(1), and 7508(b)).

House Bill

The House bill reinstates and makes permanent the expired provisions relating to Vietnam MIAs, effective for taxable years beginning after 1982.

Senate Amendment

The Senate amendment is the same as the House bill.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment.

3. Tax exemption for certain reindeer-related income

Present Law

Under the Reindeer Industry Act of 1937, the United States Government purchased all reindeer herds and improvements held by non-Alaskan natives. Since then, this property has been held in trust by the government for Alaskan natives who manage the reindeer herds. The U.S. Court of Appeals for the Ninth Circuit ruled in 1985 that reindeer-related income derived by Alaskan natives from herds is not exempt from Federal taxation.

House Bill

No provision.

Senate Amendment

The Senate amendment provides that during the period of the trust, income derived directly from the sale of reindeer or reindeer products as provided in the 1937 Act is exempt from Federal income taxation. This provision applies as if originally included in the related provision of the 1937 Act.

Conference Agreement

The conference agreement follows the Senate amendment.

4. Information on special or unique tax treatment

Present Law

No provision.

House Bill

No provision.

Senate Amendment

The Senate amendment includes a sense of the Senate resolution that the conference report on the bill should contain the name of any business concern or group receiving special or unique treatment, and the reason for and cost of such treatment.

Conference Agreement

The conference agreement does not include the Senate amendment.

5. Certain quality control studies for AFDC and Medicaid

Present Law

Under section 12301 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA), the Department of Health and Human Services (HHS) and the National Academy of Sciences (NAS) are required to undertake a study of quality control measures in connection with the administration of the Aid to Families with Dependent Children and Medicaid programs. HHS and NAS are required to report the results of their study to the Congress within one year of the date of enactment of COBRA (April 7, 1986). In addition, HHS is required to publish certain regulations relating to such quality control measures within 18 months of the date of enactment of COBRA.

House Bill

No provision.

Senate Amendment

The Senate amendment requires HHS and NAS to report the results of their quality control study within one year after contracting to undertake the study. The date by which HHS is required to publish the specified regulations is six months after the deadline for reporting the results of the quality control study to the Congress.

Conference Agreement

The conference agreement follows the Senate amendment.

TITLE XVIII. TECHNICAL CORRECTIONS

House Bill

The House bill contains technical, clerical, and conforming amendments to the Tax Reform Act of 1984 and other recently enacted tax legislation, as well as similar amendments to nontax provisions of the Deficit Reduction Act of 1984. The Committee on Ways and Means previously favorably reported H.R. 2110 (H. Rep. 99-526, Part 1), containing technical corrections to the Retirement Equity Act of 1984. The provisions in H.R. 2110 as so reported are referred to herein as being in the House bill.

Senate Amendment

The Senate amendment contains technical, clerical, and conforming amendments to the Tax Reform Act of 1984, the Retirement Equity Act of 1984 and other recently enacted tax legislation, as well as similar amendments to nontax provisions of the Deficit Reduction Act of 1984 and the Consolidated Omnibus Budget Reconciliation Act of 1985.

Conference Agreement

The conference agreement follows the House bill and the Senate amendment with respect to common provisions. Specifically, the conference agreement includes the following provisions:

The Tax Reform Act of 1984

Deferral of certain tax reductions

The conference agreement follows the Senate amendment.

Tax-exempt entity leasing

The conference agreement follows the Senate amendment except that the provision relating to subsidiary organizations applies to property placed in service after September 27, 1985.

Debt instruments

The conference agreement follows the Senate amendment except that the provision relating to amortization of bond premiums applies to bonds issued after September 27, 1985; the provision requiring accrual of interest on certain short term obligations applies to obligations acquired after September 27, 1985; and the agreement contains the provision in the House bill clarifying the effective date for the repeal of the capital asset requirement.

Market discount

The conference agreement contains a provision relating to the treatment of market discount on debt instruments, the principal of which is paid in more than one installment. Under the conference agreement, a holder of such a debt instrument takes accrued market discount into income upon receipt of amounts includible in the debt instrument's stated redemption price at maturity, to the extent of the amounts so received. Rules are provided to prevent double counting of any market discount. In addition, rules are provided to require the recognition of accrued market discount upon the stripping of a debt instrument.

The conference agreement provides that the computation of the accrual of market discount on market discount bonds is to be provided by Treasury regulations. Until such time that the Treasury Department issues such regulations, the conferees intend in the case of debt instruments to which the provision applies, holders may elect to accrue market discount either on the basis of a constant interest rate or as follows: (1) for those debt instruments that have original issue discount ("OID"), market discount shall be deemed to accrue in proportion to the accrual of OID for any accrual period (i.e., the amount of market discount that accrues during a period is equal to the product of (a) the total remaining market discount, and (b) a fraction, the numerator of which is the OID for the period and the denominator of which is the total remaining OID at the beginning of the period), and (2) for those debt instruments that have no OID, the amount of market discount that is deemed to accrue shall be the amount of discount that bears the same ratio to the total amount of remaining market discount that the amount of stated interest paid in the accrual period bears to the total amount of stated interest remaining to be paid on the debt instrument as of the beginning of the accrual period.

In the case of debt instruments that would be subject to the OID rules contained in new Code sec. 1272(a)(6) (without regard to whether the debt instrument has original issue discount), the same prepayment assumption that would be made in computing OID would be made in computing the accrual of market discount (whether or not the taxpayer elects to accrue market discount on the basis of a constant interest rate). In addition, the conferees intend that the same rules that apply to the accrual of market discount on debt instruments whose principal is paid in more than one installment, also is applied in amortizing amortizable bond premium (within the meaning of sec. 171).

Stripped tax-exempt bonds

The conference agreement provides that stripped bonds and coupons resulting from the strip of a tax-exempt obligation are subject to the general rules of section 1286, with certain modifications. In the case of such stripped bonds and and stripped coupons, the original issue discount ("OID") under section 1286(a) will be limited to the amount of OID that produces a yield to maturity (based on the purchase price of the stripped bond or coupon) equal to the lower of the coupon rate on the original tax-exempt obligation or the actual yield of the stripped bond or coupon. The conferees intend that if a taxpayer can establish the actual yield of a bond (with all coupons attached) at the time of original issue, the taxpayer may elect to use such yield for purposes of this computation in lieu of the coupon rate.

For example, assume that a tax-exempt obligation with a face amount of $100, two years remaining to maturity, and a coupon rate of ten percent (payable annually) is stripped and the right to the $100 "principal" payment is sold for $79.72 (i.e., a 12-percent yield, compounded annually). Under the conference agreement, the OID is limited to $16.74, which represents the total OID on the stripped bond, assuming a 10-percent yield and a purchase price of $79.72. The amount of OID taken into account under section 1286(a) is tax exempt and shall determine the adjusted basis of the holder in accordance with section 1288(a).

Further, the conference agreement clarifies the application of section 1286(b)(2) (relating to the treatment of the person stripping a bond) to tax-exempt obligations.

Corporate

The conference agreement follows the Senate amendment except that the provision relating to the definition of qualified stock purchase applies for purchases begun after December 31, 1985; the provision relating to collapsible corporations applies to sales after September 27, 1985; and the agreement contains the provision in the House bill retaining the prior law consolidated return rules for a specified corporation.

The conference agreement also provides that, during the applicable transition period, the affiliation requirements of the consolidated returns provisions will be applied to Alaska Native Corporations (and their wholly owned subsidiaries), and to another specified group of corporations, solely by reference to the express language in those provisions. Thus, eligibility for affiliation in the case of such corporations will be determined solely on the basis of ownership of stock satisfying the 80-percent voting power and 80-percent nonvoting stock tests, without regard (for example) to the value of the stock owned, to escrow arrangements, voting trusts, redemption or conversion rights, stock warrants or options, convertible debt, liens, or similar arrangements, or to the motive for acquisition of the stock or affiliation.

In addition, with certain specified exceptions, no provision of the Internal Revenue Code or principle of law will apply to deny the benefit of losses or credits of Native Corporations (or their wholly owned subsidiaries) to the affiliated group of which the corporation is a member or of the speci-

fied group of corporations, during the applicable transition period. Thus, in general, the benefit of such losses and credits may not be denied in whole or in part by application of section 269, section 482, the assignment of income doctrine, or any other provision of the Internal Revenue Code or principle of law.

In addition, the conference agreement makes certain modifications to the provision relating to the treatment of the transferor corporation in a tax-free reorganization (sec. 361). In any type of reorganization, no gain or loss is recognized by the acquired corporation on a disposition of stock or securities (in a party to the reorganization) received from the acquiring corporation, provided the disposition is pursuant to the plan of reorganization.[1] Gain (but not loss) is recognized on distributions pursuant to the plan of any "boot" including pre-acquisition assets of the acquired corporation. However, under the provision, boot received from the acquiring corporation will generally take a basis equal to its fair market value at the time of transfer.

For purposes of this provision, a transfer to creditors of the acquired corporation will be deemed pursuant to the plan of reorganization if the acquired corporation is liquidated or merged pursuant to the plan of reorganization (or, in the case of a "C" reorganization, the Secretary has waived the liquidation requirement), and the transfer to creditors is pursuant to such liquidation or merger. No inference is intended as to whether transfers of stock or securities to creditors in such circumstances may be regarded as pursuant to a plan of reorganization under present law.

The conference agreement also provides that a specified corporation will be treated as having made a valid section 338 election with respect to a certain stock acquisition.

The conference agreement is not intended, with respect to the golden parachute provision relating to the adoption of the affiliated group rules, to create an inference with respect to the definition of a change in control.

Partnerships

The conference agreement follows the House bill and the Senate amendment.

Trusts

The conference agreement follows the Senate amendment.

Accounting

The conference agreement follows the Senate amendment and contains the provision in the House bill relating to a certain payment to an insurance company with respect to an asbestos claim.

Settlement funds

The conference agreement generally follows the Senate bill. The conference agreement clarifies that: (1) the provision does not affect the treatment of payments made for certain personal injury liability assignment within the meaning of section 130; (2) payments from a designated settlement fund to a claimant are treated as having been made by the taxpayer for purposes of determining the claimant's taxable income; and (3) taxpayers may not both exclude an amount recovered and deduct (under this provision) an amount paid to the extent such amount is attributable to the same liability.

The conference agreement provides that except as provided in regulations escrow accounts, settlement funds, or similar funds are subject to current taxation. If the contribution to such an account or fund is not deductible, then the account or fund is taxable as a grantor trust.[2] This provision is effective for accounts or funds established after August 16, 1986.

Straddles

The conference agreement follows the House bill. Under the statute as clarified by the technical correction, generally a taxpayer engaged in the business of investment banking who regularly trades in commodities as a part of that business would be considered in the trade or business of trading commodities. If a person qualifies as a commodities dealer, the subsection (b) treatment applies with respect to any position disposed of by such person. It would, for example, apply without regard to whether the position was in a commodity regularly traded by the person, whether it was traded on an exchange on which the dealer was a member, or whether an identical position was re-established on the same trading day or subsequently. The conferees also wish to clarify that if an individual owns a seat on a commodities exchange, such individual will be treated as a "commodities dealer." Further, if a trading firm also regularly trades commodities in connection with its business, then the commodities trading will be deemed to be part of its trade or business. The latter rule applies only to the securities trading firm itself; it does not apply to separate individual trading of its partners, principals, or employees, nor to partnerships or other organizations formed for the principal purpose of marketing tax straddles.

The conference agreement also clarifies that subsection (b) treatment is available not only with respect to a loss incurred directly by a commodities dealer, but also to a loss allocable to a commodities dealer in determining such person's income with respect to an interest in a partnership, S corporation, or trust. For example, in determining the tax liability of a commodities dealer who was a shareholder in an S corporation, a loss incurred by the corporation in the trading of commodities would be treated as a loss incurred by the commodities dealer. Of course, whether an individual is a commodities dealer is no way indicated merely because such individual has an interest in a partnership, S corporation or trust engaged in the trading of commodities.

Further, the conferees clarify their intent that the Internal Revenue Service bring all outstanding pre-ERTA straddle litigation to a speedy resolution, so that the large docket of cases on this issue may be cleared, in a manner consistent with this legislation.

Depreciation

The conference agreement follows the House bill except that the provision relating to related party sale-leasebacks applies to property placed in service after December 31, 1985. In addition, the conference agreement clarifies that the depreciation recapture installment sale rule (sec. 453(i)) applies to the installment sales of partnership interests.

Foreign

The conference agreement follows the Senate amendment, with the addition of the FSC completed contract method transition rule from the House bill and a targeted transitional amendment to the separate foreign tax credit limitation for income of foreign finance subsidiaries.

Compliance

The conference agreement follows the Senate amendment. The conference agreement also requires the passthrough of information with respect to trusts and estates, parallel to the provision of the Senate amendment requiring the passthrough of information to the beneficial owners of partnership interests.

Miscellaneous

The conference agreement follows the House bill and the Senate amendment with the following modifications.

a. Tax benefit rule.—The House bill and the Senate amendment provide that the "tax benefit" rule of Section 111 applies where there was no reduction in the taxpayer's tax in a prior year. Under prior law, some taxpayers who had no taxable income for the year in which a deduction was claimed, or who were subject to the alternative minimum tax or had credits that reduced their tax liability to zero, were required to include in income in a later year a portion of the amount previously deducted. The intent of the amendment is to provide equity to taxpayers in these situations so that an amount would be included in income only if the taxpayers derived a tax benefit from the deduction in the year it was taken. It is not intended that the current simplified tax benefit computation be changed for individual taxpayers who receive refunds of State and local income taxes. A recomputation of the tax liability for the prior year is expected in these situations only if the taxpayer had no taxable income in the prior year or was subject to the alternative minimum tax or had credits that reduced their tax liability to zero. Other individual taxpayers receiving refunds of State and local income taxes must continue to follow the procedure set forth by the IRS to determine whether their refund should be included in income. This procedure involves a comparison of the refund amount with the amount by which the taxpayer's itemized deductions for the prior year exceeded the zero bracket amount (standard deduction). The lesser of the two amounts is included in income in the current year. This simple procedure, effectively, produces a result comparable to that obtained by the more complicated recomputation of the taxpayer's tax liability for the prior year.

b. Low interest loans.—The conference agreement exempts obligations issued by Israel from the below-market interest rate provisions of section 7872 if the obligation is payable in United States dollars and bears an interest rate of not less than 4 percent.

c. Related party transactions.—The conference agreement contains the provisions in the House bill.

d. Federal Home Loan Bank.—The conference agreement provides that the earnings and profits of the Federal Home Loan Bank, for purposes of section 246(a)(2), is to be determined as reported in its annual financial statement.

e. Luxury vehicles and gas guzzler tax.—The conference agreement includes all the provisions common to both bills. In addi-

[1] This provision is not intended, however, to affect the recognition of discharge of indebtedness income by the acquired corporation on a transfer to a creditor.

[2] This provision reverses the finding in Rev. Rul. 71-119, 1971-1 CB163.

tion, the conference agreement generally follows the House bill and the Senate amendment in utilizing "unloaded gross vehicle weight" for purposes of both the luxury vehicles and gas guzzler tax provisions. However, the conference agreement follows the Senate amendment by utilizing "gross vehicle weight" for purposes of the luxury vehicles provision, with respect to trucks and vans. The conference agreement follows the House bill as to the effective date.

The conference agreement exempts from the gas guzzler tax small manufacturers who lengthen existing automobiles.

Life insurance

The conference agreement follows the Senate amendment except for the following modifications.

a. Self-insured death benefits.—The provision in the Senate amendment clarifying that death benefits provided under a self-insured church plan can qualify as life insurance is not adopted.

b. Early withdrawal tax for deferred annuities.—The clarification in the Senate amendment of the exceptions to the 5-percent additional income tax for premature distributions from deferred annuity contracts is effective for contracts issued more than 6 months after the date of enactment.

c. Early withdrawal tax for annuity contracts.—An exception to the penalty is provided in the case of annuity contracts that would qualify as a qualified funding asset under a structured settlement arrangement, were the liability assigned.

d. Section 818(c) elections.—The Senate amendment provision relating to section 818(c) elections of companies acquired during 1983 is amended to provide that a section 338 election may be made with respect to such an acquired company during the 60-day period following the date of enactment; the conferees intend no inference as to the effect of the section 818(c) election on the basis of assets acquired for which a section 338 election is made. The time to make an election under section 818(c) is also extended.

e. Mortgage life insurance.—The provision in the Senate amendment with respect to the provision relating to a certain mutual insurance company engaged in nonparticipating mortgage life insurance business is not adopted.

f. Group-term life insurance.—The provision in the Senate amendment relating to a grandfathered group-term life insurance program is modified to provide that grandfather treatment is retained with respect to any employee whose benefits do not increase under the plan.

g. Modified coinsurance grandfather.—Section 255 of the Tax Equity and Fiscal Responsibility Act of 1982 repealed section 820 of the Code relating to the option treatment of modified coinsurance contracts and adopted a grandfather provision with respect to the treatment of modified coinsurance contracts for taxable years prior to 1982. Under this grandfather rule, any determination as to whether any contract met the requirements of section 820 (before repeal) (1) was to be made solely by reference to the terms of the contract and (2) the treatment of the contract was made in accordance with the regulations under section 820 as in effect on December 31, 1981. Under TEFRA, such contracts were grandfathered except in the event of fraud.

The Internal Revenue Service has recently issued "guidelines" to auditing agents instructing them to raise certain issues with respect to modified coinsurance contracts. The guidelines apply to taxable years prior to 1982 and direct agents to examine two issues: (1) the date on which modified coinsurance contracts became effective, and (2) the rate at which investment income was transferred under the contracts.

The provision clarifies the intent of Congress that, for taxable years prior to January 1, 1982, the IRS should give full and complete effect to the terms of a modified coinsurance contract. Accordingly, under the provision, the IRS is to respect the manner in which the terms of a modified coinsurance contract have been reflected on the tax return. In particular, the provision requires the IRS to recognize the investment income rate terms and the effective date terms stated in the contract.

h. Prevention of double proration.—An anti-double proration rule applicable to life insurance companies with property and casualty insurance subsidiaries is added to the life insurance anti-double proration rule in the Senate amendment.

i. Variable contracts with guarantees.—Certain variable life insurance contracts with guarantees are treated as variable contracts under section 817 with a special effective date.

j. U.S. branches of foreign life insurance companies.—Branches of foreign life insurance companies are not included in the determination of the 50 largest stock companies and the calculation for mutual companies.

k. High surplus mutual rule.—The rule determining the excess equity base for a high surplus mutual company is modified to apply where the excess equity base, for its first taxable year beginning in 1984, as determined under sec. 809(i)(2)(D) of the Code, is no more than $175,100,000.

l. Suspension of audits, time to file petition and interest and penalties.—The time to file a petition in Tax Court, the initiation and continuation of audits, and the running of interest and the collection of penalties, is suspended for a period ending August 16, 1987 with respect to certain self-insured workers compensation funds.

m. Adjustment to earnings and profits for fresh start adjustment.—The provision in the Senate amendment is modified to allow an additional company to elect to take the fresh start adjustment into account in 1985 for earnings and profits.

Private foundations

The conference agreement follows the Senate amendment.

Simplification

Except as provided below with respect to the treatment of alimony, the conference agreement follows the Senate amendment.

Alimony

The conference agreement revises the front-loading alimony rules of section 71(f). Under the conference agreement, if the alimony payments in the first year exceed the average payments in the second and third year by more than $15,000, the excess amounts are recaptured in the third year by requiring the payor to include the excess in income and allowing the payee who previously included the alimony in income a deduction for that amount in computing adjusted gross income. A similar rule applies to the extent the payments in the second year exceed the payments in the third year by more than $15,000. This rule is intended to prevent persons whose divorce occurs near the end of the year from making a deductible property settlement at the beginning of the next year. Recapture is not required if either party dies or if the payee spouse remarries by the end of the calendar year which is two years after the payments began and payments cease by reason of that event. Also the rule does not apply to temporary support payments (described in sec. 71(b)(2)(C)) or to payments which fluctuate as a result of a continuing liability to pay, for at least three years, a fixed portion or portions of income from the earnings of a business, property or services.

Thus, for example, if the payor makes alimony payments of $50,000 in the first year and no payments in the second or third year, $35,000 will be recaptured (assuming none of the exceptions apply). If instead the payments are $50,000 in the first year, $20,000 in the second year and nothing in the third year, the recapture amount will consist of $5,000 from the second year (the excess over $15,000) plus $27,500 for the first year (the excess of $50,000 over the sum of $15,000 plus $7,500). (The $7,500 is the average payments for years two and three after reducing the payments by the $5,000 recaptured from year two.)

This new provision will generally apply to divorce or support decrees and agreements executed after 1986. The provision will also apply with respect to the modification of a prior instrument where the modified instrument expressly so provides.

In addition, the conference agreement deletes the requirement that the divorce instrument specifically state there is no liability to make payments after death. The conference agreement also reduces the recapture period to three years for those divorce decrees and agreements not covered by the amendment described above.

Welfare benefit plan provisions

The conference agreement follows the Senate amendment with the following exceptions:

a. Definition of fund.—The conference agreement follows the House bill with the following modifications:

The conference agreement also modifies the exclusion from the term "fund" for amounts held by an insurance company under certain "qualified, nonguaranteed insurance contracts." A qualified, nonguaranteed insurance contract is defined as an insurance contract (including a reasonable premium stabilization reserve) under which (1) there is not a guarantee of a renewal of the contract at guaranteed premium rates, and (2) other than current insurance protection, the only payments to which the employer or employees are entitled under the contract are refunds or policy dividends that are not guaranteed, that are experience rated and that are determined by factors other than the amount of welfare benefits paid to (or on behalf of) the employees of the employer or their beneficiaries.

Thus, under the conference agreement, amounts that are held by an insurance company for an employer generally are not to be treated as a fund to the extent that the amounts are subject to a significant current risk of economic loss that is determined, in part, by factors other than the amount of welfare benefits paid to (or on behalf of) the employees of the employer. Experience refunds or policy dividends are determined by additional factors where they reflect a charge for pooling of large individual claims, where the insurance company's retention reflects a risk charge related to the insurer's actual or anticipated experience under the class of business to which the

contract belongs, or where the claims experience of other policyholders is otherwise taken into account. For example, an additional factor is present where the experience refund or policy dividend is based on the experience of a single employer together with a risk charge that is intended to assess the employer for an appropriate share of the insurance company's anticipated losses under policies where claims and expenses exceed premiums collected. The conferees do not intend, however, that a de minimis risk charge on its own will be sufficient to create a significant risk of economic loss.

The conferees emphasize that, in prescribing regulations relating to the definition of a fund, the Treasury Department is to take into account that the principal purpose of the provision is to prevent employers from taking premature deductions for expenses that have not yet been incurred. To the extent that the temporary and proposed regulations could be interpreted to include in the definition of a fund certain experience-rated insurance arrangements with a significant current risk of economic loss, the conferees do not believe that the regulations implemented this purpose. The conferees believe that significant premature deductions do not occur with respect to experience-rated group insurance because of the element of insurance risk transferred to the insurance company. Thus, by excluding qualified nonguaranteed insurance contracts from the definition of a fund, the conference agreement makes clear that typical group insurance arrangements are not to be made subject to the welfare benefit fund provisions through regulations. In addition, the conferees reiterate that any regulations defining the term "fund" should take into account that the principal purpose of the provision is to prevent premature deductions by employers.

b. Employee pay-all VEBAs.—The Senate amendment exempts certain employee pay-all VEBAs with at least 50 employees from the welfare benefit fund provisions if the amount of any refund or rebate to an employee is determined by factors other than the employee's experience. Under the conference agreement, an employee pay-all VEBA is not considered to fail to qualify for this exemption merely because an employee's refund or rebate may vary depending upon the number of years the employee contributed to the fund. For example, if a VEBA provides a set employee contribution rate that applies for 3 years, the mere fact that an employee who contributes for 3 years may receive a larger refund or rebate than an employee who contributes for less than 3 years does not cause the fund to fail to meet the requirements for exemption as long as there is a significant current risk of economic loss (i.e., the amount of the refund or rebate is also determined by factors other than any employee's experience).

c. Unfunded deferred compensation.—The provision in the Senate amendment clarifying that the deductibility of deferred compensation is governed by section 404 if the amounts would, but for section 404, otherwise be deductible under any other provision is modified to apply also for purposes of determining the deductibility of foreign deferred compensation (sec. 404A) and for purposes of the welfare benefit fund provisions.

d. Accrued vacation pay.—The transition rule for accrued vacation pay applies in the case of a fully vested vacation pay plan under which the vacation pay is expected to be paid (or is in fact paid) within 12 months following the close of the employer's taxable year.

Pension plan provisions

The conference agreement follows the Senate amendment with the following exceptions.

a. Tax-sheltered annuities.—The provision in the House bill requiring that distributions commence under a tax-sheltered annuity no later than when the employee attains age 70½ is adopted.

b. Estate tax exclusion.—The provision modifying the grandfather rule relating to the repeal in the Act (and the reduction in TEFRA) of the estate tax exclusion for pension benefits is further modified to provide that the grandfather rule is also available for individuals who separated from service before January 1, 1985, with respect to section 525(b)(2) of the Act, or before January 1, 1983, with respect to section 245(c) of TEFRA, elected a form of benefits to be paid in the future, and who was not in pay status as of the applicable dates.

c. Multiemployer Pension Plan Amendments Act effective date.—The change in the effective date of the Multiemployer Pension Plan Amendments Act of 1980 with respect to a certain employer is modified to change the effective date from January 12, 1982, to January 16, 1982, and from May 16, 1980, to May 14, 1980, in the case of another employer.

Fringe benefit provisions

The conference agreement follows the Senate amendment with the following exceptions:

a. Working condition fringe.—The conference agreement adopts the clarification in the legislative history of the House bill that the application of the product testing provision for purposes of the working condition fringe benefit exclusion in the case of automobile testing is not violated if the employer charges the employee a reasonable amount for any personal use of the automobile as long as all of the other requirements are satisfied.

b. Automobile salesmen.—The conference agreement adopts the clarification in the legislative history of the House bill relating to the working condition fringe benefit rule for full-time automobile salesmen.

c. De minimis fringe.—The conference agreement adopts the provision in the legislative history of the Senate bill clarifying the applicability of the de minimis fringe benefit exclusion to the provision of public transit passes.

d. Qualified tuition reduction.—The conference agreement adopts the House bill provision relating to an exception to the rules relating to qualified tuition reductions for certain students.

ESOPs.—The conference agreement follows the Senate amendment, with certain modifications. The agreement clarifies that, for purposes of section 1042 (relating to certain sales of stock to an ESOP), in computing whether lineal descendants of a selling taxpayer have been allocated more than 5 percent of the employer securities attributable to a sale to which section 1042 applies, all employer securities sold to the ESOP by the taxpayer which are eligible for nonrecognition treatment are taken into account.

The requirement under section 1042 that certain individuals not be allocated employer securities attributable to a sale to which the section applies, or amounts in lieu thereof, is not intended to apply to amounts which are provided to the individual outside of a qualified plan, for example, through a non-qualified deferred compensation agreement.

In addition, the conference agreement clarifies that an insurance company is treated as an operating corporation for purposes of determining whether property qualifies as qualified replacement property under section 1042.

The conference agreement adopts the provision in the Senate amendment which permits a plan sponsored by a corporation whose bylaws or charter restrict the ownership of substantially all outstanding employer securities to employees or certain trusts to distribute employer securities in certain cases. The conferees intend that, if such a plan does distribute employer securities, the distribution requirements and put option requirements generally applicable to ESOPs (except for the requirement that the employee has a right to demand that the distribution be paid in employer securities) will apply to the distribution.

Under the conference agreement, a deduction is allowed for certain dividends paid on employer stock held by an ESOP, even if the stock is not yet allocated to participant accounts. The Treasury is empowered to disallow deductions for dividends paid on stock held by an ESOP if the dividend constitutes, in substance, the evasion of taxation. The conferees intend that the deduction is to be allowed only with respect to reasonable dividends.

Further, the conference agreement provides that market discount is not created by reason of the basis adjustment resulting from the rollover provision for the sale of stock to an ESOP.

Miscellaneous employee benefit provisions

The conference agreement follows the House bill.

Tax-exempt bonds

The conference agreement contains the provisions in the House bill and also the provisions in the Senate amendment, with a modification providing that the sunset date for the exception from the private loan bond restriction is August 15, 1986. The conferees wish to restate that the provision of the House bill with regard to the specificity required for certain volume cap carryforward elections is to be self-implementing rather than an authorization of Treasury action.

Miscellaneous provisions

The conference agreement contains the provisions in the House bill and also contains the provisions in the Senate amendment.

Partnership audit provision

The conference agreement coordinates the Tax Court deficiency procedures with respect to partner level determinations arising from a partnership proceeding with the deficiency procedures applicable to the taxpayer from items unrelated to a partnership proceeding.

Windfall profit tax provision

The House bill and the Senate amendment clarify that the term "newly discovered oil" includes production from a property so long as not more than 2,200 barrels was produced from the property in 1978 and no well on the property was in production for more than 72 hours during that year (whether or not the oil was sold). For purposes of this test, a dual completion well shall be treated as two separate wells, i.e., one well for each horizon. This provision is

intended to clarify the "test well" exception described in the Conference Report accompanying the Crude Oil Windfall Profit Tax Act of 1980. No inference is intended as to the application of similar principles in areas other than section 4991(e)(2).

Social Security, Medicare, AFDC, Child Support, SSI, Social Services

Social Security amendments

The conference agreement follows the Senate amendment.

Revocation of certain church elections

It is intended that the regulations allowing a church or qualified church-controlled organization to revoke an election made under Code section 3121(w)(2) are to provide that any such revocation is not to be effective prior to January 1, 1987, unless such electing church or organization had withheld and paid over all employment taxes due, as if such election had never been in effect, during the period from the stated effective date of the election being revoked through December 31, 1986.

Medicare

The conference agreement follows the Senate amendment.

AFDC and child support

The conference agreement is as follows.

a. Stepparent work disregard.—The conference agreement follows the Senate amendment, which repeals the authority for a lower disregard in the case of part-time employment effective October 1, 1984.

b. Standard filing unit.—The conference agreement includes that portion of the Senate amendment which clarifies that the standard filing unit provision applies to the AFDC-UP program. The change is effective October 1, 1984. The agreement does not include that portion of the Senate amendment concerning Title II benefits and certain child support payments. No inference is intended with regard to current Federal regulations implementing section 402(a)(38) of the Social Security Act.

c. Definition of minor parent.—The conference agreement follows the Senate amendment, which clarifies that the definition of minor parent is based only on age, not on school attendance. The agreement also clarifies that to be considered a minor parent, an individual must be under 18 years of age.

d. Treatment of foster care payments.—The conference agreement follows the Senate amendment which clarifies that a child receiving foster care maintenance payments shall not be considered a member of the family when determining AFDC eligibility and benefits.

e. Distribution of child support collections.—The conference agreement follows the Senate amendment which clarifies that the rules regarding distribution of child support collections apply to child support paid as a result of a court order or an administrative order.

General Social Security Act provisions, SSI and Social Services

The conference agreement follows the House bill and the Senate amendment.

Effective Date of Social Security Act Amendments

The conference agreement follows the House bill and the Senate amendment. With regard to those amendments with an effective date of October 1, 1984, paragraphs (1), (2), (3) and (9) of section 1883(b) of the Senate amendment, no State shall be considered to have failed to comply with the Social Security Act or to have made overpayments or underpayments by reason of its compliance or noncompliance with these amendments for the period beginning October 1, 1984 and ending on the day preceding the date of enactment of this Act.

Unemployment compensation

The conference agreement follows the House bill and the Senate amendment.

Trade and tariff programs

The conference agreement includes the provisions in the House bill and also includes the provisions in the Senate amendment, with a further explanation of the Senate amendment relating to overtime charges for inspectional services of the Federal Government. The conference agreement clarified that this amendment relating to overtime charges is intended to reinstate the limit on weekend and holiday overtime charges for private aircraft and others not benefitting from the inspectional overtime account funded through the customs user fees.

The conference agreement also adds the following amendments.

a. Customs user fees

(1) *Vessels, barges, bulk carriers and ferrys.*—A cap of $5,955 is placed on the fees charged for the arrival of any commercial vessel of more than 100 net tons in the United States. The conferees believe that this cap is appropriate in light of a cap already in place on the arrival of trucks and rail cars. This cap on vessel fees is computed on the basis of fifteen arrivals per year. The conferees intend the fee on commercial vessels to be applicable to each arrival at a U.S. port regardless of whether these arrivals occur as a series of calls at U.S. ports on the same trip or on several trips.

A lower user fee of $100 on barges and bulk carriers arriving from Canada and Mexico is provided in light of the fact that such vessels compete with trucks and rail cars arriving by land from Canada and Mexico, which are subject to much lower user fees. A cap of $1,500, also representing fifteen arrivals, has been placed on the annual total of the user fees which such barges and bulk carriers arriving from contiguous countries must pay.

Regardless of which fee may be applicable during the calendar year, no barge or bulk carrier shall be liable for more than the $5,955 annual cap applicable to vessels.

The conference agreement exempts tugboats from the application of any vessel fees. This exemption is intended to prevent the Customs Service from applying the vessel user fee to a tugboat which provides propulsion to barges or merely accompanies vessels which are themselves subject to a user fee. This exception does not apply to tugboats which are not being used as tugboats at the time of arrival.

The conference agreement contains a definition of the term ferry for the purposes of the exemption from the user fee applicable to commercial vessels of over 100 net tons. For purposes of this exemption, a ferry includes a vessel which transports passengers, vehicles, or railroad cars or any combination thereof, for distances of 300 miles or less. While such a ferry is exempted from the fee, trucks or railroad cars carried by such a ferry would be subject to the applicable fee. In the case of commercial vessels subject to the user fee which transport vehicles or rail cars there shall be no fee assessed on the vehicles or rail cars.

The conferees note that some vessel operators have proposed the consolidation of all vessel fees into a single fee. The conferees expect the Customs Service to study all fees now applicable to vessels entering U.S. ports in an effort to determine whether a simpler and more efficient method can be proposed in administering these fees. The conferees expect the Customs Service to confer with the Finance and Ways and Means Committees in an effort to resolve this problem.

(2) *Passenger fees.*—The conference agreement clarifies that the exemption from the $5 fee applicable to passengers arriving on commercial aircraft and vessels also exempts passengers originating in the U.S. who transit only those locations to which the exemption applies, prior to reentering the U.S. The conferees further provided that overtime for customs inspections may not be charged at U.S. Customs pre-clearance facilities overseas.

(3) *Railroad cars.*—The conference agreement provides for a $7.50 fee on the arrival of each rail car carrying passengers or freight and eliminates the fee on empty railroad cars.

(4) *Customs brokers.*—The conferees clarified that the annual fee for the issuance of a broker permit is to be prorated so that the applicable fee in 1986 would be one-half the annual fee, based on the July, 1986 effective date of the fee. The Customs Service is required to provide 60 days notice of the due date for the fee, and is barred from revoking a delinquent broker's permit absent such notice.

b. Customs broker's freight forwarding

The conferees also clarified Congressional intent with respect to the compensation of customs brokers for certain services. The conference agreement provides licensed customs brokers, when performing ocean freight forwarder services on export shipments from the United States, with the benefits of the right of independent action with respect to the level of forwarder compensation in a shipping conference's freight tariff. Under present law, a conference may prohibit its members from taking independent action on forwarder compensation. This amendment makes clear that a conference must allow its members to take independent action on compensation to the extent that compensation is or will be paid to a forwarder who is also a licensed customs broker under the Tariff Act of 1930.

This provision also benefits customs brokers when they act in the capacity of a licensed freight forwarder on shipments exported from the United States. Despite the requirement of current law that conferences not deny forwarders a reasonable percentage of the carrier's freight charges as compensation for the forwarder's service, some conferences are limiting forwarders' compensation to a percentage of some, but not all, of the rates and charges assessed against the cargo in their tariffs. The purpose of this amendment is to make clear that when compensation is paid to a forwarder who is also a licensed customs broker, the compensation must be based on all the freight charges, including, but not limited to, surcharges, handling charges, service charges, terminal charges, supplements, currency adjustment factors, and any and all other charges required to be paid by the shipper or consignee under the tariff.

These amendments do not in any way modify or diminish the existing scope or protections of the Shipping Act of 1984 as applied to ocean freight forwarders in general. Their sole purpose is to impose additional requirements on conferences or carri-

er groups in their concerted dealings with forwarders who are also licensed customs brokers.

c. Foreign trade zones

The fifth proviso of section 81c. of the Foreign Trade Zones Act of 1934, as amended, prohibits operations involving the use of certain domestic merchandise in foreign trade zones. The purpose of this provision was to prevent internal revenue taxes from being avoided by the use of foreign trade zones. However, the provision also has prevented the use of domestic merchandise on which there are no internal revenue taxes or on which all internal revenue taxes have been paid.

The conference agreement permits domestic merchandise on which all internal revenue taxes, if any, have been paid to be used in manufacturing or production in foreign trade zones. The change is revenue neutral but removes the current bias in favor of new investments being placed in foreign countries, thus putting on an equal footing in this regard, investments made within the United States. This is not a vehicle to provide for redistillation of imported spirits subsequently removed (admitted) to a zone for use in the manufacture of articles. The right of U.S. Customs and other government officials to inspect and audit zone operations will insure the enforcement of this prohibition.

d. Marking of pipes, tubes and fittings

The conference agreement clarifies that the exception for marking through the tagging of containers or bundles for small diameter pipes and tubes also applies to small diameter fittings.

The Retirement Equity Act of 1984

The conference agreement follows the Senate amendment except as follows.

a. Simplified employee pensions.—The provision in the Senate amendment relating to participation requirements under simplified employee pensions is effective for plan years beginning after the date of enactment.

b. Spousal consent.—The provision relating to spousal consent to changes in benefit form is effective for plan years beginning after the date of enactment.

c. Annuity starting date.—Under the conference agreement, in the case of benefits payable in the form of an annuity, the annuity starting date is the first day of the first period for which an amount is payable as an annuity, regardless of when or whether payment is actually made. For example, a participant is to begin receiving annuity payments on the first day of the month following the participant's sixtieth birthday. After that date, but before any annuity payments are actually made, the participant dies. The annuity starting date is the first day of the month following the participant's sixtieth birthday.

Under the conference agreement, in the case of benefits not payable as an annuity, the annuity starting date is the date on which all events have occurred which entitle the participant to a benefit (e.g., separation from service, applicable consent to payment).

d. Qualified domestic relations orders.—Under present law, a domestic relations order is not a qualified domestic relations order ("QDRO") if such order requires a plan to provide any type or form of benefit, or any option, not otherwise provided under the plan. Thus, an order generally constitutes a QDRO if it provides that payments attributable to a participant's benefits are to begin before the participant separates from service and becomes eligible for a distribution. As an exception to the rule, present law provides that a QDRO may require that an alternate payee commence receiving payments on or after the date that the participant attains the earliest retirement age under the plan, even if the participant has not yet separated from service.

Under the conference agreement, the definition of "earliest retirement age" for purposes of the QDRO provisions in the case of a defined contribution plan or a defined benefit plan is the earlier of: (1) the earliest date benefits are payable under the plan to the participant, and (2) the later of the date the participant attains age 50 and the date on which the participant could obtain a distribution from the plan if the participant separated from service.

For example, in the case of a plan which provides for payment of benefits upon separation from service (but not before then), the earliest date on which a QDRO can require payments to an alternate payee to begin is the date the participant separates from service. A QDRO could also require such a plan to begin payments to an alternate payee when the participant attains age 50, even if the participant has not then separated from service. The amount payable under a QDRO following the participant's earliest retirement age cannot exceed the amount which the participant is (or would be) entitled to receive at such time. For example, assume that a profit-sharing plan provides that a participant may withdraw some, but not all, of the participant's account balance before separation from service. A QDRO may provide for payment to an alternative payee up to the amount which the participant may withdraw.

A plan may provide for payment to an alternate payee prior to the earliest retirement age as defined under the conference agreement.

The conference agreement adopts the provisions in the Senate amendment with regard to procedures during the 18-month period. If a plan administrator determines that a domestic relations order is defective before the expiration of the 18-month suspension period, the conference committee intends that the plan administrator may delay payment of a participant's benefit until the expiration of the 18-month period if the plan administrator has notice that either party is attempting to rectify any deficiencies in the order.

Similarly, the committee intends that the plan administrator may delay payment of benefits for a reasonable period of time if the plan administrator receives notice that a domestic relations order is being sought. For example, a participant in a profit-sharing plan which is exempt from the survivor benefit rules requests a lump sum distribution from the plan. Before the distribution is made, the plan administrator receives notice that the participant's spouse is seeking a domestic relations order. The plan administrator may delay payment of benefits.

e. Loans to owner-employees.—The conference agreement adopts the provision in the House bill regarding loans to owner-employees from qualified plans.

Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA)

Continuing health care

The conference agreement adopts the following technical corrections to the continuing health care provisions of COBRA.

a. Notification requirement.—The conference agreement establishes a 60-day notification period for divorced or legally separated spouses of covered employees, or dependent children ceasing to be dependent children under the generally applicable requirements of the plan, to notify the plan administrator of a qualifying event entitling the spouse or dependent children to continuation health coverage.

b. Maximum period of continuation coverage.—The conference agreement clarifies that a qualified beneficiary may have more than one qualifying event which entitles the beneficiary to continuation coverage, but in no event may the coverage period with respect to such events generally exceed a 36-month period. The second qualifying event must take place during the period of coverage of the first qualifying event to be eligible for a total of 36 months continuation coverage beginning from the date of the first qualifying event.

c. Election of coverage.—The conference agreement clarifies that each qualified beneficiary is entitled to a separate election of continuation coverage. For example, if a covered employee does not elect continuation coverage, the conferees intend that the spouse or dependent children are entitled to elect such coverage. Moreover, even if the employee elects certain coverage, the spouse or dependents may elect different coverage.

d. Failure to pay premium.—The conference agreement provides that the grace period for the failure to pay premiums is the longest of (1) 30 days, (2) the period the plan allows employees for failure to pay premiums, or (3) the period the insurance company allows the plan or the employer for failure to pay premiums.

e. Type of coverage.—The conference agreement provides that, for all purposes, qualified beneficiaries are to be treated under the plan in the same manner as similarly situated beneficiaries for whom a qualifying event has not taken place. For example, if the plan provides for an open enrollment period, then qualified beneficiaries are to be permitted to make elections during the open enrollment period in the same manner as active employees. Thus, an individual who is a qualified beneficiary by reason of being a spouse of a covered employee would have the same rights as active employees during an open enrollment period and would not be limited to the rights of spouses of covered employees.

The conference agreement defines health benefits to mean health benefit plans, including dental and vision care (within the meaning of sec. 213 of the Code). The conferees do not intend that an employer could compel a qualified beneficiary to pay for noncore benefits (such as dental and vision care) even if active employees are required to purchase coverage for such benefits under the plan.

Medicare

The conference agreement follows the Senate amendment with the following clarifications: (1) correct and clarify the section regarding payments under the indirect medical education provision; (2) correct and clarify the section regarding payment under the disproportionate share provision; (3) clarify that all hospitals which have a medicare provider agreement would have to abide by the emergency care requirements of COBRA and the requirements regarding participation in the CHAMPUS program; (4) allow skilled nursing facilities to make an election to be paid on a prospective payment basis based on their costs reporting

periods rather than on a Federal fiscal year basis; (5) clarify that the medicare HI tax on state and local governments does not apply to certain campaign workers; (6) clarify that a one-year transition period is provided for foreign medical graduates who have not passed the FMGEMS; (7) allow the Secretary to announce HMO/CMP rates by September 7 of each year rather than publish them; (8) clarify the effective date of the provision regarding penalties for billing for assistants at surgery for certain cataract procedures; (9) allow temporary use of carrier prepayment screens as a substitute for preprocedure review; (10) clarify that the termination date of the ACCESS demonstration project is July 31, 1987; and (11) correct citation, indentation and other technical errors.

Single Employer Pension Plan Amendments Act

The conference agreement adopts technical and conforming amendments to the Single Employer Pension Plan Amendments Act of 1986.

Footnotes to table:
[1]Rate reduction lines include the effects relating to capital gains as well as interactions between rate changes and other provisions of the bill.
[2]Includes increased outlays. Changes to the earned income credit will increase outlays by $83 million in 1987, $1,731 million in 1988, $3,149 million in 1989, $3,481 million in 1990 and $3,848 million in 1991.
[3]An outlay of magnitude similar to the amount shown here is anticipated as a result of section 1711 of the Act, concerning payment of expenses relating to the adoption of children with special needs.
[4]Loss of less than $5 million.
[5]Amounts have not been assigned to footnotes for summation purposes. Therefore, totals do not include estimates represented by footnotes.
[6]Section dealing with attorney's fees will increase outlays by less than $5 million annually.
[7]Includes outlay effects. Changes to the interest provisions will reduce outlays by $22 million in 1987, $10 million in 1988, $27 million in 1990 and $6 million in 1991.
[8]Gain of less than $5 million.
[9]Loss of less than $1 million.
[10]The effect of this provision after calendar year 1986 is included in the corporate minimum tax.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO SIT FRIDAY, SEPTEMBER 19, 1986, DURING THE UNDER 5-MINUTE RULE

Mr. JONES of North Carolina. Mr. Speaker; I ask unanimous consent that the Committee on Merchant Marine and Fisheries be permitted to sit Friday, September 19, 1986, while the House is reading for amendment under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. WALKER. Reserving the right to object, Mr. Speaker, and I shall not object, I just take the time to see whether we can find out what the schedule is for the rest of the evening.

The SPEAKER pro tempore. The Chair will advise the gentleman that the legislative business of the House has been concluded for the day. It is not expected there will be any further rollcall votes. There may be some commemorative measures presented.

Mr. WALKER. Mr. Speaker, if the Chair would allow me, is it the understanding of the Chair that the measures to come before us will be those measures out of the Post Office and Civil Service Committee which are essentially unanimous-consent requests and that is the only legislative business?

The SPEAKER pro tempore. The gentleman is correct.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there ojection to the request of the gentleman from North Carolina [Mr. JONES]?

There was no objection.

NATIONAL HISTORICALLY BLACK COLLEGES WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 357) to designate the week of September 15, 1986, as "National Historically Black Colleges Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Reserving the right to object, Mr. Speaker, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 357

Whereas there are one hundred and one Historically Black Colleges and Univerities in the United States;

Whereas such colleges and universities provide the quality education so essential to full participation in a complex, highly technological society;

Whereas black colleges and universities have a rich heritage and have played a prominent role in American history;

Whereas such institutions have allowed many underprivileged students to attain their full potential through higher education; and

Whereas the achievements and goals of the Historically Black Colleges are deserving of national recognition: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of September 15, 1986, through September 21, 1986, is designated as "National Historically Black Colleges Week" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States and interested groups to observe such week with appropriate ceremonies, activities, and programs, thereby demonstrating support for Historically Black Colleges and Universities in the United States.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1905

AMERICAN LIVER FOUNDATION NATIONAL LIVER AWARENESS MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 202) designating November 1985 as "American Liver Foundation National Liver Awareness Month," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Reserving the right to object, Mr. Speaker, I do not object, but would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. COURTER. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from New Jersey [Mr. COURTER], who is the chief sponsor of House Joint Resolution 127.

Mr. COURTER. Mr. Speaker, I thank the gentleman for yielding, and I appreciate the gentleman from New York taking this issue out of order.

Mr. Speaker, this is something that the gentleman knows that I have been very much involved with. There are some personal friends of mine that have gone through a very serious situ-

ation with regard to liver transplantation.

I know that all the Members of this body want people to be more aware of the fact that when children have liver diseases, the only way in which they can survive is by a liver transplant. It is not something that can be solved by medication.

One of the main detriments and one of the main problems or stumbling blocks to the salvation of these children is the fact that people are unaware that they can contribute, they can donate various organs, livers being one of those particular organs. It is a growing situation in the United States, and therefore this type of resolution, which brings to the attention of the American people the fact that the opportunity that we can have in serving each other and those that survive by engaging in organ transplants is something that not only is going to save money, but it is going to preserve human life, which is the greatest calling that we can possibly have.

Also I might add that a successful liver transplant saves the Federal Government more money than liver dialysis treatment year after year, so in one sense we are saving money, we are preserving human life, and we are giving the opportunity for people to serve when tragedy strikes.

I thank the gentleman for putting this on the calendar, and I would hope that we accept this particular resolution by unanimous consent.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. OLIN). Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 202

Whereas there are more than one hundred liver diseases which are progressive debilitating and often fatal;

Whereas liver diseases claim fifty thousand lives annually and are the fourth leading cause of death of Americans between the ages of fifteen and sixty-five.

Whereas liver diseases strike infants, children, adolescents, and adults, regardless of sex, race, or economic status;

Whereas there are no known causes, effective treatments (other than liver transplants), or cures for the vast majority of liver diseases;

Whereas there are many conditions which can lead to liver diseases, including congenital or inherited abnormalities, severe reactions to drugs, prolonged exposure to environmental toxins, parasitic and other diseases, as well as alcoholism;

Whereas people with a liver disease suffer not only physically from the disease but also emotionally from the unjust stigma placed on them due to the common, but mistaken notion that liver disease is caused only by alcoholism;

Whereas the American Liver Foundation is the only national organization to focus on the full array of liver diseases;

Whereas the Foundation is a network of volunteers, families, researchers, health care professionals located throughout the United States, dedicated to funding and increasing research to find the causes, treatments, cures, and ways to prevent these devastating diseases; and

Whereas the Foundation is committed to promoting the health of Americans by increasing public awareness of all conditions which can lead to a liver disease, providing health and therapy information and education programs about liver diseases for lay persons and professionals, and supporting and enhancing the quality of life for those individuals and their families who must cope with a liver disease: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 1985 is designated as "American Liver Foundation National Liver Awareness Month", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to—

(1) learn more about the liver and how to prevent liver diseases;

(2) support the search for the causes and possible cures for liver diseases;

(3) aid those who suffer from the crushing physical, psychological, and financial burden of a liver disease; and

(4) observe such month with other appropriate activities.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: Page 2, line 3, strike "November 1985" and insert "October 1986".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York [Mr. GARCIA].

The amendment was agreed to.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. GARCIA: Amend the title so as to read: "Joint resolution designating October 1986 as 'American Liver Foundation National Liver Awareness Month'."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

9-1-1 EMERGENCY NUMBER DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 405) to designate September 11, 1986, as "9-1-1 Emergency Number Day", and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Reserving the right to object, Mr. Speaker, I do not object, but I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 405

Whereas protecting life and insuring safety are important responsibilities of local governments;

Whereas the ability of all persons to quickly summon help in an emergency is essential to a community's well-being;

Whereas thousands of municipalities throughout the United States have established 911 emergency telephone systems;

Whereas 911 emergency telephone systems have made it possible to save many lives, thereby enhancing the quality of life in communities throughout the Nation; and

Whereas 911 emergency telephone systems increase public confidence and provide efficient emergency services with greater response capabilities and cost savings to the public: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 11, 1986, is designated as "9-1-1 Emergency Number Day". The President of the United States is requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

AMENDMENT OFFERED BY MR. GARCIA

Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: Page 2, line 3, strike "1986" and insert "1987,".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York [Mr. GARCIA].

The amendment was agreed to.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. GARCIA: Amend the title so as to read: "Joint Resolution to designate September 11, 1987, as '9-1-1 Emergency Number Day'.".

The title amendment was agreed to.

A motion to reconsider was laid on the table.

NATIONAL DRUNK AND DRUGGED DRIVING AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 362) to designate the week of December 14, 1986, through December

20, 1986, as "National Drunk and Drugged Driving Awareness Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Reserving the right to object, Mr. Speaker, I do not object, but I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I would just like to just take a moment, if I may, and point out that in October 1981 I had the privilege of going to the White House and talking to the President regarding this particular issue. He likened it to cancer at that particular time, and thought that it would be well if we could stamp this out.

He got Secretary Drew Lewis, who was then Secretary of Transportation, and the Presidential Commission on Drunk Driving was established. Possibly in that 2½ years there was more said about the driving habits of America than has ever been done. We found that many Americans drive under the influence of alcohol, and 20,000 people a year die as a result of that, and 750,000 people a year are paraplegic, quadriplegic, or have serious back injuries.

We further found out that many of our great police officers around America did not have the ability to determine if someone was drunk, and in the District of Columbia every moving violation was checked out to see in effect if that person had been drinking. Some of our police officers in America were absolutely shocked to find out that people who seemed stone sober were actually over 0.10 blood alcohol count.

In America today most of our States have a blood alcohol count of 0.10, except for my home State of Utah, which has 0.08. We found out that people who have only a 0.05 blood alcohol count cannot control their cars. We also found out, to the satisfaction of some and the disrespect of others, that people in the District of Columbia, the majority of them, after 6 o'clock, have over a 0.10 blood alcohol count. I do not know what to attribute that to, possibly the receptions that we attend or other things, but it made you feel awfully good that the person who is driving could very likely be on your side of the street and could not control his car.

We found out an awful lot about the speeding habits of America in a very extensive study which we did. What we did find out, Mr. Speaker, was that the people in America cannot control it like our Swedish friends, who drink a third more than we do, and that possibly we had to instill in the hearts and minds of Americans that possibly they should slow up or if they are going to go out and party, that one person should stay stone sober.

It was an extremely interesting thing that we discovered. Out of that came the recommendation, and in this body, that people now go to the age 21 before they drive, because their judgment seems to be much better.

Mr. Speaker, I would just like to conclude by saying that probably one of the greatest problems that has occurred is the person who uses drugs, the person who uses alcohol, and then gets in 2 tons of steel and barrels down the highway, and the heartache that that brings into families with children in deaths and fatalities and serious injuries is unbelievable.

I would hope that this awareness week would bring to the minds and the thoughts of people that they should be careful with this very, very deadly drug that is out, that we call alcohol and drugs, before they get in cars and kill people around America.

Mr. GILMAN. Mr. Speaker, I rise in support of House Joint Resolution 694, designating the week of December 14, 1986, through December 20, 1986, as the National Drunk and Drugged Driving Awareness Week.

I want to commend the distinguished gentleman from Maryland, Mr. BARNES, for once again introducing this measure which affords us the opportunity to focus attention on the tragic results from driving under the influence of drugs. Although drunk driving is usually associated with alcohol, we should never forget that all too often, individuals who have consumed heroin, cocaine, crack, marijuana, PCP, and other illicit drugs, are also driving under the influence of these deadly substances, thereby creating a danger to themselves and to everyone on the highway.

As the ranking minority member of our Narcotics Select Committee and as a parent who lost a daughter to a reckless, intoxicated driver several years ago, I want to commend the distinguished gentleman from Maryland for his efforts and leadership in focusing attention on this problem that is causing so much suffering to so many people and accordingly, I urge my colleagues to support this measure.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 362

Whereas traffic accidents cause more violent deaths in the United States than any other cause, approximately forty-four thousand in 1985;

Whereas traffic accidents cause thousands of serious injuries in the United States each year;

Whereas about 54 per centum of drivers killed in single vehicle collisions and 38 per centum of all drivers fatally injured in 1985 had blood alcohol concentrations of 0.10 or above;

Whereas the United States Surgeon General has reported that life expectancy has risen for every age group over the past seventy-five years except for Americans fifteen to twenty-four years old, whose death rate, the leading cause of which is drunk driving, is higher now than it was twenty years ago;

Whereas the total societal cost of drunk driving has been estimated at more than $26,000,000,000 per year, which does not include the human suffering that can never be measured;

Whereas there are increasing reports of driving after drug use and accidents involving drivers who have used marijuana or other illegal drugs;

Whereas driving after the use of therapeutic drugs, either alone or in combination with alcohol, contrary to the advice of physician, pharmacist, or manufacturer, may create a safety hazard on the roads;

Whereas more research is needed on the effect of drugs either alone or in combination with alcohol, on driving ability and the incidence of traffic accidents;

Whereas an increased public awareness of the gravity of the problem of drugged driving may warn drug users to refrain from driving and may stimulate interest in increasing necessary research on the effect of drugs on driving ability and the incidence of traffic accidents;

Whereas the public, particularly through the work of citizens groups, is demanding a solution to the problem of drunk and drugged driving;

Whereas the Presidential Commission on Drunk Driving, appointed to heighten public awareness and stimulate the pursuit of solutions, provided vital recommendations for remedies for the problem of drunk driving;

Whereas the National Commission Against Drunk Driving was established to assist State and local governments and the private sector to implement these recommendations;

Whereas most States have appointed task forces to examine existing drunk driving programs and make recommendations for a renewed, comprehensive approach, and in many cases their recommendations are leading to enactment of new laws, along with stricter enforcement;

Whereas the best defense against the drunk or drugged driver is the use of safety belts and consistent safety belt usage by all drivers and passengers would save as many as ten thousand lives each year;

Whereas an increase in the public awareness of the problem of drunk and drugged driving may contribute to a change in society's attitude toward the drunk or drugged driver and help to sustain current efforts to develop comprehensive solutions at the State and local levels;

Whereas the Christmas and New Year holiday period, with more drivers on the roads and an increased number of social functions, is a particularly appropriate time to focus national attention on this critical problem;

Whereas designation of National Drunk and Drugged Driving Awareness week in each of the last four years stimulated many activities and programs by groups in both the private and public sectors aimed at curbing drunk and drugged driving in the high-risk Christmas and New Year holiday period and thereafter; and

Whereas the activities and programs during National Drunk and Drugged Driving Awareness Week have heightened the awareness of the American public to the

danger of drunk and drugged driving: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of December 14, 1986, through December 20, 1986, is designated as "National Drunk and Drugged Driving Awareness Week" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL DRUG ABUSE EDUCATION AND PREVENTION WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 354) to designate the week of October 5, 1986, through October 11, 1986, as "National Drug Abuse Education and Prevention Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Reserving the right to object, Mr. Speaker, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. GILMAN. Mr. Speaker, I rise in support of House Joint Resolution 619, designating the week of October 5, 1986 through October 11, 1986, as the National Drug Abuse Education and Prevention Week.

As the ranking minority member of our Narcotics Select Committee, and as a cosponsor of House Joint Resolution 619, I want to commend the distinguished gentleman from Florida [Mr. BENNETT] for his leadership, his tireless efforts in helping to combat narcotics trafficking and drug abuse, and for introducing this resolution.

Mr. Speaker, this resolution is extremely timely. Just last week the House overwhelmingly passed, by a vote of 392–16, H.R. 5484, the Omnibus Drug Enforcement, Education and Control Act of 1986, which among other provisions, provides $350 million for drug prevention education assistance that would beef-up Federal, State, and local efforts to help prevent drug abuse. Along with the President's announcement equating drug trafficking and drug abuse as a national security threat and his recent proposal to focus attention on creating drug-free schools and a drug-free work environment, we are now beginning to see an increased awareness by the public as to the dangers of drug trafficking and drug abuse.

This measure which the distinguished gentleman from Florida has introduced and which I am very proud to cosponsor, will go a long way in helping to raise the public's consciousness as to the dangers that heroin, cocaine—and now the new deadly derivative crack—marijuana, PCP, and other deadly drugs, are having upon our citizens and upon our society.

Accordingly, Mr. Speaker, I urge my colleagues to support this measure.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 354

Whereas the illegal drug trade consists of approximately $100 billion in retail business per year;

Whereas removing the demand for drugs would reduce the illegal drug trade;

Whereas drug abuse destroys the future of many of the young people and adults in the Nation;

Whereas the eradication of drug abuse requires a united mobilization of national resources, including law enforcement and educational efforts; and

Whereas the most effective deterrent to drug abuse is education of parents and children in the home, classroom, and community: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 5, 1986, through October 11, 1986, is designated as "National Drug Abuse Education and Prevention Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to participate in drug abuse education and prevention programs in their communities and encourage parents and children to investigate and discuss drug abuse problems and possible solutions.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1915

NATIONAL ADULT DAY CARE CENTER WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 617) to designate the week beginning September 21, 1986, as "National Adult Day Care Center Week," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. (Mr. OLIN). Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 617

Whereas more than 1,000 adult day care centers are in operation nationwide, providing safe and positive environments to functionally disabled adults and senior citizens who are in need of daytime assistance or supervision;

Whereas adult day care centers have comprehensive programs providing a variety of services related to health, including medical therapy, medication monitoring, counseling, and health education;

Whereas adult day care centers are operated by professional staffs which identify individual health needs and give appropriate advice;

Whereas adult day care centers assist functionally disabled adults and senior citizens in maintaining a maximum level of independence;

Whereas adult day care centers provide opportunities for social interaction to individuals who otherwise may be socially isolated; and

Whereas adult day care centers offer relief to families who otherwise must provide constant care to functionally disabled adults and senior citizens, including victims of Alzheimer's disease and other forms of dementia: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning September 21, 1986, is designated "National Adult Day Care Center Week". The President is requested to issue a proclamation calling on the people of the United States to observe such week with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL CHILDREN'S TELEVISION AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 710) to designate the week beginning October 6, 1986, as "National Children's Television Awareness Week," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 710

Whereas children on average spend 4 hours of each day watching television and will have spent almost 15,000 hours watching television by the time they finish high school;

Whereas television can create an intellectual and emotional environment which can play a critical role in shaping a child's development and perception of the world;

Whereas television has the power to promote and reinforce the pro-social values parents try to teach their children regarding health and safety;

Whereas television often serves as a companion and babysitter for children with working parents;

Whereas many people do not realize television's great potential for enriching family life and for improving children's education;

Whereas families need to be shown how to use television as an educational resource;

Whereas national attention must be focused on the positive role that television can play in child development to insure that broadcasters uphold their obligation to serve the child audience;

Whereas schools, libraries, religious institutions, and community groups need to work with broadcasters in helping parents and children take advantage of television's potential as an educational and learning device; and

Whereas greater awareness must be achieved regarding how television can be effectively utilized and further developed to enhance the education of children: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning October 6, 1986, is designated as "National Children's Television Awareness Week". The President is requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA:

Page 3, line 3, strike "October 6" and insert "October 12".

The question is on the amendment offered by the gentleman from New York [Mr. GARCIA].

The amendment was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. GARCIA: Amend the title so as to read as follows:

"Joint resolution to designate the week beginning October 12, 1986, as National Children's Television Awareness Week"."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

NATIONAL APLASTIC ANEMIA AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 611) to designate the period of December 1, 1986, through December 7, 1986, as "National Aplastic Anemia Awareness Week", and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. CARPER. Mr. Speaker, I am pleased that the House has adopted House Joint Resolution 611, a bill that designates the week of December 1–7, 1986, as National Aplastic Anemia Awareness Week.

Senators BIDEN and ROTH joined me on April 22, 1986, in introducing this legislation at the urging of the father of an 11-year-old Delaware girl, Nicole Kathleen, Cerchio, who lost a long battle with the disease last year. Like many Americans, I was not really familiar with Aplastic Anemia. As a result of my work on this bill, I now know that Aplastic Anemia is a fatal disease of the bone marrow which strikes 2,000 American every year. It occurs when bone marrow stops producing blood cells—red cells, white cells, and platelets. The only known cure is a bone marrow transplant, an operation for which it is very difficult to find suitable donors.

It is clear that more research is required to understand how to attack this little-known killer. With Federal research budgets reduced due to current fiscal constraints, private contributions must be increased. I have been informed by the Aplastic Anemia Foundation of America that its fundraising efforts for research have been hampered by the lack of public awareness of the disease. I hope that designation of this commemorative week will make more Americans aware of the fight against Aplastic Anemia and other bone marrow diseases. If even a few more private individuals join this fight as a result of our resolution, we'll be closer to our goal of beating this illness.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 611

Whereas aplastic anemia is a rare but extremely serious disorder that results from the unexplained failure of the bone marrow to produce blood cells;

Whereas aplastic anemia fatally strikes 2,000 Americans of all ages each year;

Whereas the causes of aplastic anemia are not known and there is only a limited understanding of how to treat the disease; and

Whereas increased public education on aplastic anemia will facilitate the battle against all bone marrow diseases: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the period of December 1, 1986, through December 7, 1986, is designated as "National Aplastic Anemia Awareness Week" and the President is authorized and requested to issue a proclamation calling upon the American public to observe such period with appropriate activities to assure a better understanding of aplastic anemia.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL JOB SKILLS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 721) to designate the week of October 12, 1986, through October 18, 1986, as "National Job Skills Week," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 721

Whereas one of the most critical problems facing the Nation is to design and engineer a national work force that can meet the challenges of today and tomorrow;

Whereas work in the United States is undergoing rapid and profound change;

Whereas advances in technology will require new skills not now held by the national work force;

Whereas it is predicted that during the decade beginning in 1980, businesses will experience a shortage of skilled workers;

Whereas the skills of many young adults and teenagers are inadequate to perform jobs that are becoming available, thereby contributing to a much greater than normal unemployment rate among young people;

Whereas the ability to maintain a competitive and productive edge necessary for a strong economy and relatively high quality of life standard are dependent on the national work force;

Whereas the productivity and ability of the Nation to compete in a world economy are dependent on the national work force; and

Whereas a National Job Skills Week can serve to highlight the many changes that are underway in the workplace which have necessitated the learning of new skills, concentrate attention on private and public job training efforts, and bring attention to present and future work force needs: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 12, 1986, through October 18, 1986, is designated as "National Job Skills Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States and interested groups to observe such week with appropriate programs and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

UNITED STATES-CANADA DAYS OF PEACE AND FRIENDSHIP

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 402) designating July 2 and 3, 1987, as the "United States-Canada Days of Peace and Friendship," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 402

Whereas, since the War of 1812, the people of the United States and Canada have peacefully shared and extended the longest border in the world;

Whereas more cultural and economic exchanges are made between the United States and Canada than any other two countries;

Whereas the United States and Canada have welcomed immigrants from all nations everywhere, resulting in rich and similar cultures in each country;

Whereas the United States and Canada share common ideals and institutions, including freedom, democracy, human rights, justice under law, and an ardent desire for a peaceful world;

Whereas the United States and Canada have been allies against tyranny in two World Wars;

Whereas the United States and Canada have confronted differences between the two countries with diplomacy and goodwill;

Whereas the United States and Canada are rich in resources and, together, represent an ever-more-powerful prospect for world economic progress;

Whereas the United States and Canada demonstrate the dynamism of democracy and, together, contribute to establishing lasting peace in the world;

Whereas a similar resolution commemorating continued peace and friendship between the United States and Canada has been proposed in the Canadian Parliament;

Whereas in Canada July 1 is Canada Day;

Whereas in the United States July 4 is Independence Day; and

Whereas the days between Canada Day and Independence Day are appropriate annual days on which to commemorate the friendship between the United States and Canada: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That July 2 and 3, 1987, are designated as "United States-Canada Days of Peace and Friendship", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such days with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMERICAN BUSINESS WOMEN'S DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 196) designating September 22, 1986, as "American Business Women's Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from Florida [Mr. SHAW] who is the chief sponsor of House Joint Resolution 379, to authorize and request the President to issue a proclamation designating September 22, 1986, as "American Business Women's Day."

Mr. SHAW. Mr. Speaker, this legislation designates September 22 as "American Business Women's Day."

This day would mark the importance of American business women to the whole Nation and allow us to focus our attention on the expanding role of women in business. Indeed, this is a day to truly celebrate.

I would like to give special thanks to the American Business Women's Association, for without their help, this day would not have been possible.

The Association, known as ABWA, is a national association that promotes professional and educational advancement for women. This organization awards scholarships to women not only entering college, university or vocational training programs, but also to women who need to refresh job skills before reentering the work force and to women who need certain courses in order to qualify for promotion and career advancement.

Since 1949, the ABWA has awarded a total of $21 million in scholarships. Just last year, ABWA awarded $3 million in scholarships to more than 6,000 women.

Mr. Speaker, we are entering a new era as never before in business, politics, science and philosophy. Organizations such as the ABWA encourage today's women to pursue their dreams and then gives them the help to make those dreams reality.

The ABWA deserves congratulations on behalf of their efforts for all American business women and for women across our Nation.

Mr. GILMAN. Mr. Speaker, I am pleased to rise today in support of House Joint Resolution 379, designating September 22, 1986, as "American Business Women's Day." Women who are leaders in the business community are seldom recognized for their outstanding contributions to our economy.

A recent report issued by the Bureau of the Census illustrates their key role among our nations entrepreneurs. The Bureau of the Census determined that 2.9 million businesses—one fourth of all businesses nationwide (excluding large corporations) are women-owned firms. Businesses owned by women accounted for $98.3 billion in gross receipts nationally.

In my own State of New York, over 189,000 women-owned firms contribute over $8 billion in sales and receipts to the states' economy.

It is fitting that September 22, 1986 is under consideration for designation as American Business Women's Day. Later that same week, I will join with my good friend and colleague Congressman HAMILTON FISH, JR., in hosting the women leaders of our congressional districts. Women Business Leaders will be joined by women leaders in local government and the professions in participating in a conference on issues of national concern. The subjects for this year will include the implications of tax reform, long-term prospects of the Federal role in health care, the budget, and a forum discussion on one of our Nation's most serious problems—narcotics abuse.

I again applaud the long-overdue recognition of women in business. I commend the gentleman from Florida [Mr. SHAW] for his leadership in sponsoring this measure.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 196

Whereas the American Business Women's Association is a national educational association that promotes professional and educational advancement for women;

Whereas the American Business Women's Association awarded $2,900,000 in scholarships to over six thousand women in 1984, and has awarded more than $18,000,000 in scholarships since 1949;

Whereas the American Business Women's Association has more than one hundred and ten thousand members and two thousand one hundred chapters throughout the United States and its territories;

Whereas the American Business Women's Association encourages women to expand horizons, diversify skills, and set higher personal and career goals; and

Whereas Congress recognizes the important contributions of American businesswomen to our Nation's continuing vitality: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 22, 1986, is designated "American Business Women's Day". The president is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL SCHOOL-AGE CHILD CARE AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the joint resolution (H.J. Res. 60) to designate the week beginning September 1, 1985, as "National School-Age Child Care Awareness Week," with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the joint resolution.

The Clerk read the Senate amendments, as follows:

Page 2, line 3 strike out "September 1, 1985" and insert "September 15, 1986".

Amend to title so as to read: "Joint resolution to designate the week beginning September 15, 1986, as 'National School-Age Child Care Awareness Week'."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from Maine [Mr. MCKERNAN] who is the chief sponsor of House Joint Resolution 60, to authorize and request the President to issue a proclamation designating the week beginning September 15, 1986, as National School-Age Child Care Awareness Week.

(Mr. MCKERNAN asked and was given permission to revise and extend his remarks.)

Mr. MCKERNAN. Mr. Speaker, I rise in support of House Joint Resolution 60, designating this week as National School-Age Child Care Awareness Week. I introduced this bill to draw attention to the problems of children in self-care—the so-called latchkey children.

Two years ago, Congress passed, and the President signed, a similar bill, setting aside a week in September for Americans to learn about, and respond to, the special problems of the millions of children who are in self-care in our country each day. National School-Age Child Care Awareness Week provides a focal point around which local communities, States, and national organizations can conduct activities to heighten public awareness of the problems of latchkey children.

As the fabric of our society changes, so do the needs of our families and children. Today, more than half of America's children have two parents in the work force, and one in five children grows up in a one-parent family. In my State of Maine, a survey revealed that close to 25,000 Maine children between the ages of 6 and 12 are spending time in self-care each week.

As this group continues to expand, the associated problems can be expected to grow, too. A shortage of good, affordable day care has been identified time and again in hearings held by the House Select Committee on Children, Youth and Families, on which I serve. Children in self-care are often found to be lonely, frightened, and vulnerable. We can take a big step toward addressing these issues by lending recognition to the problems.

I want to sincerely thank Senator HAWKINS for her assistance in passing this legislation in the Senate, and to ask the support of my House colleagues for this measure.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

A motion to reconsider was laid on the table.

NATIONAL DAY OF EXCELLENCE IN HONOR OF THE CREW OF THE SPACE SHUTTLE "CHALLENGER"

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 588) commemorating January 28, 1987, as a National Day of Excellence in honor of the crew of the space shuttle *Challenger,* and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. KOLBE. Mr. Speaker, January 28, 1987, will provide this country the opportunity to appropriately recall the sacrifice of the crew of the space shuttle *Challenger* and to honor the dedication and commitment to the pursuit of excellence exemplified by those seven American heroes.

House Joint Resolution 588, proclaims January 28 a "National Day of Excellence" in honor of the *Challenger* Crew who gave their lives while striving for an excellence of technology, of goal, and of personal achievement.

It should, most emphatically, not be a holiday. On the contrary, it should be a day when Americans rededicate themselves to the simple, but sometimes forgotten, pursuit of excellence, performing their work with the greatest pride and success that is possible. In lieu of a passive or static event, this tribute will provide an opportunity for all of us to participate, and to be made better by virtue of our participation. It is to be a time to focus our attention on the rewards and, yes, the risks of extending our reach beyond the familiar and mediocre toward new knowledge, toward new insights, and toward a final embrace of the ideal of excellence pursued so fervently by the crew of the *Challenger.*

It is to be a day when the best cars roll off the assembly line, when educators teach their best lessons, and when the best national ideas are born; a time set aside to excel in each of our endeavors. Each year we should see product labels marked "Manufactured January 28" and know, this is America's finest.

The vision of a "National Day of Excellence" was first proposed by Ed McDonald, a Tucson schoolteacher of handicapped children. Since our original discussions, House Joint Resolution 588 has been endorsed by educational organizations, city governments, and aerospace organizations. Particularly satisfying to me personally has been the enthusiastic support of the Young Astronauts Council.

I ask you to join me today in accepting this challenge of the space shuttle *Challenger* by designating January 28, 1987, as a "National Day of Excellence."

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 588

Whereas on January 28, 1986, the seven crew members of the space shuttle Challenger, Commander Francis R. Scobee, Pilot Michael J. Smith, Mission Specialist Ellison S. Onizuka, Mission Specialist Ronald E. McNair, Mission Specialist Judith Resnik, Payload Specialist Gregory B. Jarvis, Teacher-Observer S. Christa McAuliffe, were killed in a tragic explosion shortly after liftoff;

Whereas each of the crew members of the Challenger was a true American hero who represented the best and the brightest that our Nation has to offer;

Whereas the crew of the Challenger gave their lives while striving for an excellence of technology, of goal, and of personal achievement which fills all Americans with a sense of pride in their fellow human beings and countrymen;

Whereas the most appropriate tribute we could pay the crew of the Challenger is a national day when Americans would dedicate themselves in all their endeavors to the pursuit of excellence which makes our country great;

Whereas the American spirit is most responsive to a living tribute in which all citizens can participate and be enriched by such participation; and

Whereas this is a day for which our national character cries out: Now, therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That January 28, 1987, is designated as a "National Day of Excellence". The President is authorized and requested to issue a proclamation calling on the people of the United States to observe such a day—

(1) by resolving that in the course of their regular activities they will pursue the spirit of excellence represented by the crew of the space shuttle Challenger; and

(2) with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL HOSPICE MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 317) to designate the month of November 1986 as "National Hospice Month," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 317

Whereas hospice care has been demonstrated to be a humanitarian way for terminally ill patients to approach the end of their lives in comfort with appropriate, competent, and compassionate care in an environment of personal individuality and dignity;

Whereas hospice advocates care of the patient and family by attending to their physical, emotional, and spiritual needs and specifically, the pain and grief they experience;

Whereas hospice care is provided by an interdisciplinary team of physicians, nurses, social workers, pharmacists, psycholoIgical and spiritual counselors, and other community volunteers trained in the hospice concept of care;

Whereas hospice is rapidly becoming a full partner in the Nation's health care system;

Whereas the recent enactment of the medicare hospice benefit makes it possible for many more elderly Americans to have the opportunity to elect to receive hospice care;

Whereas private insurance carriers and employers have recognized the value of hospice care by the inclusion of hospice benefits in health care coverage packages; and

Whereas there remains a great need to increase public awareness of the benefits of hospice care: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of November 1986 is designated "National Hospice Month". The President is requested to issue a proclamation calling upon all Government agencies, the health care community, appropriate private organizations, and people of the United States to observe that month with appropriate forums, programs, and activities designed to encourage national recognition of and support for hospice care as a humane response to the needs of the terminally ill and a viable component of the health care system in this country.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL INDEPENDENT RETAIL GROCER WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 263) to designate the week of September 7 through September 13, 1986, as "National Independent Retail Grocer Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 263

Whereas the independent retailer has served the American consumer for over two hundred years;

Whereas independent retail grocers account for 64 per centum of all grocery stores in the United States and are responsible for nearly one-half of the grocery product distributed;

Whereas the independent retail grocer exemplifies the small business entrepreneur, the backbone of the American free enterprise system; and

Whereas the independent retail grocer offers a wide array of services to the community where the grocer lives and does business: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 7 through September 13, 1986, be proclaimed as "National Independent Retail Grocer Week".

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: Page 2, strike lines 3 and 4 and insert the following:

That September 1986 be proclaimed "National Independent Retail Grocer Month".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York [Mr. GARCIA].

The amendment was agreed to.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Amendment to the title offered by Mr. GARCIA: Amend the title so as to read: "Joint resolution to designate September 1986 as 'National Independent Retail Grocer Month'."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

RECOGNIZING UNITED WAY'S 100TH ANNIVERSARY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 684) calling for recognition of United Way's 100th anniversary, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. GILMAN. Mr. Speaker, as a cosponsor of House Joint Resolution 684, a resolution commemorating the United Way's 100th anniversary, I welcome this opportunity to express my support and praise of this worthy organization. The United Way has proposed invaluable assistance to many communities within my own congressional district, and to many others throughout the Nation. I commend the distinguished gentleman from Illinois, the minority leader, Mr. MICHEL, and the distinguished gentleman from Texas, the majority leader, Mr. WRIGHT, for introducing this important resolution. I would also like to thank my colleague from New York, Mr. GARCIA, for the leadership he has provided.

The United Way has been assisting people and communities for a full century by funding a wide variety of programs, ranging from halfway houses to advanced learning seminars. The United Way has become America's premiere voluntary organization, with over 2,000 chapters contributing to and supporting over 37,000 agencies and programs. The beneficial influence of United Way has been felt by virtually every town in the United States. While we are reminded of the United Way's efforts every time we watch a professional football game, it is especially appropriate in this, its 100th year, to applaud its past efforts and encourage it to continue its important work and achieve its goal of doubling its effective resources by 1991.

Accordingly, I urge my colleagues to support House Joint Resolution 684, which recognizes the laudable endeavors of the United Way and commemorates its 100th anniversary, and hope for its expeditious enactment.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 684

Whereas voluntarism, the fundamental fiber which has made America the most giving nation in the world, is becoming even more vital, and is being strongly encouraged and endorsed by the administration and this Congress;

Whereas America's United Way, our country's premiere organized voluntarism entity is celebrating the end of its first century of service to America, and is looking forward to its second century;

Whereas there are more than two thousand two hundred United Way organizations across America helping communities meet critical health and human care needs through an ingenious system of local charitable groups;

Whereas these United Way organizations involve tens of thousands of caring and concerned volunteers from all walks of life in a catalytic process of solving community problems;

Whereas these organizations are responsible for garnering voluntary contributions to support more than thirty-seven thousand charities providing services and programs to aid tens of millions of people throughout our country; and

Whereas to help meet this Nation's urgent health and human care needs United Way will launch a Second Century Initiative, with the goal of doubling its volunteers and financial resources by 1991: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress of the United States hereby expresses its gratitude and that of the American people for the outstanding contribution made by the America's United Way over the last century; congratulates the America's United Way on the event of its one hundredth anniversary; applauds and encourages America's United Way to continue its fine work and achieve its goal of doubling its effective resources by 1991.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the various pieces of commemorative legislation just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

GENERAL LEAVE

Mr. ROWLAND of Georgia. Mr. Speaker, I ask unanimous consent that all Members be permitted 5 legislative days in which to extend their remarks and to include therein extraneous material on the joint resolution, House Joint Resolution 732, which passed the House today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

REPORT SUMMARIZING FIRST 2 DAYS OF PROCEDURES OF THE WORLD TRADE TALKS

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, the World Trade Talks continue this week in Uruguay and they are watched by all American producers, including farmers who are observing the changing conditions to compete in international trade. It is vital that we recognize that not only are the conditions changing but the rules to trade will change.

This week, we begin a round of trade talks to rewrite the rules of international commerce among our trading partners. I submit herewith a report from the U.S. Representative, Mr. Yeutter, which summarizes the first 2 days of the proceedings.

OFFICE OF THE U.S.
TRADE REPRESENTATIVE
Washington, September 17, 1986.

To: House Leadership.
From: Sol Mosher, Assistant USTR for Congressional Affairs.
Subject: GATT Ministerial Meeting, Punta Del Este, Uruguay.

In an effort to keep you informed of ongoing events at the GATT Ministerial meeting in Punta del Este, Uruguay, I am enclosing (1) a report on the press briefing by U.S. officials yesterday afternoon, and (2) a copy of Ambassador Yeutter's opening remarks on Monday.

We will attempt to keep you updated on the progress of the meeting throughout this week.

SOL MOSHER.
September 17, 1986.

NEWS FROM PUNTA DEL ESTE

Ambassador Yeutter has reported that the atmosphere at Punta Del Este remains positive, despite the continuing hard-line taken by Brazil and India against including services in the Uruguay Round. Whirlwind plenary, small group and bilateral meetings are underway, with today a "day of decisions". In particular, Chairman Iglesias indicated yesterday that he will decide today on a draft text for the communique. Time pressures intensified when the Japanese and the five Southeast Asian nations indicated that they will join us in leaving Punta this weekend.

On agriculture, Secretary Lyng and Ambassador Smith are cautiously optimistic that satisfactory treatment can be worked out. Similarly, intellectual property seems to be moving forward. Ambassador Smith again reminded the participants that something on investment must be included, and that just a study "doesn't do it." Before leaving for Washington yesterday, Congressman Frenzel warned that the Congress will not extend U.S. negotiating authority if it does not like the new round agenda.

Ambassador Smith, Ambassador Samuels and Under Secretary Amstutz held a 30-minute, on the record briefing to the world press

Ambassador Smith said a growing number of countries beyond the original G-48 seem to believe that the W-47 text should be used

as a working document. Ambassador Samuels said there are probably 57-59 nations in this category.

All three briefers reiterated that the U.S. does not want to open that text without an overwhelmingly pursuasive reason to do so.

Ambassador Samuels debunked a rumor that Colombia had changed its position on services saying the Colombians had today reiterated their strong support for the U.S. position and that they were concerned that their speech was being misinterpreted.

Undersecretary Amstutz said the U.S. has seen no proposed French language changes on agriculture but that the U.S. has no interest in changing the export subsidy phase-out concept. He reiterated. However, that actual negotiations will not take place in Punta Del Este, and that we are only here to launch the round. Ambassador Smith dismissed a suggestion by the Europeans that GATT does not permit phase-outs.

Following the briefing, Ambassador Smith held a background briefing with the Washington Post, New York Times, Wall Street Journal, and Times of London. He said that given the lack of movement by Brazil and India, Minister Iglesias will have to decide soon when to announce that the W-47 text is the one from which the CPS are working. He suggested that it will have to happen by noon tomorrow if we are to keep the Friday night deadline.

Ambassador Smith repeated that the Friday night deadline is firm because of Saturday morning travel plans by many delegations including the U.S.

He said it looks like agriculture and intellectual property will be worked out—that Australian Minister Dawkins and EC Commissionen De Clercq are talking amicably and that the U.S. is playing a role as a buffer. He said the French are working on agriculture language which the other EC nations were reviewing. He said the U.S. would only accept changes that could be characterized as technical in nature.

Ambassador Smith said the Indians are beyond making a deal on services and that we have to read the Ambassadors speech as a doorslammer. He predicted that if India forced a vote on this issue it would lose.

Investment, he said, remains the hardest issue. He said we must have something on this to go home, that a study doesn't do it.

Ambassador Smith said both South Africa and the Soviet Union appear to be low-key issues.

When asked which countries might be peeled off the G-10, Ambassador Smith said Argentina, Egypt and Yugoslavia were the most likely.

Earlier in the afternoon Congressman Frenzel briefed the world press for 20 minutes. Congressman Frenzel said Congress believes that it is extraordinarily important that the new round go forward and that it have a responsible agenda. He said he has a good feeling about this meeting in contrast to how he felt at the 1982 ministerial.

He indicated that a successful new round launching could dampen congressional enthusiasm for a trade bill, adding that Congress will not extend U.S. negotiating authority if it does not like the new round agenda.

[Telegram]

U.S. INFORMATION AGENCY

Mr. Chairman, fellow delegates, this week GATT faces an historic challenge. Our task is more difficult than any that has confronted world trade since the very creation of GATT in 1947. What we do in Punta Del Este will determine whether GATT remains a functional, dynamic institution serving the interests of its members or declines into a static and passive association that is irrelevant to the needs of international trade.

Our task may be daunting but it is one from which we must not shirk. The world trading system is in trouble. All of us, to one degree or another, have slipped from the GATT ideals of free and open trade. Some have slipped considerably, making protectionism dangerously more commonplace. Many now overlook the tremendous benefits that these ideals made possible during the last 40 years. The expansion of trade can enable more individuals to participate in the world economy, thereby improving their quality of life and standard of living.

Rather than allow permanent damage to the world trading system, we must reaffirm the basic principles established by the founders of GATT. Such a reaffirmation must recognize the realities of international trade today. This means extending GATT principles to all major areas of trade. For too long, GATT rules and disciplines have not applied to many of the most important sectors of the world economy, leading to global trade distortion and economic disequilibrium that can no longer be tolerated.

The United States, with a trade deficit approaching $250 billion, is the major victim of this disequilibrium. President Reagan has forcefully resisted a tide of domestic protectionism in the face of this gigantic trade deficit, but he cannot do so forever. GATT members need to work together to move the world back toward economic equilibrium—to the benefit of all. If other countries are not interested in doing so, the U.S. will have no choice but to defend its own interests in its own way. We are prepared to do so if we must.

The United States advocates a new round because we believe that GATT can be responsive to the rapidly-changing requirements of international commerce. We are prepared to modernize it for the benefit of every country. This will require a firm commitment by all GATT member countries to work together toward a common goal.

The vast majority of GATT members have already demonstrated such a commitment. The process for launching a new round was begun by the unanimous consensus of the contracting parties last November. During the first 7 months of this year, the preparatory committee met to draft an agenda for the new round. Out of those meetings came the text upon which we will base our discussion for the final ministerial declaration. This text resolved a number of issues, leaving others to be decided here. It was a significant accomplishment. It leaves me confident that the decision to launch a new round is within our grasp.

The negotiators who drafted that text represent countries of all characterizations: developed, developing and newly industrialized northern and southern, eastern and western. Colombia and Switzerland deserve particular mention for chairing the deliberations but all 40 or 50 participating nations deserve credit.

The diverse composition of the drafting group demonstrates conclusively that support for a new round is widespread and not limited to one nation or group of nations. It also disproves the assertion that there is a GATT conflict between the LDCS and the developed nations. Indeed, the developing nations provided much of the leadership that went into drafting the W-47 declaration.

The contribution of the developing countries to the preparatory committee process is only the most recent example of how important the LDCS have become to world trade. The United States welcomes the growth and increasing stature of the developing nations.

We buy nearly two-thirds of the manufactured goods sent from the LDCS to the developed countries and we look forward to increasing our exports to LDC markets. We believe the United States can only benefit as developing countries become more prosperous.

By deciding to meet here in Punta Del Este, the GATT has demonstrated that the LDCS are full partners in the GATT process and just as committed to GATT principles as the developed nations. Mr. Chairman, I thank you for your nation's generous offer to host this meeting and I know your able leadership will ensure its success.

Uruguay is just one of the many developing nations that understands it too has a tremendous stake in the expansion of world trade. They know that protectionism threatens developing nations far more than it does the United States. We are large enough and self-sufficient enough to adjust to close markets, thereby limiting the damage. Resurgent protectionism would slow our economic expansion and reduce our standard of living but it would not devastate our economy as it would smaller and more export-dependent nations.

The new round will not only help LDCS by reversing protectionist trends; it will also provide many opportunities for expanding trade. The U.S. position on such issues as agriculture, services, investment and intellectual property is well-known, but not so widely recognized is the support we enjoy from progressive LDCS that realize they will also benefit from inclusion of these issues in the new round.

For example, it is clear that the main victims of agricultural protectionism are smaller, agrarian economies that cannot complete with massive export subsidies nor penetrate import barriers that the GATT currently permits. The agricultural language in the draft ministerial declaration offers hope for change that will benefit not just U.S. farmers but others around the globe.

Similarly, the lack of rules for trade in services does not restrict the U.S. only. Many LDCS that are competitive in services or hope to evolve into service economies find significant markets closed to them by their neighbors protectionist policies. A services code guaranteeing nondiscriminatory treatment and equitable access would threaten no nation, especially since none will be forced to sign such a code. Furthermore, services facilitate trade in goods. The two are complementary, and as international commerce becomes more sophisticated, will forever be interrelated—in all countries.

As for investment, the lack of basic principles penalizes LDCS by creating uncertainty and risk for investors. There is an urgent need throughout the developing world for increased foreign investment, particularly among nations that need to reduce their reliance on debt capital but need equity capital to stimulate growth. As long as there are no meaningful rules in this area, investment in these countries will remain risky and unattractive.

Finally, we need better rules on intellectual property, not simply for the protection of the developed world but also for the LDCS, who benefit from research and development wherever it is conducted. The concept of

protecting intellectual property is not new, but it is time to recognize that the issue affects trade and ought to be addressed by the GATT. The current lack of protection for intellectual property virtually guarantees that only the developed nations can afford to invest heavily in vital research, which will keep the LDCS from progressing as rapidly as they could otherwise.

We regard the issues of agriculture, services, investment and intellectual property as critical to the future of all GATT members. We cannot envision—nor agree to—comprehensive new trade negotiations that do not include these four issues on the agenda. Without them, there will be no meaningful standstill-rollback commitment, no reduction in tariff and non-tariff barriers, no negotiations of a safeguards code, no improvement in the GATT dispute settlement mechanism or subsidy rules, and no discipline over the "gray area" measures that so plague international trade today.

Today GATT stands at crossroads. Regardless of what we do here, world events will go forwards. We cannot stop change, but we can work to set our own destiny. If we leave Punta Del Este without taking steps to strengthen and modernize GATT, we will have failed to grasp an opportunity to improve the lives of all citizens of the world for years to come. But if we act decisively we will be worthy successors to the statesmen who created GATT 45 years ago. Let their vision inspire us to work to invigorate GATT for future generations.

TRIBUTE TO THE HONORABLE M.G. (GENE) SNYDER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky [Mr. NATCHER] is recognized for 60 minutes.

Mr. NATCHER. Mr. Speaker, when the 99th Congress is finally adjourned, our friend GENE SNYDER will retire as a Member and return to his home in Kentucky. He has been good for Kentucky and for our country and has established an outstanding record as a Member of this Congress.

I have served with about 2,000 Members since I have been a Member of Congress, and I have served with none more loyal, more energetic, and with more ability than GENE SNYDER.

During his tenure, he has served for many years as a member of the Committee on Public Works and Transportation. He is now the ranking minority member on this committee and has served with distinction and honor. I have said on more than one occasion that it will be many a day before the Commonwealth of Kentucky again has a ranking minority member on this outstanding committee. As you know, Mr. Speaker, we only have seven Members in the House from Kentucky and it not only takes time, but recognition and ability to fill the seat that GENE SNYDER has filled on the committee since he has been a Member of Congress.

One of the nicest things that has happened to me since I have been a Member is the opportunity that I have had to serve with him in the Congress. He loves this House and he knows that our country is the greatest country of all. His concept of public trust is without parallel and never has he hesitated to speak out against any proposal which he felt was not sound and in the best interests of our people. In every position he has held, either public or private, he has achieved distinction. His service in all of his assignments was marked by a high sense of conscience and duty. He will have a high place in the history of our country and in the hearts of all of our people.

Mr. Speaker, we will miss our friend GENE SNYDER and especially does this apply in my home State of Kentucky. He has served his people in his congressional district in an excellent manner and this applies not only to his district, but his State and his country.

I want to wish GENE SNYDER and the members of his family the best of everything in the future; and, GENE, we want you to come back and visit with us as often as possible.

At this time, Mr. Speaker, I yield to the distinguished gentleman from New Jersey [Mr. HOWARD], the chairman of the Committee on Public Works and Transportation.

Mr. HOWARD. Mr. Speaker, I am pleased to participate in this tribute to my colleague GENE SNYDER, a longtime friend with whom I have worked closely on many important issues.

GENE and I have been in Congress together for almost two decades. He lost his seat for one term during the Lyndon Johnson election of 1964, the first year that I was elected. Since he returned in 1966, we have served to gether on the Public Works and Transportation Committee.

For the last 4 years, GENE has been the ranking Republican on the committee. Without reservation, I can say that it has been a pleasure working with GENE on the Public Works and Transportation Committee during those years.

On issues other than those involving the committee, GENE and I rarely agree. In fact, he is one of those Members whose votes tell me to vote the other way. That difference has not prevented us, however, from developing an extremely good working relationship on the committee. That includes virtually all issues—environmental, transportation, aviation, economic development, and public buildings and grounds.

There have even been some Public Works and Transportation Committee issues on which we have disagreed. But there is one thing about GENE SNYDER that has never changed. You always know where he stands on an issue. He may not agree with you but he doesn't leave you in any doubt about his position.

I am proud to have had GENE SNYDER as a friend during my time here. He is a Member of Congress who knows what he wants and does not hesitate to get it. But he also does not hesitate to use the same means to assist others who he thinks are right. He is willing to go out of his way to ensure the right position prevails.

GENE SNYDER and I represent vastly different districts. He represents the suburban areas of Kentucky and some of the rural areas along the Ohio River. I represent the beach towns of the New Jersey Shore. Out political views are different, but over the years we have developed a close and harmonious relationship. I will miss his assistance and support on the Committee on Public Works and Transportation in the next Congress.

I will miss him as a good friend in Congress. He is a strong and effective advocate for his position but also someone who is considerate of his colleagues' concerns and someone who can be counted on in tough situations.

I want to thank BILL NATCHER for taking this special order to honor GENE SNYDER. It is a tribute that has been well earned and well deserved.

□ 1935

Mr. NATCHER. Mr. Speaker, at this time I yield to the distinguished gentleman from Kentucky [Mr. MAZZOLI.]

Mr. MAZZOLI. I thank the chairman very much

Mr. Speaker, I appreciate the gentleman from Kentucky, the dean of our delegation, taking this time to allow us to honor our friend and soon to be departing friend GENE SNYDER.

As the chairman knows, the gentleman from Kentucky, Mr. SNYDER, and I share Jefferson County, which is my home base, and of course GENE goes up the Ohio River to include parts of northern Kentucky, but we do share Jefferson County.

In that connection we have had the opportunity of jointly representing our people for the 16 years that I have been in the Congress.

I can say unequivocally that GENE and his people, Bill Tanner and his office folks work very hard for the people in Jefferson County.

So from the standpoint of losing a friend and also a colleague in the closest sense, GENE's departure will be a loss.

Second, with GENE's departure, of course, will go one of the major influential figures in public works.

As the chairman, the gentleman from Kentucky [Mr. NATCHER] our dean, knows, that is very important to Kentucky: roads, harbors, and water projects. Specifically in Jefferson County, once again, the gentleman from Kentucky [Mr. SNYDER] has been very strong and assertive being sure that we get for Jefferson County our fair share of the public works fundings.

So when GENE leaves, while we will have strong support from the gentleman from Alabama [Mr. BEVILL] and others, it is going to be a far more difficult task.

I might also say that when GENE leaves and takes with him his beautiful wife, Pat, she is a delightful person to be with and in that sense of the word it adds to the Snyder influence here in Congress.

Last, Mr. Chairman, but not least, once again GENE and I have over these last 16 years become good friends. We have flown back and forth more times to Kentucky than probably he or I could remember. I think in that sense of the word we have worked together affably and harmoniously.

So I want to extend to him—he is in the Chamber—and to all who would be watching and to Pat my best wishes for much health and happiness and prosperity in the future.

We will miss you and we appreciate you.

Mr. NATCHER. Mr. Speaker, at this time I yield to the distinguished gentleman from Arkansas [Mr. HAMMERSCHMIDT].

Mr. HAMMERSCHMIDT. Mr. Speaker, I am very appreciative to my distinguished colleague from Kentucky [Mr. NATCHER] for arranging this special order.

Mr. Speaker, the retirement of my good friend and colleague, the Honorable GENE SNYDER, at the end of this Congress, bings down the curtain on a truly distinguished career in this body. His services will be sorely missed by this House, the Nation, and the great Commonwealth of Kentucky.

Over the course of by two decades of service with GENE SNYDER in the House and on the Public Works and Transportation Committee, I have never seen his equal as a master of the legislative process and the art of negotiation.

For 22 years, he has served effectively and with great ease as one of the stalwarts of our party, as a protector of the interests of his constituents, and as a key player in landmark legislation of national, if not global, importance.

With his great legislative skills, his accomplished art of persuasion, and his ability to forge compromises with straightforward common sense and logic, GENE SNYDER has always been a Member in great demand during legislative battles. He has always been one of those Members you wanted to have on your side. In that way you had the advantage of having him as a persuasive ally, and perhaps just as important, you did not have to face him as the fierce and equally persuasive adversary he could be.

The great highway, aviation, water, and environmental legislation enacted over the course of the past 20 years have had the mark of GENE SNYDER. Most recently, he was a prime mover in forcing the compromise necessary to break the impasse over the programmatic issues surrounding Superfund.

As ranking minority member of the Public Works and Transportation Subcommittee on Aviation for 8 years, until 1983, and as the ranking member of our full committee for the past 4 years, he has provided the strongest possible leadership in guiding the committee's efforts to shape a sound national transportation and water policy.

He has also served on the Merchant Marine and Fisheries Committee for almost 16 years, and was ranking minority member of that committee in the 97th Congress. He played an important leadership role in the major legislation drafted in that committee, including the Shipping Act of 1984, and in efforts to revitalize the merchant marine industry.

Through more legislative endeavors than I can possibly mention, I have served beside GENE SNYDER on the Public Works Committee and stood with him here on the floor in support of legislation to keep this Nation economically healthy and militarily strong.

It has been more than a pleasure to serve with GENE. It has been a delight. His homespun humor has produced some of the best stories I have ever heard or ever expect to hear. I know that my colleagues will echo my assessment of GENE as truly a master story teller.

I know also that the folks back in the Fourth District of Kentucky will miss their spokesman and defender in this body. The many federally funded projects throughout his district amply demonstrate Congressman GENE SNYDER's abiding concern for addressing the needs of his constituents. He has never been one to give up on a project with real merit, and in that regard, his long-running campaign in support of the Falmouth Dam is legendary.

His constituents have expressed their appreciation many times and in many ways, the most recent being the renaming of Louisville's great Jefferson Freeway as the "Gene Snyder Freeway." Just as his fellow Kentuckians appreciate what he has done during his distinguished congressional career, so do my fellow Arkansans and indeed all Americans who enjoy a national transportation network without equal and a system of public facilities that gives us a standard of living unmatched anywhere in the world.

As my good friend, Congressman GENE SNYDER, closes out his service in the House, I wish him and his lovely wife, Pat, continued success, prosperity, and good health in the years ahead.

Mr. NATCHER. Mr. Speaker, at this time I yield to the distinguished gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. I thank the chairman for yielding.

Mr. Speaker, it truly is an honor for me to participate in this special order and pay tribute to our distinguished colleague from the Fourth District of Kentucky, GENE SNYDER, who is retiring upon the sine die adjournment of this 99th Congress.

Before I formally begin my remarks in GENE's honor, I would like to take just a moment and commend the Kentucky delegation, especially BILL NATCHER and RON MAZZOLI, the Chairman of the Committee on Public Works and Transportation, JIM HOWARD, and our soon-to-be ranking minority member of the committee, JOHN PAUL HAMMERSCHMIDT, for reserving this special order.

As some might know, GENE and I have had a very unique working relationship throughout the 18 years in which I have been a Member of Congress.

You see, as fate would have it, my two committee assignments throughout all these years are identical to GENE's. We are both a member of the Merchant Marine and Fisheries Committee and the Public Works and Transportation Committee. So every time we've had a hearing, markup, or caucus at either of these committees, GENE and I have been there. And, as we all can understand, when you spend that much time with an individual, you begin to learn a little about them.

And I can say without hesitation that GENE SNYDER has been a positive force on these committees and has been a real fighter for his district and his constituents. Because of his effectiveness and success as a legislator, GENE is looked upon as a leader by Members on both sides of the aisle. And, quite frankly, if you really took the time to analyze his long record of accomplishments, you would never know that he is not a Member of the majority party. I say this because, more often than not, he comes out on top on those issues that are important to the Fourth District of Kentucky. In fact, I would guess that his legislative track record is far better than most of our own.

Now it's no secret that GENE and I didn't agree on every issue which confronted us in committee or on this floor. But I'll tell you something, you always know where GENE is coming from and appreciate his motives for taking a position on a particular matter. Which is highly commendable.

I've always had the deepest respect for GENE SNYDER and I sincerely shall miss his guidance, counsel and quick wit. He has served his country well and his many contributions, particularly in the area of improving our Na-

tion's public infrastructure, will be remembered for many years to come.

Good luck GENE, all of us are going to miss you and your charming wife, Pat.

Mr. NATCHER. Mr. Speaker, at this time I yield to the distinguished gentleman from Kentucky [Mr. HUBBARD].

Mr. HUBBARD. I thank the gentleman from Kentucky.

Mr. Speaker, I join with my colleagues from Kentucky and other States tonight in these special orders honoring our retiring colleague, Congressman GENE SNYDER of Kentucky's Fourth Congressional District.

Congratulations to Congressman GENE SNYDER upon his many accomplishments as a Member of the U.S. Congress.

I wish for Congressman SNYDER and his lovely wife Pat the very best of everything in the future.

Mr. NATCHER. Mr. Speaker, at this time I yield to the distinguished gentleman from Pennsylvania [Mr. SHUSTER].

Mr. SHUSTER. Thank you very much, Chairman NATCHER, for this time.

Mr. Speaker, I rise to express my deep respect, affection and appreciation for GENE SNYDER and his service to all of us and most importantly his service to this country. When I came to Congress as a freshman, I quickly learned on the Committee on Public Works and transportation that although at that time I did not know GENE SNYDER personally, I quickly learned that he was a man that I should learn from, a man who quite obviously was providing leadership to the committee, whose every utterance was articulate, capable, tough, bright; a man who indeed was able to persuade in the best sense of the word.

As I moved into my second and third terms, I began to realize working closer with GENE that he not only had those capabilities but he was an absolute master legislative strategist.

Then as I got to know GENE better and more personally, I realized that he also not only had this legislative capability but indeed was and is a man of great integrity, high character and deep personal responsibility, a man of honor in the best and most broad sense of that hallowed term.

You know, there is a saying that "familiarity breeds contempt." But I would say from my experience in getting to know GENE SNYDER better, in that case familiarity breeds respect and, indeed, the more I got to know GENE SNYDER, the more closely we worked together, the more highly I respected the gentleman.

Indeed, there is nobody in this Congress, in my judgment, who is not only more capable, but also more congenial, warmer, more helpful, indeed a loyal friend.

So it is a great privilege and pleasure for me to join with the gentleman from Kentucky [Mr. NATCHER] and all of our colleagues here this evening to rise and help honor our distinguished friend and colleague, GENE SNYDER.

America is better because GENE SNYDER served in the Congress of the United States, as is his home State of Kentucky.

GENE, we will miss you and your lovely wife Pat. You are entirely too young and too vigorous to be retiring. So while you are leaving the Congress, we expect to continue to be hearing great things about GENE SNYDER.

We will miss you sorely. We wish you well.

□ 1950

Mr. NATCHER. Mr. Speaker, I yield to the distinguished gentleman from Kentucky [Mr. HOPKINS].

Mr. HOPKINS. Mr. Speaker, let me first of all thank the dean of our delegation, Mr. NATCHER, for taking this time and allowing all of us to pay a small tribute to one of our colleagues, GENE SNYDER.

Mr. Speaker, particularly for those of us in the Kentucky delegation, and on this side of the aisle, we reluctantly join our colleagues in bidding farewell to our distinguished fellow Member and friend GENE SNYDER.

We are saddened by his decision but, nonetheless, proud to join in praising his service to the Nation and to our Commonwealth.

I would note that our reluctance to accept our friend's retirement is somewhat tempered on this side of the aisle by the fact that the latest polls in Kentucky affirm that his successor also will be seated on this side when the 100th Congress convense next January.

In addition to the many other expressions of respect and deserved tribute for GENE SNYDER's long record of public service, it can accurately be said and fondly remembered that he was unyielding in his philosophy of government and equally resolute in his personal commitments.

He has been a resourceful and staunch friend and a formidable opponent.

But friend and foe alike know him as one whose word is his bond.

He gave his word to serve the people of the Fourth Distict of Kentucky and today the record will show without question that in his 20 years here, he has steadfastly kept his promise.

There is a direct correlation between the effective, visionary stewardship of Congressman GENE SNYDER and the dynamic growth and progress of that part of Kentucky which he has so ably represented since coming to the House in 1962.

In a district historically hostile to members of our party, GENE SNYDER inspired his constituents to rise above partisanship by staying in touch, by listening, and by faithfully reflecting through his actions here the commonsense patriotism and the highest aspirations of the people of his district.

The people of the Fourth District—and those who have served with GENE SNYDER—will miss his presence here.

On a personal note, I observe his impending retirement with a keen sense of personal loss because of the freindship he has shown me and the assistance he has given me over the years.

No single individual was more helpful during my orientation as a freshman Member of this House.

And I will always remember with special appreciation that GENE SNYDER was among the very first persons who not only encouraged me to seek this office but also helped me to be successful in that initial campaign.

I want again today to express my appreciation to GENE, and in bidding farewell on his departure from the House, to extend to him and the members of his family my warmest personal regards and best wishes.

Mr. NATCHER. At this time, Mr. Speaker, I yield to the distinguished gentleman from New Jersey [Mr. ROE].

Mr. ROE. Mr. Speaker, I thank the dean of the Kentucky delegation for yielding to me, and I want to at the outset, extend my highest greetings and good will to him.

Mr. Speaker, I have been carried away with this presentation here tonight, and we are expressing our encomiums to our good friend, GENE SNYDER, so I have a solution to solve all this sadness that I hear. I do not know whether I can do this, Mr. Dean, at this time in the activities of the House, but I was going to offer a unanimous consent request that GENE SNYDER's term be extended for 2 years. I think would vitiate all the sadness we have and we would be able to hang on to one of the best Members we have in this House. And I do not say that in any facetious way at all, because I think it is too bad we cannot do it that way. Lots of times around here it is some of our very, very best of Members who decide to take on some other work.

I do not look at this night as being a sad night. I am highly honored to be able to join in this well-deserved congressional salute to my good friend, GENE SNYDER, my personal good friend, who has decided to retire from the House of Representatives after 22 years of outstanding service to the people of Kentucky, but equally important, I think that should be stressed to the people of this Nation.

While I am most pleased that we are honoring GENE today, I guess maybe I have to join in a little bit of the sadness that we all feel, but for a different reason; not sadness alone, but a

feeling that we will miss his strong voice that was raised so many times on this floor in key support and in support of key issues vital not only to this congressional district, but vital to my congressional district, the State of New Jersey, the State of Kentucky and every other State throughout this Nation.

GENE SNYDER is widely recognized by his colleagues as one of the most effective Members of this legislative body. I think it is fair to say today that the work we are doing in our conferences, all of us joining together with the Senate on our water resources omnibus bill which has taken 3 years to get to the point it is at, the clean water legislation which we are working on, that even as late as today, GENE SNYDER took the lead and helped resolve. In fact, had it not been for his leadership, two or three of the very key policy issues of this country would not have been decided, if he in his own way did not get those matters resolved.

During the many years we worked together on the Public Works and Transportation Committee, GENE demonstrated a unique devotion to his work that won the admiration and praise of all those who have had the privilege of working with him.

As the ranking Republican member of the Public Works and Transportation Committee, GENE SNYDER has been a strong leader in efforts to improve our Nation's infrastructure.

The water supplies the people drink, the private people drink, the roads they travel on, the airlines that we have flying today would not be there in large measure if it had not been for the leadership of GENE SNYDER.

As was mentioned earlier by some of our other colleagues, he was highly honored by the people of Kentucky, recently by Governor Collins, dedicating the Jefferson County Freeway in his name. And that was no idle gesture where somebody was singing encomiums to his good work. He worked on that for 20 years to finally get it to be achieved. I think that says something about a person's stick-to-itiveness.

Mr. Speaker, let me close on two points. I also had the opportunity to travel earlier this year with GENE SNYDER to China. Lest that we think he devotes all of his time to Kentucky and to the needs of the Nation, we had a chance to travel to China. Being the ranking Member as he was on that particular tour, I think we achieved many things in consultation and in cooperation with the Chinese Government that would not have been able to have been achieved certainly without his presence, which is an honor to him and to our country.

So, I want to say to GENE, not with any sadness, I expect the gentleman will be back here every day seeing what we are doing and keeping an eye on us. He owes that to the people of the 4th District of Kentucky, to the people of Kentucky, and the people of this country.

I want to extend my highest regards and personal best wishes to both GENE SNYDER and to his lovely wife, Pat and all of the family for many, many, many years. And when GENE gets tired of turning over the sod and working with the plants and the flowers, maybe a little tobacco down there in Kentucky, we want him to come on back. We need him.

Mr. NATCHER. At this time, Mr. Speaker, I yield to the gentleman from Kentucky [Mr. ROGERS].

Mr. ROGERS. Mr. Speaker, I thank the gentleman for taking this special order and giving us the chance to say these words about our personal friend and our colleague who is leaving our delegation.

Mr. Speaker, I can speak about GENE SNYDER in a number of ways, as can all of us. I guess that probably the word that comes to mind more than any other though is just "friend." I guess we can all say that, those of us who have known him for a period of time.

As a Member of the Kentucky delegation, when I first came here as a freshman, like Mr. HOPKINS, I can think of no one who helped me personally more in getting used to this place as you can than GENE did; and even before I came here. It was GENE SNYDER who encouraged me to seek the office from the fifth district in Kentucky at a very critical time.

I shall never forget the telephone call that he gave to me at a particular time that I will not describe here that was very critical to whether or not I sought this office.

□ 2000

Then you could speak about GENE SNYDER as the successor of Henry Clay. Probably the most distinguished Kentuckian ever to serve in the Congress of the United States, having served as Speaker the first day he served here. Then, of course, going on to serve in the Senate for all those years and then as Secretary of State and candidate for President four times; nearly victorious twice, but best known, perhaps because he was the designer and the pusher of what he called the "American Plan." That was to build the infrastructure of this young Nation at that time. The things that we call public works, and that is a good name for them because they are works for the benefit of people, the public.

That has consumed GENE SNYDER for his career, not just in the Congress even, but even before that when he served as a magistrate of the Jefferson Fiscal Court in Kentucky. I guess maybe that is where GENE learned some of the toughness that he sometimes demonstrates here in this body where he has earned the title of being a tough competitor. A man who, when he believes his way, is willing to take no prisoners in those beliefs. We all heard that phrase. GENE was named by a leading columnist in this country a few years back as one of the most effective Members of the Congress, ranking, I think, in the top 10 or thereabouts. Even though he is a minority Member of this body.

We could refer to GENE as an ally, in projects certainly, on our side of the aisle, a philosophical ally; a person who feels very strongly and deeply about his conservative philosophy and is willing to fight for it, and of course an ally in the Kentucky delegation. A delegation that historically has worked very closely together across the aisle and still does. When I came here, that was the lesson that I learned from people like GENE SNYDER and of course our dean, BILL NATCHER and our late, great friend, Carl Perkins and the others about working together for the benefit of our State. GENE has carried on that tradition.

We could refer to GENE as a devoted public servant; a person who has spent those nights and days and weekends and time away from family and time away from home and time away from business and time away from all other activities devoted to this place and to this Nation and to people like you and I.

A person who loves this body as few do, a person who is devoted to his people and the people of this great land as few are, and a pure public servant. We know GENE SNYDER is a man of his word. When he tells you something, you can write it down and put it in the bank because it is there and will be there, regardless of the temptations or the pressures that might come from other directions. If he has given you his word, that is it. He will stay with you. A man who will fight for your causes as well his own and has demonstrated that so many times.

Of course, then we could say a man who has fought for his beliefs strongly. A man who is willing to go the extra mile, to get in the arena, get dirty, get dusty and do the right thing for the causes in which be believes. That is why we are here tonight crowning GENE SNYDER with this crown of flowers as we relunctantly wish him goodbye and Godspeed from this body.

Mr. Speaker, I am going to quote a poem written by Theodore Roosevelt which talks about the victor's crown which says many things that I wish I could say better but cannot. Quoting from Teddy Roosevelt in that poem, he said:

> It is not the critic who counts; it is not the man who points out how the strong man stumbled or whether the doer of the deed could have done better. The credit belongs to the man who is actually in the arena,

whose face is marred by the dust, sweat and blood. Who strives valiantly, who errs, to come short again and again because there is no effort without error and shortcoming.

It is the man who does actually strive to do the deeds, who knows the great enthusiasm, the great devotion, who spent himself in a worthy cause, who at best knows in the end the triumph of high achievement, and who, at the worst, if he fails, at least fails while daring greatly. So that his place shall never be with those cold and cruel souls who know neither victory nor defeat.

The victor's crown belongs tonight and forever more in our book to GENE SNYDER. GENE, to you and Pat and to all of those you hold dear, we wish you Godspeed, a happy vacation, and we hope you come back here almost as often as you do now.

Mr. NATCHER. Mr. Speaker, I yield to the gentleman from Georgia [Mr. ROWLAND].

Mr. ROWLAND of Georgia. I thank the gentleman for yielding to me.

Mr. Speaker, I wish to express my appreciation to the gentleman from Kentucky [Mr. NATCHER] for this special order this evening giving all of these people here an opportunity to express their feelings about our dear friend GENE SNYDER.

I could talk about a lot of things that have already been talked about here tonight. The ability that my good friend, GENE SNYDER has in the Public Works and Transportation Committee. He has really done an outstanding job in highways and byways and airways and waterways and buildings and all of the things that the Public Works and Transportation Committee is concerned with.

He is a man of uncommon ability in those areas and that has already been stated. Let me tell you about the special relationship that has developed between GENE SNYDER and myself over the past 2 years.

I came to the Public Works Committee 4 years ago and learned a little bit about him during that period of time. But for the past 2 years I have sat just in front of and just below GENE SNYDER.

Some 2 years ago, he invited me to a dinner that he had been having for a good many years with other friends of his. He, I found out, is a man of uncommon good will. I say that because he had Members from both sides of the aisle to come to this dinner that he has had on several occasions. He said, "Why do you not bring some friend from your side of the aisle to this dinner for this good fellowship, for this good food and to enjoy each other."

Mr. Speaker, he has done a lot for the good will, the building of good will on both sides of the aisle here. While he has been a man that has been devoted to building such things as bridges across rivers and streams, he has also been a man who has been devoted to building good will between people.

GENE, I want you to know how much I appreciate your friendship; it has really been a great thing for me. It has given me an opportunity to get to know other people who I probably would not have gotten to know so well. I am going to miss you; I wish you were not leaving. But since you are, Godspeed to you and Pat and I look forward to you coming back.

Mr. NATCHER. Mr. Speaker, for a great many years, we had a Member in this House from Youngstown, OH, by the name of Mike Kerwin. When Mike Kerwin liked a Member, served with him a long time, he had an expression that said this, Mr. Speaker: "He tests well." Mike Kerwin would always say, "He tests well."

The next gentleman that I am going to yield to, Mr. Speaker, can tell you whether or not GENE SNYDER tests well. That is the distinguished gentleman from Missouri, GENE TAYLOR.

Mr. TAYLOR. I thank the gentleman for yielding to me.

Mr. Speaker, first of all, I would like to express my appreciation to our good colleague, the distinguished and able and well-respected gentleman from Kentucky, the dean of the Kentucky delegation, Mr. NATCHER, for arranging for this time for us to say the few words that we can say that are totally inadequate relative to the retirement of our good friend, GENE SNYDER.

Mr. Speaker, when the gentleman from Kentucky [Mr. SNYDER] retires from this body at the end of this session, we will be losing one of our true leaders, and I will miss one of my closest friends. Our association has been molded in the bonds of friendship and it is an association that I will always revere and always remember.

GENE SNYDER has stood for many things. Integrity, ability, leadership, dependability, courage, legislative skills, and all of the qualities that have enabled him to be a major and effective participant in many of the most important bills that this House has ever considered.

□ 1840

GENE SNYDER'S word is his bond. He has never wavered in the face of adversity, nor has he ever foregone his principles.

He is a talented debater who concedes no ground, yet holds no animosity when the battle has ended. We all will miss GENE SNYDER. I know that he, in turn, will miss this body because of his intense interest in Government and his affection for these halls, where he has served the Commonwealth of Kentucky and this Nation with such distinction.

As I sat here this evening and listened to the recitation of the accomplishments of GENE SNYDER with his colleagues on the Committee on Public Works, where I was privileged to serve with him for a number of years, I thought of the great accomplishments that have been attained by the work of that committee. They have built facilities that have made this Nation a much richer place in which to live.

Yes, GENE SNYDER was one of those builders. I could not help but be reminded by the words of a poet. "I saw them tearing a building down, a gang of men in a dusty town, with a yo-heho and a lusty yell, they swung a beam, and the sidewall fell. I asked the foreman if these men were skilled and the kind he'd hire if he had to build. He laughed and said, 'Oh, no, indeed, common labor is all I need. For these men could wreck in a day or two what it would take a builder years to do.' Then I thought as I went my way, what kind of role am I to play? Am I the builder who builds with care, measuring life with rule and square, or am I the wrecker who stalks the town simply content to be tearing down?"

Mr. Speaker, I am sure we all agree here tonight, the man that we honor here tonight has been a builder, a builder for this Nation, a builder for his district, a builder for the Commonwealth of Kentucky.

I wish him and his lovely wife, Pat, well, and I know that the U.S. House of Representatives is tonight a better place because he came this way.

Mr. NATCHER. Mr. Speaker, at this time I yield to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. Mr. Speaker, I thank the gentleman from Kentucky [Mr. NATCHER] very much for calling for this special order for our good friend, the gentleman from Kentucky, GENE SNYDER, and for giving me the opportunity to speak.

Mr. Speaker, the end of any Congress is always a sad occasion, regardless of what has been accomplished, because we always say goodbye to some of our colleagues. In many cases, they are some of our senior Members, such as my friend and committee colleague, Congressman GENE SNYDER.

The gentleman from Kentucky has been a powerful force in this body for over two decades. He has dominated the scene with his intelligence, preparation, toughness, wit, and candor. He has been a forceful spokesman for fiscal sanity and integrity in Government almost from the day he arrived in this city. In fact, he introduced a balance-the-budget resolution in 1962, the year he was elected to the House. His must have been something akin to a voice crying in the wilderness on the subject in those days.

As a long-time member of both the Merchant Marine and Fisheries Committee and the Public Works and Transportation Committee, with services as ranking minority member of both, GENE SNYDER has played a

strong leadership role in the development of sound and sensible transportation and water policy.

I personally am immensely proud to have had the opportunity to serve with him in the House and especially on the Public Works Committee. Not only has he been of great assistance to me with matters of concern to my constituents, he has provided a valuable education in the art of negotiation. Time and again, he has demonstrated his ability to help break legislative logjams and pull together support for controversial and complex pieces of legislation, such as the Superfund reauthorization bill. He has also frequently been successful in his opposition to legislation, as proponents of coal slurry pipeline deregulation, among others, have learned on occasion.

While his legislative prowess is well known and appreciated by those of us in this Chamber, tributes to the effectiveness of GENE SNYDER have come from outside the Halls of Congress as well. No less than syndicated columnist Jack Anderson, who passes out criticism by the truckload, rates GENE SNYDER as one of the 12 most effective House Members.

His Fourth District constituents certainly know first hand of GENE SNYDER's effectiveness. The tributes they have paid and continue to pay him are testimony enough to his good works on their behalf.

I know that GENE will continue to be successful in his various endeavors when he leaves this body. And I would simply wish him and his lovely wife, Pat, the very best in all of their future pursuits.

I want him to know that I personally will miss him very much.

I hope to see very much of him in the future as he comes back here to visit with us. As one of our former colleagues says, "Keep us on the straight and narrow."

GENE, a job well done. This body, Kentucky, the country, all owe you a debt of thanks and gratitude for what you have done.

Mr. NATCHER. Mr. Speaker, at this time, I yield to the gentleman from Kentucky [Mr. PERKINS].

Mr. PERKINS. Mr. Speaker, I am honored to have this opportunity tonight. I am honored to be able to speak tonight about a man who, I think, everybody in this room knows how special he is.

I am honored to have an opportunity as Kentucky's junior elected Congressman to hear all six of the remaining Congressmen from our great State speak and tell GENE SYNDER a little bit about how we feel about him and how much we are going to miss him.

I have a number of informational items here on GENE SNYDER's life, but I am not going to read those because it is going to sound like a eulogy and he looks like he is living pretty well up there right now. But I am just going to take this opportunity to speak a little bit about what has happened over the years so that maybe some of the people across this great land will have some sort of idea of what GENE SNYDER did, first of all, in his district.

In 1968, he was instrumental with the southwest Jefferson County floodwall; in 1970, the Markland Dam Bridge; in 1970, the Clayway Bailey Bridge in Covington; in 1974, the Banklick Creek watershed flood control project; in 1977, the Dayton floodwall; in 1982, highway bill, a highway that was recently renamed the Gene Snyder Freeway; the Falls of the Ohio Wildlife Conservation Area, in 1984; the renovation of the Louisville Post Office and Courthouse in 1984; the new terminal at Standiford Field in 1983; two bridges that are not under construction yet, but the money is coming and the money is there at Covington and Newport this year, 1986; and numerous other sewer and water plant and line projects, and, of course, the Gene Snyder Airport at Falmouth, KY, in 1984.

Maybe when you start listing just a few of the things that GENE SNYDER has done in terms of his district, you will have a better idea of what he has done across the Commonwealth of Kentucky and across the United States of America.

I know that myself, when I came here as a freshman Member this term of Congress, was not sure exactly what kind of relationship I was going to have with GENE SNYDER, but he opened his arms to me in friendship and kindness. He took me in under his wing; he helped me with projects, and I thank him for the people of eastern Kentucky for helping us to try to get those projects because we need those things to improve the quality of life.

When I am standing here today, I am not just standing here and saying, as a friend, which I consider myself to be, thank you for all the things you have done for us. I am thanking you for the people that you have helped in Kentucky and across America.

GENE, you know that you always have a way of saying something that you always kind of figure out where you stand. I like that. It is something we do not have enough of in this country. It is something that you get tired of seeing, people speak out of both sides of their mouths, but GENE SNYDER, you know where he stands.

I want to say that I am proud to have served and to have had the honor to serve with GENE SNYDER in this distinguished House of Representatives, and I know that we will be seeing, a lot of GENE SNYDER in future years in other areas. But he just has to know that on both sides of this aisle, Democrats and Republicans, and I guess if you are going to go on that liberal/conservative scale in Kentucky, I am about as far away from GENE SNYDER as you would want to get. On both sides of this aisle, and on both ends of the political spectrum, there are people who appreciate GENE SNYDER for the fine American that he is and the fine job that he has done for America.

Mr. NATCHER. Mr. Speaker, at this time, I yield to the gentleman from New York [Mr. MOLINARI].

□ 2020

Mr. MOLINARI. Mr. Speaker, I thank the gentleman for yielding this time to me.

I made a promise to Mr. SNYDER that when I got up that I would not tell the truth, but I will.

I am a graduate of the Professor Snyder school of politics. I recall after GENE became ranking member of the Public Works and Transportation Committee that he had an amendment before the committee. It was the Snyder amendment and I voted against it. After the vote was over, he came over and tapped me on the shoulder, and he said, "Were you aware that was my amendment that you voted against?"

I said, "Yes, I was aware."

"Oh."

Then at the end of the day he called me up and asked me to come to his office. I came to his office and he pointed to the wall and there was this gadget hanging along the wall.

And he said, "Do you know what that is?"

It was silver, and I said, "No, I have never seen it before."

And he said, "Well, back home they use that to castrate cattle."

I got my first lesson and I felt mighty, mighty uncomfortable, and I was indoctrinated into the world, the real world of GENE SNYDER.

You know, there has been too much of a eulogy here. GENE SNYDER is alive and there is another side to him.

Let me also say, and it is no secret and I think GENE would not mind me saying this, we have had some serious differences. In fact, I must confess that I have been angry with this man on more than one occasions, but at no time, and this is important, at no time, no matter how angry I was, did I ever lose the immense respect that I had for GENE SNYDER, the Congressman, GENE SNYDER, the intellect, GENE SNYDER, the man who put together on the ranking side teamwork like I had never seen before, who put together a staff that loved to work extraordinary hours for him.

And yes, that part of discipline is what set him apart and made him so effective.

He was a very difficult opponent. It is better to be on your side, Mr. SNYDER, than to be opposed to you. On

the other hand, it was a great learning experience.

I echo that which has been said before me. One of the joys of government is serving with some people who are unique and special and who leave an indelible imprint, and it is nice that we can take a few minutes out like we do here to pay tribute to someone who has served over 20 years in the style in which he has.

I am not going to repeat everything that has been said, except to say, yes, indeed, you do rank up there with the tops who have served in this body, and whatever my differences have been with you in the past, I love you for what you have done for your country and for your district. You have done a great job.

Mr. NATCHER. Mr. Speaker, at this time I yield to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. Mr. Speaker, I thank the gentleman from Kentucky for having this special order here this evening.

I also want to thank the gentleman from New York for breaking up a very long funeral.

I think that some of the stories that all of us can tell who have worked with GENE over the years, I think could fill a very large book. I can say that a lot of them would be very humorous and a lot of them I think would be very inspirational.

I, too, GUY, have been to GENE's office. I have seen that delicate instrument of surgery. You cannot help but hurt when you look at it.

I think that beyond all that, and I have disagreed with my friend, GENE, on many occasions, and when you do disagree with GENE, he will tell you right up front. He will tell you again and he will remind you sometime later. He is a man of great memory.

But this strong personality goes beyond just the man, GENE SNYDER, and the position that he holds, because it goes out and it carries forward in the representation and confidence that he has among those he leaves, those who have been ranking members on the various committees under GENE have known that he has always stood by us very strongly and that he has not tried to dominate the areas which we felt strongly about.

I think all of us in the Congress, and I have been here 6 years, have been allowed to grow under the tutelage of GENE SNYDER. I feel because of that that we are stronger people and we will become stronger leaders as our time comes to lead as we gain seniority.

One of the things that I think is so important about this job here in Congress, and I think perhaps I would say that the only real pleasure that you get out of this job that keeps you coming back is the friendship and the association and all the extraordinary people that you meet, the cross-section of people, the different personalities.

There are men who have left huge footsteps that we will never be able to fill entirely.

GENE, you certainly will be missed. You have been a tremendous friend to me and Emily over the years as we have got to know you and Pat better and better. You have been a great teacher and you have been a great leader. We are certainly much better off for having been with you and for that we thank you and we bid you all the happiness that you certainly deserve in your next career and, please, go after a career or you are going to drive Pat crazy.

Mr. NATCHER. At this time, Mr. Speaker, I yield to the gentleman from Tennessee [Mr. SUNDQUIST].

Mr. SUNDQUIST. Mr. Speaker, I thank the distinguished gentleman, the chairman, the dean of the delegation from Kentucky, for taking this special order to recognize our good friend, GENE SNYDER.

The leadership of the gentleman from Kentucky in both the House and in our Public Works and Transportation Committee will be sorely missed.

As the ranking Republican on this committee, the guidance and direction he has provided, particularly to the younger members, the results of that and his influence have been immeasurable.

I have worked with him on almost every issue and occasionally against him, and I think it was only one time, I learned my lesson very well, but I remember him as being forceful and committed and always fair.

My business partner had a saying about one of his relatives. He said, "Sometimes he is right and sometimes he is wrong, but he is never in doubt."

GENE SNYDER has never been in doubt and he not been wrong very many times, in my opinion.

From him I learned a valuable lesson about discipline, about loyalty and about teamwork, not just to a party, but to a principle, to a concept, to some progress.

Somebody else mentioned Jack Anderson a few minutes ago. I think Jack Anderson also said that GENE SNYDER is one of the most dangerous men in Congress to cross. I never found that. I found that GENE SNYDER was principled and tough. I consider him a close and a revered colleague and a true friend.

Given GENE's love of life, his obvious sacrifices and his many accomplishments, his dedication to the commonwealth of Kentucky and to this country, he has provided and obtained the admiration of this Member and I think has set an example that all of us will have to work hard to follow. As Members of Congress we should all seek to maintain the bipartisan manner in which he sought to work problems out.

I think it is also important for us to mention that he has put together a staff that is second to none. That is always a reflection of the Member or the chairman or the ranking member, what kind of staff does he have? That is a reflection of what he accomplishes.

The thing that has impressed me so much about GENE SNYDER through his staff is that they remember the little things. They are sensitive to the political needs of both Democrats and Republicans in the follow-through that they have. I appreciate that and I think all my colleagues value that.

There is no doubt in my mind that next year the Public Works and Transportation hearings will take on a different personality, and that is the way life is, because we are all individuals.

There is no doubt also that back in that corner over there behind the rail and by the rail it will not be the same as we look over there and look for that man with the bright colored coat and the matching pipe and his quick wit.

It has been said that real wealth in life is not measured in money and it is not measured in property and it is not measured in jewelry. Real wealth in life is the effect that we have on the lives of others, those we have touched as we have come into contact with them in our day-to-day activities.

GENE, based on the friends you have made, the lives you have touched, I think you are a wealthy man. We will miss you.

Mr. NATCHER. Mr. Speaker, at this time I yield to the gentleman from Connecticut [Mr. ROWLAND].

Mr. ROWLAND of Connecticut. Mr. Speaker, and Mr. Chairman, thank you for hosting this special order.

It is quite obvious from the comments that have been made for this past hour or so that this great affection and respect for GENE SNYDER is considerable.

There have also been some fun stories and some fun jokes.

Just some personal thoughts that we share with GENE, I happen to be the newest member of the Public Works Committee, the newest member because approximately a year ago there was a vacancy and GENE SNYDER decided that someone from New England was actually going to serve on the Public Works Committee.

GENE, as so many others have said, did indeed take me under his wing and brought me into the powerful Public Works and Transportation Committee.

The interesting thing is that many of us on both sides of the aisle have heard so many stories and so many anecdotes about the Public Works Committee, we always heard about the loyalty and we always heard stories

about how discipline and teamwork was so important.

I remember, oh, I do not think I was on the committee for a week or 2 weeks that a caucus was called, a meeting, and I always regarded a caucus as an opportunity for party members, one particular party or the other, to get together to decide on strategy and issues and how people were going to vote. This particular caucus was for both sides of the aisle, Republicans and Democrats meeting to decide how we were going to take an issue through the whole Congress. That issue was pretty simple and all of us had decided we were going to stay and work together.

The next day the vote came up. We all voted the same way. I remember I cast my vote, it was on a rule, and I realized about an hour or so later when I had a call from GENE and a call from a few staff people that I had voted the other way.

I was so upset by that, I went to GENE and we talked back and forth and I tried to tell him that it was a pure mistake. I must have pressed the wrong button. I thought about it for a number of hours and I was so upset that at the very first opportunity I had to show loyalty and discipline.

I finally called the computer company, personally got on the phone and asked them to track the whole vote to make sure that something did not go wrong. Quite ironically, there was a wrong transmission from the computer to the actual tally. So I was very pleased to run back to my ranking member and so many others on the committee to explain to them that it was a computer error.

I think all of us have said how much we do not like to be on the other side, and as a new member of that committee, I did not want to start out on the other side of GENE SNYDER. It was going to be a very, very long year.

In all seriousness, GENE has really been a rare breed of Congressman, a rare breed of public servant. It is obvious he is devoted to his constituents. It is obvious that he is devoted to his work here in the Congress.

As a new Member of the Congress and of this committee and I think some of us have spoken of him as almost a father figure, we really do feel that way.

I think we also feel that his leadership and his guidance and his honesty have been a great inspiration to many of us.

I think the thing I like about GENE SNYDER the most, I think the thing all of us like about him the most, is his ability to work with both sides of the aisle, Democrats and Republicans, his ability to work with liberals and conservatives, and, yes, his ability to work with southerners and northerners.

He will be missed. His sense of humor will be missed. His hard work will be missed and he will be missed by those of us who have learned in just a very short while from him.

Many of us have talked about the relationship we have had going back a few years, some going back 22 years. I will always remember my relationship with GENE SNYDER for the past 2 years and know that he is one of the people, and we all hope we are going to be here a long, long time, that he is one of the people who has taught me how the process works, has taught me how to work within that process, with compassion and devotion, and your compassion and devotion, GENE, to your colleagues, and especially to your staff is so greatly appreciated.

Thank you and best wishes to you and your wife.

Mr. MINETA. Mr. Speaker, it is indeed a pleasure to join with my colleagues on the floor of the House of Representatives to honor our distinguished colleague from Kentucky, GENE SNYDER, who will be retiring from the Congress at the end of the session. All of us who have worked with Mr. SNYDER, since he was first elected to the House 24 years ago, know first hand just how smart an individual and how knowledgeable in the ways of the House our colleague from Kentucky's Fourth District is. Mr. SNYDER is truly a Member of Congress in the great tradition of the House of Representatives. He has learned the process and worked his way up to the top leadership of the House Public Works and Transportation Committee, where he serves as our ranking member, and to a prominent role in the House.

Mr. SNYDER has accomplished this by relying on his intelligence, sense of fair play and his extensive knowledge of the intricacies of the congressional system.

I must also note here parenthetically that I am most certain that Mr. SNYDER's role on the Public Works and Transportation Committee will be most ably filled in the 100th Congress by my good friend and distinguished colleague, the gentleman from Arkansas, JOHN PAUL HAMMERSCHMIDT, who has been a leader in the House for a long time.

Getting back to the business at hand—that is, honoring Representative SNYDER, I learned first hand, when the gentleman from Kentucky served with me as the ranking member of the Aviation Subcommittee, just how awesome and wily an adversary Mr. SNYDER can be. I have always preferred to be on the same side of an issue as he is, although I have not always been so fortunate and I am not so lucky at this point in time.

Nonetheless, even when we have been on opposing sides, working with GENE SNYDER has been an honor, a privilege and an education.

We will all miss him.

Mr. APPLEGATE. Mr. Speaker, I rise today to join with my colleagues in paying special tribute to a friend and colleague, Congressman GENE SNYDER. I am pleased to have the opportunity to add my personal thanks and appreciation to Mr. SNYDER for his dedication, devotion, and for his good advise whenever I asked for it.

As a member of the Public Works and Transportation Committee for the past 10 years, I have had the distinct pleasure of serving with GENE. As the ranking minority member, GENE has been an effective and respected leader. Under his leadership, the committee has adopted some of the most important infrastructure legislation in decades. His leadership and experience assisted the full committee in our efforts to secure passage of a water quality renewal bill, a Superfund reauthorization bill, a highway reauthorization bill, and a clean water bill. These pieces of legislation represent significant gains for our environment and our Nation's infrastructure policy. I know for a fact that he has diligently worked with the leadership of the committee in securing minority support for each and every piece of legislation that is considered by the committee.

GENE SNYDER is one Member of Congress who can take a great deal of pride in his accomplishments as a Member of Congress. His record speaks for itself and his accomplishments will have a major impact on the future of the Public Works Committee. GENE SNYDER will be sorely missed, not only by the voters in Kentucky, but by all of us who had the opportunity to work with him. We will miss his leadership, dedication, hard work, and of course his unique sense of humor. I personally wish him the best in his retirement and am confident that he will continue his efforts on behalf of several important issues and policies.

Mr. PETRI. Mr. Speaker, I rise to join with my colleagues in praising the accomplishments of the distinguished gentleman from Kentucky, GENE SNYDER.

The condition of our Nation's public works infrastructure is an issue which has received a great deal of attention over the years. GENE has had the opportunity to be involved in many aspects of our infrastructure during his long service on both the Merchant Marine and the Public Works and Transportation Committees.

As a member of the Public Works Committee for the past two Congresses, I have seen firsthand GENE's dedication to the preservation and expansion of that infrastructure. He has consistently supported the Federal role in maintaining America's transportation systems. He has been instrumental in the passage of highway and water resources legislation. In this Congress, the committee has produced landmark legislation in these areas.

GENE has not neglected the other responsibilities of this committee as he has put his considerable energies toward working out compromises on environmental issues such as Superfund and the Clean Water Act. Again, with GENE's able assistance, the Public Works Committee has steered crucial environmental issues through the House and is now in conference with the other body.

As a minority member of the Public Works Committee, I can only regret the loss of such knowledge, experience and ability on the retirement of our ranking member, GENE SNYDER, at the end of this Congress. I wish him the best on his return to his native Kentucky.

Mr. NOWAK. Mr. Speaker, it is a pleasure to join my colleagues in this tribute to the distin-

guished gentleman from Kentucky, Representative GENE SNYDER, the ranking minority member on the House Committee on Public Works and Transportation.

In my 12 years in the House, I have been privileged to serve on this committee with GENE SNYDER, where we have joined forces on both sides of the aisle to work to address our Nation's infrastructure needs.

The motto of the State of Kentucky is "United we stand, divided we fall." That philosophy succinctly reflects the manner in which GENE SNYDER has worked within the Public Works and Transportation Committee. The highway, bridge, airport, water pollution control, flood control and economic development needs of this Nation are a nonpartisan and bipartisan concern.

GENE SNYDER'S approach to dealing with remedial legislative action to deal with these needs has reflected the commonality of our concerns. On many occasions, he was instrumental in helping forge the compromise and consensus that make meaningful legislative action possible.

Thus, he had been a leader in the development of a balanced transportation network in this country and to target our limited Federal resources in the most efficient way possible to meet our infrastructure needs.

We on the committee certainly will miss his leadership, cooperative spirit and good counsel as he ends his career here in the Congress.

At the same time, we wish him well in all his future endeavors.

Good luck, GENE.

Mr. DE LUGO. Mr. Speaker, I am pleased to join with my colleagues on the Public Works Committee and my good friends, Mr. NATCHER and Mr. MAZZOLI, in paying tribute to GENE SNYDER. It has been a pleasure to have known and worked with GENE, and I am indebted to him for his support on extremely important projects for the U.S. Virgin Islands, in particular the St. Thomas Airport.

I, too, share in the respect all of us have for this true Kentucky gentleman, for his skill as a legislator, and for his wit and wisdom in handling the issues. His brilliant wit, which he uses like a rapier to underscore his point and disarm his opposition, has made him one of the most-quoted Members of this body.

Some of his best lines have never been published, and I personally will never forget the comment he made 2 years ago after a particularly interesting duel we had on the Virgin Island Jones Act exemption. I am going to miss you, GENE, especially your sense of timing. I don't know what I am going to use for campaign material now.

We are all going to miss him, on both sides of the aisle. I salute him and wish him Godspeed and success in achieving those new goals he has set for himself.

Mr. CLINGER. Mr. Speaker, there are few people I have enjoyed working with more in Congress than GENE SNYDER. His leadership on the Public Works and Transportation Committee has served as an inspiration to all the members of the committee, both on the majority side and the minority side of the aisle. He has been dedicated to the committee's work to strengthen and improve this Nation's infrastructure. He has been energetic and enormously effective at working with the Members on both sides of the aisle to forge the compromises that are the end results of the work of a truly effective congressional committee as the Public Works and Transportation Committee has been.

I can personally vouch for his legendary legislative skills having been on the opposite side from GENE on one or two occasions. Needless to say my side didn't win. As a matter of fact, we were buried and in large measure the extent of the rout was due to GENE. There is no Member of this body more expert at building a coalition for his causes. He has an awesome knowledge of the rules of the committee and the House. He never enters a battle unless he knows the facts cold. He is an extremely accomplished debater who has been known to reduce opponents to incoherent babbling, and when all else fails there is his extraordinary charm. One way or another GENE usually wins his battles and in the process the Nation's public works facilities and transportation networks win as well.

There is so much I have learned from GENE and there are so many things that I am grateful to him for that it would be impossible to list them all during this special order. But there is one thing that I must speak of. He has been a superb ranking member. Everyone knows that GENE is a strong and forceful leader. Only those of us who serve on the committee know that he is a thoughtful and sensitive leader as well—one who goes to great lengths to protect and serve the vital interests of his members. He counsels with us when we have problems. He advises us on strategy. Time and time again he has prevented me from committing embarrassing blunders. GENE is a conservative and from his vantage point I am a leftwing radical flake—although I prefer the term "moderate." Nevertheless, our philosophical differences—actually not that major—have never stopped GENE from working with me, and from helping me do a better job.

It takes awhile for GENE to get to know you and vice versa. I remember that from my first year on the committee GENE kept confusing me with JERRY SOLOMON but once he gets to know you there is no more loyal or supportive friend in the world. He is also a great storyteller although I must confess that I have been unable to repeat most of them before the Rotary Club back home much less the League of Women Voters.

I hope I don't sound too pretentious if I close my remarks with a quotation—because GENE is far from a pretentious man. But it seems to me that Robert Whitinton's classic description of Sir Thomas More, penned in the 16th century could not be more apt when we speak of GENE SNYDER.

A man of angel's wit and singular learning; I know not this fellow. For where is the man of that gentleness, lowliness and affability? And as time requireth, a man of marvelous mirth and pastimes; and sometimes of as sad a gravity; a man for all seasons.

We are all going to miss GENE. I am going to personally miss GENE, and wish him just the very best in everything he endeavors to do once he leaves his friends and colleagues in the House of Representatives.

Mr. LIPINSKI. Mr. Speaker, it is with great pride and great pleasure that I rise today before my fellow Members of Congress to honor the illustrious career of my old friend and colleague, Congressman GENE SNYDER of Kentucky. Yet it is with some sadness that we note GENE will be retiring following this term after a quarter century of dedicated service in the House of Representatives.

I have had the unique honor of serving with GENE on both the Committee on Public Works and Transportation, where he sits as the ranking minority member, and the Committee on Merchant Marine and Fisheries. In my frequent dealings with him I have always found him to be a knowledgeable and competent legislator as well as an amiable gentleman who worked well in a nonpartisan manner.

GENE has also had a full life outside of his congressional activity. He has had his hand in a number of business ventures throughout the years including construction, real estate, farming, insurance, and a law practice. His extensive involvement in community organizations includes local political work that began in his youth. This wealth of experience has added to the base of knowledge from which he has drawn allowing him to be a more effective legislator.

GENE'S rise in the political world has been swift and sure. His success in the House of Representatives is noted by his longevity and his accomplishments. Since I have shared committees with him, GENE has been a key player in every piece of major legislation to come out of Public Works and Transportation as well as Merchant Marine and Fisheries. He has also been recognized as one of the prime movers of the Airport Development Aid Program to fund safety improvements for airports. Recently, GENE was recognized in his own district by having the freeway of Jefferson County, KY, renamed the Gene Snyder Freeway.

Our loss at his retirement, however, is his family's gain. His wife, Patricia, and their four children are certainly looking forward to the end of his long weekly commute between the District of Columbia and his own home district in Kentucky.

I will miss you, GENE, and the House of Representatives will miss you. I'm sure all your colleagues will join me in wishing you continued luck and success in your furture endeavors.

GENERAL LEAVE

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the retirement of our friend, GENE SNYDER.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

THE TAX REFORM BILL

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Minnesota [Mr. FRENZEL] is recognized for 60 minutes.

Mr. FRENZEL. Mr. Speaker, tonight with some help from some other distinguished Members of Congress, I am going to discuss the tax reform bill on which the House will have the opportunity to vote sometime late next week. I expect to be joined in my discussion by the distinguished gentleman from Texas [Mr. ARCHER], a member of the Ways and Means Committee and perhaps some others as well.

□ 2035

It is not a very interesting thing to carry on a discussion with rows and rows of empty chairs on any subject, much less tax reform, but it is necessary that the Members of this body have on the record information about tax reform so that they will be able to cast responsible votes when the matter is before us.

My personal opinion is that much of what we read about tax reform is material which has been released by the drafters of the bill, and tends to oversell the advantages of tax reform, and to overlook what I think are monumental disadvantages.

I will concede that tax reform had a noble origin, that it had lofty goals, and that the participants who worked on the bill did their dead level best to produce a good tax reform bill.

I will further concede that the tax reform bill achieves some notable goals: A lowering of marginal tax rates for individuals and corporations; a removal of 6 million relatively low-income Americans from the tax schedules completely—that is, they will have no tax liability; and a modification or elimination of a number of tax preferences which were obsolete, unfair, undesirable, or whatever. One must admit that this bill contains some of these advantages and achieves some of its goals.

However, as we begin to discuss the bill, I think that it is important to gauge the bill against what it set out to accomplish, and it is my personal judgment that when we look the bill over, we are going to find (a) that it is antigrowth, particularly in the short run; (b) that it is antisavings and anticapital accumulation; (c) that it is antimanufacturing and antitrade; (d) that while it claims to bring more fairness, if it does, the fairness is only marginal; (e) that it brings not one whit of simplicity, but rather complicates the Tax Code; and (f) that it hurts many industries and many sectors of our society which in large measure do not know that they are going to be affected by this bill and have no idea what is going to happen to them.

I would like to talk first about the matter of negative growth, which I believe that the tax reform bill presents. The difficulty is, of course, that when the President put his first tax proposal on the table, the title of it was "fairness, simplicity, and growth." Well, whatever the original idea was, I think that it is clearly the consensus of economists that growth is not going to be what comes from this bill, particularly in the early years.

When you get beyond 5 years, the crystal balls tend to get fuzzy, and people have difficulty making predictions, but certainly in the first 2 or 3 years the predictions range anywhere from 1-percent decline in GNP, compared to what would be the case under the current Tax Code, to even higher numbers in the first 2 or 3 years. That is particularly grievous in an industrial society like our own, because 1 percent of the GNP could represent nearly a million jobs in our society, and I think that anyone in this country who wants to voluntarily give up that many jobs is not thinking in the best interests of our economy or of our Republic.

So as I look at the various economists who have cast their own horoscopes about the future of this bill, it seems to me that the overwhelming consensus is that we are going to lose ground in the first couple of years. Beyond that, a number of them, particularly those who claim to be supply-side economists, believe that the tax rate incentives, the lowered rates, are going to push us up to a greater rate of recovery. I think that that remains to be seen, and we will talk about that later in connection with discussions on savings and capital accumulation incentives that have been modified within the bill.

With respect to growth, the suggestions that there is growth in this bill in early years are restricted to a very small number of economists, and as I said earlier, the general consensus is that there will not be growth.

Moving on to the anticapital situation, or to my allegation that the bill is antisavings and anticapital accumulation, I think that it is fair to note that the major incentives that we had in the Tax Code for savings and capital accumulation were all pretty badly wounded. The investment tax credit was repealed completely—retroactively, I might add, but I will have something to say about that later in the section on fairness. We also stretched out depreciation and removed some of the savings incentive from the depreciation schedules.

Perhaps the worst blow of all in my judgment was the removal of the lower capital gains tax, one of the really good incentives in our Tax Code for capital formation.

Moving on, we had some other savings in the so-called section 415 pension program, which allows businesses to deduct moneys contributed to pension programs for their employees. Those have been not only reduced in the limitations, but in addition, the Tax Code has been strewn with new rules about how those pensions will be administered and run to such an extent that it is my considered belief that many smaller companies will withdraw from their pension systems completely, and that new-forming companies will never form pensions. Particularly I think that this is true with respect to guaranteed-benefit plans.

Mr. ARCHER. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the distinguished gentleman from Texas [Mr. ARCHER], a member of the Committee on Ways and Means.

Mr. ARCHER. I thank the gentleman for yielding, and I want to compliment him on his comments, particularly relative to the removal of incentives for savings that lie within this tax reform bill.

Mr. Speaker, in the particular area of pensions and employee benefits and thrift operations, I want to just give the gentleman a quote from Mr. Richard Raskin, who is a consulting actuary with the Wyatt Co. in New York. He says that this bill contains a strong incentive to cause companies and individuals to think about an actual reduction in the level of benefits.

Further, I would like to quote Mr. Gerald Faciani, who is the president of Faciani Co. in Cleveland, an actuarial firm that designs plans for companies all over this country and for organizations all over this country. He says as follows: "This bill will have a deleterious effect on continued plan maintenance and new plan formation in the small-plan business sector. The day will come, I think in 5 years, when small employers will have nothing but traditional profit-saving plans."

□ 2045

I thank the gentleman for yielding just so that I could insert that at this point.

Mr. FRENZEL. I thank the gentleman. I think he is dead right.

The gentleman probably has a more vivid memory than I do on this, but looking at ERISA changes and pension tax changes, I believe in the last 4 years we have had three major changes, each of which necessitates rewriting the plan at the business level. If you are a small employer and you have some 10 to 100 employees, after you have to pay those legal and actuarial fees for the third time in a row, you say, hey, wait a minute, my plan cannot stand the overhead, my employees cannot stand it, I will put it in the paycheck. That is just the phenomenon I think the gentleman was suggesting.

Mr. ARCHER. Absolutely. And it is estimated that it will cost $1 billion of administrative costs just to rewrite all of the plans in the United States. That

is a tremendous waste of effort, and those extra changes that will be placed on the people who have the plans, in many instances, will not be affordable.

I would also like to insert in the RECORD for our colleagues the fact that we have had four major changes in the last 5 years relative to pension plans under the Tax Code. We have the 1982 TEFRA changes. Actually, in 1983 we had a gain in participants in plans, but, as a result of the 1982 TEFRA changes, in 1984 we had a net reduction in the number of people in the United States who were included in plans. It went up for an increase of 1½ million people to 1984 when there was a net reduction of 250,000 people covered by pension plans. In 1985 there was a loss of 3½ million and the pension actuaries that I talked to tell me that this bill will accelerate that very, very negative trend of fewer and fewer people being covered by private pension plans.

Mr. FRENZEL. I thank the gentleman for his comments and I yield to the distinguished gentleman from Washington [Mr. CHANDLER], who chaired the tax committee in his own legislature and is an expert in the field of pension law.

Mr. CHANDLER. I thank the gentleman for yielding. The urgency is that my wife will arrive at National Airport in about 25 minutes, and I need to get over and not stand her up.

Mr. FRENZEL. We empty chairs appreciate the gentleman being here.

Mr. CHANDLER. I appreciate your raising the point of the whole retirement income issue. When you were talking about small employers, and the gentleman from Texas was talking about that, I think if you will look at the studies that have been done you will find that we are actually on a negative trend. Not only are they not adopting plans, but they are terminating. That is the growth industry in the pension industry today, terminating plans.

We have about 50 percent, I think the gentleman said, 50 percent of the people in the United States who are not covered by any pension plan, and a demographic for the future that is really against us is the dependency ratio of Social Security, those working to those already retired, which today is 3.2 to 1. By the time people of my generation, and a little bit younger—I was born in 1942—the 1945 to 1955 years, young people born in that time, by the time they retire the ratio will be 2 to 1, two people working for every one that is retired. The conflict between generations, or the potential for conflict between generations that that creates is obviously enormous, and so the need for citizens to provide for themselves something in addition to Social Security is obvious.

As you have pointed out, the tax bill not only changes the rules, the thing I think Members of Congress need to understand is it costs just as much for Fred's Cleaners to amend his plan, make the plan amendments as it does General Motors, virtually the same process, virtually the same costs.

I do not believe the gentleman mentioned IRA's. This is another area that troubles me. We are saying, all right, if you are a joint taxpayer and you and your spouse earn $40,000 a year, then we start declining the amount that you can defer income for a later time for retirement and savings. By the time I believe it is at $55,000, then you are not allowed to defer any income at all, although you can make a contribution to shelter the income that you generate from the interest.

The gentleman has mentioned the 401(k) plans. The thing I think we have to remember is we have a voluntary system in the United States where employers have a choice of whether to provide a pension plan or not, a voluntary system. If General Motors, or Boeing, or Weyerhaeuser, or Fred's Cleaners provides a pension plan, it is because they chose to do so. Nobody requires that, nor should they.

I was at a meeting one day when I said that we need to provide incentives, and someone said, yes, you need to appeal to their greed. Greed or self-interest, it basically comes down to the same thing. If there is no incentive there to do it, people will tend not to do so.

I predict that one of the biggest things lawyers are going to be doing with the passage of this bill is forming subchapter S companies for previously incorporated companies and employers are then going to take their income, all of it as ordinary income and not defer any of it, terminate whatever pension plan exists, because it is no longer in the self-interest, no longer appeal to their greed, if that is your inclination, to provide that.

So when they do not provide it for themselves, then they do not provide it for their employees, and there is the tragedy, I think, within this bill.

We need a retirement income policy for the United States. We need to look at the problem, set some objectives, and then establish a means of reaching those objectives.

I do not want any more than my friend from Minnesota or Texas to kill this bill. That is not my objective at all. I join with you on all the other concerns you have raised.

My suggestion is let us not kill tax reform, but let us not pass this bill. Then let us come back in the 100th Congress and do it right. There are still 2 years left of President Reagan's term, and that would be a fine way for him to leave office, for us to pass a tax bill in which we can take great pride, which will provide growth, which will provide the incentives for the provision of retirement income, and will simplify the code as we thought was a goal that we would achieve.

I thank the gentleman for yielding, and I must go.

Mr. FRENZEL. I thank the gentleman for his participation, and agree that he is embarking on a nobler mission at the moment.

I want to finish up the discussion on savings by suggesting that severe limitations have been imposed on 401(k) plans and 403(b) plans as well as on IRA plans. But let no one have the idea that we have imposed them with any fairness across the board. We have not touched Keough plans. It is possible to have a Keough plan and a 401 plan. It is possible to have various combinations.

The persons I think who are disadvantaged in the various combinations that are available are employees who have to make important contributions of their own to their pension plans in after-tax dollars, for they, if they are anywhere near high income people, are not going to have an IRA opportunity, but they will not have the same pension and 401(k) opportunities that other people have.

I think the one other comment I would have on the antisavings features of this bill is the one about capital gains. The reason all of these incentives have been cut back and modified is to pay for the new low rates that the tax bill promises.

The problem is that I have some serious reservations about the revenue that is going to occur by these reductions. I remember in 1969 when we raised the capital gains tax. The result was, you guessed it, the tax revenues declined because people did not want to pay that high tax. They did not take their gains and try to handle their financial affairs in another way.

In 1978 and 1981 when we lowered the capital gains rate, you guessed again what happened, we took in more money because people, at a lower rate of capital gains, were willing to take the gains that they had.

□ 2055

With this slightly higher rate and the no differential rate, not only will there be a disincentive to save, there will be an incentive to make gainers into heirlooms, that people will want to pass on death rather than convert under the new higher tax law.

Mr. Speaker, I now yield to my distinguished colleague on the Committee on Ways and Means, the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. First of all, let me congratulate the gentleman from Minnesota [Mr. FRENZEL] for having taken this special order, because I think this is one of the most serious debates that we will have this year, and perhaps for

a number of years to come in terms of its potential implications; and your stress on the capital gains rate changes is one that I do not think has been given proper consideration.

Mr. Speaker, by 1988 the maximum capital gains tax will have gone from 20 to 33 percent. In 1987 it will go to 28 percent, and that is almost a 50-percent increase in just 1986 versus 1987.

I think the other important thing to keep in mind, is in assessing this kind of a tax on capital gains, they have factored into their computations in preparing this bill a revenue increase.

Now to be sure, if I were heavily invested in the stock market, I would try and take my lower 20-percent capital gains rate between now and the end of 1986 because of the fact that come January 1, I am going to get hit at least with 28 percent, and looking ahead to 1988, 33 percent.

There has been a lot of speculation as to what is going on in the market right now. If you were a broker and you were handling my account, and I were in the maximum bracket, what would you suggest that I do, if I am heavily invested in the market?

Mr. FRENZEL. I would suggest the gentleman take some gains now at the 20-percent rate rather than paying 28 percent if he needed to sell in the future.

Mr. CRANE. What impact do you think that might have? Between now and the end of the year.

Mr. FRENZEL. Well, Mr. Speaker, of course if there are more sellers than buyers in the market, it is going to have the negative impact that I think we have seen in the market, in the last week.

Mr. CRANE. Now there have been many other rationalizations to explain that, but this point has not been stressed, and I think your point is well taken.

I would certainly want to capitalize on that lower rate; and instead of the revenue gains that are anticipated with an increase in the capital gains tax, I have seen private studies that suggest over a 5-year period, instead, there could be anywhere from a $44 to $100 billion revenue loss as a consequence of taking the maximum capital gains tax up to 33 percent.

Mr. FRENZEL. I thank the gentleman for his contribution.

Mr. ARCHER. Mr. Speaker, will the gentleman yield to me on that same subject?

Mr. FRENZEL. I yield to the gentleman from Texas.

Mr. ARCHER. Mr. Speaker, one thing that is often overlooked is that we tend to think that capital gains are items that come only to those who are rather wealthy. There have been a number of studies on this; one done by Martin Feldstein of Harvard.

These studies show that the biggest losers really are the lower and middle income people, because they are not paying the 20-percent maximum rate today; they have the opportunity to disregard 60 percent of whatever their gain is, and then pay their regular, normal tax on 40 percent of the gain.

That will be eliminated from the code. From a relative percentage standpoint, the lower and middle income people will be disadvantaged to a greater extent than those who are in the higher income brackets by this change that is proposed in the tax reform bill.

Mr. FRENZEL. The gentleman is dead right, and, of course, the typical capital gain event in the United States is the sale of a home or a farm, which does not occur only to rich people.

I yield again to PHIL CRANE, the gentleman from Illinois.

Mr. CRANE. Mr. Speaker, something that just came to mind in that regard is, for example, all of the pension funds that are invested in the market. With that increase, will that not negatively impact on pensions?

Mr. FRENZEL. It is possible, if there is a decline in general market values due to a sell-off because of capital gains rate-inspired transactions; sure. The value of their portfolios is going to decline. At least, that is the only way that I can see it.

Mr. CRANE. I thank the gentleman.

Mr. FRENZEL. Mr. Speaker, let me conclude with savings; and again the gentleman from Texas [Mr. ARCHER] may want to speak up here, because he has some special background in this area as well.

The savings rate in the United States is the lowest in the industrialized world; and that is one of the reasons why we have high rates of interest in the United States, because we do not save enough to take care of our borrowing needs. Most of the borrowing needs, of course, occasioned by the profligacy of the Congress, spending more money than we take in; and, of course, we have this enormous trade imbalance which is partly a cause and partly a result of the whole thing.

What this bill is going to do, in removing the principal savings incentives, is to cause the rate of saving to be lowered. I notice that some of the sponsors of the bill, or the proponents of the bill, are telling us that the cuts in personal rates are going to increase savings; that this is going to be a cut which is going to inspire people to work and save and invest.

Mr. Speaker, I think the gentleman from Texas [Mr. ARCHER] had some statistics on what happened in 1981 when we cut taxes and we expected people to save more.

I yield to the gentleman from Texas.

Mr. ARCHER. Mr. Speaker, I thank the gentleman for making this point; and it is a very important one.

The reduction of individual rates, which does put more money in the pocket of the average individual in this country, occurred massively in the 1981 bill, which all three of us supported.

Many of the promoters of the tax reductions at that time urged that it would increase savings dramatically. The reality was that before the bill was passed, the percent of personal savings in this country relative to income, of disposable income, was over 7 percent.

After the bill passed, it has declined in succeeding years to where today it is 5 percent or less of disposable income. So the claim that by having a 25-percent reduction in personal income tax rates would generate extra savings has just not occurred. The reality is it has not occurred.

Another interesting figure when you talk about savings and the importance of savings to having capital to create jobs, to increase our standard of living; is that 79 percent of all of our private savings in the United States are generated by businesses, not by individual savers.

The incentives that were put in the 1981 Code of course did encourage greater saving at the business level by accelerated depreciation, et cetera.

Now it seems clear to me that with the added tax on business that is represented in this bill, that we must see a significant decline in savings at the business level.

In fact, the economists that I have heard speak to this subject say that cash flow for businesses will definitely deteriorate if this bill is passed: There will be less cash flow through the businesses of this country.

One of two things, then, has to happen. Either they are not going to invest as much to modernize, to keep America competitive in the world marketplace, to create jobs, or they are going to have to borrow the money.

Since we are no longer as a nation saving enough to provide our own capital, that means we will have to depend more on foreign capital and foreign investment in the United States.

I do not think that is a direction that Americans want to go.

Mr. FRENZEL. I thank the gentleman.

Mr. Speaker, I yield to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. Mr. Speaker, this is a quote from a study done by Jerry Jasinowski, the vice president and chief economist of the National Association of Manufacturers.

On this point he said:

> Finally, while tax reform purports to achieve greater neutrality and it does so in some respects, it is not neutral on the tax treatment of income and consumption. In this respect, it moves the tax system even further away from taxation of consumption and further penalizes savings and investment.

So the distinguished gentleman from Minnesota [Mr. FRENZEL] is in good company on that point.

Mr. FRENZEL. Thank you very much.

Mr. ARCHER. Mr. Speaker, if the gentleman will yield to me again, we must admit that in this bill, we tend to see a leveling out so that in some instances capital can be allocated on a more efficient basis in the tax reform bill.

The proponents claim that, and that is accurate.

Mr. FRENZEL. I can see that.

Mr. ARCHER. However, all of the economists that testified before the Joint Economic Committee that I heard—and maybe there was one or two that did not agree—but out of 11 economists who testified in the last week, they said that the cost of capital, the increased cost of capital that this bill would generate, more than offset whatever benefit from the more efficient allocation of capital.

□ 2105

I think that is important. One of the points that they made, in fact Mr. Sommers from Harvard made the point very effectively, was that the corporate rate reduction did not offset the cost of capital because it primarily benefited old capital that was already in place. So the machinery and equipment, the manufacturing capacity that is in place will benefit from the rate reduction. But you cannot get any greater efficiency out of existing capital that is in place. You cannot get greater productivity. Relative to new investment that is required for greater productivity, the tax rate reductions do not operate as an incentive. It is more retrospective than it is prospective.

And he commented that the true cost of capital and to business was far more than the $120 billion that the proponents say they are shifting from individuals to business because that 120 is net after the rate reduction. So if you add back the fact that the rate reduction does not benefit investments in new capital but primarily benefits old capital, you have a much greater charge on capital investment for the future.

Succinctly, he said this bill would favor old capital in contrast to new capital and would make it even more difficult for new corporations to get into the arena and to compete with those who already have their capital invested.

Mr. FRENZEL. I thank the gentleman, and I yield to the distinguished gentleman from Washington, Mr. LOWRY.

Mr. LOWRY of Washington. I thank the gentleman from Minnesota for yielding.

I just turned on my TV and did not notice how much time the gentleman from Minnesota has. Does the gentleman have adequate time for me to take part?

Mr. FRENZEL. Of course we have time for you.

Mr. LOWRY of Washington. I thank the gentleman. I was over there eating my raisins and trying to catch up on some mail which I am behind on. I was delighted to see the gentleman from Minnesota, who I think is one of the best fiscal thinkers in this body, holding this special order on the tax bill. I am not going to use the term tax reform bill. I myself do not find that. I think this bill is a drastic mistake. I am very much against the passage of this bill. I am not quite sure what else has been said earlier here, but I would like to say why I am working against this bill.

Mr. FRENZEL. Why does not the gentleman tell us what is lying on his heart?

Mr. LOWRY of Washington. The first thing that I would like to mention is, I think it hurts badly on the battle of the deficit.

In every way that I have tried to find that not to be the case I have found answers by proponents of this bill to be pure malarkey.

Now, the easy way, first, to look at it is the immediate effect on the deficit of the bill itself which I want to say on the record today I think is overly optimistic. I think, in other words, it will be worse than the estimates given because the estimates used by the professionals giving the estimates are all on existing static economic statistics, and I think that will prove to be inaccurate.

But even using those estimates, in the next 2 crucial years of the battle of the deficit, in the year 1988 which we will face next year, even those overly optimistic estimates say that this bill will increase the deficit $17 billion. In the following year, $15 billion.

Now I happen to serve on the Committee on the Budget, and I have for 3 days been in the little mini-conferences about how we even find the money to meet our Gramm-Rudman-plus-10, $154 billion target right now. The only way we are going to find it is by making economically unwise selling of assets of this Government to meet just this year's relatively easy target. The way we are going to come up with the $15 billion reconciliation package that I support given the alternatives, is to sell export-import loans which I am for doing. It is a bad mistake but I will do it, given the alternative; sell other loans at a loss, at a discount, take that money and move it forward so we can hit the $154 billion this year. What that really does is it says, "Let's move those future dollars in the next 2 years out of there out to here, at the same time that this bill even under the most optimistic estimates will increase the deficit $32 billion."

So I continue to say to the proponents of this bill on my side that keep walking around with their transition rules trying to buy out votes over here saying, "If you will vote for this, here is your transition rule," and I keep saying to them, what are we going to do about this deficit in the future?

Now here come the answers. If I could only get this over to the Members of this body. Here comes their answer. They say, "Well, have you looked at the 1987 rate formula by which we transist onto 1988 in which, of course, we do not go to the 28 and the 15 that we have been telling everybody in this country we are doing, but of course in 1987 we have a rate structure that goes from 38 to 11." And so we do not have to move ahead and go to 1988. They say this to me, who they know my primary concern is the deficit, you see. I am saying answer me how we are going to raise this revenue. They say, "Well, we will freeze it at 1987." Now, think of that, listen to that, every Member in this body: Their answer we will freeze this rate, exactly the opposite of what we are telling the people in this country, at the 1987 rate.

Now, if the gentleman would allow me, I would like to talk about that rate for a minute.

For the $45,000 taxable income bracket, joint return in 1987, that rate will be 35 percent.

Well, right now today under the Tax Code at $47,000 you pay 33 percent. So these people are trying to tell me when I asked them, "How are we going to raise the revenue in the future on this drastic problem?"

Mr. FRENZEL. Plus that they added a marriage penalty to that couple.

Mr. LOWRY of Washington. Added the marriage penalty, take away the IRA because at $50,000, you know, the IRA is totally gone as a deduction, take away the sales tax deduction, take away the interest deduction on the car to be used for going to work in the $45,000 family. So how are we going to meet this deficit question? They say, "freeze that." They are trying to tell me today, when we cannot even get a $6.5 billion excise tax up on this floor to be voted for because we cannot pass that, that is how we are going to answer it.

One of two things happened in this bill, one of two things: We either drastically increase the deficit or we go totally back upon the American people and turn around and raise the rates before they even got the cut. I think that is disgusting.

Mr. FRENZEL. I thank the gentleman for his contribution.

I yield to the gentleman from Texas.

Mr. ARCHER. I have an add on to the problem of the deficits.

I share the concern of the gentleman. I think the deficits in this country that this country faces are the biggest problem that looms into the future. It will not just be the difficulty on the revenue side that the gentleman mentioned and articulated very, very well—and I would only add to that, also, that they expect $11 billion above the current law in 1987, and I believe that this Congress will embrace that to meet the Gramm-Rudman targets, but then we will lose that $11 billion and we will have another minus $17 billion in 1988, the combination of which is not just $17 billion but $28 billion for the Budget Committee to pick it up to get back to scratch before they can find the $36 billion to meet the Gramm-Rudman targets a year from now going into 1988. That is almost an insurmountable barrier, in my opinion, to moving toward a balanced budget. But even worse, I believe, the gentleman is right when he says that the revenue estimates are unreliable.

Dr. Brunner of DRI testified to the Joint Economic Committee that his econometric model showed that the revenue results in 1987 would be $21 billion less than what the estimators say this bill will produce. In 1988 they would be $25 billion below current law. The total of those two is $46 billion of extra deficit in 1988 plus the $36 billion that we will have to find to get to the Gramm-Rudman targets, or an $82 billion job of deficit closure when we come back a year from now, and that is a virtually impossible task.

But let me add another bit to that. That is only on the revenue side.

This bill by changing incentives in the code for low-income housing, for defense contractors and for a number of other areas is going to put the pressure on the Treasury to appropriate the money to make those things happen in our society. If the private sector because of no longer having tax incentives does not build low-income housing, then the majority in the Congress most certainly will have to appropriate more money to HUD to build those houses. And that on the spending side is going to exacerbate the deficit. By taking $3.5 billion out of the completed contract method of accounting, it is going to cost defense contractors to have added costs of roughly $3.5 billion which will be passed on to the Defense Department and increase the cost of procurement of military hardware and equipment.

Now, the proponents of this bill even admit to this in one small area which is the area of adoptions, because there is currently in the code a tax credit for those who adopt orphan children.

Well, they say we have got to remove that in the name of tax reform but we recognize there is a need for that money to be provided by the public. Therefore, we are going to appropriate the money out of the treasury in lieu of having the tax credits.

All of these factors are going to widen the deficit by putting greater pressure on the spending side. One of the major reasons for this is that as this tax bill went through its process basically most Members were mesmerized by the tax tables without regard to the economic impact and what that would do to budget neutrality, not just what it would do to revenue neutrality. I thank the gentleman for his contribution.

Mr. FRENZEL. I thank the gentleman and I yield to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. I thank the gentleman for yielding.

Now, on the point that was made here about when you kick into that 35-percent bracket on a joint return, for some of our successful yuppies out there they should recognize that next year they are going to be kicked into that 35-percent bracket at $27,000 if they are still single and many of them are. I made a calculation with the increase in the standard deduction provided for in this bill and with the increase in the personal exemption and factoring only those two into the determination of the amount of taxes that an individual will pay if he gets to $39,440, the dollar amount, if you made $39,440 or you make it next year, under this change—and this is not counting the loss of some of the other deductions that we have done in other potential reforms in this code—the dollar amount of taxation for that individual is $8,410.

Now, that is a rather substantial increase in taxes, that that person anticipates, over what he would be paying with the same income today. And I would repeat these figures only for the benefit of any American that may be able to go back and quickly resurrect last year's tax form.

Thirty-nine thousand, four hundred forty dollars income in 1987, you will be paying $8,410 in tax. That is, as I indicated, only by calculating in the standard deduction as a subtraction from that overall income figure and subtracting the increased personal exemption.

I thank the gentleman for raising what to me was a very significant point.

Mr. FRENZEL. I thank the gentleman for his contribution.

We have been discussing the antigrowth elements of the tax bill, the anti-capital-formation and savings element and then most recently the problems that the tax bill raises with respect to our budget deficit.

I would now like to move into my allegation that the tax bill is antimanufacturing and antiexport. I think most analysts do not deny that the burden of the repeal of ITC falls most heavily on manufacturing concerns and especially most heavily on the heartland of America, that area between Pennsylvania and Chicago, where our country's basic industries, already under siege from foreign competition, is located.

Now, everybody, I think, knew the ITC was going to go. I do not think everybody knew the ITC was going to go retroactively, however. Nor did everyone expect it to go all at once. There was much to be said, I think, for the idea of some kind of graceful phasing out of the ITC while America's manufacturing firms, particularly smaller ones, learned how to cope with the problem.

□ 2120

Of course, I have already discussed the stretchout of depreciation, which also adds costs in these areas.

The problem, of course, is that with the transfer of the new costs, the new costs, from individuals to corporations in the ways that I have just indicated, the products of American manufacturing are going to be increased in price. This means that compared to their foreign competitors, America's prices will go up, this, of course, at a time when we are putting consumption stimulus into the code, if indeed, as the gentleman from Washington suggests we may not do, we lower the tax rates. If that happens, the consumption stimulus will be largely devoted to the purchase of foreign goods while the higher-priced American goods are likely to languish.

So much for manufacturing. Let me talk a little bit about export business now.

In the current Tax Code, we have four primary incentives that benefit American efforts offshore. The first is foreign tax credit, the second is tax deferral, the third the foreign sales corporation and, finally, section 911, the exclusion of income earned abroad by Americans who are put there to sell American products usually.

None of these were repealed, but all of them have been modified in such a way as to reduce incentives for American firms to be active abroad, this at a time when American exports are under heavy fire in foreign markets and at a time when we are not sure that we can maintain our market share, much less increase it. Of all the times in the world we would choose to reduce export incentives, strange that it would come at a time when America has a $150 billion trade deficit; that was last year's number, this year it will be in the neighborhood of $170 billion or perhaps slightly higher.

So the prejudicing of manufacturing exacerbated by the discrimination against export orientation is part of the growth problem, which I referred to earlier and suggested that we had

at least a 1-percent negative influence on growth in the first 2 or 3 years.

I would like to talk a little bit about fairness now, and one of the reasons is I see the gentleman from Washington here, and I note that one of the descriptions of the bill in addition to growth and simplicity was fairness.

Now there are some good things in the bill. One that I indicated earlier was the elimination of 6 million people from individual tax liability who should not have had any in the first place.

Nevertheless, if one looks at the bill from top to bottom, it is very difficult to conclude that the bill is more fair than the current tax law and, if indeed it is, it is only marginally more fair.

The first item I would like to discuss is the deduction of State sales taxes, which is not preserved, against the deductions of property taxes, which are largely preserved, and State income taxes, which are wholly preserved. My State relies heavily on income taxes. My deductions for paying State income taxes are going to be preserved. Yet my State spends its income taxes on the same thing that Mr. ARCHER's State spends its sales taxes and Mr. LOWRY of Washington's State spends its sales taxes.

What makes my State's taxes more sacred than theirs? What it does is simply a decision of the committee that this was the money they needed, and so they fed State sales taxes into the mull of tax reform. But in my humble judgment, it certainly may have been necessary to support a lower rate. It certainly does not do anything for the bill's image of fairness.

We have already talked about the problem of relatively affluent people paying a higher marginal rate because of the phaseout of the 15-percent rate and the phaseout of the individual exemption, than people who earn $1 million a year. I am not sure that anybody in the Congress would have suggested that was a desirable result of tax reform, but it happened.

The gentleman from Texas was suggesting to me earlier, what happens to you if you are elderly and blind? If both of those situations apply—well, I think I will let the gentleman from Texas talk to that.

Mr. ARCHER. I just wanted to simply say that the result of the tax rate schedule which, for all practical purposes, provides that if you make over $200,000 a year in taxable income, you pay 28 percent marginal rate. But if you are a single individual and you make over $43,000, your excess income is taxed at a 33-percent marginal rate.

This is the first time that I know of in the history of this country where the people who earn more income pay a smaller marginal rate on their top income. This is called the bubble in terms of the vernacular that is being used by the committee. It is clearly unfair. It is clearly inequitable. And I do not think any Americans would believe that it meets the test of fairness.

But getting back to the people who perhaps have some of the greatest need in this country, the elderly blind, today the elderly blind individual gets a triple exemption, three times the regular personal exemption, which is roughly going to be about $1,000 next year. So they would get under the current law a personal exemption of roughly $3,300. But under the new tax reform bill, they only get a personal exemption of $1,900. So there is a dramatic difference in treatment.

Admittedly, if you have a standard deduction and you do not itemize, then there is a provision for an increase in the standard deduction which tends to offset that. But if you are an itemizer, you have to bear the difference, the negative difference, between $1,900 and $3,300 in 1987.

But add to that a couple of other items and see how the blind elderly are impacted.

If they have high medical expenses, which is not at all uncharacteristic, then the deductibility of their medical expenses is impacted negatively to the extent of 2½ percent of their adjusted gross income, and they lose the deduction of a significant part of their medical expenses.

Then add to that if they are a renter, all of the econometric projections I have seen for this bill are that rents will increase.

I talked to an individual today who owns rent property for moderate-income people, and he said already as a result of this bill he is going to have to anticipate the increasing of his rentals by somewhere around 15 or 20 percent.

So this elderly person that may be in a renting mode is going to be hit in a number of different ways that are going to be adverse compared to the current law.

Mr. FRENZEL. I yield to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. I thank the gentleman for yielding.

Our colleague from Texas, I think, has raised a very significant point on the impact on rental costs.

Martin Feldstein, the noted economist, pointed out that the new tax bill approximately has the depreciation allowances in the first year.

To see how this would impact on rental property, he noted there will probably be somewhere in the neighborhood of at least a 10- to 15-percent increase in rental costs because of the treatment of depreciation.

Now a couple of questions come to mind. Who are renters? The elderly that have sold off their home and tried to move into smaller dwellings and husband their resources on reduced income?

The other typical renters tend to be those people at the beginning of their economic career who are not yet affluent and not yet in a position to be able to own a home. These people are going to get hit not only with that increase, but there is another unfairness in the distinction made between the homeowner who can borrow on the value of his home based upon what he initially paid for it and deduct that consumer credit, but the renter, of course, is not in that enviable position. As a result, we are discriminating once more against middle- and lower- middle-income people.

Martin Feldstein gave an example of the typical taxpayer, married with a median income of about $25,000 a year. Under the new bill, this taxpayer is expected to save about $20 per month in taxes. Such a typical taxpayer who rents pays about $500 per month in rent. If rents rise by about 10 to 15 percent, as they probably will with the new depreciation rules, our typical taxpayer will find that the increase in rents will swamp the meager reduction in taxes.

□ 2130

I think that once more, while there has been talk about trying to address the concerns and interests and justifiable apprehensions of middle- and lower-income people that here is one more flagrant example of how the very people that in theory we were going to try and help end up getting clobbered.

Mr. FRENZEL. The gentleman is, of course, correct and Dr. Feldstein who was formerly chairman of the Council of Economic Advisors to the President did indicate that the typical case that he looked at was for someone who got a $10-a-month tax cut and a $40-a-month rental increase. That can hardly be described as justice.

I yield to the gentleman from Texas [Mr. ARCHER].

Mr. ARCHER. I was just going to add that I think it is important for us to recognize that although on average individuals within all of the various income brackets are alleged to receive a tax reduction, for those who are what we might call lower and middle income, the extent of that would be somewhere between $2 or $4 or $5 a week maximum.

What that does not tell you is that within each income tax bracket there are going to be, according to the estimators now, and I am talking about the estimators that the proponents of this legislation rely on, 25 percent of the middle-income people are going to have tax increases. They are not talking about that a lot, but it is in here, and when those individuals who get the tax increases fill out their tax returns, they are going to be very surprised.

We have already talked about some of the types of people who will get the increases. The elderly, blind itemizer will get a tax increase under this bill. Are those really the kind of people that in the name of fairness and equity that we want to increase taxes on? Particularly if they have extensive medical expenses, it becomes even more exasperating.

I think that this is an area of fairness that the Congress should address.

Mr. FRENZEL. I thank the gentleman.

I yield to the gentleman from Washington [Mr. LOWRY].

Mr. LOWRY of Washington. I thank the gentleman for yielding.

Mr. Speaker, as my friend from Illinois was talking, I wanted to hold a newspaper advertisement that I took out of the Washington Post yesterday on the question of fairness between renters and homeowners. This newspaper advertisement by one of the financial institutions says: "Don't worry about losing your interest deduction on car loans and things like that because all you have to do is go get a second mortgage on your first or second residence."

That renter, of course, cannot do that. On top of that, that renter that we are talking about on the younger end of the age scale, especially the person that has to finance a car by which to drive to work. I would like to have the people in this body that are so interested with that middle income person trying to work themselves up, to tell them to drive their second home to work, because under this tax bill that is the only thing they could write off.

On top of driving rents up, that person who is the one who cannot pay for a car outright, who cannot go get second mortgage on their first or second home by which to still be able to deduct the interest has now lost the interest on buying the car let alone the other things they have to do. Extreme inequity.

Mr. FRENZEL. I yield to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. My wife and I were Depression babies and the only thing we ever bought on time was a home. The operating rule was if you could not afford to lay cash down for it, you did not buy it. We did without a lot. A lot of sacrifices during our early years of marriage especially.

The fact of the matter is there have been significant changes. Now this gets personal with me because I have a daughter, working daughter, very hard, very conscientious worker, who bought a new car. I am driving a 10-year-old vehicle and I have got a young daughter in her twenties driving a new car. But she anticipated that she would have the deduction for the interest payment on the car which, of necessity, she must buy over time.

Under the provisions of this bill, my working daughter, whose income does not begin to approximate mine, my working daughter is going to lose that interest deduction. There have to be any number of working Americans, again, the people who tend to buy on time, especially in the post World War II era, are young marrieds. They cannot afford to go out and lay the cash down for the refrigerator or the stove or the automobile. They are people who are buying on time and apartment dwellers.

GENERAL LEAVE

Mr. FRENZEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

THE TAX REFORM BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. ARCHER] is recognized for 60 minutes.

Mr. ARCHER. Mr. Speaker, before I begin, I wish to yield to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding to me.

Mr. Speaker, I wanted to pick up on the point that Mr. CRANE ended the last hour of discussion on. It comes under the general heading of retroactivity. I wanted to just pick out a few things for discussion before the gentleman begins his discussion.

The first one, of course, refers to retirement of public employees where retirees suddenly found, retroactively, that their contributions to the pension program, their own pension program, which are after-tax contributions, are going to be subject to taxes. The rule has been changed. People who made life-long plans for retirement are finding out that the money they saved for their retirement is not there because of a retroactive change.

Now, that is just purely mean spirited. That is money grubbing. We did not have to do that. Whenever we change people's plans, we usually let those who are close to retirement go out under the old system, have a transition class below that, and then make the new rules apply later to those who have time to plan for them.

We did not do it. Mr. CRANE has talked about retroactivity on a purchase for which interest used to be deductable. I find that a number of my constituents have sold their homes and houses and they have taken a down payment on those homes and paid with the 60-percent deduction we now get under the capital gains rate.

As soon as January 1 is crossed, under this tax bill, all of those sales, whatever is left on them, are going to be taxed at a higher rate even though the sale was consummated, the contract was completed last year, year before or many years into the past.

I have already talked about ITC retroactivity back to the first of this year which to me is unfair. It is unfair to cancel preferences before you cut rates. That retroactivity is unjustified. I would like to suggest that there is a final issue of retroactivity. There are more than the ones I have cited, they are important, and that is the person who has engaged in investment for so-called passive income and has taken deductions. The typical case is a limited partnership on some kind of a real estate investment, again, typically low-income housing.

For this individual, the deductions which had been anticipated under that investment are not going to be available or are going to be reduced and phased out. The net result of this problem is going to be that people who do not have the money will have to pony up additional funds in the future and they will undoubtedly have to borrow them. Their borrowings will not be deductible; the interest on their borrowings. What, of course, will happen is that is one of the things that will cause the net reduction in rental housing stocks and cause increases in prices of housing at the same time we are, I think, unfairly treating these people.

I think retroactivity is a word that we have only begun to hear with respect to this tax bill and the Members of this House are going to be talking about it with respect to literally dozens of features within the tax bill.

Mr. ARCHER. Will the gentleman agree that the retroactivity in this bill is the equivalent of the government breaking its word to all Americans, and would the gentleman further agree that keeping one's word is one of the hallmarks on which this country was founded and that we teach our children as they grow up? Are we now setting a bad precedent, a bad example for this government to have this retroactivity and break its word to the people of this country?

□ 2140

Mr. FRENZEL. I think that is true. No American has an ironclad guarantee that the tax law will not ever change, but every time, at least since I have been on the Committee on Ways and Means, that we have changed the tax laws, we have given people a little warning. We have let them rearrange their business, phase in or out certain kinds of arrangements that they had, and this is the first time that I can remember we have dropped the anvil right on their heads in contravention

of what I think has almost the sacredness of a contract.

Mr. CRANE. Will the gentleman yield on that?

Mr. FRENZEL. I am happy to yield to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. I could not agree with the gentleman from Texas more. I think this is the most unconscionable aspect of what we are considering doing.

The people who made the investments in the case of the passive loan loss provisions, or passive loss provisions, these people may have been taking advantage, and many said they were, of a loophole in the Tax Code. But who put the loophole in the Code and why did they do it? The Congress of the United States put this so-called loophole in the Code to achieve a social objective, namely, to promote the construction of apartments and office buildings and the like.

I think there is a good case that can be made that it should not have been in there. But on the other hand, to those people who entered into solemn contractual commitments that go over quite a number of years and who now, because of the retroactive application of the change in the Code may be facing the prospect of substantial losses over the years on into the future, are very apt to just walk away from those investments.

This leads to another dimension of some of the economic consequences of what we are contemplating that could be profound.

If they walk away from those investments, who is left holding the bag: the financial institutions, the same financial institutional that are losing, if they are over $500 million, their bad-debt reserve deduction, with the exception of the 20 that Mr. Volcker rushed to rescue by giving them an exemption because they are in oil States and he was contemplating the prospect of 20 fairly sizable banks going belly-up because of the loss of that deduction and apparently some of our colleagues conceded that so they said, yes, we will make the exemption here.

Mr. ARCHER. If the gentleman will yield on that, I cannot see where that is going to be very helpful anyway because these banks are already in a loss position. They might be very well better off to recapture their loan loss reserves when they do not have to pay any tax on them while they are in a loss position. They are already in such bad shape that the so-called troubled bank provision that is supposed to help the troubled banks and applies only to those that have 75 percent nonperforming loans already is not the answer.

Preventive maintenance is the answer. I agree with the gentleman and I would like for him to continue.

Mr. CRANE. The concern I have is that bank-bashing can be a favorite pastime of a lot of people. I know that we have all probably at one time or another engaged in that, sometimes deservedly, as far as the banks are concerned.

On the other hand, we had the 100th bank go belly-up this year on Monday of this week. They are projecting more bank failures this year than last year, and last year set a record since the Great Depression, the bank failures of the Great Depression.

It just seems to me that, given this current climate, this is a very fragile industry and the potential repercussions of a significant failure of any number of these institutions boggles the mind in terms of what it could do psychologically to an already unnerved public, rather, thinking back to what happened in Ohio with the savings and loans institutions that were not covered under FSLIC.

The Federal Deposit Insurance Corporation has raised the number of banks on its troubled list this year, since January, from 1,150 to over 1,400 banks. Every major bank in this country is on that troubled list. It is equally important, I think, for Members to keep in mind that FDIC does not have the reserves to cover more than one Continental Bank of Chicago failure.

It is a very delicate situation and, once more, it is one where I think in the rush to achieve so-called tax reform, we were not circumspect where we should have proceeded with the utmost kind of caution and if we were going to change these kinds of ground rules, at least absolutely guarantee that we would honor all existing contracts and any of these changes, looking down the road, would be prospective.

You can say, come January 1, 1987, these deals are off; you cannot get into these kinds of investments. Come January 1, 1987, maybe you will want to change the rules with regard to the large banks, but we could be creating the foundation of something more horrifying than anybody in this Chamber or any of the American people realize.

That, to me, is another one of the profound areas of concern in this bill and I thank the gentleman for yielding.

Mr. ARCHER. The gentleman has made some excellent points, and to continue with the concept of fairness that the gentleman from Minnesota [Mr. FRENZEL] has introduced into this discussion, to talk about some of the things that are unfair, to my knowledge, for the first time in the history of our Tax Code, we will be seeing the taxing of true economic losses recognized as economic losses, but completely again, captivated by the concept that irrespective of what your situation is, you have got to pay taxes.

A corporation that loses money in one year and makes exactly the same amount of money in the next year should be awash. The Government should not take from what is a neutral profit situation, but under this bill, for the first time, the economic losses of the first year will be taxed; at least 10 percent of them will be taxed.

There is a provision for double taxation of foreign earnings. The gentleman from Minnesota has spent a great deal of his time in attempting to find ways to make this country more competitive in the world marketplace and to open up trade opportunities so that we could export and create jobs.

Our corporations that have to be out there on the firing line and compete against foreign corporations, that pay no tax whatsoever on their foreign-source income, are now put at a greater disadvantage because a part of their earnings overseas will be double taxed for the first time under the minimum tax and they will not get credit for their foreign tax credits in full.

So when they pay tax to the Government overseas in which they operate, they will have to pay a tax again on the same income back in the United States. It will be a very, very large deterrent against our capability to compete with our foreign competitors, which is the name of the game in the world today.

There is an area that I think needs to be understood.

What is going to be the impact on the cost of local government? Our local governments issue bonds which in the past have produced interest which is tax exempt, and as a result, they get a lower interest rate. It reduces the cost of each of us as individual citizens when a new school building has to be built or a new city hall or any other type of construction that is part of our local municipality.

This bill, for the first time, provides the taxation, at least in part, of the interest on what are called tax-exempt bonds, and it does it in a number of ways. Financial institutions today held 50 percent of the municipal bonds that have been issued. This bill is going to tend to drive banks out of buying municipal bonds. There will be a smaller market for our cities and our school districts to market their bonds and the interest rates will go up.

We as individual taxpayers will wonder why our mayor is saying, I am sorry, but we have got to increase your property taxes, or we have got to increase your local sales tax or increase your local income taxes, as the case may be. But it will be to some extent because the cost of construction of projects for that local governmental unit will go up because the interest on the bonds that they have to issue will go up.

This is an unintended result, but necessarily a real result of this tax reform bill.

For colleges and universities and philanthropic organizations that depend upon large comtributions of appreciated property, this bill, for the first time, will make those contributions subject to the minimum tax, and will be a deterrent for people to give property badly needed by our colleges and universities that are having a very difficult time today.

□ 2150

The result of that will be, of course, less money flowing into the colleges and universities and many other philanthropic organizations, charitable organizations. It will mean they will not be able to do their job as well. It will mean pressure for increased tuition to students in private colleges.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I am happy to yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, I would like to comment on that. The Head of the American Council on Education called this bill the greatest catastrophe for higher education in 25 years. One of the reasons he did so was because of the fact the gentleman mentioned, that is, if one gives a farm or a business or shares of stock to a charity, most likely an educational institution, the amount of appreciated value of that asset immediately goes into the minimum tax and is charged against the contributor. The contributor probably does not contribute, lacking the incentive of the tax deduction.

The universities of the United States computed that they were more likely to lose in the next couple years about $800 million of contributions to their enterprises, which I think if not the most important, is one of the most important functions of our society. It would have cost the taxpayers or the Treasury $300 million in reduced taxes, but it does seem to me that that was money well spent. It was seed money drawing in other private money.

I would like to go forward a little bit. I am not going to talk about the fact that we knocked out the charitable deduction for nonitemizers. We let rich people take charitable deductions. We do not let poor people, because we are talking about education, but I would like to talk about the scholarships that schools and universities give to their incipient professor candidates for additional degrees who will now be paying taxes on part of the stipend that they receive, previously not being able to do it.

I would also like to comment on the inability of the universities to float bonds because of the limitations imposed in this bill.

Yes, the 501-3(c)'s are allowed to issue bonds, but with the limits imposed State by State and by educational institutions, they are not going to be able to do it.

You put all those things together and not only have you killed—not killed, but maimed the American tradition for charitable contributions, you have given higher education a blow from which it will take years to recover.

I thank the gentleman.

Mr. ARCHER. Mr. Speaker, does the gentleman agree also that it will make it even more difficult for private higher education to compete with public higher education?

Mr. FRENZEL. Well, I do, in many ways. The privates have competed mainly by getting gifts from generous alumni or admirers who have made the same kind of contribution that the taxpayers make to the land grant colleges. They have been able to keep up. They have also been able to issue dormitory bonds, for instance, to keep up with the growth of their school, which I think will now be much more difficult for them.

I believe the privates are taking a kick in the head, but so are the land grant colleges and the public institutions through some of these other devices.

Mr. ARCHER. Would the gentleman like to comment on the impact of this new tax revision bill on the ability of students to deduct the interest on the loans that they use to go to college?

Mr. FRENZEL. Yes. I did not mention two other big problems. One even comes before they deduct, and that is getting the student loan. Most States issue student loan bonds. Those are also reduced by the limitations in this bill so that my State, for instance, will not be able to issue the student loan bonds it wants to issue.

Now, if the student does as the gentleman suggests, borrows money for higher education, or the family does, the interest on that kind of borrowing, which again I give about a No. 1 priority to in our society for that kind of borrowing, the interest is not deductible. In my judgment, that is a serious mistake. If we believe in America and we believe in the ability of people to improve themselves, to go out and work for their education, borrow money to get it and then we kick them in the head by giving them no deductibility, we have made a serious policy error.

Mr. ARCHER. Mr. Speaker, I thank the gentleman for that input.

I would add also that as I understand the bill, and interestingly enough, we have not seen a copy of it even now as we speak, it is not in writing. We understand it will be 1,500 to 2,000 pages of additional legislative code to add to the 13,000 pages that are currently on the books; but if I understand correctly what is intended by the proponents of the bill, it will provide that scholarships will be partially taxed to all students, so that if a student gets a scholarship beyond tuition, a scholarship that includes room and board, the value of the room and board will for the first time be taxed.

Does the gentleman understand that to be the case?

Mr. FRENZEL. That is imputed income to the student and he or she has the great privilege of paying taxes for that amount.

Mr. LOWRY of Washington. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I yield to the gentleman from Washington [Mr. LOWRY].

Mr. LOWRY of Washington. Mr. Speaker, I thank the gentleman for yielding and I thank the gentleman from Texas for his insight and leadership on this issue.

I should mention education. I rise to address that and what the extreme inequity in this bill will do to education in my State of Washington and will also be true of education in other States.

When we found out after two gentlemen sat down by themselves after we had recessed for the Labor Day break and found out they had totally eliminated the deductibility from the Federal income tax of sales tax, that brought a terrible inequity and terrible pressure upon the services to be delivered in many States in this Union and I would like to address that in the State of Washington.

In the State of Washington, 60 percent of our State revenue comes from the sales tax. This is because we have a constitutional prohibition against an income tax. The elected officials in the State of Washington have tried twice in the last 15 years to amend the Constitution so as to move away from that heavy reliance upon the sales tax. We have never come within a 3-to-1 vote of being able to do that; the point being that in our State the sales tax is going to continue to be somewhere in the area of 60 percent of all the revenue to pay for services in the State of Washington and of those services, of course, education is the highest amount that any State and our State appropriates. It is again about 60 percent, both on the higher education level and on the common school level.

So now when two gentlemen sat down and took that position, they have just plain put a tremendous additional pressure upon the State of Washington's education system because they have decreased the cost of that sales tax because the taxpayers in the State of Washington can no longer deduct it.

Now, the position of the House of Representatives when it left here was 100-percent deductible of all State and local taxes, as all three gentlemen on

this floor well know. The position of the Senate was 60-percent deductible.

Two men sat down and knocked that out totally, came back and got a unanimous-consent request that most of us did not know about to waive points of order about the fact that was totally out of the scope of the conference, so that we could not even go to the Rules Committee to bring it up.

So now the children in the State of Washington because of that process are going to have their education cut because the deductibility of the sales tax is being taken away and thereby the cost of the sales tax is going to be greater, and as we face those same problems that all States around the Nation do, that is going to mean lower services for education.

Now, that is the height of unfairness. It is unfair in discriminating between the taxes and in the process was extremely unfair. That is why I stood on the floor of the house the other night and objected to the request of the chairman of the Ways and Means Committee to be able to waive the rules and file the report, because they wanted to shove the bill through sooner. By being able to file the report, that meant the bill could have been up today.

I find it very interesting that since they filed the report last Monday, we still cannot find out what is in the report until next Monday.

Now, last week there was a great hurry to be able to get unanimous consent to change the rules to file the report for the tax bill to be up today, but we cannot even find out what is in that tax bill until next Monday.

Do you know why? Because they do not want anybody to see what is in that tax bill. We are going to get it next Monday night when this thing is scheduled for Thursday.

There is no fairness in this bill. The process of bringing this bill to the floor has been extremely unfair.

Mr. CRANE. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I am happy to yield to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. My understanding is that they will make the midnight deadline tonight for filing the bill.

I think the problem really was one of drafting the language. The perversity of the action taken by the conference was that when that vote was taken on whether to report the legislation out, there was no document. It is important, I think, for Americans to realize that it has been almost a month since that action taken by the conference reporting favorably on this legislation without any written document before it and we still not have seen a written document, that there were, as I understand it, an estimated $7 billion worth of transition rules divided evenly between the House and the Senate. The Senator from Oregon was able to try to accommodate some of his colleagues and our distinguished chairman of the Ways and Means Committee was able to accommodate some of his colleagues here.

I think we should all very carefully examine when we have a written document before us and very carefully examine some of the things that went in that were never under discussion, that never came up in any of the debates in the conference, because the potential for skilled craftsmen to put ingenious little remedies for this individual or that who happened to get his foot in the door and get his special dispensation is awesome to contemplate, and that is what we should all make sure we understand before we are asked to render a final judgment on the finished product.

Mr. ARCHER. The gentleman is absolutely correct. It is going to be extremely difficult for us to be able to understand what is in this massive document if we receive it only 24 to 48 hours before we are asked to vote on it.

It is the most complex revision of the Code that we have ever had. It is going to be extremely difficult to evaluate.

There are some who say, oh, we have discussed all these things a thousand times and we do not need to look at it anymore. I do not say that is the way we should go into this type of a process.

Mr. LOWRY of Washington. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I am happy to yield to the gentleman from Washington.

Mr. LOWRY of Washington. I think all three of these gentleman, frankly, are more gentlemanly than I am.

I think it even goes a little bit further than somebody being able to get their foot in the door. I have observed the process with transition rules going on as a way by which those who are trying to sell the bill get the number of votes necessary to get it and that is specifically what has been going on for over a week.

Policy aside, policy and unfairness aside, policy and the economy and the deficit aside, what is going on with the transition rules is that they are being used to get people who have problems with this bill to decide to vote for it.

Mr. ARCHER. Well, this is an area where I hope we have enough time to evaluate the fairness or unfairness in an important part of the bill, because it is patently unfair to give one city a retroactive tax exemption on its bond issue if the same type of bond issue that is being issued by another city is not given the very same treatment.

We have already seen some vestiges of this where a stadium in one city, a football stadium, was given special tax treatment, but another one being planned in another city was not given the same tax treatment. That is wrong. It is not the American system.

I suspect that when we see these transition rules where one company operating in a certain way is given special tax treatment, but another company operating in exactly the same way is not accorded the same treatment, that it will certainly not smack a fairness, not at least according to the way this gentleman looks at things.

Mr. CRANE. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I am happy to yield to the gentleman from Illinois.

Mr. CRANE. I could not agree more. This gets very, very close to home.

The New Republic had an interesting article, which I will not get into, dealing with the complex ways in which these dispensations get put into the Code. Some deep point into our 1,400-page House document, like page 645, there was a reference to a deviation from contraction of these tax-exempt bonds for those communities that met the criteria of another; 139 pages back in the bill, and you turn there and you have got yet more criteria as to what communities would be eligible, but they had to meet the criteria then of another provision of the bill 200 pages forward and you jump up there and there is some esoteric reference to some date certain of some act having taken place.

□ 2205

When you go through that whole Sherlock Holmes process, as it turns out, there is only one community that qualifies.

I could not agree more with the gentleman about this favoritism to those who happen to get there first, and whatever tradeoffs were necessary, and I know that that is a part of the political process, but again, talk about unfairness. This was not generic treatment for all businesses that qualify in this category or that, which would be the fair approach. It is just those that got there "fustest with the mostest."

I would like to make one other observation too. My understanding is—and I made reference to this during the debate on the House version of so-called tax reform last December—one paragraph of the 1984 Tax Code I have been told has already produced 126 pages of interpretation. I noted at that time that this immense Chamber will not be able to accommodate the volumes of interpretations that will be made over the next 25 years of this bill if, perish the thought, it becomes law. That is something else that I think that every one of us should be concerned about, because, as the gentleman in the well noted earlier, our colleagues are going to have a very limited number of hours. There is theoretically the possibility, if indeed the conference report itself is 1,000

pages, which is almost the size of our tax bill that came out of the House, if it is 1,000 pages, there is a good chance that this may be a 4,000-page legal document, and who is going to understand that, and who in fact is going to stay up 24 hours a day for 2 or 3 days running to try and make his way painstakingly through that.

In fact, the process of writing that document was not done by the Members of Congress, it was done by staff. I am sure the Joint Committee on Taxation, probably some input from Treasury. Those are the people who then end up interpreting their bill. That is something that all Americans should be concerned about, too.

Mr. ARCHER. One thing that is certainly clear about this bill is its complexity, and the uncertainties that it creates, which are not subject to anticipation or prognosis. In the area of complexity it is absolutely a positive result that there will be plenty of business for tax accountants and for tax lawyers, and I would say that for those who are in that profession, they can view this as a very positive document for their profession, because the clientele throughout America is going to need more help in figuring out how to handle the new tax changes than they have needed before.

One of our colleagues on the Committee on Ways and Means, ANDY JACOBS, said that even though the tax form itself may not appear to be much more complicated—and I am not sure that that is true, but let us assume that that is true—the computations that one must make to get to the point of determining whether they have to fill in a return or how they are going to fill it in are such that by the time they get there, it is Miller time. I think that there is a lot of truth in that. Taxpayers are going to have to face this.

Corporations are for the first time going to have to keep three sets of books. Individuals are going to have to go through computations as to whether they do or do not fall within the minimum tax even if they do not fall within the minimum tax, and this is going to be extremely complex. The regulations are going to be literally massive coming out of the IRS. I worry about these things.

I would like to also add that there are a couple of parts of the bill that we have not talked about that I think are negatives in their costs that have to be taken into consideration.

One is that the property and casualty insurance companies will be taxed an additional $6 to $8 billion. Most of these companies are having a great deal of difficulty making a profit today, and insurance premiums are going up enormously—so much so that tort reform is becoming an extremely important issue to the Congress, and should be an important issue to the Congress.

It is not just that premiums are going up. In many instances the insurance is not available at all. At this very inappropriate time this tax reform bill will tax the insurance companies an additional $6 to $8 billion, and that must be passed on in higher premium costs or unavailability of insurance to those who desperately need it.

In addition, other provisions of the bill make it even more difficult for the hard-hit professional people, the doctors and others, to get coverage. That is going to be the result. Maybe we want to tax these offshore companies, and the reform bill says yes, we should add a significant additional bit of tax on the offshore insurance companies. But in doing so the result is going to be less availability of insurance to people who desperately need it in this country.

These are the types of things that I think that the public needs to know when they face difficulties in the marketplace.

Mr. CRANE. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I yield to the gentleman from Illinois.

Mr. CRANE. I thank the gentleman for yielding.

Mr. Speaker, the gentleman from Texas [Mr. ARCHER] certainly understands better than most of us the horrible condition of the gas and oil industry in America today. I think that it is safe to describe it as in a state of depression. We have gone, as I understand it, from 4,500 producing wells in the summer of 1981 to 653 in July.

Mr. ARCHER. Drilling rigs.

Mr. CRANE. We choose this time to come in with anywhere from a $4 to $10 billion increased tax burden on that already depressed industry. The timing is very bad.

The same is true with agriculture. I received a letter just today from the Illinois Farm Bureau, and they said tax reform has not been accomplished.

The tax reform conference report does not appear to have accomplished fairness, growth, and simplicity. The conference report has complicated tax reform far beyond the word "simplicity." Results are very uncertain, and we may be buying a pig in a poke. It was our hope to see across-the-board tax reform. This will not be the case. Farmers will be faced with the loss of capital gains, income averaging, and investment credit tax provisions. These changes are coming at a time when farmers can ill afford the loss. American agriculture will be forced into even more of a dilemma. H.R. 3838 does not provide the right answers for tax reform.

Agriculture—I come from a State that is a major agricultural State, and I can attest to the fact that even with a great crop yield this summer, we know that the overall effect of that will be further to depress the price of their product, and we certainly are familiar with the plight of the farmers down in the Southeast, and we choose this time to come in and beat up on the farmers.

In addition I mentioned the plight of the banks with the treatment of the passive losses. There is the potential for a negative impact on building and construction trades.

The other point that I would make is that every econometric study that I have seen—now that is Chase Econometrics, Wharton Econometrics, Evans, Meyer & Associates for the chamber, Data Resources, Inc.—every one of those analyzing the House and Senate versions reached the same conclusions on four points: First, the cost of capital will increase quite dramatically.

Second, it will have a depressing effect on the growth of GNP.

Third, it will aggravate unemployment.

And the final point is, it will aggravate the budget deficit.

Now these indeed may be the astrologists of the 20th century, but I would argue that they still would not be in business if they did not have some kind of reliability in making these prognostications into the future. They certainly have the capability of factoring more considerations into their studies than I can factor into my head. When they reach the same conclusions, even though maybe some of their percentages are at variance with one another, that should be cause for pause on the part of this Congress before it contemplates precipitous action that could produce those horrible consequences.

Mr. ARCHER. I thank the gentleman for his perceptive comments.

All of these potential negatives come at a time when we might reasonably expect that we are nearing the end of the upside of a normal business cycle in any event. The economy is fragile today, and to me it is not worth taking these sorts of risks as were outlined by the various economists that the gentleman mentioned.

□ 2215

I think it is a very dangerous thing. When you are talking about agriculture, an unseen potential cost in this bill is that banks, since they no longer can deduct reserves in advance for tax purposes, and can only deduct when they charge the loans off, and when they foreclose, will be more inclined to foreclose earlier on troubled farmers so that they can get the benefit of the tax deduction. I think that pushes things in the wrong way.

There is so much more really that we have not covered, and we have gone now for almost 2 hours. I would like to reiterate some of the negatives in simple synopsis form before I close on my special order.

One of them has already been very well articulated by the gentleman from Minnesota [Mr. FRENZEL] when he said this is a big negative on our ability to compete internationally. America is no longer an island unto itself. We interrelate with all of the rest of the world, both socially and economically. It is extremely important that we increase our capacity to compete.

The strange thing about this bill is that the businesses in America that are hit the hardest by foreign competition and foreign imports are the ones that are the most adversely affected by this tax reform bill.

The bill has a potential negative impact on private savings, private pensions, IRA's, capital investment, job creation, productivity, economic growth, domestic energy production, nondeductibility of sales taxes, real estate values, trade deficits, competition with imports, tax penalties on the elderly and blind, increased rents, and the marriage penalty, among many, many others.

I say it is time to pause and to think and to go back to the drawing boards. I continue to be a proponent of broad based tax reform, reform that truly is fair, that can induce growth, that can create simplicity. The American people want the Code to be simpler. They do not want it to be made more complex. They do not want the judicial system to be clogged by further cases of litigation. They do not want to have to go out and spend more in the private sector to get their returns done and find ways to understand and cope with the complexities of this new law.

One thing is certain. The flaws in this bill, although it is historic, it is primarily historic in scope, and the flaws in this bill will most certainly generate the need for a tax repair bill in the next Congress.

Mr. CRANE. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I am happy to yield to the gentleman from Illinois.

Mr. CRANE. Mr. Speaker, I think the gentleman has done an outstanding job of summarizing what are the deficiencies. One of the concerns I had from the very outset of this whole debate on tax reform was putting too heavy a burden on the Congress of the United States within too short a timeframe to be able adequately to deal with the complex problems in achieving the desired goals of simplicity, fairness, and growth that the gentleman from Texas embraces, as does my colleague from Minnesota and our colleague from Washington.

When we get here and criticize the product that has been produced, it is important for everyone to know that that is no deviation from the desired objectives. The criticisms are focused on the fact that unfortunately, given the time constraints, perhaps, the pressures that we were under, we have not achieved the objectives. We have fallen short of the mark on all three of those fundamental criteria.

I share the gentleman's concern for getting back to the drawing board. For those who say, oh, but this is a once in a lifetime opportunity, as Senator LONG, who had a distinguished career in the other body for so many years, and is departing now, but probably has forgotten more tax law than all of the rest of us have learned, he made the observation recently that this bill will, indeed, create the kind of a future that the gentleman from Texas addressed when he said we will be back to the drawing boards trying to effect remedies, a technical correction bill, and then we will be dealing with unintended consequences. The Senator proposed that it might involve 5 years of annual work just trying to remedy the mistakes.

I think it is a great public service that the gentleman from Texas and the gentleman from Minnesota performed by having these special orders tonight. I would hope that while the chamber does not reflect necessarily the level of concern on the part of our colleagues, I would hope that many of them may be watching on television if there are questions in their minds, in their own offices, and finally, and most importantly, probably the American people have a better insight as to what the future may hold if we sadly pass out the bill, H.R. 3838.

Mr. ARCHER. I thank the gentleman from Illinois [Mr. CRANE] for his contribution.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman for yielding. I think that we are all winding down here, although there is much more material that I would like to go over. We have not really gone into the simplicity part of the bill.

But I remember when Secretary Baker testified a year ago, June, suggesting that they hoped for simplicity, but it was only going to lie in the fact that by 1990 they might get a nonreturn filing system for nonitemizers. But he said, if you think this is simplicity for corporate tax filers, disabuse yourself of that notion, because it is not.

Since then, of course, we could not clean out all of the tax credits that were necessary to secure a no-return filing system. So there is no simplicity. There is a good deal more complexity.

We are told that changing 2 rates for 14, or however many rates are in the schedule, was a great act of simplification. Actually, there is an infinite number of rates in the new schedule because of the phaseout of two of the important elements, the 15-percent rate and the personal exemption. It does not make any difference whether there are 2 rates or 20 rates, you still have to go into the table, and that is how you find your tax.

So I find just more complexity and no simplicity.

I want to take one more shot at fairness and talk here about the burden rates of tax cuts through the income ranges. Everybody knows the big tax cuts are at the bottom end of the tax range where many people are relieved of tax burdens completely. On the other hand, those cuts are in the range of a couple hundred bucks a year, or a hundred bucks a year, because those people never had very much liability.

As you get higher up in the schedule, as I recall, you get about an 8- or 9-percent cut that is effective by 1988. When you get up into the $20,000, $30,000, $40,000, but by the time you cross $50,000 of income you are at a 1-percent cut, which obtains through $100,000 of income and beyond that, you have another larger percentage tax reduction.

Everything is not perfect in the world, and it was hard to get a uniform reduction. But I think what bothers me is that the people of the high income ranges are going to be able to adjust their habits and their financial affairs so that they are not going to be contributors to the tax system as much as the framers of this bill thought they were.

For instance, everybody knows that the hottest selling item on Wall Street is the limited partnership that has actually got some income which can be used to set off the passive losses which, if they were not nullified by the new income partnership, would be less deductible than in the past and ultimately phased out. Everybody also knows that the largest class of individual taxpayers that has no income tax, the richest class, are those people who rely wholly on income from tax exempt bonds. It is still possible for those individuals to secure all of their income from tax exempt bonds and pay no taxes, and I expect to see quite a shift in the upper income ranges in that regard.

□ 2225

The net of it is going to be, in my judgment, less of a contribution to the tax pot from the higher income people, and approximately as advertised by the lower income people; so you are going to see a little more shift, a little decline in the progressivity which this bill claims to have.

I think that is an important thing for Members to consider. We really are flattening the tax, particularly in the very high ranges. It is fair to say, I think, that the $38,000 single filer

pays at the same marginal rate as the person who earns $1 million a year.

I am not insisting on a highly progressive rate, but having the same rate for those two taxpayers does not fit my concept of the American dream.

I think as people go through this bill, they are going to be disappointed by growth, by savings, by cost of capital, by increased cost for low income people, by fairness and complexity; and I do not think that there is a chance at the moment for the bill to be defeated; and yet I think those of us who carry the burden of the knowledge of what this bill is going to do to our economy and our society and our taxpayers, still have it incumbent upon ourselves to reveal that knowledge, to let people know what this bill is really going to do to the country; and even though our voices are not heeded, it is our duty to tell the story.

I thank the gentleman from Texas [Mr. ARCHER] for being one of the best narrators of the evening.

Mr. ARCHER. I thank the gentleman for his contribution.

Mr. Speaker, the gentleman has piqued my interest in a couple of things which we have not talked about. Although he touched upon the fact that those out in the private sector who have the capability to do so will find ways around a complex tax bill; that has been the case in the past, it will be the case in the future.

An interesting thing is happening right now, that some financial institutions are already drawing the plans to take a second mortgage on an individual's home, issue them a special Visa-type, using that term, or American Express or whatever you want to call it, a type of credit card which be a revolving credit that can be taken for the purpose of shopping for clothes or any other consumer item that you want; and as long as that home stands as security for this new credit card, the interest will be deductible.

So this is one of the things that is already on the drawing boards that will defeat the revenue estimates that are planned for this bill; and there are many, many others that we are going to see as time goes on.

The sad thing about it is that only the homeowner will get the benefit of this, and that is inequitable. So there is much, much more that we could talk about. The sad thing is that it is very easy to talk about the good in this bill; and there is, as you have mentioned, a lot of good in this bill, and I agree with that. It takes 5 or 10 minutes to articulate the good.

To talk about the cost of the good, because there is no such thing as a free lunch. If we are going to reduce the marginal rates, somebody has got to pay, and if we think we are going to do it through the corporations and nobody pays for it, you are going to be hiddenly taxed in the price of the products that the corporations produce, as a consumer tax.

Someone is going to pay in some way or another: The individual who loses his or her job because their employer can no longer compete. That individual that loses a 401(k) plan or a retirement plan because of the negative impact that is in this bill; that is part of the cost, and so it goes on and on and on.

It is very difficult to lay all this out, and I only hope that through the media and through television, and hopefully with a span of attention that is longer than is normal in this country, that the American people will evaluate the good and the bad in this bill, because I believe that the risk of loss is much greater than the chance of gain.

Mr. Speaker, I yield back the balance of my time.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. IRELAND (at the request of Mr. MICHEL), for today and the balance of the week, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HANSEN) to revise and extend their remarks and include extraneous material:)

Mrs. ROUKEMA, for 60 minutes, on September 24.

Mr. BURTON of Indiana, for 60 minutes, today.

(The following Members (at the request of Mr. ROWLAND of Georgia) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 60 minutes, on September 19.

Mr. HOYER, for 60 minutes, on September 19.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. RAY, prior to the vote, on House Joint Resolution 732.

Mrs. ROUKEMA, on H.R. 1426, in the Committee of the Whole today.

Mr. CARPER, on House Joint Resolution 611, in the House today.

(The following Members (at the request of Mr. HANSEN) and to include extraneous matter:)

Mr. TAUKE.
Mr. HENRY.
Mr. COURTER.
Mr. CLINGER.
Mr. BLAZ.
Mr. CRANE in two instances.
Mr. SAXTON.
Mr. LIVINGSTON.
Mr. GREEN.
Mr. PETRI.
Mr. DANNEMEYER.
Ms. SNOWE.
Mr. GILMAN.
Mrs. MARTIN of Illinois.
Mr. MCDADE.
Mr. MCCAIN.

(The following Members (at the request of Mr. ROWLAND of Georgia) and to include extraneous matter:)

Mr. MAVROULES.
Mr. FLORIO.
Mr. RODINO in two instances.
Mr. ROYBAL.
Mr. DOWNEY of New York.
Mr. FLIPPO.
Mr. LEVINE of California.
Mr. VISCLOSKY.
Mr. CARPER.
Ms. KAPTUR.
Mr. FASCELL.
Mr. YATRON.
Mr. ECKART of Ohio in two instances.
Mr. HOYER.
Mr. EDWARDS of California.
Mr. TORRICELLI in two instances.
Mr. TRAXLER.
Mr. GARCIA in three instances.
Ms. OAKAR.
Mr. STALLINGS.
Mr. HERTEL of Michigan.
Mr. APPLEGATE.
Mr. KOSTMAYER.
Mr. ACKERMAN.

ENROLLED BILLS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 3002. An act to provide for the establishment of an experimental program relating to the acceptance of voluntary services from participants in an executive exchange program of the Government, and

H.R. 4530. An act to amend the Department of Defense Authorization Act, 1985, to provide that members of the Commission on Merchant Marine and Defense shall not be considered to be Federal employees for certain purposes, to extend the deadline for reports of the Commission, and to extend the availability of funds appropriated to the Commission.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 2095. An act to reauthorize the Tribally Controlled Community College Assistance Act of 1978 and the Navajo Community College Act.

ADJOURNMENT

Mr. FRENZEL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 30 minutes p.m.) the House adjourned until tomorrow, Friday, September 19, 1986, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4223. A letter from the Under Secretary of State for Security Assistance, Science and Technology, transmitting a report examining U.S. policies concerning the export of conventional arms and possible approaches to developing multilateral limitations on conventional arms sales, pursuant to 22 U.S.C. 2751 nt.; to the Committee on Foreign Affairs.

4224. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions by Everett E. Bierman, of Virginia, Ambassador Extraordinary and Plenipotentiary-designate to Papua New Guinea and Solomon Islands, and members of his family, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

4225. A letter from the Director, Administrative Office of the United States Courts, transmitting, a draft of proposed legislation to authorize additional judicial positions for the Courts of Appeals and District Courts of the United States; to the Committee on the Judiciary.

4226. A letter from the Assistant Secretary (Civil Works), Department of the Army, transmitting a report dated July 12, 1986, from the Chief of Engineers, Department of the Army, on Upper Alameda Creek Urban Study, CA, together with other pertinent reports; to the Committee on Public Works and Transportation.

4227. A letter from the Deputy Administrator, General Services Administration, transmitting an informational copy of the lease prospectus for the Internal Revenue Service in Austin, TX, pursuant to Public Law 86-249, section 7(a) (86 Stat. 217); to the Committee on Public Works and Transportation.

4228. A letter from the National Council on Public Works Improvement, transmitting the first of three reports on the state of the Nation's infrastructure, pursuant to 42 U.S.C. 3121 nt.; to the Committee on Public Works and Transportation.

4229. A letter from the Secretary of Labor, transmitting the second report on the impact of the Caribbean Basin Economic Recovery Act on U.S. labor, pursuant to 19 U.S.C. 2705 (Public Law 98-67, section 216); to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 4961. A bill to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years, 1987, 1988, 1989, and for other purposes; with amendments (Rept. 99-835, Pt. 1). Ordered to be printed.

Mr. GARCIA: Committee on Post Office and Civil Service. Senate Joint Resolution 159. Joint resolution to designate the rose as the national floral emblem (Rept. 99-836). Referred to the House Calendar.

Mr. BONKER: Committee on Foreign Affairs. H.R. 5506. A bill to amend the International Claims Settlement Act of 1949 to provide that the value of claims be based on the fair market value of the property taken (Rept. 99-837). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOAKLEY: Committee on Rules. House Resolution 552. Resolution providing for the consideration of H.R. 4300, a bill to entitle employees to parental leave in cases involving the birth, adoption, or serious health condition of a son or daughter and temporary medical leave in cases involving inability to work because of a serious health condition, with adequate protection of the employees' employment and benefit rights, and to establish a commission to study ways of providing salary replacement for employees who take any such leave (Rept. 99-838). Referred to the House Calendar.

Mr. HALL of Ohio: Committee on Rules. House Resolution 553. Resolution providing for the consideration of H.R. 5495, a bill to authorize appropriations to the National Aeronautics and Space Administration, and for other purposes (Rept. 99-839). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 554. Resolution providing for the consideration of H.R. 4154, a bill to amend the Age Discrimination in Employment Act of 1967 to remove the maximum age limitation applicable to employees who are protected under such Act, and for other purposes (Rept. 99-840). Referred to the House Calendar.

Mr. ROSTENKOWSKI: Committee of Conference. Conference report on H.R. 3838 (Rept. 99-841). Ordered to be printed.

Mr. GARCIA: Committee on Post Office and Civil Service. H.R. 4302. A bill to establish a commission for the purpose of encouraging and providing for the commemoration of the centennial of the birth of President Dwight David Eisenhower; with an amendment (Rept. 99-842). Referred to the Committee of the Whole House on the State of the Union.

[Omitted from the Record of September 17, 1986]

SUBSEQUENT ACTION ON A REPORTED BILL SEQUENTIALLY REFERRED

H.J. Res. 626. Under clause 5 of rule X the following action was taken by the Speaker: The Committees on the Judiciary and Armed Services discharged. Referral to the Committee on Merchant Marine and Fisheries extended for a period ending not later than September 19, 1986.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WAXMAN (for himself, Mr. MADIGAN, Mr. DINGELL, Mr. LENT, Mr. SCHEUER, Mr. LUKEN, Mr. WIRTH, Mr. FLORIO, Mr. MARKEY, Mr. WALGREN, Mr. LELAND, Mr. SHELBY, Mrs. COLLINS, Mr. SYNAR, Mr. WYDEN, Mr. ECKART of Ohio, Mr. DOWDY of Mississippi, Mr. RICHARDSON, Mr. SIKORSKI, Mr. BRYANT, Mr. BATES, Mr. TAUKE, Mr. ECKERT of New York, and Mr. LAFALCE):

H.R. 5546. A bill to amend the Public Health Service Act to establish a National Vaccine Program for the development of new vaccines and the improvement of existing vaccines and a program to compensate the victims of vaccine-related injuries and deaths, and for other purposes; jointly, to the Committees on Energy and Commerce, and Ways and Means.

By Mr. ST GERMAIN:

H.R. 5547. A bill to provide for the stability of the domestic banking and thrift systems, to improve housing, to protect the American consumer of financial services, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. NEAL (for himself, Mr. ST GERMAIN, Mr. LEVIN of Michigan, Mr. NELSON of Florida, Mr. MANTON, Mr. WYLIE, Mr. LEACH of Iowa, and Mr. CHANDLER):

H.R. 5548. A bill to amend the Export-Import Bank Act of 1945; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ENGLISH:

H.R. 5549. A bill to require the Secretary of Agriculture to pay restitution to certain cattle producers for losses incurred in connection with the sale of cattle during a period in which excessive dairy cattle were slaughtered under the whole-herd buy-out program; to the Committee on Agriculture.

By Mr. FLIPPO (for himself, Mr. BEVILL, Mr. NICHOLS, Mr. DICKINSON, Mr. SHELBY, Mr. ERDREICH, and Mr. CALLAHAN):

H.R. 5550. A bill for the relief of the Alabama Space Science Exhibit Commission, to the Committee on the Judiciary.

By Mr. FRANK:

H.R. 5551. A bill for the relief of certain manufacturers or suppliers that provided asbestos materials and products to the United States; to the Committee on the Judiciary.

By Mr. LEVINE of California (for himself, Mr. SMITH of New Jersey, Mr. SMITH of Florida, and Mr. MORRISON of Connecticut):

H.R. 5552. A bill to require specific congressional authorization for certain sales, exports, leases, and loans of defense articles, and for other purposes; jointly, to the Committees on Foreign Affairs, and Rules.

By Ms. SNOWE (for herself, Mr. BIAGGI, and Mr. CONTE):

H.R. 5553. A bill to authorize the National Institute on Aging, the National Institute of Mental Health, and the National Center for Health Services Research and Health Care Technology Assessment to undertake various programs for individuals with Alzheimer's disease and related dementias; to the Committee on Energy and Commerce.

By Mr. GARCIA (for himself, Mr. ST GERMAIN, Ms. KAPTUR, Mr. MITCHELL, Mr. NEAL, Mr. HUBBARD, Ms. OAKAR, Mr. LUNDINE, Mr. BARNARD, Mr. SCHUMER, Mr. FRANK, Mr. LEHMAN of California, Mr. MORRISON of Connecticut, Mr. COOPER, Mr. ERDREICH, Mr. TORRES, Mr. KANJORSKI, Mr. GORDON, Mr. MANTON, Mr.

FUSTER, Mr. HAWKINS, Mr. WILLIAMS, Mr. MARTINEZ, Mr. CHANDLER, Mr. HOYER, and Mr. GREEN):

H.R. 5554. A bill to transfer the Community Development Credit Union Revolving Loan Fund to the National Credit Union Administration and to authorize the National Credit Union Administration Board to administer the fund; to the Committee on Banking, Finance and Urban Affairs.

By Mr. McDADE (for himself, Mr. SEIBERLING, Mr. YOUNG of Alaska, Mr. GAYDOS, Mr. GEKAS, Mr. WALKER, Mr. SCHULZE, Mr. COYNE, Mr. GOODLING, Mr. SHUSTER, Mr. FOGLIETTA, Mr. KANJORSKI, Mr. EDGAR, Mr. CLINGER, Mr. RIDGE, Mr. MURTHA, Mr. WALGREN, Mr. KOLTER, Mr. RITTER, Mr. COUGHLIN, Mr. MURPHY, Mr. BORSKI, Mr. YATRON, Mr. KOSTMAYER, and Mr. GRAY of Pennsylvania):

H.R. 5555. A bill to designate certain property located in Scranton, PA, as the Steamtown National Historic Site; to the Committee on Interior and Insular Affairs.

By Mr. TRAFICANT:

H.R. 5556. A bill to amend the Controlled Substances Act to impose the death penalty or life imprisonment for violations involving 10 or more kilograms of certain controlled substances; jointly, to the Committees on Energy and Commerce and the Judiciary.

H.R. 5557. A bill to amend the Controlled Substances Act to impose the death penalty or life imprisonment for murder in the course of a controlled substances related pattern of racketeering activity and for murder of a law enforcement officer in the course of a controlled substances violation; jointly, to the Committees on Energy and Commerce and the Judiciary.

By Mr. WHITTEN:

H.J. Res. 732. Joint resolution making urgent supplemental appropriations for the fiscal year ending September 30, 1986, for emergency assistance to the Government of the Philippines; considered and passed.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1213: Mr. MICA.

H.R. 1223: Mr. FASCELL.

H.R. 2287: Mr. STAGGERS.

H.R. 3513: Mr. MAVROULES.

H.R. 3654: Mr. BUSTAMANTE and Mr. KOLBE..

H.R. 4142: Mr. BOUCHER, Mr. MCKERNAN, Mr. TAYLOR, Mr. GOODLING, Mr. JONES of North Carolina, Mr. GORDON, Mr. DORNAN of California, Mr. GALLO, Mr. STANGELAND, Mr. STENHOLM, and Mr. NEAL.

H.R. 4424: Mr. MARTINEZ.

H.R. 4460: Mrs. BENTLEY.

H.R. 4564: Mr. COLEMAN of Texas.

H.R. 4711: Mr. CLAY and Mr. SHAW.

H.R. 4715: Mr. CALLAHAN, Mr. STRANG, Mr. BRUCE, Mr. BONIOR of Michigan, Mr. GUARINI, Mr. MCDADE, and Mr. DANIEL.

H.R. 4762: Mr. SMITH of New Jersey, Mr. GEJDENSON, and Mr. SAXTON.

H.R. 4820: Mr. LEVIN of Michigan.

H.R. 5100: Mr. BADHAM, Mr. SMITH of New Hampshire, Mr. COBEY, Mr. BENNETT, and Mr. NELSON of Florida.

H.R. 5154: Mr. HAWKINS and Mrs. LONG.

H.R. 5196: Mr. LAGOMARSINO, Mr. WORTLEY, Mr. SUNIA, Mr. PURSELL, Mr. BRYANT, Mr. HENRY, and Mrs. JOHNSON.

H.R. 5225: Mr. MOORHEAD, Mr. ECKERT of New York, Mr. DANNEMEYER, Mr. GARCIA, Mr. MCDADE, and Mr. HORTON.

H.R. 5274: Mrs. LLOYD.

H.R. 5386: Mr. STANGELAND and Mr. LIPINSKI.

H.R. 5387: Mr. STANGELAND, Mr. LIPINSKI, and Mr. KINDNESS.

H.R. 5397: Mr. FAZIO.

H.R. 5402: Mr. ATKINS, Mrs. BURTON of California, and Mr. TOWNS.

H.R. 5407: Mr. BEREUTER.

H.R. 5413: Mr. JENKINS, Mr. DARDEN, Mr. TOWNS, and Mr. SWIFT.

H.R. 5497: Mr. COATS, Mr. DINGELL, Mr. DORGAN of North Dakota, Mr. HUGHES, Mr. SKEEN, and Mr. STRATTON.

H.R. 5500: Mr. ANNUNZIO, Mr. LIPINSKI, Mr. DONNELLY, Mr. HOYER, Mr. SCHUMER, Mrs. BOXER, Mr. DOWNEY of New York, and Ms. OAKAR.

H.R. 5501: Mr. FEIGHAN and Mr. PERKINS.

H.R. 5541: Mr. FRANK, Mr. BERMAN, Mr. HUGHES, Mr. BRYANT, Mr. FISH, Mr. KINDNESS, Mr. BROWN of Colorado, Mr. SWINDALL, Mr. COBLE, and Mr. SHAW.

H.J. Res. 133: Ms. OAKAR, Mr. CARPER, Mr. MCDADE, Mr. STALLINGS, Mr. SMITH of New Jersey, Mr. DANNEMEYER, Mr. MAZZOLI, Mr. LENT, Mr. BROWN of California, Mr. DYMALLY, Mrs. VUCANOVICH, Mr. GOODLING, Mr. KEMP, Mr. FLIPPO, Mr. NICHOLS, Mr. MCCOLLUM, Mr. KOLBE, Mr. WILSON, Mr. CHAPMAN, Mr. BOEHLERT, Mr. BIAGGI, Mr. BARTLETT, Mr. DENNY SMITH, Mr. SCHEUER, Mr. ROBERTS, Mr. STANGELAND, Mr. MINETA, Mr. BREAUX, Mr. LIVINGSTON, Mr. BORSKI, Mr. JEFFORDS, Mr. LIPINSKI, and Mr. BONER of Tennessee.

H.J. Res. 379: Mr. JACOBS.

H.J. Res. 524: Mr. SIKORSKI, Mr. OBERSTAR, Mr. SKEEN, Mr. FRENZEL, Mr. STENHOLM, Mr. SNYDER, Mr. OWENS, Mr. LOWERY of California, Mr. TOWNS, Mr. EVANS of Iowa, Mr. BADHAM, Mr. MARKEY, Mr. ROSE, Mr. WOLF, and Mr. PARRIS.

H.J. Res. 586: Mr. ATKINS, and Mr. KRAMER.

H.J. Res. 588: Mr. RUDD, Mr. TOWNS, Mrs. BYRON, Mr. WALKER, Mr. FUQUA, and Mr. ATKINS.

H.J. Res. 648: Mr. BUSTAMANTE, Mr. KOSTMAYER, Mr. GEJDENSON, Mr. WEISS, Mr. GRAY of Pennsylvania, Mr. ATKINS, Mr. GUARINI, Mr. BARNES, Mrs. BENTLEY, Mr. ACKERMAN, Mr. WISE, Mr. VENTO, Mr. SEIBERLING, Mr. VISCLOSKY, Mr. KILDEE, Mr. CROCKETT, Mr. MITCHELL, and Mr. LEVINE of California.

H.J. Res. 681: Mr. SABO.

H.J. Res. 684: Mr. CONTE, Mr. FRANK, Mr. IRELAND, and Mr. SMITH of Iowa.

H.J. Res. 699: Mr. YOUNG of Alaska, Mr. HUCKABY, and Mr. HANSEN.

H.J. Res. 708: Mrs. BENTLEY, Mrs. LLOYD, Mr. BLILEY, Mr. ROSE, Mr. TOWNS, Mr. FROST, Mr. MACK, Mr. TAUKE, Mr. LEACH of Iowa, Mr. MACKAY, Mr. SISISKY, Mr. FRENZEL, Mr. MARTINEZ, Mr. OXLEY, Mr. BOUCHER, Mr. FUQUA, Mr. MADIGAN, Mr. LOWRY of Washington, Mr. DENNY SMITH, Mr. BERMAN, Mr. MILLER of Washington, Mr. OLIN, Mr. DASCHLE, Mr. DANIEL, Mr. SWINDALL, Mr. KOSTMAYER, Mr. GREGG, Mr. STUMP, Mr. TAUZIN, Mr. WOLPE, Mr. WOLF, Mr. HUGHES, Mr. BATEMAN, Mr. DUNCAN, Ms. OAKAR, Mr. FUSTER, Mrs. HOLT, Mr. LIPINSKI, Mr. MCDADE, Mr. REID, Mr. ROE, Mr. HAYES, Mr. PARRIS, Mr. HORTON, Mr. EVANS of Illinois, Mr. FAZIO, Mr. LEVIN of Michigan, Mr. WYDEN, Mr. HUTTO, Mr. FASCELL, Mrs. BYRON, Mr. LELAND, Mr. WEAVER, Mrs. BOXER, Mr. FIELDS, Mr. BEDELL, Mr. MONSON, Mr. SHAW, Mr. FOLEY, Mr. CHANDLER, Mr. KASICH, Mr. CARPER, Ms. KAPTUR, Mr. HOYER, and Mr. HENRY.

H.J. Res. 728: Mr. MOODY, Mr. TALLON, Mr. GEJDENSON, Mr. SCHEUER, Mr. ST GERMAIN, Mr. DYMALLY, Mr. EVANS of Illinois, Mr. OWENS, Mr. RAHALL, Mrs. KENNELLY, Mr. CAMPBELL, Mr. FEIGHAN, Ms. MIKULSKI, Mr. MORRISON of Connecticut, Mr. BOEHLERT, and Mr. PERKINS.

H.J. Res. 731: Mr. BARTON of Texas.

H. Con. Res. 129: Mr. ROBINSON, Mr. PERKINS, Mr. ROTH, Mr. COURTER, Mr. MILLER of Washington, Mr. HYDE, Mr. TRAFICANT, Mr. WYLIE, Mr. SMITH of Iowa, Mr. LUNGREN, Mr. DORGAN of North Dakota, Mr. QUILLEN, Mr. FRENZEL, Mr. ROBERT F. SMITH, Mr. MAVROULES, Mr. SMITH of New Jersey, Mr. OWENS, Mr. HENRY, Ms. FIEDLER, Mr. BARNARD, Mr. ROYBAL, Mrs. HOLT, Mr. SHUMWAY, Mr. ANDERSON, Mr. BUSTAMANTE, Mr. KRAMER, Mr. HATCHER, Mr. MOLLOHAN, and Mr. SHARP.

H. Con. Res. 332: Mr. WEBER, Mr. MACK, and Mr. ROWLAND of Georgia.

H. Con. Res. 359: Mr. BIAGGI and Mrs. MEYERS of Kansas.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2482

By Mr. BEDELL:

—Section 821(a) of the text of H.R. 5440 (the Amendment in the Nature of a Substitute to H.R. 2482), is amended (page 138, lines 2 through 10) to read as follows:

"SEC. 821. LIABILITY FOR LAWFUL APPLICATION.

"(a) Pesticide Use and No Private Right of Action—

"(1) Liability under Federal environmental statutes for the costs of response or damage incurred with respect to a release or threatended release into the environment of a pesticide shall, in any case where the application was in compliance with label instructions and other applicable law, be imposed on the registrant or other responsible parties, not the agricultural producer, unless the producer has acted negligently, recklessly, or with the intent to misuse such pesticide. There shall be a rebuttable presumption that the application was in compliance with label instructions and otherwise lawful. For purposes of the preceding sentence, the terms "damages", "response", "release", and "environment" shall have the meanings assigned them of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. The term "Federal environmental statutes" means the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, the Clean Water Act, the Resource Conservation and Recovery Act, the Safe Drinking Water Act, and this Act. Neither this section nor any other provision of this Act shall be construed, interpreted or applied to preempt or, except as provided above, displace liability under other Federal or State laws, whether statutory or common.

(2) Nothing in this section shall be construed as conferring a private right of action on any person for the purposes of this Act or any other Federal law.".

—Page 134, strike out line 5 and all that follows through line 6 on page 135 and insert in lieu thereof the following:

SEC. 814. GROUNDWATER AUTHORITY.

(a) DEFINITIONS.—Section 2 (7 U.S.C. 136) (as amended by section 802) is amended by adding at the end the following:

"(ll) GROUNDWATER.—The term 'groundwater' means water below the land surface in a zone of saturation.

"(mm) RELIABLE ANALYTICAL DATA.—The term 'reliable analytical data' means scientific information that verifies the presence of a pesticide in a groundwater sample and that is of a reliable scientific quality according to generally recognized standards and good laboratory practices for sampling and analysis of pesticides in groundwater.

"(nn) POTENTIAL SOURCES OF DRINKING WATER.—The term 'potential sources of drinking water' means the portion of an aquifer or aquifer system that contains sufficient quantity and is of sufficient quality to supply potable water to a drinking water well, taking into account (1) geographic considerations and depth to drinking water, (2) any State criteria or guidelines for siting new wells established under section 1428 of the Public Health Service Act or other State authority, and (3) shallow groundwater that is not potential drinking water.

"(oo) DRINKING WATER WELL.—The term 'drinking water well' means a well or spring currently supplying water for human consumption

"(pp) GROUNDWATER SAMPLING POINT.—The term 'groundwater sampling point' means a public or community water supply, a private water supply, a spring, or a monitoring well or other groundwater source if the well or source is reasonably designed and of adequate depth to permit the collection of representative groundwater samples.

"(qq) GROUNDWATER RESIDUE GUIDANCE LEVEL.—The term 'groundwater residue level' means a groundwater residue guidance level established under section 1429 of the Public Health Service Act.".

(b) AUTHORITY.—The Act (as amended by section 202) is amended by adding after section 31 the following:

"SEC. 32. PROTECTION OF GROUNDWATER.

"(a) NOTIFICATION.—

"(1) REQUIREMENT.—When a registrant of a pesticide obtains or learns of reliable analytical data that a pesticide has—

"(A) been detected at any groundwater sampling point and no groundwater residue guidance level has been issued for the pesticide under subsection (e),

"(B) has been detected at a groundwater sampling point at a concentration higher than known previously to have been reported to the Administrator at such groundwater sampling point, or

"(C) has been detected at any groundwater sampling point at a concentration at or greater than 20 percent of the groundwater residue guidance level issued for the pesticide under subsection (e).

the registrant shall file a report containing such information within 15 working days with both the Administrator, the State in which the groundwater sampling point is located, and the owner of the property in which the groundwater sampling point is located, if known.

"(2) CONTENT OF REPORT.—A report required by paragraph (1) for detection of a pesticide shall contain information known to the registrant of the pesticide on the level of detection of the pesticide, the frequency of detection of the pesticide, location (including depth) where the pesticide was detected, date of the pesticide detection, well construction if the pesticide was detected in a well, soil type where the pesticide was detected, and analytical method use to make the pesticide detection, including information on the precision, accuracy, and limits of the method of detection and any quality assurance and control procedures used in the pesticide detection.

"(b) REVIEW FOR FURTHER ACTION.—Upon receiving information of a detection of a pesticide at any groundwater sampling point, the Administrator shall promptly review the information to determine the realiability of the detection and to determine whether action should be taken to protect groundwater.

"(c) MONITORING.—

"(1) CONFIRMATION OF DETECTIONS.—If the Administrator receives reliable, analytical data indicating that—

"(A) a pesticide has been detected in a drinking water well,

"(B) the concentration of the pesticide equals or exceeds any groundwater, residue guidance level issued under subsection (b) for that pesticide, and

"(C) the presence of the pesticide in the drinking water well may be the result of use of the pesticide in accordance with the labeling on the pesticide or widespread and commonly recognized practices involving the pesticide,

the Administrator may require the registrant of the pesticide detected to conduct such analysis of samples of groundwater from the drinking water well involved as is necessary to determine whether the pesticide is present at a concentration that equals or exceeds such groundwater residue guidance level. A monitoring requirement imposed under this paragraph shall be completed within 90 days of notice to the registrant. The procedures of section 3(c)(2)(B) shall govern any monitoring requirement imposed under this paragraph.

"(2) REQUIREMENT FOR MONITORING.—If the Administrator determines that additional data on the presence of a pesticide in groundwater are required to maintain in effect an existing registration of the pesticide, the Administrator may, under section 3(c)(2)(B), require the registrant of the pesticide to conduct groundwater monitoring. The Administrator shall consult with the Secretary of Agriculture, the heads of other appropriate Federal agencies, and the States concerning the design and scope of monitoring requirements imposed under this paragraph. The design and the scope of the monitoring requirement should take into account all relevant information, including the magnitude and frequency of the detection of the pesticide involved, pattern of pesticide use and soil types involved in the detection, physical and chemical properties of the pesticide, rainfall patterns, well construction if the pesticide was detected in a well, rates of degradation, reliability and analytical accuracy of the detection, and results of State or other sponsored monitoring. To the extent feasible, monitoring should be at representative geographical and hydrogeological areas associated with locations and conditions of concern as determined by the Adminstrator.

"(3) JUDICIAL REVIEW.—Monitoring requirements imposed under paragraph (2) shall be subject to judicial review under section 16.

"(d) REPONSE TO GROUNDWATER CONTAMINATION.—

"(1) REQUIREMENT.—If the Administrator determines that a pesticide is present in a drinking water well at a concentration that exceeds the final groundwater residue guidance level applicable to the pesticide and that the presence of the pesticide in the drinking water well may be the result of use of the pesticide in accordance with the labeling on the pesticide or as a result of widespread and commonly recognized practice involving the pesticide, the Administrator shall notify the State in which the drinking water well is located of the Administrator's determination and shall provide it with all information relevant to the determination. Such State shall take action within 90 days of such notification to prevent potential adverse effects on human health and the environment from such pesticide. In taking such action, the State shall take appropriate action regarding the sale or use of the pesticide detected at such drinking water well to bring and retain concentrations of the pesticide at such drinking water well at or below the final groundwater residue guidance level applicable to the pesticide.

"(2) ACTION BY THE ADMINISTRATOR.—

"(A) If a State does not have the authority to take the action required by paragraph (1) with respect to a pesticide detected in a drinking water well or fails to take such action within the time period prescribed by such paragraph, the Administrator shall take appropriate action under this Act to bring and retain the concentration of the pesticide detected at such drinking water well at or below the final groundwater residue guidance level applicable to the pesticide and my take such other action under this Act as the Administrator deems necessary to prevent potential adverse effects on human health and the environment from the pesticide. If the Administrator takes such action, the Administrator shall publish notice of the action in the Federal Register and take appropriate steps to inform the registrant of the pesticide involved, potentially affected persons, and interested members of the public. Such notice shall specify the findings and conclusions upon which such action was based.

"(B) Any person adversely affected by action taken under subparagraph (A) or the failure of the Administrator to take such action may request an expedited hearing, under the procedures in section 6(c)(2), to determine whether the action was taken in accordance with subparagraph (A) or whether the Administrator was required to take action. Such a hearing shall be held and a determination made within 75 days from the date of the receipt of the request for the hearing.

"(C) The Administrator shall provide reasonable procedures for petitions to modify or terminate an action taken under subparagraph (A) when the drinking water well involved no longer has the pesticide in a concentration that exceeds the applicable groundwater residue guidance level and will likely remain below such level.

"(3) JUDICIAL REVIEW.—Judicial review of actions taken under this subsection shall be governed by section 16.

"(e) REGISTRATION AMENDMENTS.—

"(1) REQUIREMENT.—

"(A)(i) After reviewing reliable analytical data, the Administrator shall determine whether there is a reasonable likelihood that the groundwater residue guidance level for a pesticide will be exceeded in drinking water wells in different localities. If the Administrator determines that there is a reasonable likelihood that the groundwater residue guidance level for a pesticide will be exceeded in drinking water wells in different localities, the Administrator shall promptly require amendments to the registration of the pesticide with respect to which the find-

ing was made that are reasonably necessary to ensure that use of the pesticide in accordance with the amended registration will not cause the final groundwater residue guidance level involved in the finding to be exceeded in drinking water wells. The Administrator shall make any such determination public.

"(ii) If the Administrator proposes to require registration amendments under clause (i) for a pesticide, the Administrator shall notify the registrant of the pesticide of such amendments and shall publish notice of such proposal in the Federal Register. Such notice shall include the Administrator's determination whether the presence of the pesticide in drinking water wells appears to have been the result of the use of the pesticide in accordance with its labeling or the result of widespread and generally recognized practice.

"(B) After reviewing reliable analytical data, the Administrator shall determine whether there is a reasonable likelihood that the groundwater residue guidance level for a pesticide will be exceeded in potential drinking water in different localities. If the Administrator determines that there is a reasonable likelihood that the groundwater residue guidance level for a pesticide will be exceeded in potential drinking water in different localities, the Administrator shall promptly require amendments to the registration of the pesticide with respect to which the finding was made that are reasonably necessary to ensure that use of the pesticide in accordance with the amended registration will not cause the final groundwater residue guidance level involved in the finding to be exceeded in potential drinking water. If the Administrator proposes to require registration amendments under this subparagraph for a pesticide, the Administrator shall notify the registrant of the pesticide of such amendments. In establishing such amendments, the Administrator shall—

"(i) meet the procedural requirements of subparagraph (A)(ii),

"(ii) take into account information submitted by States on land or groundwater use classification or other governmental actions that could affect when groundwater may be used for drinking water, and

"(iii) consider the views of the Secretary of Agriculture, the heads of other appropriate Federal agencies, and States as required in paragraph (2).

"(2) CONSULTATION WITH STATES.—In taking action under paragraph (1), the Administrator shall consult with the Secretary of Agriculture and the State where the pesticide involved has been detected in any groundwater sampling point and each other State in which there is significant use of the pesticide. The Administrator shall notify such State of the Administrator's determination that there is a reasonable likelihood that a groundwater residue guidance level will be exceeded and shall, in accordance with section 10(h), provide the State with all information relevant to this determination. Each State that is notified under this paragraph shall promptly provide the Administrator with information that is relevant to taking action under paragraph (1) and shall make recommendations with respect to any proposed registration amendments.

"(3) SCOPE OF AMENDMENTS.—

"(A) Amendments to the registration of a pesticide under paragraph (1) may include—

"(i) limitations on the purposes for and locations at which the pesticide may be used, considering factors such as environmentally sensitive areas and conditions,

"(ii) limitations on the rate at which the pesticide is applied,

"(iii) limitations on the time or frequency of pesticide use,

"(iv) limitations on the method of pesticide application, storage, handling, or disposal,

"(v) reporting or other requirements, including label changes or changes in classification,

"(vi) requirements for the training or certification of pesticide applicators or other persons using the pesticide,

"(vii) required site specific responses, or

"(viii) any other requirement to ensure that the applicable groundwater residue guidance level will not be exceeded.

"(B) Amendments to the registration of a pesticide under paragraph (1) should, to the extent feasible, be directed to the same or similar use of the pesticide, same or similar geographical and hydrogeological areas, and other similar conditions that led to the determination under subparagraph (A) or (B) of paragraph (1).

"(C) In taking regulatory action under paragraph (1), the Administrator may use recommendations made by a State under paragraph (2).

"(D) In requiring amendments to the registration of a pesticide under paragraph (1), the Administrator shall consider the effect of any voluntary actions by registrants or other persons, including actions by a State, to prevent the groundwater residue guidance level involved from being exceeded and to comply with other environmental laws.

"(4) PROCEDURE.—Registration amendments under paragraph (1) shall be imposed in accordance with the procedural requirements of this Act.

"(f) INFORMATION ON PESTICIDES IN GROUNDWATER.—The Administrator may collect and make available through a public information file information concerning the detection of pesticides in any groundwater sampling point. The file may, among other things, summarize for each pesticide that has been detected in groundwater, based on reliable analytical data, whether the pesticide has been detected at a concentration that exceeds the applicable groundwater residue guidance level and whether the presence of the pesticide in groundwater appears to have been caused by the use of the pesticide in compliance with this Act.

"(g) TECHNICAL ASSISTANCE TO STATES.—The Administrator shall provide technical information to States to assist in implementing this section. Subject to section 10(h), the technical information provided respecting a pesticide shall include data on the toxicity, environmental fate, or physical or chemical characteristics of the pesticide, predictive modeling, exposure and other relevant subjects. In addition, the Administrator shall provide information, to the extent reasonably available, on alternative methods of pest control and on agricultural or other management practices that could minimize the presence of pesticides in groundwater.

"(h) SPECIAL REVIEW.—Upon receiving reliable analytical data that a pesticide has been detected above the applicable groundwater residue guidance level but not in a drinking water well or potential drinking water, the Administrator may initiate a public interim administrative under section 3(c)(8) to determine whether the pesticide may cause unreasonable adverse effects on the environment from such use.

"(i) EFFECT ON OTHER PROVISIONS.—Nothing in this section shall limit the authority of the Administrator or of any State under other provisions of this Act or under any other law.".

(c) GROUNDWATER RESIDUE GUIDANCE LEVEL.—Section 1412 of the Public Health Service Act is amended by adding at the end the following:

"(f)(1) The Administrator, on the Administrator's own initiative, may issue a groundwater residue guidance level for a pesticide registered under the Federal Insecticide, Fungicide, and Rodenticide Act. The Administrator shall issue a groundwater residue guidance level for a pesticide whenever the Administrator registers or reregisters a pesticide under such Act if the Administrator determines that the pesticide has the potential to leach into groundwater. In addition, the Administrator shall issue a groundwater residue guidance level for a pesticide if—

"(A) based on reliable analytical data, the pesticide has been detected at groundwater sampling points in 3 different geographical areas,

"(B) based on reliable analytical data, the pesticide has been detected in a drinking water well or wellfield that serves a population of over 500 people, or

"(C) a Federal agency or a State petitions the Administrator to set a groundwater residue guidance level for the pesticide.

"(2)(A) If the Administrator has promulgated or promulgates a maximum contaminant level under subsection (b)(3) that applies to a pesticide, the groundwater residue guidance level required under paragraph (1) for the pesticide shall be set at such level within 30 days of being required under such subsection.

"(B) If a maximum contaminant level that would be applicable to a pesticide for which a groundwater residue guidance level is required by paragraph (1) has not been established under subsection (b)(3), the Administrator, in the Administrator's discretion, may use a health advisory level established under this Act in establishing such groundwater residue guidance level. The groundwater residue guidance level established by the Administrator for such pesticide shall reflect the level of the pesticide in drinking water at which no known or anticipated adverse effects on the health of persons occur, the need for an adequate margin of safety, the nature of the toxic effects caused by the pesticide, and the validity, completeness, and adequacy of data about the pesticide. If all required chronic, oncogenicity, reproduction, or teratogenicity data are absent or invalid for the pesticide, the groundwater residue guidance level for the pesticide shall be at the limit of detection. If any required chronic, oncogenicity, reproduction, or teratogenicity data are absent or invalid for the pesticide, the groundwater residue guidance level for the pesticide shall include an additional margin of safety that takes into account the absence of such data.

"(3)(A) Before issuing a final groundwater residue guidance level for a pesticide, the Administrator shall publish an interim groundwater residue guidance level for the pesticide in the Federal Register and allow public comment for at least 30 days. During the public comment period, the Administrator shall invite comment on the level involved from the Secretary of Agriculture and States.

"(B) If the Administrator is required under paragraph (1) to issue a groundwater residue guidance level for a pesticide and the groundwater residue guidance level is to

be issued under paragraph (2)(B), the Administrator shall issue an interim groundwater residue guidance level for the pesticide within 30 days after the requirement to issue the groundwater residue guidance level takes effect.

"(C) Within 3 months after establishing an interim groundwater residue guidance level, the Administrator shall establish a final groundwater residue guidance level. Until a final groundwater residue guidance level is established under paragraph (1) for a pesticide, an interim groundwater residue guidance level established for the pesticide shall remain in effect.

"(4) The Administrator may revise a groundwater residue guidance level for a pesticide. The Administrator shall allow at least 30 days for public comment on any proposed revision.

"(5) An interim groundwater residue guidance level shall not be subject to judicial review before the expiration of 3 months after its issuance. Judicial review of any final groundwater residue guidance level or failure to establish an interim or final groundwater residue guidance level shall be governed by section 1448. A groundwater residue guidance level established under paragraph (2)(A) shall not be subject to judicial review.".

Page 131, line 7, strike out "or", in line 10 strike out the period and insert in lieu thereof "; or", and after line 10 insert the following:

"(U) to violate any action required under section 32(e)(2).".

EXTENSIONS OF REMARKS

IMPRESSION OF HOOSIERS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, September 17, 1986 into the CONGRESSIONAL RECORD:

IMPRESSIONS OF HOOSIERS

Traveling around the Ninth District to public meetings and civic events puts me in touch with more people, with a greater variety of views, on all kinds of subjects, in a briefer period of time than any endeavor I know.

Hoosiers are keenly aware of the problems and the opportunities in America today. They acknowledge there are no easy answers or magic bullets in confronting our challenges. They are, for example, uncertain about what specifically government should do to deal with budget deficits or even the farm crisis. Given this uncertainty, most Hoosiers are more concerned about the character and integrity of the individuals that will be making the choices for them, than about their stand on specific issues. They want leaders whose values and priorities they trust. They want leaders who take care of things at home, who put the interests of Hoosiers first.

Hoosiers are skeptical about politics, and they do not impress me as ideological. They are more pragmatic than conservative or liberal. They really do not care much about labels. What they want to know is if a proposed solution works, if it makes sense, and if it is right for the times. They want representatives with good solutions, and they don't care if they come from the left, center or right. They are uneasy about the influences of political action committees; they are fed up with what they see as the dominance of special interests in Washington and statehouses across the country. They feel the average person loses out when political deals are cut behind closed doors.

While politics may not be at the top of their concerns, Hoosiers are very worried about the future of the country. They reflect the basic values that made the country great, and they often express traditional concerns about jobs, family, children, retirement and peace.

THE ECONOMY

In 1986, Hoosiers are feeling squeezed. They worry because family income is not growing, but declining. They work hard and want to be recognized for their fundamental contribution to America. They see themselves caught in a world of big forces and big institutions, including big government and big corporations.

They worry about the unevenness of the recent economic recovery. In Indiana, and across the country, islands of prosperity are surrounded by seas of stagnation that have left many Americans facing job losses, foreclosures, and bankruptcies.

Hoosiers mention often the unfairness of the tax code. They don't like to pay for other peoples' tax shelters. They know that in our complex tax system many of the richest individuals and corporations pay no taxes, while the tax burden of the middle and lower classes is heavy.

They know that the one trillion dollars added to the national debt in recent years is neither right, nor good economic policy. Hoosiers believe that a balanced budget on a regular basis should be one of the highest priorities of fiscal policy. They are fearful that the uncontrolled deficits are mortgaging our children's future, soaking up the country's savings, and discouraging business investment that the economy now desperately needs.

They are worried about the $170 billion trade deficit, especially the deficit in agriculture. They see the old industries, like steel, and new industries, like semiconductors, are equally threatened by foreign competition. They worry that the once powerful American manufacturing industries are losing their ability to compete in the world, and that a lot of Americans are losing jobs. Hoosiers want their government to be more aggressive in trade negotiations. They don't like to lose jobs or industries to countries which don't permit equal access to American products.

Hoosiers want strong action to help both the American farmer and rural communities. Hoosier farmers want the nation to recognize that their productivity and their way of life are worth preserving. They are saying that the farm crisis is not over and that it must be addressed; that the economic recovery, such as it is, has not solved the problem of the small family farm. They want to know how they can best get Washington's attention focussed on the farm crisis.

NATIONAL SECURITY

Hoosiers want a secure nation. They don't believe in military power for its own sake, but they believe the Soviet threat is real. They are prepared to defend our way of life as a free people, and believe that we should stand, as we always have, as a beacon for the oppressed and a refuge for those denied liberty.

Hoosiers want a strong national defense, but they worry about waste and unpreparedness in our armed forces. They understand that there is a difference between an expensive defense, and an effective one. Some are troubled that one trillion dollars spent on defense in the last six years have not brought us a greater sense of security or peace.

THE FAMILY

Hoosiers are puzzled by the changes occurring in the family. Today, two-wage earner families and single parent families account for 4 out of 5 working families. Family incomes are declining and parents are finding it harder to provide for their children and for their own retirement.

Hoosiers want above all else a decent life for themselves and for their children: a chance to own a home; to send their children to college; to retire in reasonable security. They want to work, get better at their jobs, and contribute to the well-being of their families and communities. They believe government should act to favor and strengthen the family, not weaken it. They think government should give them a fair break, reward hard work, help the family, and encourage savings. They want leadership that provides independence, security, and opportunity. They want leaders who promote policies to raise family incomes and help keep families together, broaden educational opportunities for their children, and make home ownership and saving for retirement easier.

TWO SHOOTINGS, ONE LESSON: GUN CONTROL

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. GREEN. Mr. Speaker, I would like to bring to the attention of my colleagues the following article published in the September 15, 1986 New York Times. Ursula Schwerin, president of New York City Technical College, concludes that only through stricter handgun control can events such as the recent letter carrier's shooting spree in Oklahoma on August 20, 1986, be prevented.

Again, I commend this article to my colleagues:

TWO SHOOTINGS, ONE LESSON: GUN CONTROL

(By Ursula Schwerin)

On Aug. 12, a 29-year-old student entered the campus of a college and went on a shooting spree that left one faculty member dead and six others injured.

Eight days later an Oklahoma letter carrier killed or wounded 20 of his fellow workers before fatally shooting himself.

Both of these acts were committed by emotionally disturbed people in places where, in effect, they belonged. Van Anthony Hull, the student accused of the shootings at New York City Technical College, had been enrolled at the college's Brooklyn Heights campus for four years.

Pat H. Sherrill was reporting for work at 7 A.M. the day of the murders, wearing his blue mail carrier's uniform and carrying a mail bag just as he would on any other day. Their senseless acts occurred on familiar territory where their presence went unquestioned.

The response about how to prevent similar acts in the future was the same. The president of the National Association of Postmasters called for stepped-up security and the stationing of armed guards and metal detectors in post offices throughout the country. After the shootings at City Tech, dozens of people suggested arming the college's security guards and installing plexiglass office windows to separate staff and students.

At City Tech, I have rejected these recommendations because they are not solutions

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

but, instead, part of the problem. Encasing ourselves in fortresses with armed guards will not guarantee protection from violent acts committed by disturbed individuals. And increasing the weapons we carry will not give us greater security.

The more guns with which our society equips itself, the greater the likelihood for accidents or violent acts involving firearms. Each year, 1,200 people are killed in accidents involving handguns, and someone is injured by a handgun every two and a half minutes. More than 200,000 privately owned handguns are stolen annually. More guns in more hands will serve only to produce a false sense of security and an even more dangerous sense of power.

Moreover, a college campus cannot survive behind barricades and metal detectors. How can a college foster collegiality when its staff speaks with students from behind plexiglass partitions? For an institution that is part of the City University system—with its mission of serving all people, regardless of race, ethnicity or income—this final capitulation to barbarism would be sadder still.

The way to prevent future acts of violence is much more complex. It requires education and the devotion of greater resources toward helping and identifying the emotionally ill. Above all, it means stricter handgun controls.

Federal legislation requiring background checks and a 21-day waiting period for the purchase of a handgun could have prevented the tragedy at City Tech. If such a bill were law, Van Anthony Hull could not have made a 20-hour sojourn to his boyhood home in Augusta, Ga., and flashed an outdated Georgia identification card as proof of residence for the purchase of deadly arsenal. And a simple background check would have revealed his history of mental instability.

These reforms are supported by the law enforcement community, including the International Association of Chiefs of Police. Their adoption, rather than guns and barricades, is what will help create a safer society—inside as well as outside the ivory tower.

AIDS EPIDEMIC

HON. WILLIAM E. DANNEMEYER

OF CALIFORINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. DANNEMEYER. Mr. Speaker, I commend to the Members' attention the article reprinted below which appeared in the September issue of the American Council On Science and Health News & Views Journal. The author, Ms. Elizabeth Whelan, has a master of public health and is the executive director of the American Council on Science and Health.

Her assessment of the public health community's reticence to take the necessary steps to protect the public health in the fare of the AIDs epidemic in American is welcome and long overdue. Ms. Whelan brings a perspective to the crisis which has been obscured too long by the rhetoric of civil rights activists.

THE AIDS EPIDEMIC: MOVING FROM COMPLACENCY TO ACTION

(By Elizabeth M. Whelan)

Acquired Immune Deficiency Syndrome (AIDS) in the United States is one of the gravest public health threats of this century. One would think that in our health conscious society, we would be doing everything in our power to stop the spread of this disease. But we are not. The same population that threw out its muffin mix two and a half years ago because of the purely hypothetical risk posed by trace residues of the pesticide EDB seems oddly blasé about AIDS, a condition which in the past five years has claimed at least 10,000 lives and currently leaves another 15,000 Americans mortally ill.

It is urgent that we now shift from relative complacency to action in preventing future cases of AIDS. We can begin by discarding those naive assumptions and simplistic solutions which to date have so hampered aggressive preventive medicine policy.

MEDICAL TECHNOLOGY WILL SAVE US

We live in an age of great medical confidence about the control of human disease, an age when many young doctors have never seen a case of measles or polio, and once life-threatening infections are cured within days. But we must not be diverted by an assumption that a vaccine or cure for AIDS is imminent. The AIDS virus is highly variable. This could make the development of an effective vaccine difficult, since an individual who was immunized against one variant of the virus might not necessarily be protected against another.

Although genetic engineering techniques offer some hope that a safe vaccine against AIDS might someday be developed, extensive and lengthy testing of any new vaccine would be required before it could become available to the general public. Thus, a vaccine against AIDS is unlikely to be available for many years, if ever.

A cure for AIDS does not appear to be right around the corner, either. To put things in perspective, it is useful to consider that scientists have never developed a cure for a single viral disease, let alone one as challenging as AIDS.

The AIDS virus has a complex life cycle which greatly complicates the search for a cure. Because it essentially becomes part of the cells it infects, it may not be possible to eliminate it completely from the body. Since the virus infects the brain cells, to be effective, a drug must be able to cross the so-called blood-brain barrier (a mechanism whereby substances, including many drugs, are prevented from reaching the brain). And even if a drug can be found to combat the AIDS virus, if it is administered in the late stages of infection, the person's immune system will already have been destroyed. Additional treatment will probably be required to reconstitute the immune system.

It is also likely that any drug treatment for AIDS would have to be given on an intermittent basis for life. Thus, a successful drug would have to be relatively nontoxic and tolerated for long periods of time.

That is a pretty tall order for any drug and so far none has met the challenge.

The viral pathogen here is a formidable opponent. Hundreds of thousands of Americans may die before medical technology conquers AIDS.

THERE ARE RELATIVELY FEW CASES

We have had only a bitter taste of the AIDS entree to come. In addition to the 25,000 cases worthy of the strict definition that the Centers for Disease Control have for AIDS, an estimated 200,000 Americans are now ill with diseases which closely resemble AIDS, the so-called AIDS Related Complex (ARC). Further, as many as two million asymptomatic Americans are infected with the virus and are daily spreading the disease to others. The best guess is that 25-30 percent of the infected population will develop AIDS. In the calendar year 1991 alone there will be some 55,000 U.S. deaths from AIDS, substantially more than the number of deaths attributable to auto accidents. No longer will it be just those of us living in New York, San Francisco, Los Angeles, Miami and Washington who are seeing friends and colleagues die in agony. AIDS is quickly becoming a nationwide problem.

IT AFFECTS "THEM", NOT "US"

Although AIDS did not initially present itself as an equal opportunity disease (90 percent of current cases are homosexual or bisexual men, or IV drug users), there is a good deal of informed concern among epidemiologists that the disease has begun to move outside the original risk groups. A recent study showed that in the New York metropolitan area six of 1,000 women, and eight of 1,000 men who applied for military service were infected with the AIDS virus—a ratio of nearly one to one. Heterosexual transmission of AIDS, while currently accounting for only 1 or 2 percent of the total patient load, has now been convincingly documented. Studies in Haiti suggest that a majority of AIDS cases there are acquired through heterosexual contact. In Africa, heterosexual transmission also appears to be an important mode. There is a potential for AIDS to cause enormous health havoc in that segment of the heterosexual community with multiple sexual partners. In San Francisco, for example, it is estimated that more than 3,000 women may have been exposed to the AIDS virus through sexual contact with bisexual men from June 1984 to February 1985. These women may then have passed the virus on to their sexual partners. Female prostitutes in several American cities have shown evidence of infection with the AIDS virus suggesting they might serve as a source of infection for heterosexual men.

AIDS PATIENTS POSE NO HEALTH RISK IN THE WORKPLACE, IN SCHOOL, ETC.

Although there is scientific consensus that AIDS is almost exclusively spread through the exchange of blood and semen, and that casual contact poses no risk of AIDS, new evidence raises questions about blanket assurances that AIDS patients do not jeopardize the health of others: a substantial minority of AIDS patients develop tuberculosis, a highly communicable disease. The finding renders ridiculous generalized policies about the presence of AIDS victims in public places. It also underscores our need for compassion, not only for those suffering with AIDS, but also for those who, with or without scientific merit, are terrified of becoming ill as result of social interaction with an AIDS patient. Education is our only tool here.

WE ARE DOING ALL WE CAN TO PREVENT THE SPREAD OF AIDS

Spectacular progress has been made in a very short time: defining high risk groups, identifying and isolating the causative viral agent. And much is now in progress: sophisticated surveillance to detect any change in disease incidence and pattens, a search for a vaccine and cure; research into possible cofactors to explain why some infected people develop AIDS and others do not; massive education about how the disease is and is not transmitted.

But there are other options, to date, we have avoided out of fear of being labeled discriminatory or an understandable reluctance to seemingly endorse antisocial behavior. (If AIDS were a disease that predominantly affected people with grey eyes, instead of a vocal, well established, well organized minority group, would we be more aggressively seeking to halt the epidemic?)

A more preventive approach may be in order. Individual states should evaluate the efficacy of classic "tracking" protocols (known as case-contact investigations) in curbing the spread of AIDS. (Tracking has long been used with other sexually transmitted diseases.) Our society's failure during the "liberated" 1970s to intervene in this fashion to stop the epidemic of common and exotic venereal diseases afflicting the gay community is considered by some to be a great failure of public health policy, one which may have left this population vulnerable to the AIDS virus.

An "index" case (here, it would be an individual diag nosed as having AIDS, ARC or antibodies to the virus would be interviewed, names and addresses of sexual contacts would be obtained; these sexual contacts would be notified of possible exposure to the AIDS virus and urged to undergo a blood test to determine if they are antibody positive. If a positive finding is confirmed, the individual would be given specific instructions as to the implications of continued sexual activity of the type that would spread the disease, and further questioned as to names and addresses of his or her sexual contacts, with subsequent public health follow-up of contacts for testing and guidance.

Tracking would be extraordinarily more difficult, time consuming and expensive in dealing with AIDS as opposed to other sexually transmitted diseases. The vast numbers of partners—many of them anonymous—which frequently characterize homosexual encounters, and the relatively long latency period of this disease pose formidable challenges here. Indeed, one might argue that it is already too late to track in the two high risk groups (gays and IV drug users) because such an extraordinarily large percentage of these subgroups is already infected. Case contact investigations may have their most cost-effective value in confronting the possible spread of AIDS in the heterosexual community.

Tracking has not yet begun in any formal way in any state. But a number of states currently are, or are seriously considering, requiring reporting of the names and addresses of individuals diagnosed with either AIDS or AIDS Related Complex. Six states now require physicians to report the names of individuals whose blood shows evidence of AIDS exposure. So a framework for possible future tracking is already being built.

But will tracking of the sexual partners of AIDS and ARC patients—and perhaps those of individuals who in voluntary, random blood screening, are found to test positive—be enough to stymie this epidemic? We will not know until we see the results of these efforts. In the worst possible scenario, should the disease rapidly spread into the general population, mandatory blood screening might have to be considered an option with educational intervention and tracking of sexual partners. Given the current epidemiology of the disease, that is its confinement to two risk groups, general screening is currently impractical. But in early 1986, U.S. Federal health officials acknowledged the usefulness of screening by recommending that high risk individuals regularly and voluntarily have their blood tested.

Surely we will have outcries about the violation of individual rights, and emotional declarations that it is inhumane to terrify an individual who may never develop AIDS by notifying him of his AIDS antibody status. But hopefully, reason and common sense will prevail: The AIDS virus does not have rights, nor do individuals who persist in engaging in activities which put the lives of others at risk. It is blatantly selfish for an individual to reject knowledge that would help him prevent the death of another person. Confidentiality has been an integral part of other preventive medicine protocols, and could be here too. And there is the possibility that such screening and identification might in the future allow for the type of intervention that could reduce the infected person's risk of developing the advanced stages of AIDS.

We should try the unthinkable: providing junkies with clean needles and syringes, along with all the standard education of the health hazards of drug use. Given that this group holds the most potential for introducing AIDS to the general population by means of sexual contact, it's time we remove our ideological glasses and take a close up look at anything that might lessen the burden of this terrifying disease.

FINANCIAL DISCLOSURE, 1985

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. MAZZOLI. Mr. Speaker, it has been my custom to submit a statement of financial disclosure every year that I have served in the House of Representatives. While the law now dictates that Members of Congress submit financial statements in May of each year, I continue to file this more detailed family financial report. In this way, my constituents are kept fully and completely informed concerning my financial status.

The financial statement follows:

Romano L. and Helen D. Mazzoli income and expenses for calendar year 1985—income

Interest and dividends: U.S. Treasury Bills (GS7-2-400-40-3938-01; GT5-2-400-40-3938-01; GL2-2-400-40-3938-01; HK2-2-400-40-3938-01; JF2-2-400-40-3938-01)	$1,786.60
Liberty National Bank & Trust, IRA Acct. 01-527329	915.78
Liberty National Bank & Trust, IRA Acct. 29-508123	167.99
Lincoln Federal Savings & Loan, Acct. 37339-5	225.00
Lincoln Federal Savings & Loan, IRA Acct. 1-01-205323/1-01-205992	243.08
Lincoln Federal Savings & Loan, IRA Acct. 1-01-205694	235.53
American United Life Insurance Co., Policy 1116312	25.77
American United Life Insurance Co., Policy 1011729	13.64
Meritor Savings Bank, Acct. 05-99-76	85.24
Meritor Savings Bank, Acct. 5-18-241	83.23
Meritor Savings Bank, Acct. 05-96-1906	$335.15
Government Services Savings & Loan, Acct. 80-450336-2	68.16
Congressional Federal Credit Union, 62976-0	3.91
Total interest and dividends	4,189.08
Honorariums:	
Seyforth-Shaw, Fairweather & Geraldson, Attys. at Law (February)	1,000.00
Food Service Lodging Institute (February)	500.00
Laffer Institute (March)	1,000.00

Refund	561.00
Louisville and Jefferson County (Kentucky) Tax Due	364.00

TAX REFORM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, September 3, 1986, into the CONGRESSIONAL RECORD:

TAX REFORM

Last week a House-Senate conference committee agreed to the most sweeping revision of the federal tax code in its 73-year history. the bill will affect every American and every corner of the economy. The tax bill will be sent to the House and Senate for one up or down vote, with no amendments permitted. It is almost sure to be approved by Congress and signed by the president.

The effects of this legislation aren't easy to predict, but the bill represents a fundamental change in tax policy. It reasserts the income tax's primary purpose as a collector of revenue, and reverses a 40-year practice of using the code as a major tool for hidden industrial policies and social and economic engineering. It attempts to lessen the importance of the tax code in daily decision-making. It goes a long way toward leveling the economic playing field. It attempts to achieve equity and guarantee that poor people don't pay more taxes than some millionaires, and that people in the middle class will no longer pay taxes at a higher rate than some corporations. The result is a simpler, more efficient code with sharply lower tax rates for both individuals and corporations and restrictions on most loopholes.

The hardest bargaining was over the distribution of tax benefits and burdens. The bill shifts about $120 billion in taxes from individuals to corporations over the next 6 years, ending a 30-year slide in business's share of the federal tax burden. The lower rates in the bill are the real reform, and the overwhelming reason for its appeal. The top individual rate will drop from 50% to 28%. Most taxpayers would fall into a second, 15% bracket. By nearly doubling the personal exemption and boosting the standard deduction, the bill will cut taxes for most people earning less than $20,000 a year. It virtually ends tax shelters and repeals the preferential low rate for capital gains, benefits enjoyed predominantly by the wealthy. Tough minimum taxes make it harder for wealthy individuals and corporations to avoid taxes. The bill is also a major anti-poverty program. The taxes of the poor have risen in recent years, and this bill redresses that by removing over 6 million poor households from the federal tax rolls.

Equally significant, the bill keeps tax benefits important to the middle class. Deductions for mortgage interest and for state and local property and income taxes stay intact. The deduction for Individual Retirement Accounts, though restricted, survives. Other popular deductions—notably the one for consumer interest payments—would be cut back. But for most taxpayers, the rate cuts and increased personal exemption and standard deduction would more than offset any lost deductions. Over 80% of all taxpayers will get a tax cut.

The bill is not without critics. By replacing the current 14 brackets with only 2, the bill drops the appearance of steeply progressive tax rates, once a symbol of the commitment to increasing the equality of income distribution. But the rich have used loopholes and shelters to avoid high tax rates, and the bill takes away their major dodges. The plan does not redistribute the tax burden between the rich and the middle class. Despite claims that the bill eliminates loopholes, many preferences remain, and many new ones were added. Most of the new provisions are narrow, and the sharp reduction in rates means all tax breaks will be worth less. Simplification, always an objective of tax reform, has not been achieved for all taxpayers. Many features of the bill will complicate tax preparation for some people. Moreover, tax reform does not necessarily mean tax relief. The average tax cut would be a modest 6%—between $2.50 and $8 a week for most taxpayers. Some taxpayers will pay more.

The bill could hurt some taxpayers. Some worry that the reduction in the depreciation allowance, coupled with the repeal of the investment tax credit and the loss of preferential rates for capital gains, will depress investment in plants and equipment and hurt competitiveness, especially in capital-intensive industries like steel and autos. Colleges and universities fear that changes in the charitable deduction and limits on the use of tax exempt bonds will cause a drop in gifts to them and slow new construction. Industries like real estate, banking, defense and oil and gas say they have been hit so hard that the entire economy will suffer.

Reformers hope that lower business tax rates will stimulate the economy, offsetting the loss of preferences. The bill cuts the top corporate rate from 46% to 34%. Lower rates and the end of many shelters should lead to more efficient allocation of capital and create a uniform tax burden among individual companies and among sectors of the economy. Individuals and companies should make investments based on their potential for profits, not phony tax losses. By historical standards, the corporate tax burden is still very low, and the new code sets U.S. corporate rates below those of most of its trading partners. But because the tax code interacts with so many aspects of the economy, it is impossible to predict the bill's impact on the economy with certainly. Inevitably, tax reform will have unforeseen consequences.

Even with its flaws, I think the bill is a welcome shift in tax policy. The idea was to make the system fairer, to restore market efficiences to industries that have been stimulated by tax rules, and to take the tax system out of ordinary economic decision-making. More fundamentally, the bill may reduce widespread discontent with the tax system and with government in general. The tax system affects more Americans than any other government program. If it seems to operate unfairly or inefficiently, it erodes public trust in government. As tax breaks multiplied, everyone wanted to exploit old ones and create new ones. Many of the breaks were worthy, but together they made the tax system inconsistent and unfair. This bill breaks that cycle.

No one expects this bill to be the final chapter in tax reform, but I hope that Congress will resist pressure to start adding special breaks back to the fairly rational tax system of this tax bill. It would be best to let tax matters settle for a while.

WHO PAYS FOR PROTECTIONISM?

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. GRADISON. Mr. Speaker, protectionism is costly. Protecting jobs in one sector is paid for in two ways—by lost jobs in other sectors, and by increases in prices paid by consumers.

In this regard, I wish to call to the attention of my colleagues some startling new data on the costs to consumers from protectionism. They appear in the following editorial from the September 13-19, 1986, Economist, and is drawn from a study by the World Bank.

SOAKED BY PROTECTIONISTS

IT IS CONSUMERS WHO PAY FOR THE JOBS THAT TRADE BARRIERS PURPORT TO SAVE

Mention the eighth round of negotiations on the General Agreement on Tariffs and Trade (GATT) which begins in Punta del Este next week, and most people will suddenly remember that they need to top up their drink. Yet buyers of just about everything, from cars to clothes to computers to corn, will pay more for lower quality stuff if these seemingly boring talks in an obscure seaside town in Uruguay are a failure.

All of which illustrates a sad truth. Protectionism costs money and consumers foot the bill. But the particular interest of makers of, say, "rubber shoes with canvas uppers" (tradespeak for trainers) to keep out competitive products overrides the general interest of consumers to keep down the prices of tennis, gym and jogging shoes. So protectionist lobbies continue to get away with import restrictions, voluntary restraint agreements, market-sharing arrangements and 101 other deals that rob the consumer.

COUNTING THE COST

Most such deals are sold to the public, and to the politicians they elect, as necessary to save jobs. It is a spurious pitch by the lobbyists. The World Bank's 1986 Development Report puts the "efficiency loss" of each job saved by protectionist measures in the American clothing industry at $169,600 in 1980; in the European clothing industry at $124,700, also in 1980; and in the American steel industry at $71,100 in 1985. Another study puts the cost of saving a job in the non-leather shoe industry in Britain at about 12 times the cost of adjusting to free trade. It reckons that, to keep British shoemakers permanently in business, the cost (discounted back to today's money) would be £2.35 billion ($3.5 billion), about £117 for every household.

Consumers seldom spot what is happening, except when a trade barrier is suddenly brought between them and their favourite import. A "voluntary export restraint" agreement rationed the sale of Japanese cars in the United States; in 1984 American buyers of Japanese cars found that they were paying an average of $1,300 more per car than they would have done if the Japanese had not been forced to volunteer for anything. Britain has had a similar "agreement" with Japan for years, so the British are less aware that they pay about 15% more than they need to for cheaper Japanese cars.

Since just about everybody wears clothes, the cost of protectionism in textiles and clothing should rouse almost every voter against it. One British study reckons that abolishing the Multifibre Arrangement, which protects textile businesses in the rich countries from third-world competitors, would let Britons pay 5-10% less for their clothes. In the EEC as a whole, the cost of protecting clothing producers was put at $1.4 billion as long ago as 1980; in America, at $1.5 billion.

The cost has certainly risen since then—and it is the poorest consumers that get the worst deal. Think of the costs of protection as a tax, and treat it as a surcharge on the income tax that people pay. That is what the World Bank did; it found that, based on 1984 figures, import restrictions in America amount to an income-tax surcharge of 66% on people earning around $8,000 a year. For those on $60,000, the surcharge falls to 5%.

Since every country is protectionist (though some more than others), all are impoverishing themselves. Trade liberalisation would bring big gains to consumers everywhere, especially if it were extended to farming. On admittedly heroic assumptions, the World Bank reckons that industrial countries would reap an efficiency gain of $48.5 billion (in 1980 dollars) if they unilaterally liberalised their agricultural trade and that developing countries would gain $28.2 billion if they did the same. The only (short-term?) loser would be Eastern Europe, which feeds its cattle subsidised American grains and its people subsidised EEC butter.

So why won't trade ministers be banging their desks in Punta del Este in support of free trade? Blame sectional interests. Producers of uncompetitive products—American semiconductor chips, British coal, French video-cassettes, Japanese rice, Australian cars, Indonesian petrochemicals, Belgian textiles—can bend the ears and swing the careers of local politicians. The loudest voices are those that warn of the social costs of the closure of this factory or that mine, and the votes that can be lost as a result.

The scattered, shotgun interest that consumers have in freer trade is often no match for the rifle-fire precision of those with a narrow vested interest in protectionism. Yet if the negotiators for the 92 countries in the GATT round do not put the consumers first, just about everybody will be a loser, by amounts that it is absurd to foist on ordinary households.

H.R. 5259, ADAMHA

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. WALGREN. Mr. Speaker, I am pleased that the House yesterday passed H.R. 5259, the bill extending research on alcohol, drug abuse and mental health. Undergirding the strong antidrug abuse effort the House adopted last week with my support should be a strong research effort to identify the causes of addiction and to find cures.

I would like to highlight an amendment I authored that directs the National Institute of Mental Health to make the mental health needs of the elderly a priority. I am grateful to the Energy and Commerce Committee for unanimously adopting my amendment.

In light of the "graying of America," the growing number of elderly people, I believe that NIMH should be focusing more attention on a long-overlooked area, the mental health needs of the aged.

The President's Commission on Mental Health estimated that 15 percent of the population at large is at risk for mental illness, but among the elderly, 20 to 25 percent are at risk and in need of mental health intervention. Experts tell us that mental decline is not a normal aspect of aging and much of what was thought to be senility has been found to be an acute—and treatable—mental health problem. Researchers have found that many elderly have been misdiagnosed as "senile" and left untreated when they were actually experiencing depression or anxiety, from involuntary events like loss of a spouse, declining physical health, loneliness, disruption. Additionally, NIMH has estimated that 58 percent of nursing home residents suffer from chronic mental illness, but the 1977 National Nursing Home Survey found that only 20 percent have been diagnosed as having mental illness.

It is our hope that elevating the mental health needs of the elderly in research will create more awareness of these problems, more understanding and ultimately better training of health care personnel. The bill continues an important research effort of the Federal Government.

THE HOOSIER IMPRINT ON WASHINGTON

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, August 20, 1986 into the CONGRESSIONAL RECORD:

THE HOOSIER IMPRINT ON WASHINGTON

Washington city planners are now working on designs for Indiana Plaza, a square on Washington D.C.'s Indiana Avenue. The plaza recognizes the Hoosier contribution to the Nation and its Capital. In a city practically built with Indiana limestone, whose football team fields Indiana-trained quarterback Babe Laufenberg, and whose latest cabinet addition, Secretary of Health and Human Services Otis Bowen, is a former Indiana governor, acknowledging Indiana with a park may seem an unnecessary gesture. But we Hoosiers who work in or visit Washington appreciate it anyway.

The Indiana Washington Society, a club for Hoosier displaced in the capital, has raised $15,000 to pay for improvements. The square's centerpiece is an obelisk memorializing the Grand Army of the Republic (GAR), an organization of Civil War veterans which flourished around the turn of the century.

The statues of two Hoosiers who were well known to those veterans stand in this town. In 1864, an Act of Congress allowed each state to put 2 statues in the Capitol building. Among the bronze and marble likenesses of Will Rogers (Oklahoma) and Queen Lililoukalani (Hawaii) are Hoosier Lew Wallace of Brookville and Oliver P. Morton of Centerville. Both were instrumental in raising the army of Indiana volunteers that stood between the capital city and the Confederate invaders. Both distin-

guished themselves in later careers, Wallace as the author of "Ben Hur," and Morton as a statesman, Governor and Senator.

Indiana's artistic contribution to Washington does not end at those two statues. Three blocks up 7th Street from Indiana Plaza, at the Museum of American Art, visitors can view works by William Merritt Chase, originator of a style of American Impressionism called the "Hoosier School." Here also are two works by Indiana painter Donald Mattison. One, entitled "Indiana Farming," was a rough draft of a mural Mattison designed for the post office in Tipton, Indiana. In 1984, the Museum hosted a travelling exhibit of works by Robert Indiana, the modern artist (known to friends in New Castle, Indiana, as Robert Clark) who took on the name of his home state. His sculpture in New York City's Central Park of the word "love" with its letters stacked and its leaning 'o' became a pop artifact, as much a part of the sixties as lava lamps and beanbag chairs.

Indiana also contributes to the lively arts in Washington. Indiana University and Hanover College theater groups have performed at the Kennedy Center. In February, Joshua Bell, the prodigy violinist from Bloomington, gave a concert at the Library of Congress where Scott Watkins, a pianist from Madison, performed last November.

The state's most evident contribution to the nation's capital is undoubtedly limestone. As a student at Indiana University I noticed that one quality of an Indiana limestone building is its reddish sheen at sunset as angled light hits the stone walls. The same effect can be seen all over Washington at this time of year. The National Cathedral, the Pentagon, several Smithsonian Buildings, a large number of agency office buildings, and most recently the Capitol itself are faced with stone quarried around Bloomington and Bedford. Stonecutters at the Bybee Stone Company near Ellettsville are currently carving column caps to replace the ones crumbling from the Capitol's West Front. The Virginia sandstone of the building's original wall is being replaced by Indiana limestone, rated by the Architect of the Capitol as a superior building material.

Indiana sends thousands of tourists to Washington each year. In many of the landmarks they visit are reminders of their home state. Hoosiers touring the FBI building, for instance, will see weapons used by John Dillinger's gang to raid banks in Indiana and across the Midwest. In the Air and Space Museum are planes flown by the Amelia Earhart, once Purdue's Dean of Women.

Numerous items from Indiana's past can be seen in the Museum of American History. In that museum's exhibit of inventions submitted to the U.S. Patent Office are many models from Indiana inventors. Richard J. Gatling of Indianapolis applied on November 4, 1862 for a patent on his Improved Revolving Machine Gun. His "improvement," which can be seen in the exhibit, revolutionized warfare in the latter 19th century. With the Gatling gun are models of the Cox and Fanning school desk, made in Richmond, Indiana, which was familiar to schoolchildren across the country early in this century, and the Bevil windmill, built in Indianapolis.

In the automotive section is everything from Elwood Haynes's two-cycle, single-cylinder, one-horsepower horseless carriage built in Kokomo in 1894 to the STP-Brawner Hawk that carried Mario Andretti to the winner's circle at Indianapolis in 1969 at an average speed of 156.8 mph.

The American Maritime Enterprise Exhibit has a display on the propeller ship Indiana, one of the first steamships to use screw propulsion. Built in 1858 in Vermillion, Ohio, the Indiana plied the Great Lakes for ten years before it sank in Lake Superior. In 1979, it was rediscovered and divers working in 32 meters of near-freezing water raised the remnants of its powerplant. No other commercial maritime engine or propeller of comparable antiquity is known to survive. Museum officials hope to reconstruct the Indiana's entire engine and include it in the display. Also in the maritime exhibit are models of tugs used on the Ohio River such as the Jack D. Wofford, built in 1966 for American Commercial Barge Lines.

Our state's most notable contribution to the nation's capital, however, is undoubtedly the people: Two presidents (Benjamin Harrison and William H. Harrison), four Vice-Presidents, a Supreme Court Justice, 14 cabinet members including 3 Secretaries of Agriculture and 3 Secretaries of State, 3 Postmasters General, and other generals and legislators. They have all left their mark. Almost every week I discover new evidence of the contributions of Hoosiers. This list is far from complete. Those given here are just a few examples of the many ways in which Indiana has placed its imprint on Washington.

DR. WILLIAM SPEIGHT AND CONGRESSMAN AUGUSTUS HAWKINS; MAKING MAJOR CONTRIBUTIONS TO THE LARGEST BLACK COMMUNITY ON THE WEST COAST

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. MITCHELL. Mr. Speaker, in 1967, shortly after "the long hot summer" of 1965 when riots exploded in Watts, the largest black community on the west coast, the Watts Health Center was first opened to render health care to a struggling community.

The following editorial, which appeared in the Washington Post on September 7, is a tribute to Dr. William Speight of the Watts Health Center, and to my good friend and colleague Congressman AUGUSTUS HAWKINS, chairman of the House Education and Labor Committee, for their significant contributions to this community.

[From the Washington Post, Sept. 7, 1986]

AN OASIS OF HOPE IN THE WATTS COMMUNITY

(By Colman McCarthy)

LOS ANGELES.—At the Watts Health Center, which serves about 180,000 patients a year from the largest black community on the West Coast, Dr. William Speight is the senior physician. Of the 33 full-time doctors, he has been here the longest—nearly 20 years. That goes back to 1967 when the center, about seven miles southeast of downtown Los Angeles, served its first patient.

At the time, the streets of Watts were like its spirit—smoldering and recovering. Two years before, when "burn baby burn" was the call to action and "the long hot summer" was the nervous phrase of politicians fearing the worst, Watts exploded in blood-flowing riots.

The rampage left 35 dead, 900 injured, more than 4,000 arrested and nearly $200 million in property damage. The National Guard sent in 15,000 troops, with the U.S. Army adding three brigades of its 40th Armored Division. Los Angeles mayor Sam Yorty blamed the communists. The communists, in Pravda, ran a cartoon showing Lyndon Johnson dispatching troops to two war zones, Vietnam and Watts.

Dr. Speight remembers those days. But he would rather talk about how the community, spent of it rage, revived itself to organize such lasting strength as the health center. Speight, a graduate of Howard University Medical School, estimates that he has seen tens of thousands of patients. Ranging from family to emergency medicine, he averages between 35 to 45 patients a day.

In a clinic hallway, Speight said, "We're giving a great amount of good health care here to a larger number of people than in 1967. We've made quite an impact on the health of the community." As to why he has stayed all these years, Speight, in eloquent simplicity, says: "I went into medicine to render service where it was needed. I found my place."

One of the reasons I stopped by the Watts Health Center the other day was sentimental. I was here on opening day in September 1967, working at the time for the Office of Economic Opportunity, which had funded the center for $2.4 million. Although spending for the war in Vietnam was about to drain any kind of meaningful money for the war on poverty, federal officials spoke then in language that is heard nowhere today.

In a speech at dedication ceremonies for the center, Sargent Shriver said that it represented "a human victory. It will not treat bodies, it will deal with people. It will not be a financial success, it will be a human success . . . Do we have the psychic strength to eliminate poverty? Are we going to buckle under to the pressure of riots? Can we stretch ourselves to include all Americans in our national pride? This is how a country grows to greatness."

Two decades later, Watts, and the rest of the country, has an administration that has shifted from a war on poverty to a war on the poor. Despite heroic citizens like William Speight and successes like the health center, Watts remains an enclave of victims. In 1965, two weeks after the riots, Gov. Edmund Brown appointed former CIA director John McCone to head a commission to recommend rungs on which Watts could ladder up from poverty. The McCone Report came back with the inevitable list: better schools, better job programs, better transportation, housing and social services.

In 1985, the Los Angeles county and city human-relations commissions did a "McCone Revisited" study. Among the findings:

"Of the 600 low-cost housing units authorized, only 300 have been built during the 19 years since the riots, and no single-family housing has been built in the area."

"While black infant mortality declined from 26.8 per 1,000 births in [Watts], it is still more than twice the 10.5 per 1,000 rate for white infants."

"Unemployment for black teenagers is close to 50 percent."

"McCone Revisited" concluded that the blights today "are substantially the same as those in 1965."

In Congress, Watts has been served since 1962 by Rep. Gus Hawkins, a liberal Democrat who has not become lost in the neo-liberal or neo-conservative clouds of mist now

turning American politics into a dull sogginess. Hawkins is 79 and the chairman of the House Education and Labor Committee through which much of the current misery of the poor passes. His liberalism has remained impeccably conscientious as well as practical: Initial investments of federal money into social programs save enormous costs later. The investments have now been slashed, with larger and larger bills soon coming due.

At the Watts Health Center, the savings have been large. If the cost-analysis crowd needs a precise number, let it spend time talking with the staff and the families it serves. Start with William Speight. His contributions, in skill and soul, have probably been the most cost-effective of all. He has saved lives.

CONGRESS INTENDED THE NORTHWEST POWER COUNCIL TO BE MORE THAN A MERE "ADVISORY" BODY

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. SWIFT. Mr. Speaker, just under 6 years ago, Congress enacted the Pacific Northwest Power Planning and Conservation Act. As the prime sponsor of H.R. 8157, the House substitute to S. 885, I have maintained a special interest in the successful implementation of this legislation, which is of such vital importance to the Northwest region of the country.

Since enactment of the Northwest Power Act, many people have placed apparently inconsistent interpretations on several of the provisions contained in the act. These statements, from time to time, have been made a part of the record, including one as recently as August 15, 1986. I believe that it is important to clarify the record regarding this most recent matter, which has to do with the function and authority of the council authorized to be established under section 4 of the act.

Before doing so, however, I would like to describe the legislative history in the actual legislative context, reiterating certain points which I made in the RECORD of December 1, 1980, shortly before the President signed the bill into law. As I stated on that occasion:

"There is * * * no conference report on this bill. There is no conference report because there was no conference. There was no conference not because the Senate was necessarily pleased with every provision of the House-passed bill, but because both House and Senate sponsors of the bill were very well aware that it was imperative for this bill to be signed into law this year (1980). The luxury of a conference that might, at this stage in the session, effectively scuttle the bill, was not something that the sponsors in either House could afford."

Because of this legislative context, the Senate accepted the House bill. Nothing can change that fact. I do not mean to reduce the significance or value of the contributions of the Senate or of individual Senators to the development of this act, for those contributions were vitally important. I simply mean to point out that the bill eventually enacted into law was originated in the House, and accepted by the Senate, and that in the absence of a conference report the legislative history created in the House should govern.

This brings me to the main point of my remarks today regarding the Northwest Power Council. It is clear from the plain language of the act, as well as from the legislative history, that the Northwest Power Council is more than a mere "advisory" body, as was specifically suggested in the RECORD of August 15, 1986.

First, section 4(d) of the act states that "all actions of the Administrator—of the Bonneville Power Administration—shall be consistent with the plan—adopted by the council—and any amendment thereto, except as otherwise specifically provided in this act." It doesn't say that the Administrator's actions "may" be consistent with the council's plan. Nor does it say that the Administrator's actions shall be consistent with the plan "to the extent he determines feasible," as did section 4(d) of S. 885 as originally passed by the Senate. It clearly states that the Administrator's actions "shall" be consistent with the plan.

Second, this clear statement was included in H.R. 8157, the House substitute which I introduced, for the first time; therefore, the floor debate in the House is particularly important to an accurate interpretation of the legislative history. As Mr. FOLEY of Washington, a cosponsor of H.R. 8157, stated on September 29, 1980, the first day of the House floor debate:

"The heart of the regional planning provisions, the council's role relative to BPA has become much more clearly defined as the bill progressed. Instead of a mere planning body, or a mere advisory body, it now has a mix of mandatory and discretionary oversight functions and control."

Both the plain language of the statute, as well as the relevant legislative history, show that the council is to be more than merely "advisory." This does not mean that the council is a Federal agency. In fact, section 4(a)(2)(A)(iv) of the act specifically states that the council, "except as otherwise provided in this Act, shall not be considered an agency or instrumentality of the United States for the purpose of any Federal law * * *." Furthermore, section 4(a)(3) of the act declares that "[t]he members and officers and employees of the council shall not be deemed to be officers or employees of the United States for any purpose." The council is a creature of the laws of the four States of the Pacific Northwest. It was established pursuant to the laws of those States, not pursuant to Federal law; although Congress, in section 4(a)(2) of the Northwest Power Act, consented to an interstate compact that would establish the council, the council itself was established by the States. Its members are appointed according to the laws of each State, and serve at the pleasure of the States.

No constitutional difficulty arises by virtue of the fact that the council, a creature of the four Pacific Northwest States, exercises certain functions that constrain the actions of the BPA Administrator. The ninth circuit court of appeals recently, and in my view correctly, upheld the constitutionality of the Northwest Power Council and its authority vis-a-vis the BPA Administrator. Judge Alfred T. Goodwin, writing for the court, stated:

"There is no bar against Federal agencies following policies set by nonfederal agencies. The Federal Government has in fact agreed to be bound by State law in several areas. * * * The Federal Government can be subject to State law where there is a clear congressional mandate and specific legislation which makes the authorization of State control clear and unambiguous." (*Seattle Master Builders* v. *Pacific Northwest Electric Power and Conservation Planning Council,* 786 F.2d 1359, 1364 (1986).

Nor does the recent decision of Supreme Court in Bowsher versus Synar create any constitutional problems for the Northwest Power Council. In striking down Gramm-Rudman's automatic sequestration provisions, the Supreme Court did not rule that Congress cannot constitutionally vest authority over executive functions in an entity beyond the President's power of removal. What it did rule is that Congress cannot reserve for itself executive authority, including the power to remove officers who exercise executive functions.

Throughout the court's decision in Synar, the issue is clearly presented as one of the separation of legislative and executive powers within the Federal Government. As Chief Justice Burger stated for the majority:

"By placing the responsibility for execution of the Balanced Budget and Emergency Deficit Control Act in the hands of an officer who is subject to removal only by itself, Congress in effect has retained control over the execution of the act and has intruded into the executive function. The Constitution does not permit such intrusion." (*Bowsher* v. *Synar,* No. 85-1377 (U.S. Supreme Court, decided July 7, 1986).)

As Judge Goodwin pointed out in the Seattle Master Builder case, "[b]ecause Congress neither appoints nor removes the members of this council, the balance of powers between Congress and the President is unaffected." (Seattle Master Builders, supra, 1365)

Mr. Speaker, the Pacific Northwest Power Act has worked well. One of the primary reasons it has done so is because in that act Congress consented to the establishment, by the States, of a Northwest Power Council which does exercise a certain limited amount of authority over the BPA Administrator. Working out the exact nature and parameters of that authority is an evolving process, but it is important that there be no confusion about the fact that the council is more than a mere "advisory" body.

TRIBUTE TO CPL. JOSEPH E. VITTORI

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. MAVROULES. Mr. Speaker, 35 years ago the United States was heavily embroiled in a war with North Korea. During that war, we lost a great many good men, all of whom were heroes in their own right. This week, the

city of Beverly, MA, is honoring one of those men—Cpl. Joseph E. Vittori—Beverly's only recipient of the Congressional Medal of Honor. Corporal Vittori received his medal posthumously for "conspicuous gallantry and intrepidity at the risk of life above and beyond the call of duty while serving in the Marine Corps Reserve against enemy forces in Korea.

I am enclosing for the RECORD a copy of his citation, signed by then President Harry S Truman which tells the story of Corporal Vittori's valorous actions far better than I. Now I take this opportunity to express my own thanks and admiration for this man who courageously and selflessly gave his life for his country.

The President of the United States in the name of The Congress takes pride in presenting the MEDAL OF HONOR posthumously to

CORPORAL JOSEPH VITTORI, UNITED STATES MARINE CORPS RESERVE

for services as set forth in the following citation:

For conspicuous gallantry and intrepidity at the risk of his life above and beyond the call of duty while serving as an Automatic Rifleman in Company F, Second Battalion, First Marines, First Marine Division (Reinforced), in action against enemy aggressor forces in Korea on 15 and 16 September 1951. With a forward platoon suffering heavy casualties and forced to withdraw under a vicious enemy counterattack as his company assaulted strong hostile forces entrenched on Hill 749, Corporal Vittori boldly rushed through the withdrawing troops with two other volunteers from his reserve platoon and plunged directly into the midst of the enemy. Overwhelming them in a fierce hand-to-hand struggle, he enabled his company to consolidate its positions to meet further imminent onslaughts. Quick to respond to an urgent call for a rifleman to defend a heavy machine gun positioned on the extreme point of the northern flank and virtually isolated from the remainder of the unit when the enemy again struck in force during the night, he assumed position under the devastating barrage and, fighting a singlehanded battle, leaped from one flank to the other, covering each foxhole in turn as casualties continued to mount, manning a machine gun when the gunner was struck down and making repeated trips through the heaviest shellfire to replenish ammunition. With the situation becoming extremely critical, reinforcing units to the rear pinned down under the blistering attack and foxholes left practically void by dead and wounded for a distance of 100 yards. Coporal Vittori continued his valiant stand refusing to give ground as the enemy penetrated to within feet of his position, simulating strength in the line and denying the foe physical occupation of the ground. Mortally wounded by enemy machine-gun and rifle bullets while persisting in his magnificent defense of the sector where approximately 200 enemy dead were found the following morning, Corporal Vittori, by his fortitude, stouthearted courage and great personal valor, had kept the point position intact despite the tremendous odds and undoubtedly prevented the entire battalion position from collapsing. His extraordinary heroism throughout the furious night-long battle reflects the highest credit upon himself and the United States Naval Service. He gallantly gave his life for his country.

/S/ HARRY S. TRUMAN.

AGRICULTURAL EXPORTS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, September 10, 1986 into the CONGRESSIONAL RECORD:

AGRICULTURAL EXPORTS

Over the past few years, many of us have felt that boosting agricultural exports was the best way to improve the farmer's plight, giving him a fair return on his investment and labor. Congress last fall passed a new farm program with aggressive export promotion as its major theme. It reduced our farm support prices in order to make our commodities more competitive overseas, and set up several export promotion programs. America was poised for a major farm export boom. Yet none has happened. Even with the devaluation of the U.S. dollar further reducing the price of our goods overseas, we have not seen a rebound in exports. Agricultural exports, $44 billion in 1981, fell to $31 billion last year. The latest estimates are that they will be down again in 1986, to less than $27 billion. There is growing concern that agricultural exports will never return to the glory days of the late 1970's.

To add insult to injury, imports have been increasing—to the extent that the United States, the world's greatest food producer, recently became a net agricultural importer. In May, agricultural trade recorded a deficit, after more than twenty years of continuous monthly surpluses. Expanded coffee imports at higher prices were a major factor. Moreover, transportation advances have allowed record imports of fresh fruits and vegetables. Brazilian growers, for example, can produce juice oranges at one-third the costs of Florida growers. Mexican growers supply more than 70 percent of our winter vegetables and control half of the market in other months. Even wheat is being imported from Canada. But overall, the major factor in our declining trade balance has been our falling exports.

There are several reasons for the continued slump in U.S. exports. First, although the U.S. dollar declined sharply against many major currencies, it did not weaken against the currencies of our major export competitors, such as Canada, Australia, and Argentina. Second, many importing countries have been delaying their purchases in anticipation of the lower U.S. commodity support prices to take effect this fall. Third, many of our export competitors are determined not to lose their market share. The European Commodity in particular has shown a willingness to subsidize its agricultural exports as much as needed. Fourth, strong U.S. export promotion schemes at times run into State Department opposition because they can undermine foreign policy objectives and cause major rifts with our allies. Fifth, falling oil and raw material prices and burdensome debt have sharply cut the buying power of many Third World importers. Sixth, there has been a growing number of complaints by foreign buyers about the quality of U.S. grain.

Perhaps the most import factor in our export slump is the structural world food oversupply. Global surpluses have developed as other exporting countries have boosted production, and as countries that experienced food shortages in the mid-1970's have aggressively improved their farm production incentives and techniques. The results have been remarkable. Countries like China and India, which only a few years ago were major grain importers, are now exporters. Although world food demand will continue to grow, experts believe that the developing countries may be able to meet most of their increasing food needs from their own production. The global food market has tightened considerably.

However, it would be premature to abandon our efforts to boost U.S. farm exports. Exports sales are enormously important to U.S. farmers, and our recent farm policy changes should improve our competitive position. Yet we must recognize that when we pin our hopes on exports, some instability is inevitable because of the ever-changing world supply/demand picture. The boom in U.S. exports in the late 1970's was driven primarily by sharply increased world demand combined with droughts and major crop production failures overseas. These same conditions do not apply today. They are not factors that the U.S. control.

Nonetheless, there are several steps that we can and should take to improve our agricultural exports. We must revise our remaining protectionist commodity programs, such as the sugar program, which are impediments to getting other countries to reduce their barriers to our products. We must continue our efforts to get agriculture on the "fast track" of international trade negotiations under GATT, in order to reduce international subsidies of agricultural exports. We must do what we can to assist the debt-ridden economies of our Latin American neighbors, which represent our biggest potential growth market. We need to improve the quality of our grain exports, increase acreage set-asides to reduce surpluses, and pursue more barter agreements. We should also concentrate our efforts on selling high-valued, processed food products, rather than just grain.

We should also provide export subsidies on a selective basis to counter unfair trade practices by our competitors, expand our food aid programs abroad, and consider new approaches for boosting exports (such as the "marketing loan" concept under which the government makes up the difference between the government loan rate and the world price). However, major new export subsidies could face some resistance. Congress in recent years has shown an extraordinary willingness to support agriculture, as farm program costs have increased from an average of less than $3 billion per year before 1981 to some $30 billion this year. Export subsidies alone now total more than $3 billion anually. It is uncertain to what extent taxpayers would be willing to provide additional major export subsidies at a time when the federal deficit crisis has forced sharp cutbacks in many other popular programs.

Most experts are predicting that our farm export picture will improve later this fall and throughout 1987. There is much we can and will do to ensure an improved world market share. Yet agricultural exports cannot be expected to return soon to the boom levels of the 1970's. That would take more than US farm policy changes; it would

take a return to very favorable world market conditions like those in the 1970's. Agricultural exports will not be a miracle cure for the American farmer, but they will be a plus.

A TRIBUTE TO THE 91ST ANNIVERSARY OF THE ALLIANCE OF POLES OF AMERICA

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. HERTEL of Michigan. Mr. Speaker, September 22 marks the 91st anniversary of service by the Alliance of Poles of America which, although founded in Ohio, is now extremely strong and active in my district in Michigan.

A fraternal organization, the Alliance of Poles was founded to advance and preserve the culture, music, language, and traditions of Poland. Since its inception in 1895, the alliance has continued to grow and prosper. In 1925, the work and expansion of the alliance necessitated the building of a national headquarters.

The Alliance of Poles of America has an admirable record of service. During both World Wars, the alliance mobilized great amounts of time, money, and other contributions to assist in the war effort, particularly in aid of the countless suffering citizens of Poland.

Today, the Alliance of Poles continues the tradition of giving, both to its members in the United States and to the oppressed people in Poland. The alliance publishes a semimonthly newsletter, the Alliancer. It also provides full insurance coverage, low interest loans, and full credit union services. In addition, the alliance provides scholarships, arranges tours, and sponsors radio shows, plays, and other cultural activities. Sports programs involve old and young alike in activities such as skiing, golf, bowling, and soccer. There is also a ladies' guild, a Polish-English library, and a senior citizens' club.

The Alliance of Poles provides more than just community service in America. It can unfailingly be depended on to give to any needy cause in Poland. It sends everything from money to clothing for causes ranging from Poland's blind children to medical ships and more.

The sacrifices and successes of the Alliance of Poles could never be fully recognized, nor could each person be individually commended for the generosity of spirit which has been apparent over the last 91 years. I ask my colleagues to join me in commending, as a whole, the Alliance of Poles of America. They certainly deserve our recognition and support.

WORLD TRADE TALKS IN URUGUAY

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. ALEXANDER. Mr. Speaker, this week the member nations of the General Agreement on Tariff and Trade [GATT] are meeting in Punta del Este, Uruguay. Every American producer for export in international trade will certainly be interested in the progress of the talks as the future of farmers and manufacturers will be affected.

I include a review prepared by the CRS for the RECORD:

WORLD TRADE TALKS

An agenda and starting date for a new round of multilateral trade negotiations (MTNs) to revise the General Agreement on Tariffs and Trade (GATT) is expected to be set this September in Punta del Este, Uruguay, at a meeting of trade ministers of member countries. The actual negotiations will likely begin in early 1987. As it has since the establishment of GATT in 1947, the United States has taken the lead in calling for a new round of MTNs. Agricultural issues will be prominently featured in this new round, largely at the insistence of the United States, which has seen its farm exports drop 37 percent over the past six years. At the September ministerial meeting the United States is expected to propose "fast track" negotiations on agricultural trade issues with the objective of completing them in 2 to 3 years, rather than the 4 to 10 years likely to be needed for other GATT matters.

WHAT'S AT STAKE FOR U.S. AGRICULTURE

WHAT IS THE GATT?

The GATT is a document of rights and obligations that individual sovereign nations have agreed to observe in conducting world trade. Since the United States and 22 other countries signed the GATT in 1947, its membership has grown to include 92 contracting parties, 31 countries that apply it *de facto*, and one country that has acceded to it provisionally. Although these countries account for nearly 90 percent of world trade, a number of significant players in trade remain outside the GATT, most notably the Soviet Union. China is also a nonmember, but has announced its intention to join.

In addition to a code of principles and rules for the conduct of international trade, the GATT provides a framework for consultation, dispute settlement, and negotiation on trade issues arising among its contracting parties.

A common misunderstanding of the GATT is that it has the power to enforce its rules. In fact, it has no enforcement mechanisms and at best performs a mediating role in world trade. All decision-making bodies of the GATT are composed of representatives of contracting parties, and decisions are made on a consensus basis. The need to reach agreement among all concerned members is often difficult but has been perceived by members as necessary since most countries, including the United States, are unwilling to cede control over national trade policies to an international body.

The GATT is an evolutionary product which represents a commitment on the part of its signatories to a *progressive* liberalization of world trade within the multilateral context. The GATT recognizes the incremental nature of trade liberalization and thus also serves as a forum for multilateral trade negotiations to revise or expand the principles contained in the General Agreement.

Negotiations under the GATT are carried out in sessions, termed "rounds," that often last several years. There have been seven of these rounds since GATT's inception, the last of which ended in 1979 (the Tokyo Round, 1973-79). New rounds are generally prompted by a desire or perceived need to broaden or clarify prevailing GATT rules. The eighth round scheduled this fall is no exception, particularly in the area of agricultural trade.

CONGRESS' ROLE IN THE UPCOMING ROUND

Although the Administration, through an interagency process, sets the agenda and objectives for the United States and does the actual negotiating, Congress retains a powerful voice in MTN rounds.

Before the United States can fully participate in a new round of MTNs, Congress must grant authority to the President, and through him to negotiators headed by the U.S. Trade Representative (USTR), to negotiate both tariff and nontariff barriers to trade. Congress began delegating authority to the President to negotiate and proclaim reductions in tariffs under the Reciprocal Trade Agreements Act of 1934.

This authority has always been subject to specific congressionally mandated conditions and limitations. Congress last gave the President basic tariff negotiating authority in the Trade Act of 1974 and extended this authority through January 2, 1980. Congress also authorized the President to negotiate nontariff barriers and extended this authority to January 2, 1988.

Congress must grant similar authority to the President for U.S. participation in the upcoming round. Several bills granting that authority are currently pending before Congress. However, many of these bills contain a variety of other trade provisions that the Administration does not support. The Administration reportedly will wait until after the November elections to request legislation authorizing U.S. participation in the new round in the hope that protectionist sentiment in the Congress will have dissipated.

Whereas tariff concessions granted in a MTN have become effective for the United States by Presidential proclamation alone, and have not needed specific congressional approval, nontariff barrier agreements become U.S. law only if implementing legislation is passed by Congress and signed by the President. This requirement imposes some limitations on U.S. negotiators, who must remember that review and final approval of agreements negotiated in the GATT rests with the U.S. Congress.

AGRICULTURE AND THE GATT

Critics have charged that, up to now, agriculture has been largely ignored or inadequately dealt with under the GATT. They contend that as these inadequacies have become more and more evident over the past few years, confidence in the entire GATT system has been eroded. Unresolved agricultural trade issues, such as export subsidies and quantitative import restrictions, have become critical sources of conflict among the United States and its trading partners, notably the European community and Japan, as global economic recession and worldwide surpluses of agricultural commodities have fueled protectionist pressures and intensified competition for stagnant world markets.

By most accounts, GATT has been relatively successful in dismantling tariff barriers to trade, including those applied to agriculture, because it has traditionally focused its attention on this area. But, because of this focus on tariffs, GATT has been more successful in liberalizing trade in industrial products which have been more

widely protected through tariffs than have agricultural products.

The relative lack of success in removing trade barriers in agriculture is due largely to:

(1) special provisions for agriculture in the GATT;

(2) widespread use of nontariff barriers—such as voluntary export restraint agreements, variable levies, and quotas—in agriculture and the difficulties in negotiating their removal; and

(3) the strong links between individual nations' domestic agricultural policies and trade.

These issues, along with the GATT dispute settlement process itself, are critical areas for attention in the new round. Most trade analysts agree that progress in these areas, particularly in dealing with the trade effects of domestic agricultural policies, is essential for GATT to continue as a viable mechanism for facilitating world agricultural trade. However, they also tend to be somewhat pessimistic about the outcome of the new round, given the difficulties inherent in addressing sovereign domestic agricultural policies within a multilateral context.

AGRICULTURE'S SPECIAL STATUS

There are two major exceptions to the basic GATT principles, allowing export subsidies and quantitative restrictions in agricultural trade, that give agriculture a special status under GATT. This special treatment of agriculture in the GATT essentially reflects the domestic agricultural policies of most member countries, including the United States, which are designed, in part, to protect farmers from adverse effects of free market forces.

These exemptions for agriculture are contrary to the basic GATT goal of trade liberalization in that they continue to provide a precedent for other members to use restrictive measures to protect their agricultural sectors. They also provide countries with a rationale for pursuing domestic policies which may adversely affect the trade of others.

First, Article XVI contains a general prohibition against the use of export subsidies. However, it only dissuades member countries from subsidizing exports of primary (nonprocessed) products, whether agricultural or nonagricultural, enjoining the GATT participants to commit themselves to "seek to avoid" the use of export subsidies on these products. Moreover, if contracting parties do apply export subsidies on primary products, they should do so in a manner that will not give them "more than an equitable share of world export trade" in the products concerned.

What constitutes an "equitable share", however, is not defined precisely in GATT rules. This special treatment has led to numerous trade disputes within the GATT and is currently the most contentious agricultural trade issue between the United States and the European Community.

Second, Article XI of the General Agreement contains a general prohibition on the use of quantitative restrictions, such as quotas, by the contracting parties. There are, however, three exceptions to this general prohibition that relate to agriculture, the most important of which permits import restriction agricultural or fisheries products where such restrictions are necessary to the enforcement of domestic marketing or production restriction programs or for the removal of temporary surpluses.

In addition to this general exception to Article XI, in 1955 the United States was granted a special waiver of its obligations under Article XI (as well as Article II concerning the non-discriminatory application of concessions) to reconcile provisions in domestic law with its international obligations under GATT.

The United States requested the waiver because of a 1951 amendment to its "Section 22" import relief law which required that no trade agreement could be applied in a manner inconsistent with Section 22's requirements. Section 22 authorized the President to impose fees or quotas on imported agricultural commodities that render in effective or materially interfere with the operation of any U.S. Department of Agriculture domestic commodity program whether or not it included production or marketing controls. This now famous waiver, which effectively permits the United States to apply unilaterally quantitative restrictions on a wide range of agricultural products, further highlights the special status of agriculture in the GATT.

The United States and other GATT members have stressed the need to bring agriculture more fully under GATT rules, which means addressing those issues that give agriculture its special status. Any progress in eliminating quantitative restrictions on agricultural trade will require the United States to put its special Section 22 waiver on the bargaining table, and U.S. officials have indicated a willingness to do so. Some analysis, however, believe that it is unlikely that the United States will give up this protection in the face of powerful pressure from domestic farm lobby groups whose commodities are currently protected under Section 22 imports quotas. (Quotas are now in effect for peanuts, cotton, milk and various other dairy products.)

The same holds true with regard to the European Community and its use of agricultural export subsidies. The United States has repeatedly insisted that the new round should seek to phase out all export subsidies with only very limited exceptions, such as food aid donations. The European Community's Common Agricultural Policy (CAP), however, is predicated on the use of export subsidies to maintain high domestic farm prices.

EC officials, who face tremendous political pressure at home to maintain this practice, have continued to resist efforts to have agricultural export subsidies discussed in the new round. Recent press reports indicate that a stalemate between the United States and the EC on this issue threatens to derail the upcoming talks.

NONTARIFF BARRIERS

Nontariff barriers to trade, such as licensing procedures, technical and administrative requirements, voluntary export restraint agreements, excessive health and sanitary regulations, import quotas, and variable levies, are widely used to protect agriculture.

Reductions or elimination of nontariff barriers have been difficult to negotiate within the GATT framework for a number of reasons. First, nontariff barriers are not as "transparent" as tariffs, which are clearly visible to all trading partners and, therefore, easier to negotiate. Second, many countries consider their nontariff barriers to be part of their domestic agricultural policy, and therefore not negotiable under GATT. And third, since many nontariff barriers are inconsistent with GATT rules, countries adversely affected by NTBs are unwilling to grant concessions in exchange for the removal or reduction of measures that should not have been imposed by their GATT counterparts in the first place.

The United States has been particularly concerned with EC and Japanese nontariff barriers to U.S. farm exports. According to officials in the Office of the U.S. Trade Representative, the European Community's variable levy is probably the single most important barrier to U.S. agricultural exports. (A variable levy is, in effect, a tax on imports which is constantly being adjusted to make the imported product noncompetitive with the domestic product.) Announced U.S. objectives for the new round in this area include increased market access through the phase-out and elimination of access barriers as well as greater harmonization of animal and plant health-related regulations that have an impact on international trade. Other options to reduce nontariff barriers include bringing bilateral voluntary export restraint agreements under GATT rules and establishing increasing minimum access commitments or maximum self-sufficiency ratios in order to reduce the effects of domestic support policies and ensure market access.

EFFECTS OF DOMESTIC POLICY ON AGRICULTURAL TRADE

The widely acknowledged link between domestic agricultural policies and trade make the use of adjusting domestic policies to facilitate trade an important and contentious issue in multilateral trade negotiations. All of the issues discussed above are tied to this.

Almost all countries pursue agricultural policies that provide some degree of protection to their domestic producers. The United States is no exception. Despite enjoying a clear comparative advantage in many agricultural products over other nations, the United States still finds it necessary to employ a variety of measures that protect domestic producers from foreign competition in both U.S. and third country markets, as well as to operate a number of programs to support farm income and prices, and to subsidize farm exports.

Many other countries, without the advantages enjoyed by the United States, also find it necessary to employ domestic policies that have hindered free trade. The EC and Japan have domestic policies that particularly tend to distort trade. The EC's CAP both significantly limits imports and heavily subsidizes exports. Japan's agricultural policy, however, primarily limits access to Japanese markets in order to maximize self-sufficiency and maintain farm income at a level equal to urban income.

Once these types of programs and policies are in effect they are extremely difficult to reduce or remove. A case in point was the Reagan Administration's attempts in both 1981 and 1985 to reduce the Federal Government's support of agriculture. Opponents countered that the safety net provided by Federal support was essential to protect the declining farm sector and were successful in maintaining a relatively high degree of Government support to farmers. The political strength of the farm sector in the United States, Japan, and EC as well as in other GATT countries will continue to make it difficult to reduce the trade effects of domestic farm programs.

There are, however, some indications that progress in this area of negotiations may be possible. First, there appears to be a growing appreciation on the part of major trading countries that it is the trade effects of

domestic polices—and not the domestic policies themselves—that would be subject to negotiation. Although some modification of domestic policies may have to result, neither the objectives of the domestic policies, nor the instruments used, would have to be replaced on a wholesale basis.

Second, there has been some, albeit limited, progress in strengthening GATT provisions on export subsidies. The next logical step may be to strengthen GATT rules and principles with respect to domestic subsidies and other trade-affecting policies. In fact, if the United States wants to address export subsidies, it can expect to have a number of its own domestic subsidies, such as target prices and marketing loans, put on the bargaining table.

Finally, the strongest factor encouraging reforms in domestic agricultural policies is the growing budgetary cost of these programs, especially in the United States and the European Community. Efforts to reduce the cost of domestic support programs may not only result in reduced budget deficits, but also in reduced trade distortions.

How might these reforms be accomplished? Proposals include: (1) developing international arrangements for consultation among agricultural and trade policymakers on the trade effects of domestic agricultural policies; (2) negotiating international commodity agreements with economic provisions (e.g., pricing and/or market sharing or stocking provisions); and (3) reducing or binding the level of price support and phasing out over time the protection provided by domestic policies that affect import requirements or export availabilities.

GATT DISPUTE SETTLEMENT PROCEDURES

Articles XXII and XXIII of the GATT provide procedures for consultation and settlement of disputes between GATT members in all areas of trade, including agriculture. While the specific mechanisms and time limits vary, depending on the Code or Article under which a dispute is filed, common steps include:

(1) provisions for bilateral or multilateral consultations seeking to reach a mutually satisfactory solution without resorting to dispute settlement;

(2) the right of any signatory to a panel of 3 to 5 impartial experts from countries not party to the dispute, which reviews the dispute and makes findings of fact or law; and

(3) submission of panel findings to the GATT council for review and approval and possible authority for retaliatory action.

While the GATT dispute settlement procedure covers all trade areas, it is in the area of agricultural trade disputes that the process has come under increasing fire. Criticism centers around two issues: (1) the time it takes to settle a dispute (a U.S. wheat flour case filed in the GATT in 1981 has not yet been settled, at least to the satisfaction of U.S. interests); and (2) the consensus and nonbinding nature of the decision-making process, which means the decisions can be easily blocked by a party to the dispute. Thus, both the EC and the United States have blocked GATT panel decisions that would have been unfavorable to their respective interests.

The present problems with the GATT procedure for settling agricultural trade dispute are, in part, a manifestation of the continued agricultural trade problems between the United States and the EC, particularly in the area of export subsidies. According to the U.S. International Trade Commission, all subsidy cases brought before GATT since 1975 have concerned agricultural commodities. Almost 40 percent of all GATT cases since 1948 have been agricultural diputes. Nearly 70 percent of these cases were brought against the EC.

In many instances, the complainant was the United States, which has participated in more dispute settlement cases than any other GATT member. While strengthening the dispute settlement process should make decisions more timely, unburdening the system by resolving the fundamental trade differences between the United States and the EC should result in an even more effective dispute settlement process.

The United States has stated that one of its objectives in the new round is the improvement of the dispute settlement procedures. Proposals include significantly shortening the time necessary to arrive at a decision, requiring binding arbitration, and strengthening the code of conduct to make legal obligations thereunder more precise, which should reduce the number of disputes brought to the GATT for resolution.

PROSPECTS FOR SUCCESS

The United States has taken the lead in calling for the new round of multilateral trade negotiations with a major objective of bringing agriculture more fully under GATT rules. Agreement on a new round, with agriculture featured on the agenda, reflects a continuing commitment on the part of GATT members to work toward further liberalization of world agriculture trade—as well as a recognition that GATT, as it presently structured, is inadequate to that task.

Despite agreement among GATT members of these fundamental points, prospects for successfully addressing critical issues in agriculture are less than promising, given the probable intense resistance in many countries by politically powerful domestic farm groups who benefit under the current system. This holds true particularly in the United States, the European Community, Japan which are traditionally the key players in MTNs.

Increasing market access by lowering tariff and nontariff barriers to farm products, and reducing or eliminating reliance on export subsidies wil necessitate painful readjustment in a number of agricultural economies around the world, including in this country. While always difficult, this readjustment over the next several years will be an especially formidable task under the current depression in the U.S. and world agricultural markets. It is ironic that the same stresses and strains that have prompted a new round of MTNs also cloud the chances for progress in opening up world agricultural markets.

GATT TALKS: NOT A PANACEA FOR U.S. FARM EXPORTS

From a peak of $43.8 billion in FY 1981, U.S. farm exports are expected to drop to $27.5 billion this year, the lowest level since 1978. With imports remaining relatively steady or rising slightly, the declines in agricultural exports have significantly cut into what had been a healthy agricultural trade surplus—exports exceeding imports annually by over $10 billion between 1974 and 1985, and in some years, more than twice that amount.

The agricultural trade surplus for FY 1986 is forecast at $7.5 billion, the lowest level since 1973. And, in a more startling development, the Commerce Department recently reported that farm imports (valued on CIF-basis) exceeded farm exports by some $348.7 million in May, the first monthly agricultural trade defict since August 1971. The United States has been running an annual trade deficit in processed food products since 1983.

These declines have had a number of serious repercussions throughout the U.S. economy. Since farmers look to the export market to take production from more than one-third of their cropland, falling exports have resulted in significant declines in farm income and farm employment—it is often estimated that for every $1 billion drop in export sales, some 35,000 agricultural jobs are lost, as many as 60,000 non-farm jobs are lost for every $1 billion decline. And for every $1 lost in agricultural export activity, an additional $1 or more worth of supported business activity is foregone.

Several factors have contributed to the decline in U.S. farm exports: abundant food supplies worldwide; relatively weak demand due to global recession and large debt loads of importing countries; keen price competition among exporters, including new competitors, to increase market share or capture new foreign commercial markets; a strong dollar which made U.S. commodities more expensive to foreign purchasers; and domestic farm programs which, in effect, increased the price of U.S. farm products.

Although steps have been taken to bring down the dollar's value and farm programs have been revised, the effect of these measures has not yet been reflected in increased agricultural export levels. At the same time competition to boost sagging export levels has intensified, deteriorating world economic conditions have fueled protectionism worldwide, placing servere stress on trade relations.

GATT can do little to solve the underlying problem of world excess capacity in agriculture competing for stagnant markets. It can, however, mediate disputes that arise from this intense competition and develop rules which limit "unfair" trading practices that benefit one country, or a group of countries, to the exclusion of others.

DEVELOPING THE RESOURCES OF MOUNT ST. HELENS

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. BONKER. Mr. Speaker, on May 18, 1980, southwest Washington was the site of an incredible natural phenomenon, the volcanic eruption of Mount St. Helens. Since that time my district and the State of Washington have been working to cope with and adapt to the changes wrought by this dramatic event.

While this event was in many ways a disastrous and tragic one for the area, with 59 people dying in the explosion and 150,000 acres of forest leveled, the volcano also provides unique opportunities. The mountain, originally one of the most beautiful in the world, now is one of the most fascinating. It provides an exciting outdoor educational experience and a testimony to the importance of exploring mankind's relationship with nature.

In recognition of the volcano's importance, Congress established the Mount St. Helens National Volcanic Monument in 1982. Congress has followed up on this commitment by providing access and facilities which will enable more visitors to enjoy the monument

and safely tour the area. This includes trail and road construction, and building on an interpretive center. These efforts will greatly enhance visitors' understanding of the eruption and the natural forces at work within the mountain.

On a recent visit to the monument, Mr. Tom Koenninger, editor of the Columbian, in Vancouver, WA, saw firsthand some of the results of congressional and Forest Service efforts. He eloquently describes the beauty and power of a visit to the volcano. I would like to share his comments with my colleagues to highlight the good work that is going on and the vast potential for the volcanic monument. In order to realize all these hopes, continued funding will be necessary. As the article notes, this money is being put to good use.

MOUNT ST. HELENS ERUPTS WITH PLANS, DEVELOPMENTS

(By Tom Koenniger)

It is shortly after 9 a.m. on Saturday a week ago. Gifford Pinchot National Forest Supervisor Bob Williams and I are standing on a knoll with Mouht St. Helens at our backs.

As we look east, we see the split of solid rock marking the beginning of Ape Canyon. The chasm extends for hundreds of feet downward.

The landscape is visible far below through the blue haze of a warm summer morning.

From our mini-peak, we see Mount Rainer, Mount Adams, Mount Hood and Mount Jefferson in the distance, and Mount St. Helens, the gray giant up close. A different view is at our feet—the tracks of an elk.

The previous day we stood on a rock outcropping the size of a card table. This is the brim of Lava Canyon in the Lahar on the southeast side of Mount St. Helens. We see the creek 100 feet below—plenty of rocks and a little water. A warning about slipping on loose rock rivets us to the spot.

These are but two of the many memorable experiences that included a visit to the crater of Mount St. Helens Friday and Saturday a week ago.

Four Columbian staffers were guided on this trip by Williams and Ken Johnson, manager of the Mount St. Helens National Volcanic Monument—that 110,000 acre area that includes the mountain. We were joined by three other Forest Service specialists at various times during the 2-day visit. They were Ronald Emstaz, Monument Recreation Assistant; Jim Slagel, forest trail specialist; and Francisco Valenzuela, monument recreation planner.

Columbian people included Al Thomas, outdoor editor; Jay Bookman, who covers the Gifford Pinchot as part of his news beat; and photographer Casey Madison and me.

We got around the mountain in 2 days by walking 12 to 14 miles and riding a helicopter.

We wanted to know more about the mountain so we could tell you of plans and developments. We found enough to keep us busy writing and publishing pictures for some time to come.

What we found was the Forest Service planning for public access to the mountain in ways that will make such a visit even more spectacular than it is today, including:

Plans for a viewing area—an observatory—on Johnson Ridge northwest of the crater by 1991. Visitors will look right down the throat of the volcano. They will be able to see scientists at work and to talk with them.

A trail system that will go around the mountain, some 25 miles in circumference.

"We want people to spend two or three days on St. Helens as a learning experience," Williams said.

Another change in philosophy that will see a trail constructed in Lava Canyon for the disabled with wheelchair access to several good viewing areas.

An emphasis on the 404 research projects now in progress in the monument area.

A program that will stretch public dollars for trails as the Forest Service frets about taking on more projects with the same budget.

Use of Larch Mountain honor camp inmates to work on the Lava Canyon Trail, near Ape Cave.

An "adoption" program that invites any individual or group to accept responsibility for a planting area or work project. The Aid Association for Lutherans of St. John Lutheran Church of Vancouver adopted a planting area at one entrance to the mountain.

Plans for a shelter and larger parking area for snowmobiles and cross-country skiers at the 83-8312 road junction north of Cougar.

A program to open the mountain to climbing on the south side by late fall or early winter.

Many changes and adjustments in roads and trails to accommodate the 400,000 people who visit the forest each year, and a trail cleanliness policy that labels anyone who drops a candy wrapper or pop can an instant chump.

Our first day of hiking takes us along the route of a trail marked only with red ribbons. Each new ridge reveals a different sight—a rock, a mudflow, a small forest, Indian paint brush and heather and semi-sweet huckleberries to refresh a weary hiker.

The trail route follows the 4,000-foot level to extend the hiking season to the maximum. Walking it won't be a picnic, but it will provide a rich outdoor experience. Climbing down and up the loose pumice of some of the steeper ravines was a memorable experience.

We end our first day at Blue Lake, a mountain droplet of blue-green water.

On Saturday, we hike the Plains of Abraham—gray, desolate and almost lifeless. Our path is clear, marked by rock cairns.

Our group scrambles up and over rocks and pumice of windy pass to catch our first view of Spirit Lake.

We marvel at signs of life: A lady Bug * * * a spider * * * evergreen branches poking through the surface at distant intervals.

After lunch it's on to the "desert"—the crater of Mount St. Helens. The impact of standing in that vast crater at the foot of the dome is dramatic and spiritual. The crack and rumble of rock falling from all sides is a constant sound.

Except for a couple of toenails that opted for early retirement, we came through our mountain experience unscathed.

We have looked at the present and future of Mount St. Helens and both views are magnificent.

THE NEED FOR MEDICARE FUNDING FOR INFLUENZA VACCINATION

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. WHITEHURST. Mr. Speaker, on December 6, 1979, I introduced H.R. 6066, which would have provided funding under Medicare for both pneumococcal pneumonia and influenza vaccines. The pneumococcal provision was included in legislation passed (H.R. 8406) by the Congress in late 1980, but at that time there was not sufficient documentation to justify including influenza vaccine.

In November 1979, I had written to then Chairman STAGGERS to ask that he request the Office of Technology Assessment to do a study of influenza vaccines as a followup to their fine work on pneumococcal pneumonia. Their report, "Cost Effectiveness of Influenza Vaccination," was published in December 1981, and it made a strong case for including it under Medicare. On the basis of that report, I introduced H.R. 5481 in 1982, to provide for Medicare coverage of influenza vaccine and its administration.

Regrettably, the bill was not passed, at least in part because it lacked administration support. I reintroduced it in the 99th Congress as H.R. 482, and I continue to hope that this important step in preventive medicine will be taken without too much further delay.

The September 1986, issue of Reader's Digest contains an article entitled "Six Shots to Save Your Life," and I am pleased to share it with my colleagues at this point in the RECORD. I would call particular attention to the section on influenza, which points out that the Center for Disease Control recommends flu shots for all those age 65 or older and makes it clear that the new vaccine is much safer than its predecessors.

Mr. Speaker, it seems to me that it is far more cost-effective to prevent an illness such as influenza by encouraging the use of the vaccine than to provide hospital care for those who contract the disease and are then subjected to life threatening complications. To refuse to fund influenza vaccine under Medicare is, at best, penny-wise and pound-foolish.

[From the Reader's Digest]

SIX SHOTS TO SAVE YOUR LIFE

(By Stanley L. Englebardt)

Only 10 to 15 percent of at-risk American adults are taking advantage of one of the easiest, safest and least-expensive ways of preventing catastrophic disease: vaccination. The need for inoculations does *not*, as many adults believe, end with school years.

"We've done a very poor job educating patients about vaccinations," says Dr. Richard J. Duma, president of the National Foundation for Infectious Diseases. "We could avoid a tremendous amount of suffering by immunizing all at-risk adults against a small number of preventable diseases." These are:

Influenza. Flu epidemics race across the United States almost every year, affecting millions. In the epidemic of 1980-81, experts estimate that 45,000 people died from complications brought on by the disease; 80 to 90 percent of the excess deaths that oc-

curred in the years 1973-81 were of persons age 65 or older. If these high-risk patients had been inoculated, most of these infections could have been prevented, or the disease at least held to a minor illness.

The U.S. Centers for Disease Control (CDC) in Atlanta pinpoints several high-risk groups: persons with chronic heart and lung diseases; residents of nursing homes and other chronic-care facilities; all those age 65 or older; people with chronic diseases such as diabetes, anemia and asthma; and health-care workers.

Though many people avoid the annual flu shot for fear of side effects, doctors say that less than one-third of patients experience soreness around the vaccination site; anything more serious is infrequent. But people with a history of severe allergic reaction should consult their doctors before getting a shot. ("Unlike the 1976 swine-influenza vaccine," says the CDC, "subsequent vaccines, prepared from other virus strains, have not been associated with an increased frequency of Guiullain-Barré syndrome"—a progressive muscular weakness.)

Pneumonia. While viral pneumonia usually is overcome by bed rest, fluids and aspirin, pneumococcal pneumonia, the most common form of bacterial pneumonia that sweeps through communities, can be an unmanageable killer. Last year, this type of pneumonia hit an estimated half-million Americans, killing about 25,000.

Essentially the same population at risk of flu should be inoculated against pneumococcal pneumonia. A single injection usually will provide protection for at least five years.

About half the patients can expect one to two days of soreness at the injection site, and a very small percentage may experience some transient fever. The CDC recommends not giving the vaccine to pregnant women who are otherwise healthy.

Hepatitis. There are two major types caused by different viruses. Hepatitis A is unpleasant but seldom causes permanent damage. Hepatitis B, on the other hand, is a more severe infection that can be spread through unsterilized hypodermic needles, unclean dental or surgical instruments, blood products and transfusions, and sexual contact. It's no wonder the disease has been increasing. There are between 400,000 and 800,000 carriers in the United States at this time; an estimated 50,000 people with clinical signs of the disease; 10,000 yearly hospitalizations and 5,000 annual deaths.

Moreover, the hepatitis-B virus was recently identified as the single most important worldwide cause of liver cancer, an invariably fatal disease.

The recommended recipients of the hepatitis-B vaccine: all health-care workers who deal with blood; hemodialysis patients, certain blood-product users; homosexually active men; prostitutes; drug adicts; and pregnant women in any high-risk group, such as refugees from the Far East. The cost of the vaccine is high—about $100 for a series of three shots—but a pittance compared with the cost of the disease.

Rubella. In 1964-65 when an epidemic of rubella (often called German measles) swept the country, the toll was staggering: 20,000 infants with birth defects and 11,000 instances of fetal death due to miscarriage or therapeutic abortion. And then a new vaccine virtually eliminated rubella.

Rubella, however, still remains a problem; 604 cases were reported by the CDC in 1985. Experts urge all non-pregnant females in their childbearing years who do not have a clear-cut record of a rubella vaccination to get one now.

Measles. Though measles was all but eliminated by an effective vaccine, enough children manage to slip through the immunization net each year to produce relatively small outbreaks, most notably on college campuses. While measles is rarely fatal, it can cause serious complications: ear infections, pneumonia and encephalitis among them. Any young adult with no record of measles, and no vaccination with a live-measles vaccine in childhood, should consult a physician.

Tetanus. If you step on a nail, chances are your doctor will give you a tetanus shot while treating the wound. "Tetanus is a terrible disease with a high death rate," explains an emergency-room physician, "so prevention is a top priority."

Yet waiting to get a shot in an emergency—particularly if the wound is deep and dirty, and some time has elapsed—may decrease your protection. The best bet: a booster injection every ten years. The CDC recommends the combined tetanus-diphtheria vaccination (though they can be given separately). The incidence of diphtheria is low, but a booster shot every ten years is "safe, inexpensive and good insurance," says Dr. Duma.

Immunization is one of the best bargains around. "If you're not up-to-date," states Dr. Duma, "*now* is the time to make an appointment with your physician."

SUPPORT FOR THE CONTRAS: AMERICA'S DELICATE BET

HON. JIM KOLBE

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. KOLBE. Mr. Speaker, I understand aid to the Contras will probably be included in the continuing resolution which we are considering on the House floor this week. This issue has been particularly controversial in the House of Representatives, and the decision to oppose or support this assistance has required a great deal of soul searching for many Members of this body.

Today, I am submitting an article from September 6, 1986, edition of the Economist on Contra aid. I believe this piece provides a balanced, objective analysis of the dilemma the United States and other supporters of democracy in Nicaragua face. I urge my colleagues to review this article carefully and to continue to support adequate assistance to the Nicaraguan freedom fighters.

The article follows:

[From the Economist, Sept. 6, 1986]

WHY THE CONTRAS?

President Reagan is about to receive from Congress, no last-minute hitch intervening, a bill that will authorize him to spend $100m to help the contra guerrillas wage a war against Nicaragua's Sandinist government: a war that has already cost more than 15,000 lives. It has taken all of Mr. Reagan's vast powers of persuasion to wring approval of this "wanton, bloody war", as the New York Times has called it, out of the Senate and the House of Representatives. He has done so against the apparent wishes of most Americans. West Europeans are antagonistic. It is hard to find a Latin American voice raised in public in support of Mr. Reagan, even though the emotions the Sandinists privately inspire among most Latin Americans are dislike and fear.

This is a remarkable storm over a country of 3m people. But the Sandinists are at the center of a debate that the West, and particularly the United States, has seemed incapable of settling for the past quarter-century. How far can it go in trying to turn events in the third world in a democratic direction? How far should the superpower contest intrude on the third world? What has Vietnam taught America about the uses of its power? Mr. Reagan does not have many doubts: he now says that the contras may have to take over Nicaragua by force if they do not succeed in making the Sandinists accept a fully open and supervised election.

Are his instincts right? That depends on two things: whether Nicaragua is becoming a Leninist state; and whether American support for an armed attack on a Latin American government serves the interests of the United States and of Latin America.

Not many people doubt that the Sandinists are running a nasty regime that is impoverishing their country. Most civil liberties have been suppressed, the last voice of an independent press was silenced this year, the church is harried and whole groups of Indians have been forced out of their homes. Economic miseries have been piled on political ones. Nicaragua's foreign debt of $6 billion is far larger than the country's shrinking GDP, manufacturing industry has collapsed, even rice and beans are now rationed in peasant diets.

The wisest policy toward such a regime is usually to let it self-destruct. the Sandinists seem well on their way to that. The guess of some observers is that perhaps only a fifth of city-dwellers, and a slightly higher proportion of peasants, now back the government. But the worry about the Sandinists is that that they may be putting themselves in a position where no amount of unpopularity or incompetence will ever make any difference to their grip on power. Their 75,000-man army (Central America's largest by far) and 44,000-man reserve are there, very likely, not just to fight contras but also to impose a full-blooded communist government on the country.

COMMUNISTS ARE DIFFERENT

For democrats, the prospect of another communist government matters not so much because such regimes are unpleasant as because they seem irreversible. Francoists give way in Spain, Marcoses depart from the Philippines, Duvaliers leave Haiti, Somozas eventually get thrown out of Nicaragua; but after too many decades of experience the world has yet to see a single communist regime dislodged. These regimes stay in place, even when their people would overwhelmingly wish them to go, because the single permitted party has established a monopoly of control—over the economy, education, culture and communications, as well as ordinary politics—far tighter than that achieved by any conventional dictatorship. That leaves democrats little room for manoeuvre. If a country is sliding into Leninism, more modest instruments of pressure, like economic sanctions, are often useless. Military force is frequently the only thing that can stop it, and the decision has to be made at an early stage: once a country has crossed the line, it is lost.

Are the Sandinists really the communists Mr. Reagan claims? A few people in Nicara-

gua, if they are prominent enough, can still speak out; a private sector still functions; the Sandinists allowed a fairish election in 1984; there is a small, though largely ignored, democratic opposition. Different currents of thought exist within the government, and Sandinism has a distinctly Nicaraguan flavour. But most of the evidence is on the other side. Much of the repressive apparatus of an East European state is already in place: "neighbourhood committees", a large Cuban-trained secret police, an army and propaganda system named after the regime. The Sandinists have asked for "comprehensive integration" with Comecon, the Soviet-bloc economic group.

Many people object that the Sandinists are being driven against their will into Russian arms by the American threat against them; but the record belies that. In 1979-80 United States gave $118m in aid to the Sandinists, while they were opening the door to Cuban arms and advisers. The Sandinists took advantage of the long pauses that the American Congress forced in Mr. Reagan's pro-contra campaign to show their attachment to Moscow and to tighten their internal repression. They have so far refused to agree to a regional peace treaty drawn up by the Contadora group. The more plausible conclusion is that the only thing sparing the Nicaraguan people Cuba's fate is the contra guerrillas' military harassment of the Sandinist regime.

Some of Mr. Reagan's critics accept this, but argue that the contra cure is worse than the Sandinist disease. The contras are still widely seen in the West as a murderous rabble consisting mainly of left-over thugs from Somoza's despised National Guard. This view no longer has much to support it. The contras have done atrocious things, but no more than most groups of men, of left or right, who fight this shapeless sort of war (and certainly no more than the guerrillas in Afghanistan). They include 2,000-3,000 ex-Somoza men. But they have almost as many disillusioned ex-Sandinists in their ranks, and their civilian leaders—like Adolfo Calero, Arturo Cruz and Alfonso Robelo—have good democratic credentials. The most telling thing about the contra army is its size. The 2,000 former National Guardsmen of five years ago have grown into an army of 16,000, three times as big as the Sandinist army was when it marched into Managua. The new recruits are not press-ganged; they are fleeing from the Sandinists.

THE WIDER WAR

For all that, Nicaragua is a tiny country. If America's policy is to make sense, it must serve broader interests. One of those involves America's contest with Russia. Local explosions, however strong their local causes, also weigh in the balance of advantage and disadvantage that the world's two global powers keep with each other. A People's Democratic Republic of Nicaragua would be an example for revolutionaries elsewhere in Latin America, and another willing forward base of Leninism in the western hemisphere. No democrat in the West—even those who think Mr. Reagan is wrong about Nicaragua—could welcome that.

Still, the United States took such a blow in Vietnam, and lived in its defeat to see a mostly flourishing Southeast Asia. Is Mr. Reagan misjudging the importance of Nicaragua for the rest of Central America?

The civil wars which that wretched region has been enduring for the past decade have killed perhaps 150,000 people out of a total population of 20m. They are in part the product of deep changes in economies and societies still cruelly divided by race. They are also the result of too many decades of right-wing and military repression, which the United States, to its great discredit, did nothing to try to relieve. In the past five years, however, the Americans have helped to nudge hard-right regimes in Guatemala, El Salvador and Honduras towards the centre. All three countries now have democratically elected presidents (even though each is still too little the master of his country's generals). The danger of an unchecked Nicaragua is that it could drag other Central American countries back into the anti-democratic turmoil from which they are just beginning to escape.

Until they became preoccupied with the contras a couple of years ago, the Sandinists were giving a good deal of help to El Salvador's guerrillas, and smaller amounts to the smaller insurgent groups in Guatemala and Honduras. The Sandinists said then that "the revolution goes beyond our borders". It is possible that even unrestrained by the contras, Nicaragua's leaders would not resume the revolution-exporting business; but it is not probable. Their inclination to keep to themselves is probably about equal to their inclination not to create a Leninist state.

AMERICA'S DELICATE BET

As Congress has discovered, the United States has an unenviable choice. It does not really know whether the Sandinists are enough of a threat to their own people, or to the rest of Central America, to warrant sponsoring a war against them; but if it does not keep the contras alive now it may, if things go badly, have no instrument short of its own army to put a stop to the advance of communism in Central America.

This dilemma is not reflected in Mr. Reagan's unruffled certitude. He wants the Sandinists out, period. The proper aim of the United States should be limited to getting them to agree to a regional arms-cutting treaty and regular elections (which would almost certainly block the emergence of a one-party Leninist state), both under international supervision. The uncertainties about Nicaragua justify no more assertive a course. But even that will remain out of reach unless the Sandinists are put under pressure. The United States has tried friendship and aid; economic sanctions; and now support for the contras. This last element, for all its crudeness, still seems a necessary part of the pressure if it is to have any chance of success.

NICARAGUAN DEPORTATIONS

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. MOAKLEY. Mr. Speaker, today I sent a letter to Assistant Secretary of State for Inter-American Affairs Elliott Abrams supporting his recent statement that the Reagan administration is intending to "reconsider the political refugee status of Nicaraguans currently in the United States."

Mr. Abrams made his statement, according to an Associated Press wire story, at a dinner hosted by the Miami based Nicaraguan American Bankers Association and the Nicaraguan American Private Enterprise Council.

I believe that the violence inflicted on Nicaraguan civilians—by both the Sandinistas and the Contra forces—should have compelled this administration, long ago, to halt Nicaraguan deportations.

While I applaud Mr. Abrams' recent remarks, I also encourage him not to ignore the equally tragic plight of the Salvadoran refugees. Despite the best intentions of Salvadoran President Duarte, there is still great cause for concern with regard to human rights in El Salvador.

Mr. Speaker, to advocate, as I and many other Members do, the temporary suspension of Salvadoran and Nicaraguan deportations should not be interpreted as a statement for or against United States foreign policy in the region. The issue of protecting Salvadorans and Nicaraguans is not a political or partisan matter—it is a humanitarian concern. I hope my colleagues will keep this in mind as we debate this issue in the coming days.

For the benefit of my colleagues, I am submitting my letter to Mr. Abrams for the RECORD.

HOUSE OF REPRESENTATIVES,
Washington, DC, September 16, 1986.

Hon. ELLIOTT ABRAMS,
Assistant Secretary of State for Inter-American Affairs, Department of State, Washington, DC.

DEAR MR. ABRAMS: An Associated Press wire story which ran on September 16, indicated that, in a speech before 900 people at a dinner hosted by the Nicaraguan American Bankers Association and the Nicaraguan-American Private Enterprise Council, you stated the Administration's intention to reconsider the political refugee status of Nicaraguans currently in the United States.

I am very encouraged by your statement and want you to know that I would fully support halting the deportation of Nicaraguans. As you may know, I have voiced strong humanitarian concerns about deporting Nicaraguans back to their homeland which is currently engulfed in a violent struggle. On July 23, the Subcommittee on the Rules of the House, of which I am Chairman, held hearings on Congressman Barney Frank's, bill H.R. 4893, which would temporarily suspend Nicaraguan deportations. Sadly, the Administration chose not to testify. I am an original sponsor of the Frank bill and have urged its prompt consideration by the House. The human rights abuses by both the Sandinistas and the Contras should have compelled the Administration, long ago, to offer Nicaraguans extended voluntary departure (EVD) status.

Similarly, the same humanitarian concerns you have raised with regard to Nicaragua—hold true for El Salvador. Though we can be heartened that Jose Napoleon Duarte, a man committed to peace and democracy, is currently president of that war-torn country, there is still great cause for concern. Random violence resulting from the war is commonplace. There continues to be abuses of human rights by the Salvadoran military and, it would appear, that violence against civilians by the guerrillas is on the rise. Though the total number of civilian deaths each year has decreased, it is still at an unacceptable high level. This is why, for the past three years, I have been advocating legislation (H.R. 822) that would provide Salvadorans EVD.

During House consideration of the Immigration Bill, it is my intention to include a

provision which would offer temporary protection to both Salvadoran and Nicaraguan refugees. I am aware that the Administration has been opposed to such action in the past. However, in light of your recent statement and your continued concern for human rights, I hope that the Administration will reconsider its position. The protection of refugees is not a partisan or political issue—it is a humanitarian issue.

Sincerely,

JOE MOAKLEY.

THE U.S. CONSTITUTION REVISITED

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. KOLTER. Mr. Speaker, I rise on this occasion to draw attention to the rapid approach of the 200th anniversary of the adoption of our U.S. Constitution. It may have been through the Declaration of Independence that we proclaimed our liberty, but it has been through the Constitution that we have made it work.

When the Founding Fathers assembled, they too represented backgrounds as diverse as those we here today represent. And yet, they forged a unity—the Constitution itself—by recognizing the strengths of the individual and the advantages of debate. This Congress, together with the executive and judicial branches of Government are tangible manifestations of this ideal born 200 years ago. And this ideal is as relevant today as it was back then. We have indeed come a long way in two centuries. Our great Nation has known times of triumph as well as despair; but it has been through the respect of the individual and the orderly operation of law, that we have thrived.

It is, therefore, only right, then, that we join the Chief Justice in paying tribute to the supreme law of the land. It is a time for all Americans to recognize the significance of this Constitutional achievement.

And with that, Mr. Speaker, I call to my colleagues' attention today an article written by Prof. Charles L. Kennedy of the Pennsylvania State University, York Campus. Professor Kennedy praises the Founding Fathers for their faith in the American people, and is striving to raise the level of public awareness regarding this momentous event in our Nation's history and the impact it has on all Americans. It is the spirit of proud individuals like Professor Kennedy that has made our Nation great and helps us all look confidently toward our third century of nationhood under the best system of govenment ever devised:

THE U.S. CONSTITUTION REVISITED

(By Charles L. Kennedy) [1]

The Bicentennial of the United States Constitution will be observed and celebrated throughout the land in 1987.

The challenge to all Americans is to have a meaningful Bicentennial. It should involve more than parades, flag waving, bells ringing and tall ships marching.

The Bicentennial of the U.S. Constitution should serve as an "American renewal." It should be a renewal of the spirit of the Constitutional Convention, a renewal of responsibility and individual awareness, and a new sense of civic duty.

The ultimate goal should be to generate the sort of responsible, exacting thought on questions of human nature and conduct that characterized the deliberations of the Constitutional Convention of 1787.

As emphasized in the "American Renewal" series by Time in 1981, "If there is one political belief that Americans cherish as an article of faith, it is the belief that their system of constitutional government is the best ever devised by the mind of man." This has been called the American sense of mission. It is a belief in an ever better tomorrow, the conviction that obstacles exist to be overcome and that the United States has a strong and beneficial role to play in the world.

Yet, when the founding fathers assembled in Philadelphia in 1787, they not only did not design a blueprint for the America of the 1980s, but had not the slightest idea what it would be like. They made a commitment, however, not to wealth and power, but to a vision of what the nation could become. The ultimate genius of the founding fathers was their recognition of the pluralistic nature of American society.

It is important to emphasize that the delegates to the Constitutional Convention brought to Philadelphia very different attitudes, motivations, personal beliefs and political pressures.

The founding fathers recognized the spirit of faction that permeated throughout the Constitutional debates. They recognized the capacity of the American citizens to reach a measure of consensus, unity and accommodation through the creative interplay of the competing factions.

The convention was about problems that have always confronted society. The founding fathers focused on several of these universal problems that continue to have immediate significance to the citizens of the United States in the 1980s.

The Constitutional Convention was an attempt to reconcile a host of conflicting interests and prejudices. As the first successful national convention in modern history, it has become a model for subsequent constitutional conventions. It covered the spectrum of fundamental issues any group would face in forming a new government. It also focused on efforts to improve the quality of life and society's institutions.

The challenge to all groups and organizations in the United States in their observance of the Bicentennial will be to revive its responsibility by bringing together a wide range of citizens to renew and continue the debates of the founding fathers.

We must revive speculations and observations about man and society, about the best means of bringing about social justice.

As did the founding fathers, we must endeavor to effect workable compromises for those issues, practical and ideological, upon which we disagree. We will have differences in perception, purpose, philosophy and values, as did the founding fathers, and the Republic itself.

We need to stimulate creative thought and develop a sense of responsibility in the individual citizens for the many problems currently confronting the country.

Most importantly, however, our observance of the Bicentennial of the U.S. Constitution should be based on confidence and trust in individual Americans: "those countless citizens who, despite all the doubts, the heedlessness, the disorder of the society, go about their lives with courage and patience, slangy competence and cheerful persistence, with some anger and some kindness and above all with the odd conviction that their country is still an experiment and that it must stand for something beyond mere survival."

If we can do this, then we will continue to meet the challenge of the ages.

[1] Charles L. Kennedy is a part-time instructor of political science at York Campus and executive director of the Manufacturers' Association of the Tri-Counties.

SOVIET JEWRY

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. SCHUETTE. Mr. Speaker, I would like to bring to the attention of my colleagues the plight of Lev Ovsishcher and his wife, Tatiana Ulanovskaya, refuseniks living in Moscow.

Mr. Ovsishcher was born December 14, 1919, in the Vitebsk region of western Russia. Ovsishcher joined the Red Army when he was 20, as an aviation mechanic. In 1941 he attended pilots' school, graduating as a pilot, and then becoming a political organizer. As a member of the Communist Party, he was sent to a special Political Commissars' school and became a Political Commissar in 1942. Lev distinguished himself during World War II. He was credited with making 24 flights over German lines and fought on the Kursk front and at the Battle of Kniev. After the war, he went to the Air Force Academy, and in 1950 was promoted to commander. He retired with the rank of colonel in 1961.

During the Doctor's Trial of 1953, Ovsishcher began to question the fact that the officials were trying to prove that the doctors who had allegations made against them were Jews. He began to study Jewish history and began to understand that Jews are the people who often suffer more than others. He began to think about emigrating to Israel.

Ovsishcher first applied for an exit visa in 1971. This request was denied in January 1972. Since then he has repeatedly been denied permission to leave his native country.

In 1972 he was summoned to court with three other senior officers, who had applied to go to Israel. For 6 months preparations were made for a trial on a charge of anti-Soviet activity. After the intervention of a U.S. Senator, the trial was abandoned. Ovsishcher lost his colonel's rank, being made a private, and was deprived of his colonel's pension.

For 12 years Ovsishcher has waited for a visa. In 1978 his daughter Tanya was allowed to leave for Israel after waiting for a visa for 8 years. In 1984 Ovsishcher married Tatiana Ulanovskaya, also a refusenik who was living in Moscow.

Tatiana Ulanovskaya was born in Moscow, March 11, 1927. In 1950 she received a master's degree in radio engineering, then worked in her field for 30 years. After applying for an exit visa in December 1980 she has not been

allowed to work. Her son, Lev Ulanovskaya, was allowed to emigrate in 1979.

Ovsishcher and his wife have not spoken against the Soviet Government, only requested permission to leave for Israel where they have been granted Israeli citizenship.

Lev and Tatiana are only 2 of at least 400,000 Soviet Jews who have been refused permission to leave their own country. Refusing to allow them to emigrate is in direct violation of international law as expressed in article 13, section 2 of the Universal Declaration of Human Rights which states: "Everyone has the right to leave any country, including his own, and to return to his country."

Because basic human rights are being denied to these Jewish refuseniks, Members of Congress and the American people should continue to support the Call to Conscience Vigil for Soviet Jews.

TRIBUTE TO JAMES BIERY, SR.

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. RITTER. Mr. Speaker, Jim Biery will live on in memory as a gentleman with a great sense of humor. He will be remembered as a man with a zest for life and a willingness to get involved with his community. He'll be remembered as a leader—amongst veterans, sportsmen, conservationists and just plain people. He was my friend and a pioneer in more ways than one.

JAMES BIERY, SR., SPORTSMAN, ACTIVE IN ALLENTOWN FAIR

James S. Biery Sr., 87, of 835 Chew St., Allentown, died Wednesday in Allentown Hospital. He was the husband of Ella I. (Bartholomew) Biery. They observed their 61st wedding anniversary in July.

He was an electrical inspector for the City of Allentown for 20 years, retiring in 1969.

A superintendent in Agricultural Hall at the Allentown Fair for 65 years before retiring in 1984, he developed much of the wiring for the grandstand and major fair buildings, and was in charge of the electrical system for shows for 48 years.

Born in Allentown, he was a son of the late Samuel F. and Rosa E. (Schubert) Biery.

He was a member of Trinity United Church of Christ, Allentown.

An Army veteran of World War I serving in the Medical Corps, he was a past commander of the local World War I Veterans group.

Active in sportsmen's organizations since 1921, he was inducted into the Pennsylvania Federation of Sportsmen's Clubs Hall of Fame in 1974. In 1979 he received citations from the state Senate and House of Representatives and the Pioneer Fish and Game Protective Association for his work in conservation. He received the Allentown Spirit Award in 1983 for his work with senior citizens and fishermen.

Biery was a director of the Lehigh County Federation of Sportsmen's Clubs, an emeritus member of the executive board of the Pioneer Fish and Game Protective Association and was fish committee chairman for the State Federation of Sportsmen's Clubs for five years.

He was a past president of many sportsmen's clubs including Pioneer, Southeast Division of the Federation of Sportsman's Clubs, Lehigh County Federation of Sportsman's Club, and Queen City Sportsman's Association. He was chairman of the Queen City Sportsman's Trout Rearing Committee for the past 36 years, and served 50 years as a Pennsylvania Waterway patrolman.

Surviving with his widow are a son, James S. Jr. of Harrisburg; two daughters, Marilyn L., wife of Chester Gierula of Brookville, Md., and Ann Marie, wife of Donald Eshleman of Kirkwood, N.J.; a brother, Woodrow of Allentown; a sister, Mrs. Eleanor Sage of Northampton; eight grandchildren, and three great-grandchilden.

JOHN CAMPBELL IN AUSTRALIA

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. BEREUTER. Mr. Speaker, the article following was written by John Campbell, a native of Nebraska, who is a member of the staff of the U.S. Senate Committee on Agriculture, Nutrition, and Forestry now enrolled for postgraduate study in agricultural economics at the University of Sydney in Australia.

Mr. Campbell first addresses the concerns recently raised by Australia about the use of the Export Enhancement Program by the United States Government for agricultural exports; second, compares the farm and agricultural export programs of the European Community, Australia, and the United States; and third, assesses the economic and international trade impact of the United States 1985 farm bill.

Among other major points made by Mr. Campbell, he notes that all of the major wheat exporting nations have support schemes for wheat farmers, but the United States is the only one operating a scheme to reduce production and keep supplies off the market. The result of this unilateral supply management, he says, is that America has lost its share of a shrinking market to such countries as Australia and the countries of the European Community. These conditions result not from any impact of the 1985 farm bill—we are now in the harvest season of its first year—but from the U.S. farm policy during the last 6 or more years. During the political season when rash and irrational statements about U.S. agricultural policy are almost the norm, I urge my colleagues to read these relevant excerpts from Mr. Campbell's article printed in the August 6, 1986, edition of the Sydney Morning Herald:

WHEAT: AUST'S FREE RIDE ENDS

(By John Campbell)

The other day I rang Telecom information to get the telephone number of the US Agricultural Attache. The operator, recognising my obvious American accent, said the US could take its agriculture "up on the next space shuttle".

There has always been room for more rational discussion of agricultural problems. The near-panic generated by US Congressional proposals to widen the American export subsidy program to include the Soviet Union and China makes it even more necessary to examine the reasons for this "crisis".

The problem is a combination of three fundamental facts. First, the world does not want to buy in international trade as much wheat as it did only a few years ago. Since the 1980-81 crop year, world wheat trade has been flat or falling and now stands at about 10 percent less than it did six years ago and 13.5 per cent less than it did only two years ago.

Second, production of wheat by exporting countries, on the whole, has not changed. Production in Australia and the EC has been rising over the past five years with offsetting production declines in the US and Argentina.

Third, only one country, the US, has had a deliberate policy of trying to reduce production and hold stocks off the market in an effort to keep prices as high as they were when demand was stronger.

It may seem like common sense that when consumers do not want to buy as much, but producers keep the same amount on the market, prices go down. I have used wheat as the example, but the same could be said of cotton, coarse grains and rice. Why then do farmers insist on various forms of government intervention to shield them from the realities of the market place?

Before the new US farm bill became law, American farmers had a vast network of subsidies all aimed at idling land and keeping stocks off the market so that prices would be kept high. Australian wheat farmers have, until 1984, had a scheme whereby domestic users paid a higher price for wheat than the world market price and taxpayers footed the bill if world market prices were not as high as the guaranteed minimum export price. The Australian wheat scheme only protects export prices and is expected to pay wheat farmers if prices drop because of the US subsidy plan.

European farmers have a system whereby domestic consumers pay a price vastly higher than the world price and all production in excess of domestic needs is dumped on the world market for whatever price it will bring.

Although all of the major wheat exporting nations have support schemes for wheat farmers, only the US is operating a scheme to reduce production and keep supplies off the market. The outcome has been that America has lost its share of a shrinking market while its competitors, including Australia, have gained. American wheat farmers listen grimly to US Department of Agriculture predictions that their wheat exports will fall 44 percent from the 1983-84 crop, the largest year-to-year drop in exports ever recorded. Overall, since the peak export year of 1980-81, American wheat farmers have lost 40 percent of their market share.

Meanwhile, Australian farmers during this period have been happily producing and exporting more and more as if nothing had changed in the world market place. In fact, the Australian Wheat Board recently predicted their third straight record export year on a volume basis. Australia's market share has risen from roughly 11 percent in crop year 1980 to more than 17 percent in crop year 1985—more than a 50-percent increase. The European Community has also increased its market share in the face of falling world demand.

How could this happen? Most of the blame can be laid directly at the doorstep of past US farm policy. The rest can be blamed on exchange rate fluctuations and refusal by the EC to moderate their export dumping policies. As stated earlier, American farm policy has attempted unilaterally to

alter supply and demand conditions. The result: US markets have been taken up (American farmers would say stolen) by Australia and others at just below the US asking price.

The 1983 US payment-in-kind program is a good example. In that year, 32 million hectares were taken out of production—more than one and a half times the entire amount of Australian land in broadacre production. American farmers were compensated for idling this massive amount of land. Combined with a summer drought, production was reduced and prices were increased.

How did US competitors react? As could be expected with higher prices, they increased the area sowed to wheat by 26 million hectares, almost cancelling the impact of the US program.

Enter the new US farm bill. Seeing the error of past American farm policy, Congress moved decisively to reduce the price of American wheat, coarse grains, cotton, and rice, to limit the amount of land taken out of production in a year, and to close loopholes in farm programs which rewarded increased output when a farmer's acreage was reduced. To protect American farmers from bankruptcy because of these sharply lower prices, direct cash subsidies were kept fairly high, but not as high as in the past.

In addition to these direct income subsidies, American farmers were assured they would not be left on their own to fight unfair competition sponsored by foreign governments. The export subsidy program so much in the news today was an effort on the part of Congress to assure hard-pressed farmers that the Government was fighting for them against the European Community and other governments perceived to be predatory competitors.

Despite the possible negative consequences of the export subsidy program or third countries such as Australia, the 1985 farm bill has much to offer in the way of improving the environment for agricultural production and trade.

The 1985 farm bill will force American farmers to face the realities of the market place to a greater degree than has been the case in the past. Over the life of the bill, subsidies are being reduced. It will also end the free ride Australian and other competitors have used to increase their share of the world market at the expense of American farmers and taxpayers. The most efficient farmers and best marketing systems will have a better chance of finishing ahead.

Finally, by dramatically increasing the cost of European farm programs, it may even bring the EC to change its farm policy—something long sought by Australians as well as Americans. * * * American farmers should not demand their markets back in one year after taking six to lose them. And Australian farmers should not mimic American farmers by demanding that their government shield them.

(John Campbell is a member of the staff of the US Senate Committee on Agriculture, Nutrition and Forestry. He is doing postgraduate study in agricultural economics at the University of Sydney.)

CRIME CONTRIBUTES TO POVERTY

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mrs. ROUKEMA. Mr. Speaker, although there has been much interest on the complex causes of poverty in this country, little mention has been made about the contribution crime makes to the poverty problem. However, a recent column by William Raspberry sheds light on this issue.

For a long time, Republicans have stressed the need for a greater crackdown on crime. As we all know, serious crime occurs most often in the poorest neighborhoods, disproportionately hurting those who are working to get themselves out of poverty. Mr. Raspberry's column discusses a recent article written by the director of the Justice Department's National Institute of Justice, James K. Stewart.

Mr. Stewart believes that crime in inner-city areas has made it harder for residents of poor neighborhoods to avail themselves of income boosting opportunity, thereby making it harder for them to get out of poverty. It also, he believes, strangles opportunity directly by driving business and jobs out of low-income neighborhoods. Mr. Stewart offers hope by providing four examples of communities which, by getting tough on crime, had a job-producing economic turnaround.

I am pleased to share the text of Mr. Raspberry's column with my colleagues.

WASHINGTON.—In the days when decent people used to worry about the "roots of crime," a lot of us were convinced that one of the chief causes of crime was poverty.

We believed that poverty, because it produced hunger, dehumanizing living conditions, alienation and despair, tended to make people antisocial and predispose them to criminal activity. Poverty, we said, causes crime.

But the director of the Justice Dept.'s National Institute of Justice has turned the idea on its head. Crime, says James K. Stewart, writing in the summer issue of Policy Review, causes poverty. The former Oakland, Calif., police official does not mean merely that crime impoverishes its victims by stealing their goods and cash (and sometimes their health and life), though he does contend that these direct costs of crime hit hardest at the poor who are least able to afford insurance or replace stolen necessities.

"The less-direct costs of crime to the poor may be even more destructive," he argues. "The traditional means by which poor people have advanced themselves—overtime, moonlighting or education to improve furture opportunities—can easily be obstructed by crime and fear. Why risk a late job or night school if the return home means waiting at deserted bus stops and walking past crowds of threatening teen-agers?

"A secretary declines overtime opportunities if they extend into the evening because she fears being robbed between the taxi and her front door. A husband gives up night school rather than leave his wife and young children alone at home."

If crime makes it harder for residents of poor neighborhoods to avail themselves of income-boosting opportunity, it also strangles that opportunity directly, by driving business—and jobs—out of low-income neighborhoods.

"A number of economic features ought to attract capital to revive inner cities," says Stewart. "Most poor neighborhoods are located in or near the center of our cities and therefore should be prime locations for commerce. The inner city usually provides easy access to railheads, highways, water and power, as well as to a ready labor supply. It already has the infrastructure often missing from the suburbs and exurbs."

But to a dismaying extent, the inner city also has crime: Crime that translates into unacceptable losses through theft and burglary for the business owners, crime that makes suppliers and contractors reluctant to come into the area, crime that leads many workers to look for jobs in less-menacing neighborhoods.

What is the solution? Not enterprise zones, which afford relief from taxes and government regulation, but not from crime.

But there is another way. Stewart offers the examples of four communities—East Brooklyn, Oakland, Watts and Portland, Ore.—that managed a job-producing economic turnaround by launching a direct assault on crime.

The East Brooklyn Industrial Park (with city help) knocked down abandoned buildings, installed burglar alarms, trained private security guards and patrols and provided escort services for businesses and residents. Portland undertook a similar effort along its Union Ave. commerical strip.

Clorox, IBM and other tenants of Oakland's Bramalea Corp. spend $300,000 a year for enhanced police security and a program to "curtail incivilities and disorderly behavior." Watts, a high-crime area of south central Los Angeles, has created an oasis of safety in the Martin Luther King, Jr. Shopping Center, an impressive center complete with wrought-iron fence around its perimeter, closed circuit monitoring, private guards and a city police field office.

Obviously, crime isn't the only thing that causes poverty (just as poverty isn't the only cause of the antisocial attitudes that produce crime). There are countless people who, though deprived, are not depraved. And there are scores of communities whose residents, though reasonably law-abiding, remain poor.

I don't think Stewart would argue the matter. His point is not that decent behavior automatically creates businesses and jobs, but that too much crime can destroy business and employment opportunities and make it harder for poor people to break out of their poverty.

"Crime," he says, "is the ultimate tax on enterprise. It must be reduced or eliminated before poor people can fully share in the American dream."

SOVIET POET IRINA RATUSHINSKAYA

HON. MICHAEL BILIRAKIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. BILIRAKIS. Mr. Speaker, today marks the fourth anniversary of the arrest of the Russian Christian poet, Irina Ratushinskaya. On this day in 1982, Irina was arrested and

charged with agitation and propaganda. Her crime, like that of so many other Soviet citizens charged with this kind of offense, was no more than refusing to surrender her personal beliefs and talents to the Communist state.

It is hard for an American to understand how writing poetry which reflects her orthodox Christian faith would make Irina a criminal in the eyes of her government. What possible threat could five poems pose to the mighty Soviet state? Yet, we should not be surprised. A society which does not value freedom of individual thought or speech necessarily views any independent expressions of faith as a threat.

Since 1983, Irina has been serving the maximum sentence for her "crime"—7 years of hard labor, to be followed by 5 years of internal exile. Irina is the first woman ever to receive that sentence.

During her imprisonment, she has been allowed to see her husband, Igor Gerashchenko, only once, in August of this year. She has suffered serious head injuries from beatings and was subjected to forced feedings when she undertook hunger strikes to protest prison conditions. She has numerous very serious health problems which she developed in prison for which she is not receiving appropriate medical care.

This summer, Irina was transferred from the strict regime labor camp in Mordavia to the KGB prison in Kiev for a period of "reeducation." Despite efforts to make her incriminate herself, this brave, 33-year-old woman in failing health who has endured so much remains, in the words of a fellow prisoner, "a person of clear and precise intellect, a courageous human rights activist."

Her courage and faith in the face of what must seem like insurmountable odds should serve as an example to us all and inspire us to redouble our own efforts to speak out on behalf of Irina and all her fellow prisoners of conscience. Our voices can make a difference and I encourage all my colleagues to join me in pressuring Soviet officials to release Irina Ratushinskaya.

As a tribute to Irina, I wanted to share with you a poem she wrote while in prison, which speaks volumes of her tremendous faith and courage:

I WILL LIVE AND SURVIVE

I will live and survive and be asked:
How they slammed my head against a trestle,
How I had to freeze at nights,
How my hair started to turn grey . . .
I will smile. And will crack some joke
And brush away the encroaching shadow.
And I will render homage to the dry September
That became my second birth.
And I'll be asked: "Doesn't it hurt you to remember?"
Not being deceived by my outward flippancy.
But the former names will detonate in my memory—
Magnificent as old cannon.
And I will tell of the best people in all the earth,
The most tender, but also the most invincible,
How they said farewell, how they went to be tortured,
How they waited for letters from their loved ones.
And I'll be asked: what helped us to live
When there were neither letters nor any news—only walls,
And the cold of the cell, and the blather of official lies,
And the sickening promises made in exchange for betrayal.
And I will tell of the first beauty
I saw in captivity.
A frost-covered window! No doors, nor walls,
Nor cell-bars, nor the long-endured pain—
Only a blue radiance of a tiny pane of glass,
A cast pattern—none more beautiful could be dreamt!
The more clearly you looked, the more powerfully drawned
Those brigand forests, campfires and birds!
And how many times there was bitter cold weather
And how many windows sparkled after that one—
But never was it repeated,
That upheaval of rainbow ice!
And anyway, what good would it be to me now,
And what would be the pretext of that festival?
Such a gift can only be received once,
And once is probably enough.

(Written in prison camp.)

TRIBUTE TO RUTGERS UNIVERSITY PRESIDENT EDWARD J. BLOUSTEIN

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. DWYER of New Jersey. Mr. Speaker, this year marks an especially important one for Rutgers, the State university of New Jersey, and its 17th president, Dr. Edward J. Bloustein, who is marking his 15th year with the university.

During Dr. Bloustein's 15 years as president, Rutgers has grown vastly in size and scope, and his ambitions for Rutgers to become a major university have been crucial in its development.

Many of Rutger's graduate programs are rated at or near the top, and the university now has 25 colleges and schools. Cook College was established in 1973 as a complete multipurpose professional school of agriculture, environmental, and life sciences—one of the first of its kind in the Nation. In 1976, under Dr. Bloustein's leadership, the Mason Gross School of the Arts was created and named in honor or Dr. Bloustein's predecessor who had been active in expanding cultural opportunities in the State. And most recently, Rutgers opened a new undergraduate school of business, a professional school, consolidating and expanding previously separate accounting, management, and marketing departments.

The list of growth and accomplishment goes on and on at Rutgers University campuses throughout the State. Dr. Bloustein's tenure at Rutgers has been distinguished by its sense of purpose, achievement, and planning for the future. He has been a driving force in reorganization and the expansion of the university's educational and cultural exchange programs. He has translated his vision for Rutgers' future into meaningful plans to help the institution continue to flourish into the 21st century. In fact, as a former chairman of the National Association of State Universities and Land Grant Colleges, Dr. Bloustein launched an important project on the future role of State research universities nationwide as we move toward the year 2000.

Dr. Bloustein has been a champion of the partnerships between Federal, State, private, business, and university sources which are so essential to sustained economic growth in New Jersey and nationwide. His personal leadership and dedication helped garner crucial support for New Jersey's jobs, science and technology bond issue in 1984, and helped move Rutgers dramatically into the high-technology era.

Dr. Bloustein serves in a variety of capacities beyond his duties as president of Rutgers. He is currently chairman of the Middle States Association of Colleges and Schools and serves as a member of the conference board. His commitment to teaching also has endured. He teaches a course on philosophy and the law and gladly accepts invitations to serve as a guest lecturer in courses being taught by his faculty colleagues. Dr. Bloustein has published extensively in the fields of freedom of expression, privacy, the first amendment, and public policy on nuclear energy.

Rutgers University has benefited greatly from the inspired leadership of Ed Bloustein. He is a gifted scholar, a dedicated administrator and above all, one of our country's most eloquent and effective advocates for higher education. As he enters his 16th year at the helm of Rutgers, we offer him our deep appreciation, and wish him continued success.

SPEAK OUT FOR PEACE

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. PEPPER. Mr. Speaker, recently, I had the occasion to speak before the International Platform Association here in Washington, DC. At that gathering I had the pleasure of hearing a wonderful and vibrant woman eloquently deliver a poem she had composed. The poem is entitled, "Speak Out For Peace," and its author is Ms. Laurene J. Tibbetts. Ms. Tibbetts has earned great distinction for her fine work. Among other honors, she is the poet laureate for the State of Minnesota and has won the Carl Sandburg Award in Poetry. "Speak Out For Peace" won the award for poetry at the International Platform Association competition and has been selected to be put to music by international composer, Dr. Victor DeLisa. The following is the text of Ms. Tibbetts' award-winning composition:

SPEAK OUT FOR PEACE

When Public Speakers mount the stand,
Their message to convey—
Are they aware how much their role
Toward Global Peace could sway?
More mighty than the sword are words
And forceful they must be.
When pragmatic power politics
Threatens our democracy.

Speak for what can right the wrongs
In voices loud and clear—
The value of plain common sense
Is needed now and here.

There is no winning nuclear war,
No victory to be found,
No people, plants or animals
Would even be around.

Bellicose talk of nuclear war
Heightens mounting tension—
Academies Promoting Peace
Could aid toward war prevention.

America has always stood
For Freedom from all fear—
Our streets may not be paved with gold
But dreams are realized here.

If people can be trained for war
They can be trained for Peace—
If the Golden Rule were followed
Hostilities could cease.

Oh, I know this sounds simplistic,
Hostilities run deep—
When there are terrorists at large,
More hatred do they reap.

Violence begets violence,
And has, since Time began;
Is there not one among us
To promote a Peaceful Plan?

We seek not a Utopia,
We ask only that there be
A chance to live life fully
In Peace and dignity.

Five major Nations, it is said,
Are in the nuclear race—
But they have people, same as we,
Frightened by the nuclear pace.

Confidence, is being prepared,
Yet, we must strive for Peace,
If Public Speakers would speak out
would not mounting tensions cease?

Belief in God, and in God's laws
Helped to build our Nation.
Our Faith, our Freedom, and our dreams
Reflect our firm foundation.

There was a time when it was thought
Some wars were justified,
But seeking Peace for all mankind
Through love, should be our guide.

More mighty than the sword are words—
So, speak for Liberty.
Speak out for Peace to save mankind—
Seek justice and equality.

There is no winning nuclear war,
No victory to be found,
No people, plants or animals
Would even be around.

When Public Speakers take their stand,
There message to convey,
May they know their every word
Toward Global Peace could sway!

CIGARETTE TAX INCREASES

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. DUNCAN. Mr. Speaker, in view of the fact that the Committee on Ways and Means is presently grappling with raising revenues under the reconciliation process, I commend this letter for consideration. Mr. David Wilhelm, the executive director for Citizens for Tax Justice outlines precisely the reasons why Federal cigarette excise taxes should not be increased.

CITIZENS FOR TAX JUSTICE,
Washington, DC, September 13, 1986.

DEAR WAYS AND MEANS COMMITTEE MEMBER: I am writing today to urge you to vote against a proposal to raise the federal cigarette tax as a vehicle to meet revenue targets of the FY 1987 budget resolution.

The principle of fairness—the idea that profitable corporations and wealthy individuals should bear their fair share of the federal tax burden—has been the driving force behind the campaign for federal tax reform.

The federal tax on cigarettes, like all taxes based on consumption, flies in the face of the principle of fairness. It hits hardest those people who are least able to pay—the poor, minorities, and the elderly.

The data on this point, compiled from the Bureau of Labor Statistics' most recent Consumer Expenditure Survey, are compelling:

"As a share of household income, the federal cigarette tax burden is 6 times greater for households in the bottom 20% than for the households in the top 20%.

"As a share of total income, households headed by persons 65 or older pay 2½ times the amount of cigarette taxes than the richest 20% of all households pay.

"As a share of total income, households with a single parent and at least one child under the age of eighteen pay three times the amount of cigarette taxes than the richest 20% of all households pay."

The federal deficit is a problem that demands swift corrective action. But no one could possibly argue that the cause of the deficit can be traced to reduced taxes on the poor! Indeed, the past few years have seen both skyrocketing deficits and skyrocketing taxes on the poor. The solution to the deficit must be found elsewhere—in the resurrection and continued application of the principle of fairness.

This year's tax reform bill gives some long overdue relief to those families that were being taxed into poverty—or deeper into poverty—under our current system. Now is the time to raise the type of tax that would offset this badly needed relief.

We urge you to reject the proposal to raise federal cigarette taxes. Thank you for consideration of our views.

Sincerely,

DAVID WILHELM,
Executive Director.

RETIREMENT OF FRANK GUS TSUTRAS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. SKELTON. Mr. Speaker, I would like to take this time to announce to my colleagues the retirement of an outstanding public servant, Frank Gus Tsutras, who recently stepped down as the executive director of the Congressional Rural Caucus.

Mr. Tsutras is retiring after 26 years of active involvement in governmental and nongovernmental affairs, including 22 years as a professional staff member in the U.S. House of Representatives. For 13 of these 22 years, he served as the director of the Congressional Rural Caucus, an official legislative service organization of approximately 100 bipartisan Members of Congress concerned with the growth and development of rural America.

I would like to compliment Frank Tsutras on his longtime support and devotion to rural America through his active participation in and leadership of the Congressional Rural Caucus. He has contributed his time, effort, and energy to the welfare of America's heartland. I would like to further recognize his service to all the members of the Rural Caucus.

Mr. Speaker, I feel certain that our colleagues join me in praising this dedicated American for his many years of service to rural America, and in wishing Frank Tsutras, his wife Helen, and their son Dean all the best in the many years to come.

THE BERETTA VOTE

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mrs. HOLT. Mr. Speaker, The recent decision by the House Appropriations Committee to cancel the Army's contract with Beretta USA for 9mm automatic pistols was a gross display of pork lust by a couple of senior Congressmen.

The Beretta 9mm pistol won the contract after extensive tests by the Army. The Smith & Wesson Co. of Massachusetts lost in fair competition conducted by the Army to choose the most reliable weapon. An effort is not being made to grab the contract by political devices that have no relevance to merit.

I would remind the House that Beretta would manufacture the guns in the United States at the plant in Maryland. The contract with Beretta means jobs for Americans, although the parent company of Beretta USA is a distingushed Italian firm noted for quality firearms.

I submit for the RECORD an article in Defense News quoting Gen. Bernard A. Rogers, Supreme Allied Commander of NATO, expressing the confusion and dismay of our European allies concerning the Beretta vote of the Appropriations Committee.

[From the Defense News, Sept. 8, 1986]

ROGERS: HOUSE ACTION ON BERETTA PISTOL CONTRACT AN EXAMPLE OF MIXED SIGNALS

(By David Fulghum)

WASHINGTON.—The United States' senior officer in Europe says the House Appropriations Committee erred when it recommended that the Army's $75 million contract for Beretta 9mm pistols be cancelled and competition for a standard U.S. military handgun be reopened.

Speaking with Pentagon reporters on Aug. 29, Gen. Bernard A. Rogers, Supreme Allied Commander Europe, said "I think it's wrong for parochial interests within the Congress to have sufficient influence to have the Congress try to overturn the procedures which they certainly have been insisting the Defense Department establish in the past years."

Rogers was referring to the efforts of Congress over the years to push the military into replacing the 30-odd types of revolvers and automatic pistols and 100 kinds of ammunition used by the military with a single 9mm handgun compatible with similar NATO weapons. To that end, the Army selected and is buying the Beretta pistol.

However, he said, the House committee action jeopardized these U.S. efforts to end duplication within NATO in the purchase of arms.

As a result of the committee recommendation, NATO allies "don't know what's going on and I can't blame them," the general said.

Among some experts there is agreement with Rogers that Congress is giving out confusing and sometimes contradictory directives on international arms purchases.

"There was always an understanding that purchase of military equipment should be a two-way street in NATO, but for years it has been one-way in America's direction," said Dr. Edward Ezell, a small-arms authority and curator of the Smithsonian Institution's Division of Armed Forces History.

Therefore, last year the Reagan administration cited the Beretta contract as an example of its efforts to ease the imbalance in the arms trade between United States and its allies.

But while there is federal legislation to at least "give military products of our NATO allies a fair shake" when awarding contracts, at the same time there is other legislation to "buy American," said Ezell. Such mixed signals put the Army and other services in an awkward situation.

"From where I sit, I think the proper procedures were followed by the Army to make a decision, procedures that had been established by the Defense Department," said Rogers. "And under those procedures, the Army property let the contract to Beretta."

On Aug. 14, the House Appropriations Committee voted 24-12 to cancel the five-year, 315,939-pistol contract with Beretta USA Corp. and reopen the competition. Leaders of the assault on the Army's choice of pistol were U.S. Reps. Edward Boland, D-Mass., and Silvio Conte, R-Mass., whose constituents include the 2,000 workers at the Smith & Wesson Division of Lear Siegler Inc. in Springfield, Mass. Smith & Wesson was among the firms that had sought the military handgun contract awarded to Beretta in April 1985.

It was this decision that prompted Rogers' comments.

A Smith & Wesson executive asked how any decision could be more political or more parochial than the one awarding the contract to an Italian firm.

"The Secretary of Defense [Caspar Weinberger] personally called the defense minister of another country [Giovanni Spadolini of Italy] to announce it," said Robert Haas, Smith & Wesson's senior vice president for marketing. "If that isn't parochial, I don't know what is."

Haas and other Smith & Wesson officials believe their company was unfairly eliminated from the competition that Beretta won. They say results of the competition were incorrectly analyzed, but officials of Beretta and the Army contend the fairness of the tests was upheld when the courts rejected two legal challenges by Smith & Wesson.

"That's where the confusion comes from," said Haas. "The judges did not say the tests were correct, he only said the Army's evaluation was not irrational. But that is not a ringing vote of confidence."

Haas says Rogers' statement is entirely consistent with a Department of Defense bias toward the Italian-manufactured handgun.

"I sympathize with the problem he is going to have explaining this to his NATO allies, but I assure you he would have more problems explaining it to unemployed workers in Springfield, Mass.," Haas said.

"We've also noted that Defense Minister Spadolini has taken the position that he intends to fight our Congress in their appropriation of defense funds," he said. "If a U.S. official said such a thing about another country's defense budget, we would immediately hear statements about outrageous interference in someone else's domestic affairs.

Ezell said the controversy points out the complexity of U.S. defense policies. The House committees that recommended cancellation of the Beretta contract and the Army, which chose the Beretta pistol, are going at the problem "from different starting points so that what is reasonable to the Army is unreasonable to the House," he said.

"The Europeans buy high-ticket items from the United States and they can't understand why we can't buy some low-ticket arms from them in a token acknowledgement that this is a two-way street", Ezell said.

This lack of a quid pro quo has bedeviled the alliance since the formation of NATO in 1949 and has resulted in extremely slow progress toward standardizing the equipment, arms and ammunition of the participating nations.

HONORING THE 25TH ANNIVERSARY OF ST. JOSAPHAT'S UKRAINIAN CHURCH

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. HERTEL of Michigan. Mr. Speaker, I rise today in honor of the 25th anniversary of St. Josaphat's Ukrainian church.

In 1961, Bishop Joseph M. Schmondiuk recognized an increasing need for spiritual guidance in the growing city of Warren, MI. In response to that need, he founded St. Josaphat's and appointed its first pastor. Today, St. Josaphat's is the cornerstone of the community. It is now surrounded by the new rectory, the new Ukrainian Cultural Center, a senior citizens' home and a community bank.

While the parish is large, serving 630 families in two counties, it is a close knit and supportive congregation. St. Josaphat's provides excellent guidance for its youth and works to preserve the rich Ukrainian heritage for young and old alike. The parish is presently involved in the special Harvard project which will ultimately prove the original baptism of the Ukrainian Church 1,000 years ago, a heritage to be proud of.

Past high points of St. Josaphat's have included the building of a new rectory, a visit by the President, and the acquisition, with another church, of a school for their children. In addition, the church is looking forward to a visit by His Excellency Bishop Innocent Lotocky, OSBM, in honor of St. Josaphat's silver jubilee celebration.

The present pastor, Father Constantine Wysochanski, OSBM, has been at St. Josaphat's for 10 years. He exemplifies the generous and giving spirit of the entire church. He and his parishioners "welcome tomorrow and the challenges tomorrow is certain to bring."

I ask my colleagues to join me in honoring St. Josaphat's Ukrainian Church. It has endured and grown for 25 years and will certainly continue to prosper for the next 25 years and beyond.

THE DRUG BILL IN RETROSPECT

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. AuCOIN. Mr. Speaker, I was an original cosponsor of the Omnibus Drug Enforcement, Education, and Control Act of 1986, and a cosponsor of many of the individual bills which were combined to form the core of this bill. But I voted for its final passage with grave concerns over some provisions adopted on the floor.

As reported by 12 different House committees last month, the original version of this bill was a tough, well thought-out attack on drugs. It was crafted with Democrats and Republicans working together to achieve these common goals: stop the flow of drugs into this country, educate our young to the dangers of drug abuse, impose tough mandatory sentences on drug dealers, and assist local law enforcement officials in their front-line battle against drugs. Those were the goals, and they were admirably met in the original version of this bill.

It is unfortunate, however, that in the rush to pass this legislation Members in several instances lost sight of these basic goals. In the rush to appear "tough" on drugs, this body approved several amendments of questionable constitutionality, amendments which run roughshod over certain civil liberties, and adopted an amendment which would divert the Armed Forces from their mission of defense to that of policemen.

These amendments were very serious proposals, not to be taken lightly, or passed with only 10 minutes of debate. I opposed many of them and hope they will be deleted from the bill by the Senate or in the House/Senate Conference Committee.

It is in this hope that I voted in favor of this bill; any other vote would have eliminated all hope of passing a tough omnibus drug bill this year. But I am discouraged with what I saw take place on the floor of the House during consideration of this bill.

BEREA'S SESQUICENTENNIAL BIRTHDAY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Ms. OAKAR. Mr. Speaker, on September 21, Berea, OH, which I am privileged to represent in the U.S. Congress, will be celebrating its 150th birthday. I invite my colleagues to join me in congratulating them on their sesquicentennial.

Berea is a picturesque town, located about 10 miles southwest of downtown Cleveland, and is adjacent to the Rocky River. Family owned shops and over 100 clubs and organizations bind the town together with traditional American values and a lively community spirit. It is also an economically integrated community and the home of Baldwin-Wallace College, a highly respected institution.

Berea was first settled in 1809 by Jared Hickox who migrated there from England. In 1836, the residents of the settlement came together to name their village. Two biblical place names were suggested—Berea and Tabor. To settle the issue, a coin was tossed, and the village was named Berea.

In 1842 a sandstone vein was discovered by John Baldwin, and soon thereafter Berea became known as the "Grindstone Capital of the World." The Berea building stone was shipped throughout the world to build such famous houses as the Palmer House in Chicago and the Parliament building in Canada. The emergence of Cleveland as a large market for farm products, the development of the quarrying industry, and the construction of the Cleveland-Columbus Railroad provided the real roots for Berea's growth. In 1946 the quarry industry ended, and the quarries were turned into beautify parks and lakes for future generations to enjoy.

The village government was established in 1850 with John Baldwin as its first mayor. The village's first newspaper, the Advertiser, was founded in 1868. In March 1883 the Berea Library Association was organized and a village high school was opened. The merge of Baldwin and German Wallace Colleges in 1913 and the growth of the new Baldwin-Wallace College added to the quality of life of Berea.

Presently, Berea is the home of 40 light industrial plants, although the city is not industrial by nature. Some of the notable attractions of the area are the Cuyahoga County Fairgrounds, site of the largest county fair in the State, Baldwin-Wallace College, and the Metropolitan Park district with its recreational facilities that run through the center of the city.

To celebrate its birthday, Berea has scheduled a number of special events during the weekend of September 27. On Friday, September 26, Berea High School will feature special half-time ceremonies. The historic Berea trolley tours will be given on Saturday, and a flower show will be on display at the Baldwin-Wallace College Art and Drama Center. In addition, there will be an antique auto exhibit at the Baldwin-Wallace Lang Hall.

The highlight of the celebration will be the reenactment of the historic coin toss and the sesquicentennial parade. Floats, marching bands, and civic groups will be featured with parade units being judged by a panel from the All American Judges Association.

On Sunday the Cleveland metro parks will feature crafts, displays and demonstrations from the pioneer period at its Frostville Museum and the Rocky River Nature Center. The weekend will be capped by an Ecumenical Choirfest at the high school sponsored by Berea churches.

Berea has much to be proud of, and I salute them for their achievements over 150 years and offer them my congratulations. I hope that the next 150 years will be as successful as Berea's first 150 years.

THE 25TH ANNIVERSARY OF THE PEACE CORPS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. SKELTON. Mr. Speaker, I rise today to honor an organization that not only serves our Nation, but the entire world. I am speaking of the Peace Corps, which is commemorating its 25th year of service.

The Peace Corps has maintained the ideals of world peace through education, work, and service to others. It has taken our knowledge to all corners of the Earth and returned home to enrich our country with the culture of the diverse world around us. These volunteers have strived to overcome economic, cultural, and language barriers to serve in the ultimate goal, peace.

It is an honor to bring this outstanding organization to the attention of my colleagues in the U.S. House of Representatives. I ask that the Members of this body join me in saluting the Peace Corps.

CONSUMER RESPONSE TO LOWER CREDIT CARD INTEREST RATES

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. SCHUMER. Mr. Speaker, about 2 weeks ago a mid-sized bank in Buffalo, New York, the Key Bank of western New York, announced that it was lowering its credit card interest rate to 9.9 percent. The bank figured it would get a healthy response from consumers, but the avalanche of applications it received exceeded all expectations. The bank received 20,000 applications in only 3 days. The response was so strong that the bank decided it could not handle them all, and has decided to accept applications only from people within the bank's local operating region.

Consumers' response was only logical. Despite the fact that the cost of money used to fund credit cards has plunged dramatically in recent years, the average credit card interest rate is still 18.3 percent, and has hardly budged since its peak in the early 1980's.

In a competitive market, such rates could not be sustained. But the market for credit cards is not competitive. One of the major reasons for this is that card issuers are not disclosing enough information about their cards. In a survey by the Bank Credit Card Observer, a credit card newsletter, over 60 percent of those surveyed believed that banks could reveal a great deal more about the financial obligations of credit cards. In another survey, 95 credit card applications were examined, and less than half even mentioned interest rates, not to mention the other important credit card charges. The conclusion? Comparison shopping for credit cards is extremely difficult, if not impossible.

Before the recess, the Subcommittee on Financial Institutions Supervision, Regulation, and Insurance approved an amendment I offered with Mr. ROTH of Wisconsin, based on H.R. 4197, the Full Credit Card Disclosure Act, which would require financial institutions which offer credit cards to disclose the rate, annual fee, grace period, and other important information in any pre-approved solicitation or application for a credit card.

I am hopeful that this legislation can be considered by the full House before we adjourn, and would urge my colleagues to cosponsor our legislation, and to support credit card disclosure when it is considered on the floor of the House.

Key Bank is not the only bank to lower its credit card interest rates. The combined pressure from consumers, national and State legislators, and media attention has begun to crack the market. A few other banks have cut their rates and have been similarly rewarded by a rush of new applicants. But if Congress enacts disclosure legislation, it could break the market wide open, and these banks will have lots of company. Disclosure could trigger a wave of competition, with many more 9.9 percent cards on the market. The winner in this competition will be the consumer, who at last will be getting a fair deal from credit card issuers.

The text of the article follows:

[Newsday, Sept. 10, 1986]

BUFFALO BANK CURTAILS APPLICATIONS FOR CARD

(By Al Gordon)

A Buffalo bank expected its bargain-basement credit-card rates would get a big reception, but it wasn't sure how big. Now it knows: Demand is so great the bank is shutting off applications from consumers outside its upstate region.

A week ago, Key Bank of Western New York introduced Visa and MasterCards with a 9.9 percent annual interest rate, one of the lowest in the country. The cards have a $25 annual fee but, in contrast to other low-rate cards, still have a 25-day grace period to repay purchases without interest charges. Key Bank, a subsidary of Albany-based KeyCorp, had not previously offered Visa or MasterCards.

Ellen Conboy, a Key Bank marketing assistant vice president, said yesterday that in the first three days the cards were offered, the bank received 20,000 applications. It was expecting to issue only about 40,000 or 50,000 cards altogether. "We can't handle the volume," she said.

She said the bank had received numerous applications and telephone inquiries from people outside its upstate region who had heard about the card. Key Bank did not market the card outside the Buffalo-Rochester area. "We were all sort of hoping it would go great guns," Conboy said, but the bank didn't think it would have to limit applications.

The bank will accept applications from people outside its area who already have accounts. Conboy also said the limit wasn't permanent, but she did not know when such applications would be accepted again.

In another development, Empire of America Federal Savings Bank, also based in Buffalo, entered the lowered-rate credit-card

sweepstakes yesterday with a 13.75-rate card it is calling Visa Lite.

Joseph N. Pastwik, senior vice president, said consumer demand and competitive pressures, led it to offer the new card, which has no grace period and is intended for consumers who plan to make time payments. Payments may be stretched out as long as 48 months; there is an $18 annual fee.

The card will be marketed in New York, Michigan, Florida, Texas and Southern California, but Pastwick said applications will be accepted from anywhere. The bank hopes to issue 100,000 of the cards.

WE NEED TO STOP SHIFTING FEDERAL BUDGET BURDENS TO THE STATES THROUGH UNFUNDED MANDATES

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. BARNARD. Mr. Speaker, today I introduce legislation aimed at preventing an existing problem with Congress from becoming much worse. That problem is the growing tendency to circumvent budgetary controls on new Federal domestic spending by enacting national policy mandates and then requiring State and local governments to pick up the tab.

This tendency is not associated with any one political party or any particular ideological persuasion. Conservatives sometimes support imposing mandates on States and localities as a roundabout way to return domestic responsibilities from Washington. Liberals on occasion see unfunded mandates as the only available avenue for pursuing desirable social objectives. Both in Congress and within the administration, such efforts are often rationalized by comparison of the Federal budget deficit to the relatively sound fiscal condition of States and localities. Of course, virtually all State and local governments are required by constitution or statute to approve and maintain balanced budgets, and it hardly seems fair to penalize them for succeeding where we have so far failed.

The legislation I introduce today would not flatly prohibit the imposition of new costs on State and local governments, but it would ensure that such actions are not taken without due analysis and debate of the consequences. How many Members were aware that our fiscal year 1986 budget reconciliation bill imposed massive new costs on our constituents back home through mandatory extension of Medicare coverage to new State and local employees? This initiative and many others of the same nature may well be sound Federal policy. My point is that it is fiscally irresponsible to impose such new costs without careful analysis, and a guaranteed opportunity to assess and debate the impact on our constituents as State and local taxpayers.

This bill will address both objectives through two simple amendments to the Congressional Budget Act of 1974. The first section creates a point of order, waivable through the normal procedures of each Chamber, against any legislation imposing a new obligation on State and local governments costing on a national basis more than $50 million per year. Sequestrations under the Gramm-Rudman-Hollings legislation are specifically exempted from this point of order. The second section beefs up the existing requirement, honored primarily in the breach, that the House and Senate Budget Committees conduct detailed analysis accompanying the budget resolution report of the impact of budgetary decisions on State and local governments. In combination, these two provisions would help guarantee that massive new costs for our constitutents would no longer be adopted unintentionally or negligently, buried in the fine print of some fast-moving bill.

Some Members may object that this bill adds yet another procedural requirement to an already overburdened congressional budget process. I would respond that the fundamental purpose of the budget process is endangered if we fail to recognize efforts to shift costs back to our constituents in the guise of reducing or containing Federal spending. As a former Governor of my State, George Busbee, used to say when he was chairman of the National Governors' Association, "you can't save a buck by passing the buck." Imposing Federal costs on States and localities clearly violates the spirit of the Congressional Budget Act, and this bill would simply place the most minimal safeguards into the letter of the Act.

I want to make a special appeal to those Members who have over the years supported termination or reduction in the General Revenue Sharing Program for States and localities. As you know, revenue sharing for the States was eliminated back in 1980, and payments to cities and counties may well end on October 1. In my opinion, the best argument for revenue sharing has been that it provides some assistance in offsetting the cost of unfunded Federal mandates, in areas ranging from environmental protection to wage rates on Federal projects. If our position is that we no longer can afford to help pay for existing unfunded obligations, then I think the least we can do is make some effort to ensure that major new obligations are not imposed on States and localities without some compelling national need. Otherwise, Governors, State legislators, and city and county officials, not to mention our constituents, may justifiably conclude that we are indifferent to our entire system of federalism.

This bill is strongly supported by the bipartisan National Governors' Association and National Conference of State Legislatures. It would become effective in January, for the Congress.

I urge Members from both parties to offer immediate support for this legislation, symbolizing a bipartisan commitment to adopt a fresh and honest approach with State and local officials, without whom all our efforts toward fiscal responsibility will come to naught.

TRIBUTE TO IRA B. COLDREN, JR.

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. MURPHY. Mr. Speaker, on the evening of September 23, the Uniontown, PA, Rotary Club will honor Attorney Ira B. Coldren, Jr. who was recently elected president of the Pennsylvania Bar Association. Mr. Coldren is the first Fayette Countian to attain that honor, having been recognized by his peers for his long tenure of service to the bar association and to the legal community as well.

After graduating from the U.S. Military Academy at West Point in 1945, Mr. Coldren was commissioned a 2d lieutenant in the Regular Army and served as an infantry officer in Germany and Austria from 1945 to 1948. He was an instructor at the Ground General School at Fort Riley, KS from 1948 to 1949.

In 1949, Mr. Coldren began the study of law at the University of Pennsylvania Law School, graduating cum laude in 1952. He began his legal career and continued his Army career at the same time by serving as a captain in the Judge Advocate General's Corps in the Department of the Army Headquarters in Washington, DC. He served in Korea for 16 months as Staff Judge Advocate of the Seventh Major Port, Pusan, Korea. Ira subsequently taught at the Judge Advocate General's School in Charlottesville, VA, in 1955 and 1956. Mr. Coldren resigned from the Regular Army in 1956 but continued to serve his country through the Reserves, retiring from the U.S. Army Reserve as lieutenant colonel in 1968.

Ira Coldren entered the private practice of law in Uniontown, PA, in 1956. He is presently the senior member of the nine-lawyer firm known as Coldren, DeHaas, and Radcliffe. Ira took time out from his law practice to receive a masters of laws degree in estate planning from the University of Miami Law School in May 1982.

During his career, Ira has always found time to take an active role in professional organizations and community activities. On the local level, Ira has served as director and as a committee chairman of the Fayette County Bar Association; and as its president in 1983. At the State level, he rose from director, to treasurer, to secretary, to vice president and finally to president of the Pennsylvania Bar Institute. Mr. Coldren has been a member of the American Bar Association since 1952, a member of the American Judicature Society since 1960 and a member of the International Association of Insurance Counsel since 1970. He was named a fellow at the American Bar Association in 1982 and at the American College of Probate Counsel in 1983.

Beginning in 1976, Ira was elected to the house of delegates of the Pennsylvania Bar Association. In 1979 he began service on the board of governors, in 1985 he served as vice president of the Pennsylvania Bar and just recently was selected as its president.

I join with Ira Coldren's many friends in recognizing his contributions and achievements in

the legal community. He is truly worthy of this special tribute.

THE PLIGHT OF IRINA RATUSHINSKAYA

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. LANTOS. Mr. Speaker, today is the anniversary of an event which illustrates one of the ugliest sides of mankind. The arrest and imprisonment of Irina Ratushinskaya 4 years ago today is a testament to what man is able to do to his fellow man; an example of the cruelty and inhumanity to which some people are subject. On September 17, 1982, a beautiful young Russian Orthodox poet was arrested and charged with "anti-Soviet agitation and propoganda." When sentenced in 1983, Irina Ratushinskaya became the first woman ever to receive the maximum sentence of 12 years—7 years in a Soviet labor camp and 5 additional years of internal exile. Since then, she has been beaten and abused in the many prisons and labor camps to which she has been transported.

Physically, Ms. Ratushinskaya is not well. Recently, as she was being transported between prisons, her head was thrust against metal bars in the rear of the transport bus. She was allowed to see a doctor and was diagnosed as having suffered a severe concussion. But when she was placed in her new cell, she was subjected to a horrendous new round of beatings by four male KGB agents and prison wardens. She has a critical heart condition which recently seems to have deteriorated further. Her husband, who was allowed to visit Irina last month for the first time since her conviction, reported that she said that she had experienced chest pains of such intensity in the past few months that she had lost consciousness on a number of occasions. All of this, in a woman only 33 years old.

Her mistreatment in prison is an outrage and we, as concerned Members of Congress and as responsible citizens of the world, must voice our indignation. It is my hope that the Soviet Government will live up to the commitments it made at Helsinki and in the United Nations, to the people of their own country and to the people of the world, to respect the fundamental human rights of all people. We must call on them to act in good faith and to release the scores of prisoners of conscience currently being held for no other reason than their attempts at self-expression.

Irina Ratushinskaya's only crime was to express what was in her heart. As a devout Russian Orthodox, she has written religious poetry dedicated to her struggle to maintain her belief in God, and as a responsible human being she has written about her struggle to maintain her belief in the benevolent spirit of man. I would like to insert into the RECORD, a poem written by Miss Ratushinskaya on November 12, 1983, and dedicated to two of her fellow prisoners, "To Tanya and Vanya (Osipova and Kovalyov)."

I will travel through the land—
With my retinue of guards,
I will study the eyes of human suffering,
I will see what no one has seen—
But will I be able to describe it?
Will I cry how are we able to do this—
Walk on partings as on water?
How we begin to look like our husbands—
Our eyes, foreheads, the corners of our mouths.
How we remember them—down to each last vein of their skins—
The who have been wrenched away from us for years,
How we write to them: 'Never mind,
You and I are one and the same,
Can't be taken apart!'
And, fettered to the ground,
'Forever' sounds in answer—
That most ancient of words,
Behind which, without shadow, is the light.
I will tramp out my deportation,
And I will remember everything—
By heart!—They won't be able to take it from me!—
How we breathe—
Each breath outside the law!
What we live by—
Until the morrow.

Such words inspire us to continue the fight against human rights violations wherever they may occur. Irina Ratushinskaya is an example to us all. Through her suffering she remains strong—and today her friends in the United States must stand with her.

A TRIBUTE TO JUDGE BILL GUNTER, A MAN OF MANY TALENTS

HON. ED JENKINS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. JENKINS. Mr. Speaker, recorded in the 25th chapter of St. Matthew is Jesus's parable on the talents. He used the parable to teach the disciples about what they should be doing until he returned a second time.

When I heard of William Barrett (Bill) Gunter's death and recalled some highlights of his life, I thought about how Judge Gunter compared to the servant who received five talents from his master while the master was out of the country. The servant doubled the holdings the master had entrusted to him, as did the servant who received two talents. But the servant to whom the master gave one talent hid the money in a hole in the ground.

Bill Gunter received many talents, and by the time he died a month ago tomorrow, he had multiplied those talents many times over.

From Commerce, GA, Gunter graduated from the McCallie School in Chattanooga, TN, then in 1940 cum laude and Phi Beta Kappa from the University of Georgia, and the university's law school in 1942. For his military service in the European Theatre in World War II, he received the Silver Star and the Bronze Star.

He practiced law in Georgia for more than 30 years, served as Hall County's Representative in the Georgia General Assembly for 6 years, leading the efforts to desegregate public schools and to abolish the county unit system for electing State officials, and served as Gainesville's city attorney for 14 years during which he designed a reorganization plan which saved the city from the threat of bankruptcy.

During his 5 years on the Georgia Supreme Court bench, his carefully constructed dissenting opinions later often had the force of law.

Politically, Gunter used his talents as a member of the National Democratic Committee, to convince his friend Jimmy Carter to first run for the governorship of Georgia and later to advise him during his years in the Governor's office and in the White House, and to advise three other Georgia Governors during their terms. After Judge Gunter had returned to private practice in Atlanta, President Carter called him as a special assistant to resolve a dispute among New England Indian tribes.

Advisor and counselor describes more than Bill Gunter's political life and his career as a jurist. His lifelong commitment to theological studies earned him not only a place among the leaders of his church as an elder in the Presbyterian Church, but the respect of a teacher and counselor who shared his faith with others.

The evidence of Bill Gunter's use of his talents was reflected in the wide array of politicians, attorneys, judges, and theologians who came to pay tribute to his life in a thanksgiving service.

As the servants who multiplied the talents of their master, so had Bill Gunter multiplied those entrusted to him for 67 years. As Jesus told the parable in the 25th chapter of Matthew, when the master returned he told the two servants who had multiplied the talents he had left with them, "Well done, good and faithful servant; thou hast been faithful over a few things, I will make thee ruler over many things: enter thou into the joy of the Lord."

IN HONOR OF MAYOR STANLEY "SKEETER" SHIELDS

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 17, 1986

Mr. DUNCAN. Mr. Speaker, Mayor "Skeeter" Shields is being honored by citizens in Maryville, TN, not for his fine work as mayor of that city, but for his longstanding association with the Maryville High School football team. He is the public announcer for the games. The football field will be named the "Shields Field" in honor of his 38 years of service to the school.

I congratulate Skeeter on his faithful service to the team. This Daily Times article provides a good account of his performance and service.

SHIELDS HAS BEEN REBELS' "GUIDING" VOICE SINCE 1948

(By Gary Turner, sport editor)

"Run it, Archie!"

The voice carries above the roar of the crowd as Maryville High wingback Archie Anderson rolls to his right, holding a football in the hand of his cocked right arm.

It's 1961, and Anderson, a senior for the Rebels' football team, is in a dilemma. Maryville is opening the season at home against arch-rival Lenoir City. Anderson is a

wingback in Maryville's single-wing offense. He's carrying out a play called the left reverse pass. He's looking for the Maryville tight end, who's supposed to be in the end zone. However, all he sees is a wide-open field ahead.

"Lenoir City's disappeared," Anderson says. "But, like the well-coached player I am, I'm still gonna throw the pass."

"Run it! Run it!" rings out through the stadium again.

This time, Anderson takes off.

"I've started about the 10-yard line, and I think I get down right next to the goal," he explains. "I've waited too long, though. By the time I get started, Lenoir City's recovered a little. If I listen and run earlier, I've scored. But we score anyway, and go on and beat 'em."

It's not the first time voices from above have talked to Maryville High football players on the field. It's not the last, either. It's just the only time anybody remembers that the voice has had any affect on the game's outcome.

The voice belongs to Stanley B. "Skeeter" Shields, mayor of Maryville and the school's public address announcer for the past 38 football seasons.

In those, 38 years, he's aged from 32 to 70. The hair's turned from brown to silver. But don't expect to see an old man when you find Skeeter Shields. Racquetball and hundreds of trips up and down the bleachers of the Maryville High Stadium, have given him the body and vitality of a man 25 years younger.

And the eyes and mouth still team up for a glow-in-the-dark smile, especially when he talks about his beloved Maryville Rebels.

Other than a gray cowboy hat with a Rebel flag on the front and the title of mayor (he's worn both nearly 20 years), you imagine there's little difference in the "Skeeter" Shields of 1948 and the 1986 version.

In a recent interview, Shields recalled how he began his career with the microphone.

"I was broadcasting football games for WGAP, when Jim Renfro (the Maryville coach at the time) asked me to take over the P.A. system," Shields recalled in a recent interview.

Shields soon learned that his broadcasting skills didn't necessarily help him when it came to keeping a high school football crowd informed about a game.

"You've got a blind audience (on radio) you're trying to describe the play to, and here I am doing it (game description) over the P.A.," he remembered.

In addition to normal "First and 10 at the Maryville 10," Shields' press box calls were filled with "It's a pass!" "Watch out for the reverse!" and "The quarterback has the ball!"

Shields said one player, a defensive back, would tell him "I wait to hear you call the play, before I make a move."

Maryville players may have appreciated the help, but opposing coaches sometimes didn't take too kindly to the voice from above.

"One coach, man he just got so teed off at me for calling out what was going on in their backfield," Shields remembered. "That was in the beginning, and I couldn't blame him really."

But, Shields couldn't help it.

A former player at Walland and Maryville high schools and Maryville College, his knowledge of the game and the area coaches spilled over when the game was on the line.

"Each coach did basically the same thing, year in and year out. You'd know just about what was going to happen at the start of every play," Shields explained.

Former Maryville coach Ted Wilson, who led the Rebels from 1965 until 1980, laughed as he recalled being stopped by the opposing head coach as he walked off the field after a game one night.

"He was hot," Wilson said of his counterpart. "He said, 'You need to do something about that P.A. guy.' I asked him, 'What would you do if your P.A. was the mayor of your town?' He said, 'I'd do just like you and let him call it.' "

For the most part, it seems Shields has generated little ill will with his announcing style.

"I've always had a real good relationship with the fans," he said. "I'd talk to 'em a lot, especially when we were in the old press box. You were closer to 'em, right in amongst 'em really."

It may be that the fan in Shields is what helps people accept and enjoy his style.

Bob Navratil, who has helped Shields in his other P.A. job, at Maryville College football games, said, "When he oohs and aahs over the microphone, it's something everybody in the stadium is doing."

"To me, he's pro-home without being offensive," Anderson said. "He'll talk to people in the stands, just like they're sitting next to him—welcome them to the stadium, wish 'em happy birthday."

"Skeeter's the type of person who's a friend to everybody. It's hard to get peeved at him," J.P. Stewart said.

Stewart is the former superintendent of schools in Maryville. He has worked with Shields in the Maryville High press box for 25 seasons, helping him pick out players, figuring out what yard line the ball is on.

Occasionally, Steward performs other duties.

"Every once in a while, I'll cut the (microphone) off to keep our voices off the speaker," he says.

"J.P. always has to get after him a little bit, especially when we're in the TSSAA playoff games" Skeeter's daughter, Karen Shields, says with a chuckle.

Karen and her brother Steve have both accompanied their dad to the press box since their growing-up days in the '50s.

Steve has even taken his dad's place at the microphone the three times Skeeter's missed a game in 38 seasons.

"The times I have done it, as soon as I turn the thing on and just say, "Good evening," everybody turns around and has a look like, 'That's a strange voice up there, the wrong voice,' " Steve said.

And, after a few stints in the press box, Steve understood how his dad fell into the habit of letting stray comments slip.

"If you've ever sat up there and worked the mike, it's easy to forget to turn the thing off, especially in the old booth," Steve said. "That thing, you never knew whether it was on or not. You'd push the button, and it wouldn't click, then you'd fiddle with it, then you'd forget about it and get caught up in the excitement of the game."

Steve and his dad are paired in a tale told about Skeeter's announcing.

As the story goes, Steve, who played football for Maryville from 1960 to 1962, took off on a long touchdown run one night. His dad was so excited, all he could do was yell, "Go, son, go!" repeatedly.

Neither father nor son remember things happening exactly that way, but both admitted it could have.

In fact, Skeeter says details of games escape him. It's not that his 70 years of memories are fading. It's just that, after 38 years of announcing nearly 500 junior high, high school and college games, "they all run together on me."

There are some memories which do stick out, memories like:

The October and November nights in the press box at the old Maryville High stadium, a planks and nails structure, with more than a few cracks for the wind to whistle through—"Man, it was cold in that thing."
